SUPPLEMENTARY INFORMATION:

I. Abstract

The International Billfish Angler Survey began in 1969 and is an integral part of the Billfish Research Program at NOAA's Southwest Fisheries Science Center (SWFSC). The Survey tracks recreational angler fishing catch and effort for billfish in the Pacific and Indian Oceans in support of the Pacific and Western Pacific Fishery Management Councils, authorized under the Magnuson-Stevens Fishery Management and Conservation Act. The data are used by scientists and fishery managers to assist with assessing the status of billfish stocks. The Survey is intended for anglers cooperating in the Billfish Program and is entirely voluntary. The National Marine Fisheries Service collects fishing catch and effort information for most domestic and foreign fisheries. This survey is specific to recreational anglers fishing for Istiophorid billfish in the Pacific and Indian Oceans; as such it provides the only estimates of catch per unit of effort for recreational billfish fishing in those areas.

II. Method of Collection

The paper form is sent to anglers with recent participation in the SWFSC Billfish Research Program and is also available for downloading on the SWFSC Billfish Program website. Completed forms are submitted by mail.
