SUPPLEMENTARY INFORMATION:

I. Background

On June 15, 2006, the President signed the MINER Act of 2006 (Pub. L. 109-236). The MINER Act requires that each underground coal mine operator have an approved Emergency Response Plan (ERP) that includes post-accident communications and post-accident tracking. Further, the MINER Act requires that by June 15, 2009, each operator must submit a plan that provides for "a post-accident communication system between underground personnel and surface personnel via a wireless two-way medium and an electronic tracking system that permits surface personnel to determine the location of any persons trapped underground, or set forth within the plan the reasons such provisions can not be adopted".

II. Overview

As of December 12, 2008, approved electronic tracking systems are available. However, fully wireless communications technology is not sufficiently developed at this time, nor is it likely to be technologically feasible by June 15, 2009.
