# Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

**The seal of the National Archives and Records Administration authenticates the Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

**How To Cite This Publication:** Use the volume number and the page number. Example: 73 FR 12345.

**Postmaster:** Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

**FEDERAL REGISTER WORKSHOP**

**THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT**

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.

2. The relationship between the Federal Register and Code of Federal Regulations.

3. The important elements of typical Federal Register documents.

4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, January 27, 2009
9:00 a.m.–12:30 p.m.

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741–6008

## DEPARTMENT OF HOMELAND SECURITY

### 8 CFR Parts 215 and 235

**[DHS–2005–0037]**

**RIN 1601–AA35; RIN 1600–AA00**

## United States Visitor and Immigrant Status Indicator Technology Program (''US–VISIT''); Enrollment of Additional Aliens in US–VISIT; Authority To Collect Biometric Data From Additional Travelers and Expansion to the 50 Most Highly Trafficked Land Border Ports of Entry

**AGENCY:** National Protection and Programs Directorate, DHS.

**ACTION:** Final rule.

**SUMMARY:** The Department of Homeland Security (DHS) established the United States Visitor and Immigrant Status Indicator Technology Program (US–VISIT) in 2003 to verify the identities and travel documents of aliens. Aliens subject to US–VISIT may be required to provide fingerscans, photographs, or other biometric identifiers upon arrival at the United States. Currently, aliens arriving at a United States port of entry with a nonimmigrant visa, or those traveling without a visa as part of the Visa Waiver Program, are subject to US–VISIT requirements with certain limited exceptions. This final rule expands the population of aliens who will be subject to US–VISIT requirements to nearly all aliens, including lawful permanent residents. Exceptions include Canadian citizens seeking short-term admission for business or pleasure under B visas and individuals traveling on A and G visas, among others.

On August 31, 2004, the Department promulgated an interim final rule that expanded the US–VISIT program to include aliens seeking admission under the Visa Waiver Program and travelers arriving at designated land border ports of entry. This rule also finalizes that interim final rule and addresses public comments received during that rulemaking action.

**DATES:** This final rule is effective January 18, 2009.

**FOR FURTHER INFORMATION, CONTACT:** Helen deThomas, Senior Policy Analyst, US–VISIT, Department of Homeland Security, 1616 Fort Myer Drive, 18th Floor, Arlington, Virginia 22209, (202) 298–5200.

**SUPPLEMENTARY INFORMATION:**

### Table of Contents

## I. Background

### *A. Program Development*

The Department of Homeland Security (DHS) established the United States Visitor and Immigrant Status Indicator Technology Program (US–VISIT) in accordance with several statutory mandates that collectively require DHS to create an integrated, automated biometric entry and exit system that records the arrival and departure of aliens; biometrically compares the identities of aliens; and authenticates travel documents presented by such aliens through the comparison of biometric identifiers. Aliens subject to US–VISIT may be required to provide fingerscans, photographs, or other biometric identifiers upon arrival in, or departure from, the United States. DHS views US–VISIT as a biometrically-driven program designed to enhance the security of United States citizens and visitors, while expediting legitimate travel and trade, ensuring the integrity of the immigration system, and protecting the privacy of our visitors' personal information.

The statutes that authorize DHS to establish US–VISIT include, but are not limited to:

- Section 2(a) of the Immigration and Naturalization Service Data Management Improvement Act of 2000 (DMIA), Public Law 106–215, 114 Stat. 337 (June 15, 2000);
- Section 205 of the Visa Waiver Permanent Program Act of 2000, Public Law 106–396, 114 Stat. 1637, 1641 (Oct. 30, 2000);
- Section 414 of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act), Public Law 107–56, 115 Stat. 271, 353 (Oct. 26, 2001);
- Section 302 of the Enhanced Border Security and Visa Entry Reform Act of

2002 (Border Security Act) Public Law 107–173, 116 Stat. 543, 552 (May 14, 2002);

• Section 7208 of the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), Public Law 108–458, 118 Stat. 3638, 3817 (December 17, 2004); and

• Section 711 of the Implementing Recommendations of the 9/11 Commission Act of 2007, Public Law 110–52, 121 Stat. 266 (Aug. 3, 2007).

DHS provided detailed abstracts of the particular sections of the statutes that established and authorized the US–VISIT program in prior rulemakings and the proposed rule. *See* 69 FR 468 (Jan. 5, 2004); 69 FR 53318 (Aug. 31, 2004); 71 FR 42605 (July 27, 2006); 73 FR 22065 (Apr. 24, 2008).

On January 5, 2004, DHS implemented the first phase of the US–VISIT biometric component by publishing an interim final rule in the **Federal Register** providing that aliens seeking admission into the United States through nonimmigrant visas must provide fingerprints, photographs, or other biometric identifiers upon arrival in, or departure from, the United States at air and sea ports of entry. 69 FR 468 (Jan. 5, 2004). Effective September 30, 2004, nonimmigrants seeking to enter the United States without visas under the Visa Waiver Program (VWP) [1] also are required to provide biometric information to US–VISIT. 69 FR 53318 (Aug. 31, 2004). US–VISIT is now operational for entry at 115 airports, 15 seaports, and 154 land border ports of entry. The following categories of aliens currently are expressly exempt from US–VISIT requirements by DHS regulations:

• Aliens admitted on an A–1, A–2, C–3 (except for attendants, servants, or personal employees of accredited officials), G–1, G–2, G–3, G–4, NATO–1, NATO–2, NATO–3, NATO–4, NATO–5, or NATO–6 visa;

• Children under the age of 14;

• Persons over the age of 79;

• Taiwan officials admitted on an E–1 visa and members of their immediate families admitted on E–1 visas.

[1] Pursuant to section 217 of the Immigration and Nationality Act (INA), 8 U.S.C. 1187, the Secretary of Homeland Security (the Secretary), in consultation with the Secretary of State, may designate certain countries as Visa Waiver Program (VWP) countries if certain requirements are met. Citizens and eligible nationals of VWP countries may apply for admission to the United States at a U.S. port of entry as nonimmigrant aliens for a period of ninety (90) days or less for business or pleasure without first obtaining a nonimmigrant visa, provided that they are otherwise eligible for admission under applicable statutory and regulatory requirements. The list of countries which currently are eligible to participate in VWP is set forth in 8 CFR 217.2(a).

8 CFR 235.1(f)(1)(iv).[2] In addition, the Secretary of State and Secretary of Homeland Security may jointly exempt classes of aliens from US–VISIT. The Secretaries of State and Homeland Security, as well as the Director of the Central Intelligence Agency, also may exempt any individual from US–VISIT. 8 CFR 235.1(f)(1)(iv)(B).

*B. Program Operation*

The US–VISIT program, through U.S. Customs and Border Protection (CBP) officers, collects biometrics (digital fingerprints and photographs) from aliens seeking admission to the United States. 73 FR 22066. The US–VISIT program also receives biometric data collected by Department of State (DOS) consular offices in the visa application process. DHS checks biometric data on those applying for admission to the United States against government databases to identify suspected terrorists, known criminals, or individuals who have previously violated U.S. immigration laws. These procedures assist DHS in determining whether an alien seeking to enter the United States is, in fact, admissible to the United States under existing law. Biometric data collected by US–VISIT assists DOS consular officers in the verification of the identity of a visa applicant and the determination of the applicant's eligibility for a visa. DHS's ability to establish and verify the identity of an alien and to determine whether that alien is admissible to the United States is critical to the security of the United States and the enforcement of the laws of the United States. By linking the alien's biometric information with the alien's travel documents, DHS reduces the likelihood that another individual could assume the identity of an alien already recorded in US–VISIT or use an existing recorded identity to gain admission to the United States.

From its inception on January 5, 2004 to the present, US–VISIT has biometrically screened more than 130 million aliens at the time they applied for admission to the United States. DHS has taken adverse action against more than 3,800 aliens based on information obtained through the US–VISIT biometric screening process. By ''adverse action,'' DHS means that the alien was:

• Arrested pursuant to a criminal arrest warrant;

[2] Effective January 23, 2007, 8 CFR 235(d)(1)(iv) was redesignated as 8 CFR 235.1(f)(1)(iv). 71 FR 68412 (Nov. 24, 2006).

• Denied admission, placed in expedited removal, or returned to the country of last departure; or

• Otherwise detained and denied admission to the United States.

In addition, by quickly verifying identity and validity of documents, US–VISIT has expedited the travel of millions of legitimate entrants. Expanding the population of aliens required subject to US–VISIT requirements will allow DHS to identify additional aliens who are inadmissible or who otherwise may present security and criminal threats, including those who may be traveling improperly on previously established identities.

*C. Notice of Proposed Rulemaking*

On July 27, 2006, DHS published a notice of proposed rulemaking (NPRM or proposed rule) proposing to expand the population of aliens subject to US–VISIT requirements. The NPRM proposed to require enrollment of any alien in US–VISIT, with the exception of those Canadian citizens applying for admission as B–1/B–2 visitors for business or pleasure, and those specifically exempted under DHS regulations. Under the proposed rule, the following classes of aliens, among others, would become subject to US–VISIT requirements:

• Lawful Permanent Residents (LPRs). [3]

• Aliens seeking admission on immigrant visas.

• Refugees and asylees.

• Certain Canadian citizens who receive a Form I–94 at inspection or who require a waiver of inadmissibility.

• Aliens paroled into the United States.

• Aliens applying for admission under the Guam Visa Waiver Program.

DHS received 69 comments on the 2004 interim final rule during the 30-day notice and comment period. DHS has considered the comments received in the development of this final rule. This final rule adopts the proposed rule without change.

This rule also addresses comments received on the August 31, 2004, interim final rule and finalizes that rule. For ease of reference, DHS responds separately to the comments submitted on the interim rule and the proposed rule.

[3] The authorizing statutes, which all refer to ''aliens'' without differentiation, support the inclusion of lawful permanent residents (LPRs) into the US–VISIT program. See section 101(a)(3) of the Immigration and Nationality Act of 1952, as amended, 8 U.S.C. 1101(a)(3) (''The term 'alien' means any person not a citizen or national of the United States'').

**II. Comments on the Notice of Proposed Rulemaking**

DHS received 71 comments on the July 27, 2006, notice of proposed rulemaking. Some comments were positive, while other comments were negative or asked that the regulation be withdrawn. The comments raised a number of issues, including the relationship with other DHS initiatives, suggesting that US–VISIT should not proceed until other initiatives have been completed. One commenter noted that there have been several GAO reports that have been critical of US–VISIT and DHS has addressed those concerns as discussed in the published reports. DHS continues to address all of these concerns and recommendations as US–VISIT is developed. The most common issue raised by the comments was the inclusion of lawful permanent residents (LPRs) in US–VISIT enrollment and verification.

Some comments were very general, such as those suggesting that DHS concentrate on removing illegal aliens present in the United States. DHS believes that US–VISIT plays an important role in preventing illegal immigration in the first place by requiring biometric information from travelers seeking to enter the United States. DHS continues to concentrate on intercepting aliens who are in the United States without authorization. These priorities do not conflict.

Similarly, a commenter asked how DHS is benchmarking or measuring the success of US–VISIT. DHS provides performance measures to the Executive Office of the President and to the Office of Management and Budget (OMB) using OMB's Program Assessment Rating Tool (PART). Some of the factors included in the Fiscal Year (FY) 2006 PART assessment were: Cumulative and annual percentage baseline cost and schedule overrun on US–VISIT Increment Development and Deployment, Reduction in Review Time for Privacy Redress, Ratio of Adverse Actions to Total Biometric Watch List Hits at Ports of Entry, Percentage of Exit Records Matched to Entry Records, and other factors. OMB rated US–VISIT as ''moderately effective.'' DHS accepts OMB's view on these performance measures and is taking steps to achieve better results. The comment, however, does not raise issues relating to the proposed rule.

*A. Status of LPRs in US–VISIT*

1. Past Security Checks

Thirty-two commenters urged that LPRs be exempt from US–VISIT, based on their status as LPRs, because they have previously been subject to significant security checks in order to obtain LPR status. Similarly, some commenters stated that there is no evidence that LPRs pose a threat to the level that they ''should be grouped with'' nonimmigrants who are subject to US–VISIT. One commenter stated that DHS has a flawed process in that it is willing to trust in an LPR's first use of US–VISIT for initial capture of fingerprints, rather than compare against the records captured during the initial adjustment of status process.

DHS agrees that LPRs receive an extensive background check to become LPRs, including a criminal background check using the applicant's fingerprints. United States Citizenship and Immigration Services (USCIS) conducts an extensive investigation prior to granting adjustment of status to that of an LPR, and the DOS undertakes significant investigation of an alien applying for an immigrant visa. Also, DHS agrees that there is not necessarily evidence to support the notion that LPRs—as a class—pose risks not posed by nonimmigrants—as a class.

DHS does not, however, believe that this point is entirely relevant for the purposes of this rule for several significant reasons. DHS and DOJ continue to uncover significant immigration document fraud, particularly in relation to permanent resident cards (Form I–551). Common examples include giving or selling a permanent resident card to someone else, altering a lost permanent resident card, and using a fraudulently created permanent resident card. DHS has substantially increased the security features on permanent resident cards in recent years, but security features are not foolproof.

The Immigration and Naturalization Service (INS), predecessor to a number of DHS functions, issued resident alien cards without expiration dates until 1989. Permanent resident cards issued after 1989 are valid only for ten years. Additionally, INS upgraded the Form I–551 significantly, including more secure features, in September 1997. 62 FR 44146 (Aug. 19, 1997). Many LPRs possess permanent resident cards that have limited security features and no expiration date. Trafficking in these cards is inhibited by the fact that the card must appear to be aged to the date of its issue, but otherwise these cards provide limited security from assumed identity. DHS is taking steps to recall all such cards. 72 FR 46922 (Aug. 22, 2007).

Including LPRs within the scope of US–VISIT processing will enable DHS to detect, deter, and act against those who attempt fraud through the biometric match of the person presenting the Form I–551 against the record of the person to whom that card was issued. Accordingly, the inclusion of LPRs within US–VISIT is consistent with other security programs initiated by DHS.

LPRs are still subject to entry, documentation, and removability requirements to the United States. LPRs are aliens. *See* sections 101, 212, 237 of the INA (8 U.S.C. 1101, 1182, 1227) and 8 CFR 235.1(b), (f)(1)(i). Although LPRs are not technically regarded as seeking admission to the United States if they are returning from a stay of less than 180 days under section 101(a)(13)(C)(ii) of the INA (8 U.S.C. 1101(a)(13)(C)(ii)), they remain subject to the admissibility requirements of section 212 of the INA (8 U.S.C. 1182) because of their status as an alien and not a United States citizen. Accordingly, DHS must determine whether an LPR is admissible to the United States whenever the LPR arrives at a port of entry, as well as determine whether an LPR is removable from the United States based on intervening facts since the time LPR status was granted, and initial background checks conducted, which may have been many years ago. US–VISIT enables DHS to determine if an LPR seeking entry has been convicted of any crime that would render him or her subject to removal from the United States. In addition, DHS is concerned about attempts by terrorist and transnational criminal organizations to recruit LPRs, who are perceived to be subject to less scrutiny in travel. *See* section 101(a)(13)(C)(v) of the INA (8 U.S.C. 1101(a)(13)(C)(v). Accordingly, the processing of LPRs through US–VISIT serves an important purpose: Identifying aliens who pose a security risk, have a disqualifying criminal or immigration violation, or are otherwise inadmissible at the time that they present themselves for entry into the United States as LPRs.

DHS compares the fingerprints collected as part of the adjustment of status or immigrant visa process with the fingerscans of the LPR seeking entry, when those fingerprints are available in DHS's Automated Biometric Identification System (IDENT). The addition of data from adjustment of status and immigrant visa applications to the IDENT system will substantially reduce the initial enrollment of LPRs, but LPRs, as aliens, should be enrolled in US–VISIT.

Finally, the statutes underlying the development of US–VISIT have never distinguished between immigrants and nonimmigrants. For the purpose of data collection and biometric comparison,

the law requires the collection of data from all aliens.

2. Relationship to United States Citizens

Five commenters suggested that LPRs should not be subject to US–VISIT because they are so similar to United States citizens, and United States citizens are not subject to US–VISIT by the terms of this rule. DHS does not agree that the difference between an LPR and a United States citizen is minor. The INA defines the term ''alien'' as ''any person not a citizen or national of the United States.'' See section 101(a)(3) of the INA (8 U.S.C. 1101(a)(3)).

Similarly, some commenters suggested that the distinction between LPRs and United States citizens in terms of US–VISIT processing should be ''all or nothing.'' In other words, these commenters stated that either both LPRs and United States citizens should be subject to US–VISIT, or neither should. Generally, these comments tend to suggest that passports are just as likely to be used fraudulently as permanent resident cards and that there are no significant legal differences between LPRs and United States citizens. A corollary argument was made by other commenters: DHS should increase significantly the security features of the Form I–551 in order to make them equivalent to passports in terms of security.

As a legal matter, LPRs, although allowed to stay and work in the United States permanently, are still ''aliens'' and subject to immigration law. Unlike United States citizens,

- The status of LPRs can be rescinded under section 246 of the INA (8 U.S.C. 1256) and LPRs can be removed from the United States under section 237 of the INA (8 U.S.C. 1227); [4]
- LPRs are required to acquire and carry evidence of their status (Form I–551) and replace it when it is lost or expires under section 264 of the INA (8 U.S.C. 1304) and 8 CFR 264.5(b);
- LPRs must present specific documentation as a condition for admission and re-admission to the United States under section 211 of the INA (8 U.S.C. 1181) and 8 CFR 211.1(a);
- LPRs must notify DHS of each change of address and new address within ten days of the date of the change of address under section 265(a) of the INA (8 U.S.C. 1305(a)) and 8 CFR 265.1;
- LPRs may be deemed to have abandoned their status when outside of the United States for more than one year, unless they obtain a re-entry permit, in line with the documentary requirements at 8 CFR 211.1(a) and (b)(3); and
- LPRs must apply for naturalization to obtain citizenship, demonstrating good moral character and at least five years of continuous residence under section 316 of the INA (8 U.S.C. 1427), as well as an understanding of the English language and a knowledge and understanding of the fundamentals of the history and of the principles and form of government of the United States under section 312 of the INA (8 U.S.C. 1423).

These requirements, and others, clearly differentiate LPRs from United States citizens. Moreover, LPR status does not grant an alien a variety of benefits accorded to a citizen of the United States, including the most fundamental right to vote for federally elected officials. *See* 18 U.S.C. 611 (criminal penalties for alien voting). Aliens, whether immigrants or nonimmigrants, may not serve on a federal jury. *See* 28 U.S.C. 1861 (declaration of policy that citizens sit on juries), 1862 (discrimination against citizens on account of race, color, religion, sex, national origin, or economic status prohibited for jury service), 1865(b)(1) (requirement of citizenship for jury service); 18 U.S.C. 243 (discrimination on basis of race or color against citizens prohibited in jury selection). Accordingly, obtaining LPR status is not equivalent to citizenship and DHS is not constrained to treat aliens in LPR status and citizens alike.

Finally, DHS has a specific and unique responsibility with respect to ensuring that LPRs comply with the requirements of their status. DHS does not accept the argument that LPR status is so equivalent to United States citizenship that US–VISIT processing must be the same or similar for both. DHS recognizes that most LPRs do not pose a threat to the United States and do not commit crimes that would subject them to removal, and has accommodated the free flow of travel by LPRs by instructing them to seek inspection at airports by joining the ''United States Citizen'' inspection line. This accommodation does not mean that LPRs are, or will otherwise be treated as, United States citizens.

DHS is taking steps to improve the security of permanent resident cards, but that does not necessarily mean that they should remain exempt from contemporaneous biometric identification under US–VISIT. As noted above, DHS has proposed to invalidate all permanent resident cards without an expiration date; this action will facilitate upgrading card security and evidence of LPR status legitimacy and security. 72 FR 46922 (Aug. 22, 2007). US–VISIT is only one step in the ongoing efforts by DHS to improve the security of the United States and enforce the immigration laws of the United States.

DHS believes that US–VISIT creates better protections against the fraudulent use of immigration documentation than does mere document examination, and does so in a way that is cost-effective. Using US–VISIT, a CBP officer can match an LPR's biometric features against a database where those features are stored based on the processing done to obtain the benefit of LPR status (either an immigrant visa or an adjustment of status application). This greatly diminishes the possibility that a Form I–551 can be used fraudulently to obtain entry to the United States because there is an automated comparison to the biometric characteristics and an examination of the card itself. Thus, the security features on the Form I–551 itself are extremely helpful, but it is the biometric checks that provide the best security against immigration fraud, as this also prevents legitimate cards from being used by those to whom a card was not issued. DHS believes that because it has the biometric data collected for LPRs and the capability to technically, quickly, and easily compare those data to a person seeking to enter a port of entry, DHS has a responsibility to use those data to ensure that the person seeking admission is using his or her documentation legitimately.

3. Relationship to Canadian Citizens

Twelve commenters suggested that it was unfair to exempt Canadian tourists from US–VISIT, but require LPRs to be enrolled and processed by US–VISIT. Another commenter opposed LPR enrollment in US–VISIT, but supported the enrollment of all Canadian citizens regardless of the purpose of their trip to the United States.

DHS understands that the ''staged'' implementation of US–VISIT can carry the perception of unfairness. However, the distinction between LPRs and Canadian temporary visitors is not based on the notion that one is inherently more of a ''threat'' than the other. Logistical difficulties in implementation of biometric checks at primary inspection in the land border environment and foreign policy issues govern the continued exemption of

[4] Even after an LPR is naturalized as a United States citizen, such naturalization can be revoked under section 340 of the INA (8 U.S.C. 1451). [Suggest adding language to make clear there are very limited bases for revocation. Otherwise, this may be misleading.]

Canadians visitors for business or pleasure for the time being.

All LPRs and Canadians arriving at land border ports of entry are treated the same—those who are sent to secondary inspection are processed through US–VISIT; those who are inspected at primary inspection are not. Aliens requiring a Form I–94 (select Canadians, in this case) will actually be referred to secondary inspection more often than LPRs, because they must secure a new Form I–94, in most cases, every six to eight months in addition to those instances where such referrals may be made for any other reason. In some instances, such as classifications with extended duration of status, a single Form I–94 may be valid for an extended period, those aliens must renew their Form I–94 at least every six to eight months. This result is simply a function of the need for additional technological advancements in order to build an operational system that can function as a biometric entry system without significantly impairing the efficiency of inspections.

4. Travel Concerns in United States Air and Sea Ports

Seven commenters mentioned the current structure of most United States airports and seaports, where ''United States Citizens/LPRs'' are directed into one inspection line and ''Visitors'' are directed to a different inspection line. They suggested that placing LPRs in the ''Visitors'' line merely for the sake of US–VISIT processing would cause significant delays for them and could separate families traveling together. DHS has deployed US–VISIT equipment in virtually all lanes at United States airports and seaports where US–VISIT is functional. This deployment allows CBP the flexibility to quickly change ''Citizen/LPR'' lanes to ''Visitors'' lanes and vice versa, as there is a need to balance and rebalance the time spent in the queue and process all arrivals efficiently and effectively. Because of almost universal lane availability, DHS will be able to process LPRs and others in the existing lane determinations. LPRs will remain within the ''United States Citizen/LPR'' lanes and will not be shifted into the ''Visitors'' lane unless such action could expedite processing. Additionally, LPRs are processed in the same lanes as United States citizen lanes, in many instances, to process entire families more expeditiously; DHS continues to recognize and attempt to accommodate families traveling together.

One commenter stated that this would cause delays for United States citizens, as the lanes dedicated to LPRs and United States citizens will slow down. DHS will monitor delays in processing carefully, but does not believe that US–VISIT will add to such delays. The United States averages roughly 33 million air/sea port arriving United States citizen travelers per year and approximately 4.4 million air/sea port arriving LPR travelers per year. Further, many ports of entry use dedicated ''United States Passport only'' lanes even within the ''United States Citizen/LPR'' lanes. DHS believes that the application of US–VISIT to LPRs will not impact United States citizens' travel to a significant degree.

One commenter questioned whether, given that DHS does not currently possess electronically searchable fingerprints on all LPRs, LPRs would be required to provide a full set of ten fingerprints (or ''10 prints'') through US–VISIT at the point in which US–VISIT transfers to 10-print enrollment. DHS began transitioning to 10-print devices and capture at primary inspection in December 2007.

The process for LPR enrollment and verification will be the same as for other aliens. If entering the United States at a port with available 10-print devices, LPRs will be enrolled though the 10-print enrollment process. Thus, an alien will need to submit 10 fingerprints only one time (whether at a port of entry or at a USCIS Application Support Center), and all subsequent times, in whatever environment, the alien will provide less than 10 fingerprints for verification. DHS will possess a higher percentage of 10 prints in its biometric database for LPRs, because LPRs generally must renew their permanent resident card every 10 years and are required to submit 10 fingerprints as part of the renewal process.

5. Travel Concerns at Land Border Inspections

One commenter implied that the treatment of LPRs is unfair due to lack of radio frequency identification (RFID) chips in the Form I–551. This comment refers to a DHS proof of concept program in which five land border ports of entry have used RFID technology to track exits and pre-position information on entry for nonimmigrants. *See* 70 FR 44934 (Aug. 4, 2005). This proof of concept has now been concluded. While Form I–551 does not provide, at this time, an RFID chip, treatment of non-immigrants, immigrants, and citizens does not, and has never, required parity.

DHS agrees that documentation issued to different aliens should be consistent to the extent practical and to the extent that consistency serves security and efficiency goals. DHS is examining integration of data processes to provide both better security and better efficiency. Accordingly, DHS will consider additional opportunities to include LPRs in these initiatives in addition to United States citizens and Canadian travelers.

LPRs at the land border, however, are less likely than nonimmigrant aliens to be referred to secondary inspection as discussed above. LPRs will be referred to secondary inspection only when a CBP officer in primary inspection determines that further investigation is required before admission, as is the current practice. There is no reason to believe that LPRs, as a result of the promulgation of this rule, will be referred to secondary inspection more frequently or will spend significantly more time while in secondary inspection. Nonimmigrant aliens, on the other hand, are referred to secondary inspection routinely at least every six to eight months to renew their Form I–94.

6. Privacy Concerns of LPRs

Five commenters suggested that promulgation of the rule as proposed would violate, in a very generic way, the privacy rights of LPRs. One commenter objected to the retention of travel information on LPRs.

DHS complies with the Privacy Act, 5 U.S.C. 552a. In addition, the Homeland Security Act of 2002, in creating DHS, established a Privacy Officer who is tasked with assuring full compliance with the Privacy Act, advising the Secretary and DHS on the privacy of personal information, and conducting privacy impact assessments on DHS regulations. *See* Homeland Security Act of 2002, Public Law 107–296, tit. II, § 222, 116 Stat. 2135, 2155 (Nov. 25, 2002) (as amended, found at 6 U.S.C. 142). DHS has published the privacy impact analysis for this rule. *See* 71 FR 42653. DHS continues to be concerned about the privacy of all persons in the United States and compliance with the laws affecting privacy.

However, the US–VISIT programmatic statutes all refer to ''aliens'' without differentiation. DHS believes the intent of these statutes is clear: LPRs are to be included within US–VISIT as much as practical and consistent with other legal obligations relating to travel documents issued by the United States, including those issued by DHS and DOS. Most LPRs travel internationally on DHS-issued documents; therefore, LPRs are directly impacted by these requirements. Additionally, DHS has a legitimate need for maintaining some information on LPR travel. DHS has collected travel information on LPRs for many years, originally as part of the

Treasury Enforcement Communications System (TECS) that was transferred to DHS in 2003. *See* 66 FR 52984, at 53029 (Notice of Privacy Act systems of record). Per DHS regulations, an LPR can be deemed to have abandoned his or her status if he or she stays outside of the United States for longer than one year. *See* 8 CFR 211.1(a), (b)(3) (imposing certain documentary requirements or waiver applications on LPRs only if returning from a temporary absence of less than a year).

7. Ten-Print Enrollment

One commenter inquired whether LPRs for whom DHS has no electronic biometric record will have ten-print or two-print fingerscan enrollment upon being processed in US–VISIT in the primary lane. DHS began transitioning to a ten-print enrollment process in December 2007. These processes will not be limited to LPRs, however, and DHS is confident that it can use technology to minimize the potential for delay as a result of the change.

*B. Canadian Citizens*

1. Western Hemisphere Travel Initiative

The Western Hemisphere Travel Initiative (WHTI) requires that the Secretary of Homeland Security, in consultation with the Secretary of State, develop and implement a plan to require travelers entering the United States to present a passport, other document, or combination of documents which is ''deemed by the Secretary of Homeland Security to be sufficient to denote identity and citizenship'' by June 1, 2009. *See* section 7209 of IRTPA, Public Law 108–458, 118 Stat. at 3823, as amended by the Department of Homeland Security Appropriations Act, 2007, Public Law 109–295, sec. 546, 120 Stat. 1355, 1386 (Oct. 4, 2006), found at 8 U.S.C. 1185 note. DHS and DOS have implemented this requirement effective January 23, 2007, for air ports of entry. 70 FR 52037 (Sept. 1, 2005) (Western Hemisphere Travel Initiative, ANPRM); 71 FR 46155 (Aug. 11, 2006) (same, NPRM); 71 FR 68412 (Nov. 24, 2006) (same; air ports of entry; Final Rule).

One commenter to this rule asked whether the Canadian border issues that have been addressed through WHTI were being taken into account in the promulgation of this rule. DHS has been working very closely with Canadian authorities in order to secure better the border between the United States and Canada without sacrificing the close ties between the two countries. In March 2005, the Administration launched the Security and Prosperity Partnership (SPP) as a trilateral effort with Canada and Mexico premised on the mutual reinforcement of our security and economic prosperity. *See http://www.spp.gov/Security_Fact_Sheet.pdf.* Through this effort and others, the United States and Canada are engaged in greater cooperation and information sharing, while being mindful of the privacy laws of each country. Together, the United States and Canada are exploring ways to facilitate legitimate travel and trade while assuring the security of our border. All of these efforts were considered in the promulgation of this rule.

Another commenter suggested that the NPRM fails to consider the impact of WHTI and this US–VISIT expansion at the same time. This rule is being implemented on January 18, 2009, and the first phase of WHTI (requiring a passport or other document to demonstrate identity and citizenship at air ports of entry) began on January 23, 2007. The second phase of WHTI (land borders and sea ports) was published as a final rule on April 3, 2008, and will be effective June 1, 2009. 73 FR 18384.

This expansion of US–VISIT procedures deals with the type of immigration processing certain aliens will require at all ports of entry, with the differences described elsewhere based on the type of port of entry. One of the main reasons for exempting Canadians who do not require a separate admissibility determination through Form I–94 in this rulemaking is to coordinate the timing of the WHTI land border port of entry procedures, before DHS can determine what, if any, additional steps should be taken for US–VISIT processing of these aliens at land border ports of entry. DHS and DOS are carefully coordinating the implementation of multiple initiatives to improve the security of the United States and ensure efficient border management.

2. Preclearance Sites in Canada

Three commenters expressed concern that the preclearance sites in Canada would see a dramatic increase in the numbers of aliens subject to US–VISIT and be unable to handle the increase in time and traffic. One commenter also noted that unlike the traditional environment of immigration processing where the flights have already landed, in the preclearance environment, persons are trying to board a flight before it is too late, and that, therefore, the delays would be much more costly.

DHS acknowledges the concerns with preclearance flight locations in Canada. However, DHS notes that Canadians not requiring visas—which include those transiting the United States or applying for admission to the United States as visitors for business or pleasure—are not required to be processed in US–VISIT. Accordingly, the increased volume of preclearance travelers in US–VISIT may not be as high as the commenters suggest. Nonetheless, DHS has existing mitigation strategies in effect to respond to overcrowded inspection facilities. DHS will pay close attention to these preclearance locations to determine whether implementing these strategies is appropriate, especially during the first few weeks after this final rule becomes effective.

3. Canadians Requiring a Waiver of Inadmissibility

One commenter expressed concern about Canadian B–1/B–2 travelers who frequently travel over the land border and require a waiver of inadmissibility under section 212 of the INA (8 U.S.C. 1182) to be admitted to the United States. DHS is currently considering alternative administrative processes for simplified handling of waivers and their application to US–VISIT, but until DHS implements these processes, DHS will maintain the same procedures for Canadian B–1/B–2 travelers requiring a waiver of inadmissibility as it has with all Canadians requiring a waiver of inadmissibility and given a multiple entry Form I–94: US–VISIT secondary processing every six months or when sent to secondary by a CBP officer. Canadian B–1/B–2 applicants for admission requiring a waiver of admissibility will not be required to be processed in US–VISIT every time they cross a United States land border.

4. Canadians in Transit Through the United States

Three commenters raised concerns about Canadians in transit through the United States, two in the land context and one in the air context. In the air context, one commenter suggested that Canadian B–1/B–2 travelers will be exempt from US–VISIT processing if flying to the United States, but not if they are flying through the United States. DHS agrees with the commenter that this would be an illogical result if this were in fact what had been proposed. The proposed rule provided that Canadians are subject to US–VISIT procedures only if they are required to obtain a visa or be issued a Form I–94. Typically, Canadians may transit through the United States by air without a visa and are not required to obtain a Form I–94. *See* 8 CFR 212.1(a)(1) (no visa required); 8 CFR 235.1(h)(1)(i) (no Form I–94 required). Canadians needing a waiver of inadmissibility are required to obtain a visa even if transiting the

United States. Thus, only these Canadians transiting the United States but needing such a waiver and visa are subject to US–VISIT as a result of publication of this final rule. Accordingly, the number of Canadians transiting the United States by air who will be subject to US–VISIT is small.

In the land context, another commenter suggested essentially the same point, explaining a scenario in which a Canadian truck driver entering the United States as a visitor for business (and who is thus visa-exempt) would not be subject to US–VISIT processing, but where the same person transiting through the United States to Mexico would be subject to US–VISIT processing. The commenter conceded that this was not currently a concern due to restrictions in hauling cargo between the three countries, but that it could be a concern in the future. DHS does not believe this scenario requires US–VISIT processing for the same reason as in the air environment. The driver in the scenario posed above—a truck driver taking cargo from Canada to Mexico—would not require a visa to enter the United States, nor would he be issued a Form I–94, regardless of whether he is ultimately driving to Mexico. Thus, transiting aliens who do not otherwise require US–VISIT processing would not be subject to US–VISIT processing as a result of this final rule.

5. Crew Members

Two commenters suggested that Canadian airline crew members be exempt from US–VISIT requirements. These commenters stated that crew members are subject to significant levels of scrutiny to begin with, including checks made by Transport Canada and placement on the Master Crew lists provided to CBP 48 hours prior to departure. They also stated that the same reasoning applied to the continuing exemption for Canadian B1/B2 travelers appears to apply here, as each group is staying for a limited period of time. Finally, they said that any security benefits from these checks are insignificant compared to the costs that Canadian airlines would incur as a result of the inclusion of crew members in US–VISIT.

In promulgating this final rule, DHS is attempting to treat all aliens as equally as operationally possible in US–VISIT processing. In other words, crew from all other foreign carriers (D visa holders) currently are required to be processed in US–VISIT, and in nearly all airports there is a special crew lane designated especially for air crew members' use. Based on observations from the four years that US–VISIT has been operational, DHS does not believe that any delay for crew travel has been so significant as to justify continuing to not process airline crews through US–VISIT based on country of origin or nationality. Second, DHS does not believe that the connection to Canadian B1/B2 travelers is equivalent, as the exemption for those travelers is meant to account for the unique operational concerns of the land border environment. In addition, the extra checks that are mentioned by the commenter are biographic checks, and not the biometric checks that US–VISIT processing would provide.

However, the commenter also identifies an inequity faced by Canadian crew with respect to biometric exit procedures. Because of the large number of United States preclearance sites in Canada, Canadian airlines often fly into United States domestic airport terminals. The commenter states that if one of these airlines were to fly into a United States airport where biometric exit processing were operational, the Canadian crewmember would be required to leave the domestic terminal, go to the international terminal, record his exit biometrically, and then return to the domestic terminal for the next flight.

DHS agrees with the commenter that under these specific circumstances it may be unreasonable for Canadian airline crew members to biometrically register their departure. The exit pilot program has been terminated and, therefore, no pilots are being required to provide to register their departure.

*C. Mexican Citizens*

Two commenters stated there should be no continued exemption for Mexican citizens, as the BCC and Form I–551 are the same. Currently, Mexican citizens who use a BCC to meet the documentary requirements of 8 CFR 212.1, if staying in the United States for 72 hours or less within a specified distance from the United States/Mexico border, are not required to obtain Form I–94 and, therefore, are not subject to US–VISIT. See 8 CFR 235.1(h)(1)(iii), (v). The commenter is correct that, from a security standpoint, BCCs are equivalent to Forms I–551 carried by LPRs. DHS anticipates that procedures for interacting with these two populations will be very similar. At air or sea ports of entry, both populations will be biometrically checked on every encounter. At land borders, under this final rule, LPRs and BCC holders will be checked as appropriate by CBP officers. This final rule adds LPRs to the list of travelers who, upon being referred to secondary inspection at land border ports of entry, will be processed in US–VISIT. Thus, this rule places LPRs and BCC holders in equivalent circumstances.

*D. Operational Issues*

1. Clarification of Procedures for Returning Nonimmigrants

One commenter professed confusion with the proposed regulation's treatment of nonimmigrants returning through a land border port of entry, suggesting that DHS should clearly state whether it plans to conduct US–VISIT processing of all returning nonimmigrants arriving at a land port who, during primary inspection, present a valid visa and a current, multiple-entry Form I–94.

Nonimmigrant visa holders have been subject to US–VISIT processing in secondary inspection at the 50 most trafficked land border ports of entry since December 2004, and at all land border ports of entry since December 2005. These procedures have been in place for three years, and the additional alien classifications added by this final rule do not change any existing land border procedures. Nonimmigrant aliens requiring completion of a Form I–94 may be referred to secondary inspection at any time at the discretion of the CBP officer at primary inspection, but at least every six to eight months for renewal of the Form I–94, regardless of the time remaining on the validity of the document or whether it is issued for duration of status (D/S). Forms I–94 issued following US–VISIT processing are marked with the date on which the alien's period of admission expires (or duration of status, if applicable) and the date on which the person was processed in US–VISIT. At primary inspection, the alien is referred to secondary inspection for US–VISIT processing if six to eight months have passed since the last time the alien was processed in US–VISIT (depending on the level of activity at the port of entry at that moment, the capacity to efficiently process the alien, and other factors). If no adverse information is found relating to that alien, the alien is admitted under the existing terms of the original Form I–94.

The commenter characterizes this procedure as ''recurrent readjudication of previously approved nonimmigrant status.'' DHS does not agree with this characterization. Under the INA, each nonimmigrant alien applies for admission to the United States by approaching a port of entry and presenting identification for inspection, and DHS determines whether that nonimmigrant alien is admissible to the United States. See sections 101(a)(13),

212(a), 214, and 235(a)(3) of the INA (8 U.S.C. 1101(a)(13), 1182(a), 1184, and 1225(a)(3). DHS is not persuaded that requiring some nonimmigrant aliens to undergo an abbreviated review every six to eight months at the land border ports of entry is somehow illegitimate or unfair to the nonimmigrant alien who is being inspected and admitted, or denied admission. The DHS policy of requiring the alien to be processed every six to eight months responds to the precise problem raised by the commenter—a CBP officer has a two-month ''gap'' in which to refer multiple entry aliens to secondary inspection for US–VISIT processing in order to best select a time that would be the least burdensome on the alien. DHS feels strongly that the balancing test here—the need for additional security and an additional tool to combat immigration fraud against what is, at worst, a minor inconvenience to the alien—favors the proposed policy.

The commenter suggested also that the proposed regulation would inject uncertainty and inefficiency into the process, as a Canadian would need to carry the entire documentation for their visa classification, as well as payroll records and employment records to prove whatever the examining officer might decide is required to establish maintenance of status. DHS policy does not currently require such complex presentations on existing Forms I–94, nor does DHS anticipate changing this policy as a result of this final rule. Experience has established that the program is not being executed in the way the commenter fears. Under the INA, an alien may be required to present all of the appropriate evidence necessary to establish admissibility at any inspection or at any time. See e.g. section 264(e) of the INA, 8 U.S.C. 1304(e).

2. Real ID Act of 2005

One commenter suggested that the expansion of alien categories in US–VISIT, in conjunction with the REAL ID Act of 2005, would have an impact on the states' relationship with the federal government under Executive Order 13132 because the REAL ID Act will require states to issue driver's licenses with effective dates that do not exceed the time permitted on the alien's admission period on the Form I–94. DHS disagrees.

The REAL ID Act of 2005 prohibits federal agencies from accepting a state driver's license or personal identification card for any ''official purpose'' unless it has been issued by a state that has certified to, and been determined by DHS to meet, the minimum document requirements, minimum issuance standards, and other requirements of the REAL ID Act. *See* REAL ID Act of 2005, Public Law 109–13, Div. B, tit. II, section 202, 119 Stat. 231, 302, 312 (May 11, 2005) (49 U.S.C. 30301 note). Nothing in the REAL ID Act or final rule pertains to the expansion of the population of persons subject to US–VISIT requirements under this final rule. The commenter's concern that under the REAL ID Act and implementing regulations, states will issue REAL–ID compliance licenses to aliens that track with period of the aliens lawful status in the United States is outside the scope of this rulemaking action. The present regulatory action to expand US–VISIT makes no regulatory change that has a direct impact on the states. See 72 FR 10819.

3. Advance Passenger Information System

One commenter suggested that the proposed expansion of US–VISIT was inconsistent with previous DHS regulatory statements regarding the possible elimination of the Form I–94. DHS understands this concern and believes that it is pursuing a consistent long-term goal that may result in elimination of the Form I–94.

DHS currently requires the electronic transmission of manifest information for passengers (passenger name record or ''PNR'') and crew members to CBP in advance of those flights. *Electronic Transmission of Passenger and Crew Manifests for Vessels and Aircraft,* 70 FR 17820 (Apr. 7, 2005) (Advance Passenger Information System or ''APIS'' final rule); *Advance Electronic Transmission of Passenger and Crew Member Manifests for Commercial Aircraft and Vessels,* 72 FR 48320 (Aug. 23, 2007) (''APIS Quick Query or ''AQQ'' final rule''). As noted in the APIS final rule, DHS continues to study whether, and the extent to which, the transmission of APIS data can replace the submission of paper forms. At that time, DHS indicated that preliminary analysis suggested that Forms I–94 and I–418 could be significantly reduced, if not eliminated. That evaluation is ongoing as DHS pursues a consolidated data analysis approach—beginning with applications for visas to the DOS and machine-readable passports, through advance passenger information, to inspection admission verification, and to exit verification. As technological capacity further develops, DHS believes that a unified system is possible and preferable. This expansion of US–VISIT is one step toward that unified and streamlined goal. As further steps become possible and are taken, appropriate regulatory changes will be adopted and obsolete forms eliminated.

4. Connection to IDENT/IAFIS Interoperability

One commenter questioned the interconnections between US–VISIT under the changes in the regulations as proposed and IDENT, and the Federal Bureau of Investigation's (FBI's) Integrated Automated Fingerprint Identification System (IAFIS). The commenter expressed concern that IDENT database entries might be made available in the IAFIS database and opposed any plan to place civil immigration violations in a criminal database. Finally, the commenter requested an update on the ability of the systems to timely reflect changes and extensions of status. The commenter suggested that the proposal to expand US–VISIT to additional alien populations should wait for full IDENT/IAFIS integration.

IDENT is a DHS-wide electronic record system for the collection and processing of biometric and limited biographic information in connection with the national security, law enforcement, immigration, intelligence, and other mission-related functions of DHS, as well as for any associated testing, training, management reporting, planning and analysis, or other administrative uses. *See* 71 FR 42651 (July 27, 2006) (systems of records notice for IDENT).

IAFIS is a national fingerprint and criminal history system maintained by the Criminal Justice Information Services (CJIS) Division of the FBI. IAFIS provides automated fingerprint search capabilities, latent searching capability, electronic image storage, and electronic exchange of fingerprints and responses. As a result of submitting fingerprints electronically, agencies receive electronic responses to criminal ten-print fingerprint submissions within two hours and within 24 hours for civil fingerprint submissions.

DHS, DOJ, and DOS are collaborating to achieve interoperability between IAFIS and IDENT. *See* 71 FR 67884, 67885 (Nov. 24, 2006) (Interim Data Sharing Model). Interoperability is defined as the sharing of alien immigration history, criminal history, and terrorist information based on positive identification and the interoperable capabilities of IDENT and IAFIS. Interoperability between the two systems is expected by late 2009. DHS and FBI already share information for the most egregious offense data sets held by the FBI, including known or suspected terrorists, wanted persons,

and sex offenders, as well as serious immigration violators.

It is unclear from the comments why the proposal to expand the classifications of aliens subject to US–VISIT should wait for full IDENT/IAFIS interoperability. DHS currently receives substantial benefits from screening without interoperability because US–VISIT identifies existing aliens requiring further review (e.g. criminal warrants, prior deportations, etc.).

Whether immigration violations are made available to law enforcement officers through IAFIS is not germane to this final rule. As IDENT/IAFIS interoperability moves forward, any such determination will be discussed in the appropriate PIAs by the appropriate Department if and when contemplated.

Finally, although not germane to the rulemaking, DHS notes that biographic data from USCIS are transmitted to the Arrival Departure Information System (ADIS) so that changes to immigration status are reflected in US–VISIT in near-real time. Accordingly, US–VISIT has the capability to ensure that aliens who are in lawful status are not determined to have stayed past their original periods of admission if that period has been extended by USCIS.

5. Biometric Identifiers

One commenter inquired about the language in the proposed rule that reserves the ability for DHS to collect ''other biometric identifiers'' in addition to photograph and fingerprints. This language is prophylactic. At this time, DHS has no plans to collect biometric identifiers in addition to photographs and fingerprints. However, DHS also recognizes that historically, other biometric identifiers such as height, weight, color of hair, color of eyes, etc., have been recorded, and this language continues to reflect that historic fact. Moreover, technological development may provide the capacity for use of other biometric identifiers in the future. DHS will make, as appropriate, changes in Privacy Impact Assessments and Systems of Records Notices for these systems.

Another commenter suggested that visual comparison of photographs is sufficient for identification. DHS disagrees. Document fraud, in some instances, has been effective in creating a false identity that defeats simple visual inspection of photographs with the face of the bearer. In addition, the commenter's suggestion overlooks the purpose of positive freezing of an identity with fingerscans to determine whether the individual is admissible to the United States or has committed criminal or terrorist acts that bar admission.

6. Age Restrictions

One commenter stated that the age limitations on the requirement to be processed in US–VISIT were too narrow, saying the program should be applicable to no one over the age of 60 years old, as opposed to over the age of 79. Another commenter suggested the opposite, saying that the age range should be expanded to cover those between the ages of 10 and 85.

US–VISIT processing is currently required of aliens who are between the ages of 14 and 79 and otherwise required to enroll and be verified in US–VISIT. Technically, it is possible to include more individuals who are younger and older than these age limitations. However, this age range is consistent with longstanding DHS and legacy INS policy concerning the fingerprinting of those seeking immigration benefits, including adjustment of status to permanent resident and naturalization. DHS uses exemptions consistent with these limitations. DHS may reconsider these age ranges in the future, but does not do so as part of this regulation. The current exemptions will continue to apply equally to all of the aliens enrolled in US–VISIT.

7. Exemption of Individual Aliens

One commenter objected to language in the proposed 8 CFR 215.8(a)(2)(iv) and 8 CFR 235.1(f)(1)(iv)(D) that allows the Secretary of Homeland Security, the Secretary of State, or the Director of Central Intelligence to exempt any individual alien from the biometric entry or exit processes. Each of these three departments has specific reasons why a particular person should be exempt from the biometric collection process that is integral for their core mission. The individualized decision to exempt an alien is based on the interests of the United States in managing its foreign and military affairs and poses no risk to the security of the United States.

*E. Privacy and Information Retention*

Several commenters raised concerns relating to privacy, particularly the privacy of particular groups of aliens and DHS compliance with the Privacy Act, 5 U.S.C. 552a.

One commenter stated that DHS has not met its responsibilities under the Privacy Act by failing to publish a Privacy Impact Assessment (PIA). DHS has published a PIA. 71 FR 42653 (July 27, 2006). Though not legally required to do so because nonimmigrants are not covered by the Privacy Act, DHS, as a matter of policy, has considered all aliens subject to US–VISIT as warranting Privacy Act analysis. DHS has published numerous PIAs and System of Record Notices (SORNs) for the systems making up US–VISIT. The PIAs published by US–VISIT list the principal users for, and uses of, the data contained within US–VISIT/DHS systems. The PIAs also identify the extent that the information may be shared with other law enforcement agencies of the United States, State, local, foreign or tribal governments, who, in accordance with their responsibilities, are lawfully engaged in collecting law enforcement intelligence information and/or investigating, prosecuting, enforcing or implementing civil and/or criminal laws, related rules, regulations, or orders. DHS has published the PIAs (www.dhs.gov/privacy) and provided links to the system of records notices for the US–VISIT program. *See*, *e.g.*, 68 FR 69412 (Dec. 12, 2003); 68 FR 69414 (Dec. 12, 2003); 69 FR 482 (Jan. 5, 2004); 69 FR 57036 (Sept. 23, 2004); 70 FR 35110 (Jun. 16, 2005); 70 FR 38699 (July 5, 2005); 70 FR 39300 (July 7, 2005); 71 FR 3873 (Jan. 24, 2006); 71 FR 13987 (Mar. 20, 2006); 71 FR 42653 (July 27, 2006); 71 FR 42651 (July 27, 2006).

One commenter objected to the data retention policies of the US–VISIT system, stating that DHS does not have adequate justification for taking new photographs and fingerprints of aliens at each encounter. Another commenter questioned whether DHS should retain identification information perpetually, even if the alien later became a United States citizen. DHS is currently reviewing the retention policy for the Arrival Departure Information System (ADIS) and plans to adjust that policy to be consistent with the retention policy for IDENT, which is part of US–VISIT. IDENT is an encounter-based system compiling a complete travel history to permit DHS to prevent fraud and provide evidence of each particular encounter. DHS disagrees with the commenters' conclusion that insufficient justification exists for this system.

In addition, DHS uses the historical fingerscans to ensure that the best quality prints are matched against watchlists. This ''best print forward'' process involves evaluating the quality of the prints each time DHS encounters an alien and using the best quality print from that point on. DHS is less and less likely to receive a ''false positive,'' as the quality of prints will improve over a lifetime of encounters—both because of this quality selection process and because of improvements in the

hardware and software used in the process.

Another commenter questioned how many adverse actions were based on ''false positives.'' None of the adverse actions were based on false positives. DHS is aware of the potential of false positive ''hits'' against immigration and criminal databases and has taken documented steps to address this potential. Currently, US–VISIT uses a series of matching algorithms and thresholds developed in consultation and testing with the United States National Institute of Standards and Technology (NIST). An automated fingerprint comparison establishes mathematical scores of matching and non-matching, and a non-conclusive score is checked manually by a fingerprint examiner located at the DHS Biometric Support Center. The Biometric Support Center manually determines whether any ''close'' match is a ''false positive'' on a 24-hour, seven-day-per-week basis.

Three commenters stated that what they perceived to be low numbers of ''adverse actions'' against those being matched against biometric databases provided evidence that the program should be scaled back instead of expanded. DHS does not agree and does not measure the success of the program solely by the specific number of adverse actions. Further, the number of adverse actions pertains to those in which the person was identified solely by biometric information. It also excludes those who were identified but ultimately admitted. Finally, it obviously does not include those who were deterred by the system in the first place. Overall, measuring a program's success by the detection of the things it is designed to prevent does not necessarily lead to significant conclusions.

*F. International Conventions*

One commenter argued that the proposed rule would violate the obligations of the United States under Articles 10, 12, and 21 of the International Covenant on Civil and Political Rights (ICCPR) of 1966 relating to detention, freedom to leave a country, and assembly. The commenter suggests that these provisions apply in the border management process when a person requests admission at a port of entry. [I sent question to Nina and Elizabeth]DHS disagrees. The ICCPR is not self-executing and was ratified with limitations and understandings. *See International Covenant on Civil and Political Rights,* Dec. 16, 1966, 999 U.N.T.S. 171, 6 I.L.M. 368, *as signed and submitted see Four Treaties Pertaining to Human Rights,* Feb. 23, 1978, S. Exec. Docs. C, D, E, and F, 95th Cong., 2d Sess. (1978); *as reported* S. Exec. Rep. No. 23, 102d Cong., 2d Sess. 2 (1992); *as considered and ratified in the Senate* 138 Cong. Rec. 8070—8071 (1992); *see* Multilateral Treaties Deposited with the Secretary-General: Status as of 31 Dec. 1995, at 122, 130, U.N. Doc. ST/LEG/SER.E/14 (1996); *Sosa* v. *Alvarez-Machain,* 542 U.S. 692, 734–35 (2004) (stating that the ICCPR is not self-executing). The United States takes its international obligations seriously, and this rule violates no provision of the ICCPR.

Article 10 of the ICPPR is not applicable to the border management process by definition—Article 10 applies to the detention of persons for violation of the criminal laws of a signatory country. Although the ICCPR does not apply to this rule, DHS also does not believe there is anything inherently degrading or inhuman about the current US–VISIT process. Moreover, individuals often provide pictures for the purpose of obtaining a benefit—most notably in the context of obtaining a driver's license, a passport, or some other form of identification and associated benefit. Photographs and fingerscans are common commercial identifying events.

Article 12 permits freedom to depart a country and limits any restrictions to those that are provided by law; are necessary to protect national security, public order, public health or morals, or the rights and freedoms of others; and are consistent with the other rights recognized by the present ICCPR. US–VISIT does not unduly restrict departure from the United States—it merely records departure. Many signatory countries to the ICCPR use some exit registration, and exit registration is generally considered to be consistent with the ICCPR.

Article 21 provides for the right of peaceful assembly, except that restrictions may be placed on the exercise of this right which are necessary in a democratic society in the interests of national security, public safety, public order, the protection of public health or morals, or the protection of the rights and freedoms of others. However, nearly all governments can, and do, inspect people traveling across their international borders, and they do so in every country every day. Accordingly, DHS does not believe this rule violates or impacts any of the obligations of the United States under the ICCPR.

*G. United States Citizen Voluntary Enrollment*

Three commenters stated that US–VISIT should be applied to all travelers, regardless of citizenship, for security reasons. Three commenters stated explicitly that they were opposed to this in the context that application of US–VISIT to LPRs would mean the eventual application to United States citizens. One commenter stated that there should be provisions through which United States citizens could voluntarily be biometrically identified through US–VISIT as a means of getting through security faster at airports. On the first point, DHS is limited by statute and regulation to apply US–VISIT to aliens. On the second point, DHS is exploring several types of ''registered traveler'' programs which may accomplish the same goal. Overall, this objective could be accomplished in the future, and DHS is exploring it, just not through US–VISIT.

*H. Economic Impact*

One commenter stated that DHS incorrectly certified that it was not required to conduct a Regulatory Flexibility Analysis, as required by 5 U.S.C. 603. In the NPRM, DHS did certify that such an analysis was not required, pursuant to the provisions of 5 U.S.C. 605(b), which provides that the requirement for an analysis does not apply if the head of the agency certifies that the rule will not have a substantial affect on small entities as that term is defined at 5 U.S.C. 601(6). *See* 71 FR at 42608.

The definitions for the Regulatory Flexibility Act provide that the term ''small entity'' is the composite of the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' 5 U.S.C. 601(6). Normally a ''small business'' has the same meaning as the term ''small business concern'' under section 3 of the Small Business Act, 15 U.S.C. 632. A ''small organization'' generally means any not-for-profit enterprise which is independently owned and operated and is not dominant in its field. And, finally, a ''small governmental jurisdiction'' generally means governments of cities, counties, towns, townships, villages, school districts, or special districts with a population of less than fifty thousand. Although the statute permits deviation from these terms by following an established statutory procedure, DHS does not apply any different definition for this purpose. 5 U.S.C. 601 (3), (4), (5).

The Regulatory Flexibility Act applies to individuals only to the extent that

they are sole proprietors of businesses that are small entities; for example, an independent trucker. The Regulatory Flexibility Act does not apply to individuals, but to small businesses (for profit or not for profit), whether a sole proprietorship, a partnership, or a corporation, and small governmental entities, not the individuals who may own or belong to those organizations.

One commenter stated that DHS was incorrect to include in its Executive Order 12866 benefit/cost statements of the proposed rule that there are no potential costs or consequences associated with this rule that would impede the free flow of commerce and trade. The commenter suggests that Executive Order 12866 requires DHS to publish a thorough explanation as to how US–VISIT will benefit the efficient functioning of the economy and private markets and a full assessment of the costs of US–VISIT.

DHS believes that the commenter relies heavily on the notion that DHS plans to enact user fees to finance the US–VISIT program. As noted above, US–VISIT is funded by appropriations. DHS has no plans to charge a user fee to those seeking admission to the United States to finance US–VISIT.

DHS is required to weigh the benefits and costs of the changes of this particular rule. US–VISIT has, by design, been implemented in stages—for technology, operational, and cost reasons. This expansion of the classifications is another step for the program, and one in which DHS has weighed the benefits and costs. First, as stated previously, no additional individuals will be processed as part of US–VISIT at a land border without being sent to secondary inspection. The only aliens being added to land border secondary inspection under this rule are Canadian visa holders with a multiple entry Form I–94, and only once every six to eight months. In these instances, a Canadian being processed in secondary inspection may experience a fifteen second US–VISIT processing time, but this would be part of a several minute processing time in secondary inspection for reissuance of a Form I–94. Further, there is ample evidence, discussed in the proposed rule, that US–VISIT has actually reduced waiting times in the secondary environment at the land borders. DHS does not have any empirical evidence that the economies of land border communities will be adversely affected by expansion of US–VISIT. Moreover the commenters have not cited any empirical evidence supporting such an adverse effect.

Additionally, commenters raised questions relating to staffing, space, security, and technology costs. As discussed above, in the proposed rule, and in previous rulemakings and notices, DHS has already deployed US–VISIT technological capability into virtually all primary lanes at air and sea ports of entry and in all secondary inspection environments in land border ports of entry. Therefore, the deployment costs, space, and technology issues are virtually nonexistent. Similarly, all CBP officers in air and sea primary inspection, and in secondary land inspection, are trained on the existing US–VISIT equipment and are already familiar with its use. Finally, DHS believes that expanding a biometric entry-exit system is more likely to increase security for the United States. Security, as the foundation for the US–VISIT program, is a point made numerous times by the 9/11 Commission Report and Congress.

*I. Attorney Representation*

One commenter suggests that attorneys should be permitted to represent applicants for admission to the United States in the inspection area. As an initial matter, this suggestion is not germane to the issues presented by the proposed rule. Any affirmative response to the comment would require substantial changes in regulations and procedures not addressed by the proposed rule to expand the implementation of US–VISIT. DHS, however, wishes to be responsive to the comment.

DHS has considered this proposal in the past and will not implement this proposal because it is neither required by law nor good policy. Congress has specifically provided for the expedited removal of aliens seeking admission who are inadmissible to the United States because of misrepresentation or on deficient or non-existent documentation. Section 235(b) of the Act, 8 U.S.C. 1225(b)(3). An applicant for admission to the United States may be permitted to withdraw his or her application for admission to the United States and depart immediately from the United States. Section 235(a)(4) of the Act, 8 U.S.C. 1225(a)(4). Removal proceedings for other aliens seeking admission to the United States are conducted before an immigration judge and the alien has the privilege of counsel during those proceedings. Sections 292, 240(b)(4)(A) of the Act, 8 U.S.C. 1362, 1229a(b)(4)(A).

The introduction of the concept of legal counsel into a secured international inspection area would severely disrupt the efficient processing of the vast majority of international travelers for little, if any, benefit. Inspection of aliens and accompanying luggage is conducted very rapidly in a secured inspection environment for a number of different purposes. Facilities for detailed questioning in secondary inspection are limited. No evidence has been presented to DHS that suggests that any benefit accrues from permitting counsel to consult with clients in this environment when they are free to consult prior to seeking admission to the United States or if they are placed in removal proceedings.

Accordingly, DHS' regulations provide that:

> [n]othing in this paragraph shall be construed to provide any applicant for admission in either primary or secondary inspection the right to representation, unless the applicant for admission has become the focus of a criminal investigation and has been taken into custody.

8 CFR 292.5(b).

Additionally, DHS does not believe that the expansion of US–VISIT requires a change to the existing regulation because US–VISIT does not significantly alter the inspection or admission process for aliens. Accordingly, DHS declines to expand the privilege of counsel into the secure inspection environment.

*J. Pacific Rim Issues*

A commenter expressed concern that the inclusion of those applying for admission under the Guam Visa Waiver Program could impair overall processing times at the Guam port of entry, noting that this specific inclusion affected a large number of individuals applying for admission in a port of entry that has limited capacity. The commenter suggested that DHS should be sure to adequately staff that port of entry and have a robust outreach strategy for those entering Guam.

The Guam Visa Waiver Program was established by section 14 of the Omnibus Territories Act, Public Law 99–396, sec. 14(a), 100 Stat. 837, 842 (Aug. 27, 1986) (adding section 212(l) to the INA, 8 U.S.C. 1182(l)), and is reflected in the regulations at 8 CFR 212.1(e). Citizens of many Pacific nations are exempt from the requirement of a visa if they are entering Guam as a visitor for business or pleasure, are staying for 15 days or less, and waive the right to contest any removal decision. To date, those entering under the Guam Visa Waiver Program have not been required to be processed in US–VISIT.

DHS shares the commenter's concern and understands that inclusion of those seeking admission to Guam under the Guam Visa Waiver Program will impact

that particular port disproportionately. DHS will make significant efforts to ensure that the outreach plan to nations in the Pacific is equivalent to the outreach when US–VISIT began and that the Guam port of entry has the resources it needs to process aliens in a timely manner. In addition, DHS has existing mitigation strategies in place for instances of excessively long wait times at immigration inspection and will monitor carefully the Guam port of entry to determine whether to invoke those procedures.

Another commenter suggested that aliens from the Federated States of Micronesia need to be added to the US–VISIT program. DHS agrees; Micronesia nationals would be covered under the definition in 8 CFR 235.1 in the proposed rule and in this final rule.

**III. Comments on the August 31, 2004 Interim Rule**

*A. General*

DHS received a number of general comments on the US–VISIT program as a whole. These comments were mixed, and many expressed strong feelings about the program. Some commenters raised general immigration issues, such as whether the United States admitted the appropriate number of immigrants, whether treatment of Mexicans and Canadians was inequitable, and whether the program amounted to a stigma against the presumption of innocence. These comments are beyond the scope of the regulation and raise questions of whether Congress should alter the immigration laws of the United States.

These comments, however, indicate a misunderstanding of some of the basic laws that underlie the regulations. Every person arriving at the border of the United States must be inspected and every alien's admissibility to the United States must be determined. Under the immigration laws of the United States, the person seeking admission to the United States must establish that they are a United States citizen or a foreign national eligible for admission. See sections 212, 235 of the Immigration and Nationality Act (INA) (8 U.S.C. 1182, 1225). Inspection and admissibility upon arrival to the United States involves verification of the identity of the alien and a determination that the alien is admissible to the United States, i.e., that the alien has established that the alien has permission to be admitted and is not ineligible for admission by reason of any of the disqualifying provisions in the Immigration and Nationality Act, as enacted and amended by Congress.

The scope of the US–VISIT program, under the authorizing statutes discussed above, is, however, properly within the scope of the rulemaking. The 9/11 Commission pointed out that ''targeting travel is at least as powerful a weapon against terrorists as targeting their money'' and recommended a biometric entry-exit screening system as a result. T. Kean, et al., *Final Report of the National Commission on Terrorist Attacks Upon the United States* (9/11 Commission Report) (Government Printing Office, 2004) at 389. In successive enactments before and after the 9/11 Commission Report, Congress has insisted that DHS establish a comprehensive entry-exit data entry system. Accordingly, DHS has established the US–VISIT program and will, as practicable and subject to certain limited exceptions, expand the program to record the entry of all aliens. DHS recognizes that many individuals perceive distinctions within the universe of non-U.S. citizens as unfair, but most of these distinctions are made by Congress as a matter of law and cannot be changed by DHS. Distinctions within the universe of non-United States citizens made by DHS in the US–VISIT program reflect assessments of risk and threat, practicality of implementation based on international relations, capacity to implement universal alien data capture, and technological and other limitations.

*B. Outreach to the Affected Public*

Six commenters raised concerns about US–VISIT in terms of sharing information, most notably the concerns of the border communities. Three commenters raised the concerns of small businesses generally—that US–VISIT would result in fewer travelers and tourism and hurt the economy (and small businesses) as a whole. These commenters encouraged outreach to the affected communities and suggested that substantial notice be given to the public before changes to the program take place.

DHS disagrees with the notion that US–VISIT will result in fewer travelers and tourism. DHS is aware of no empirical evidence, and the comments have provided no empirical evidence, that the recordation of fingerscans in US–VISIT and verification of identities has an adverse impact on the number of travelers or tourists seeking admission to the United States, or that the development of US–VISIT will harm small businesses or the economy.

DHS, though US–VISIT, is committed to ensuring effective outreach to all persons affected by the program. Since 2004, US–VISIT has implemented an ongoing strategy to facilitate dialogue with land border communities in the United States, Mexico, and Canada, engaging stakeholders in two-way discussions that allowed US–VISIT to learn and understand the specific issues and concerns related to border management in those communities. At the same time, this dialogue has created opportunities to educate stakeholders about the US–VISIT program, informing them of developments in program implementation, and gaining their assistance in reaching out to inform their own constituents about the program.

Since February 2004, DHS has hosted or participated in over 100 meetings with land border stakeholders in communities along the borders of, and in the interiors of, the United States, Mexico, and Canada. These meetings occurred in Texas, Arizona, New Mexico, California, Washington, Minnesota, Michigan, New York, Vermont, and Maine. In Canada, outreach was coordinated in Toronto, Vancouver, Montreal, Windsor, Sarnia, Ottawa, and Winnipeg. In Mexico, outreach activities were held in Mexico City, Reynosa, Tijuana, Ciudad Jaurez, Monterrey, Nuevo Laredo, and Matamoros. DHS has placed numerous advertisements in publications serving border communities in the United States and Mexico to advise the public directly of the US–VISIT process.

DHS and US–VISIT have coordinated extensively with Canada on issues relating to the approximately 5,500-mile mutual border, through forums such as the Bi-National Technical Working Group, the Security and Prosperity Partnership (SPP), and participation in the Shared Border Accord meetings. The SPP is a trilateral effort to increase security and enhance prosperity among the United States, Canada, and Mexico through greater cooperation and information sharing. Through SPP, the United States and Canada have explored options for lower-cost, secure proof of status and nationality documents to facilitate cross-border travel, and have tested technology and made recommendations to enhance the use of biometrics in screening travelers.

DHS and US–VISIT have coordinated extensively with Mexico on issues relating to the 1,951-mile mutual border, including the Bi-National Technical Working Group. Mexico's National Institute of Immigration (INM) has helped to ensure that US–VISIT's education efforts are culturally appropriate so they can successfully reach, educate, and inform key population groups or communities in Mexico.

The effort to educate and engage the diverse border communities contributed significantly to US–VISIT's ability to implement the program at the 50 most trafficked land border ports of entry in 2004 and to deploy US–VISIT at the remaining 104 land border ports of entry where aliens are processed in 2005. The outreach efforts were critical to the smooth pilot testing and deployment of US–VISIT entry procedures at land border ports of entry.

DHS and US–VISIT recognize that outreach benefits not just the public, but the government as well. The success of the US–VISIT program is contingent on effective outreach. DHS and US–VISIT are committed to continue this outreach effort for future steps in the program.

*C. Use of Interim Rules*

Three commenters suggested that the use of interim rules by DHS in the previous two US–VISIT rules was inappropriate.

DHS has used interim rules twice in the development of US–VISIT. In a January 5, 2004, interim rule, DHS implemented the first phase of US–VISIT and provided that aliens seeking admission into the United States through nonimmigrant visas must provide fingerprints, photographs, or other biometric identifiers upon arrival in, or departure from, the United States at air and sea ports of entry. The rule exempted several groups of aliens:

- Those with diplomatic recognition (A–1, A–2, C–3 (except for attendants, servants or personal employees of accredited officials), G–1, G–2, G–3, G–4, NATO–1, NATO–2, NATO–3, NATO–4, NATO–5, or NATO–6 visas, unless the Secretary of State and the Secretary of Homeland Security jointly determine that a class of such aliens should be subject to the rule);
- Children under the age of 14;
- Persons over the age of 79;
- Classes of aliens the Secretary of Homeland Security and the Secretary of State jointly determine shall be exempt;
- And an individual alien whom the Secretary of Homeland Security, the Secretary of State, or the Director of Central Intelligence determines shall be exempt.

69 FR 468 (Jan. 5, 2004). At the same time, DHS published a notice in the **Federal Register** setting forth the classes of aliens subject to US–VISIT and the air and sea ports where US–VISIT would be applicable. 69 FR 482 (Jan. 5, 2004). DHS received 21 comments on that interim rule and responded to those comments in the August 31, 2004, interim rule. 69 FR at 53323–53329.

On August 31, 2004, DHS implemented the second phase of US–VISIT through an interim rule that expanded the US–VISIT program to land border ports of entry in the United States. That interim rule also further refined the population of aliens who are required to enroll in US–VISIT to include VWP travelers and ship crewmembers, and it exempted Mexican nationals who present a Border Crossing Card (Form DSP–150, or BCC), aliens who are not required to be issued a Form I–94 Arrival/Departure Record, and certain officials of the Taipei Economic and Cultural Representative Office. This interim rule is being finalized in this final rule. Subsequently, DHS has published notices applying US–VISIT to all land border ports of entry, implemented at secondary inspection.

DHS appreciates and understands the concern expressed by the commenters on the use of interim rules to implement the US–VISIT program. Consistent with the Administrative Procedure Act, DHS publishes proposed rules for public notice and comment whenever possible. 5 U.S.C. 553. Where DHS determines that expedited promulgation of a rule is required and has good cause to publish and make effective an interim final rule before receiving and considering public comments because delay would be impractical, unnecessary, or contrary to the public interest, DHS provides a clear statement to that effect. 5 U.S.C. 553(b)(B). DHS is committed to providing the public with an opportunity to comment on its rules and to considering public comments in making final decisions in promulgating rules.

One commenter questioned whether the August 31, 2004, interim rule contained sufficient information to permit the public comment on the second phase of US–VISIT. The scope and content of the comments received indicate that DHS provided ample information to support the interim rule, and DHS is responding to those comments in this final rule.

That interim rule included a sixty-day comment period. Additionally, the comment period was extended to 90 days (expiring on December 1, 2004) to provide an opportunity for commenters to observe and comment on the land border implementation (which began November 15, 2004). 69 FR 64477 (Nov. 5, 2004).

DHS is committed to ensuring that the public is able to comment on all aspects of the US–VISIT program. DHS is also committed to providing as much information as possible to permit public comment on the implementation of rulemaking.

*D. Facilities*

Five commenters suggested that existing inspection facilities could not handle, without significant delays, any broad changes to the existing inspection procedures. One commenter suggested the need to create expedited lanes for frequent travelers, believing that the existing infrastructure was inadequate to make these types of changes.

To date, US–VISIT implementation at the land borders has not caused any significant delays and has actually decreased processing time at many ports due to the implementation of an automated Form I–94 issuance process at secondary inspection. As indicated in the proposed rule, US–VISIT has significantly decreased entry timing at certain monitored land border ports of entry. 71 FR at 42609.

While land border infrastructure is constrained, DHS has taken steps to alleviate congestion, such as implementing frequent traveler programs and dedicated lanes for their travel, where possible.

One commenter specifically suggested that including a broad number of Canadians in US–VISIT would have a detrimental effect on northern border facilities. This final rule and the July 27, 2006, proposed rule describe how DHS will include some Canadians in US–VISIT processing at land border inspection. DHS agrees that there are significant technological difficulties associated with implementing US–VISIT at land borders for all aliens' entry and exit through primary inspection. Whether expansion of US–VISIT will include installation at all primary inspection booths is, at this point, unclear. This rule establishes that only a small number, and not all, Canadians will be processed in US–VISIT at secondary inspection. DHS, thus, believes that the impact on northern border facilities will be minimal.

*E. Interaction With Existing Programs*

Ten comments discussed US–VISIT interoperability with other existing programs that collect biometric or biographic information, most often those that impact the land borders, such as the Secure Electronic Network for Travelers Rapid Inspection (SENTRI), Free and Secure Trade (FAST), and NEXUS. Some commenters were concerned that multiple checks were repetitive and would not contribute to security, although they would slow down processing at the borders and airports. Other commenters noted that other programs have already vetted specific travelers and that further

security checks through US–VISIT are redundant.

DHS is committed to ensuring that international travel is both secure and efficient, and, therefore, is exploring ways to appropriately integrate US–VISIT, SENTRI, FAST, NEXUS, and other border screening and credentialing programs. DHS acknowledges the validity of the commenters' concern that multiple systems can create unnecessary redundancy. DHS is committed to ensuring that any unnecessary redundancy and inefficiencies are not perpetuated and that all border crossing programs are appropriately integrated over time.

*F. Staffing and Training*

Five commenters suggested that US–VISIT could have a negative impact if other areas of DHS did not support the program. For example, a few commenters stated that too few CBP officers were knowledgeable about issues surrounding US–VISIT and how it could affect admissibility.

Following the initial rollout of US–VISIT, DHS has taken additional steps to address this issue. For example, DHS sent training teams to all 50 land border ports of entry to instruct officers about the process changes as a result of US–VISIT implementation. In addition, DHS set up a telephone call center through the rollout of the 50 busiest ports of entry in November and December of 2004. In the Summer and Fall of 2005, other training steps were taken in conjunction with the rollout of the additional 104 land border ports of entry, including sending field trainers to each additional port implementing US–VISIT and providing on-line refresher courses on US–VISIT policies and procedures. US–VISIT procedures are implemented through the CBP management, training of officers, policy memoranda, and operational direction.

*G. Travel and Delays*

Six commenters expressed concern over the waiting periods in the inspection process that they claimed were caused by US–VISIT. These comments covered both past events in the air and sea context and concerns over future land border processes, and attributed delays to too few inspection booths and the inability of scanners to read fingerprints on the first try. Other commenters acknowledged shortened processing times due to the increase in the number of CBP officers available, but noted delays attributed to fingerprints not always being effectively scanned on the first try.

DHS is committed to ensuring that US–VISIT will be as least burdensome as possible while accomplishing its mission and understands that facilitating legitimate travel and trade is one of the program's core goals. DHS attempts to ensure that there are adequate numbers of CBP officers to clear flights as expeditiously as possible. While DHS believes that it largely succeeds in this mission, it acknowledges that there are times when international passengers are not inspected as quickly as they or DHS would like. DHS is responsible for ensuring that all international travelers seeking admission to the United States are who they claim to be and are eligible for admission. The balancing of these responsibilities can occasionally cause delays.

DHS takes steps to increase CBP officer presence during peak hours. In addition, DHS has taken steps at various ports to attempt to improve the ability to read fingerprints quickly. For example, DHS has been experimenting with attaching a silicon film to the fingerscan reader to get more accurate readings, and this process has yielded good results thus far. DHS will continue to ensure that the US–VISIT process does not unduly delay the inspection process.

At the land border ports of entry, the current process for land border inspection remains largely the same as it was prior to the implementation of US–VISIT. Aliens who must acquire Form I–94 as evidence of admission are referred to secondary inspection rather than being processed in the primary inspection lanes. This process will continue following the publication of this final rule.

Another commenter raised the issue of implementing US–VISIT at the 50 most highly trafficked land borders in November and December of 2004, stating that this was the busiest time of the year due to the holidays, and suggested waiting until January 2005. DHS understands this concern, but DHS was required to implement US–VISIT at the 50 busiest land borders by December 31, 2004. DHS sought to avoid this issue when expanding US–VISIT to all other land border ports of entry in 2005. *See* 70 FR 54398 (Sept. 14, 2005) (additional ports being added prior to December 31, 2005). In future expansions of US–VISIT, DHS plans to avoid implementing changes during the peak travel times of the year. However DHS must reserve the decision on timing of future implementation until decisions are made based on all requirements at that time.

Two commenters raised concerns involving third-party nationals crossing at land borders, specifically the southern border. One suggested that a strict interpretation of the existing regulations would require an alien who is not Mexican, but who has a multiple-entry Form I–94 and is a frequent border crosser (such as a person living on one side of the border and working on the other), to be processed in US–VISIT for every entry. DHS has not implemented such a policy. Those with multiple-entry Forms I–94 are required to undergo US–VISIT processing upon the expiration of their existing Form I–94, or every six to eight months.

*H. Health Risks*

Citing the United States Department of Health and Human Services' Bureau of Primary Health Care, two commenters suggested that southern border communities have a higher rate of communicable diseases, such as tuberculosis. The commenters suggested that biometric fingerprinting could exacerbate this incidence and create exposure to both the CBP officers working on the southern border and United States citizens living in the border communities. Another commenter raised similar health concerns regarding the US–VISIT process in the air and sea environment.

DHS is aware of these health concerns and believes that they are not influenced by US–VISIT. Tuberculosis is an airborne bacterial infection transmitted by air, and to become infected, an individual must usually be exposed to an infection source for an extended period in a closed environment. In 2005, 14,097 tuberculosis (TB) cases were reported to the Centers for Disease Control and Prevention (CDC) from the fifty states and the District of Columbia. CDC, *Reported Tuberculosis in the United States, 2005,* Sept. 2006, at 3, available at *http://www.cdc.gov/nchstp/tb/surv/surv2005/PDF/TBSurvFULLReport.pdf.* DHS believes that fingerprint scans do not impact the chances of transmitting tuberculosis, as the disease is spread through the air and transmission requires an extended period of contact with a person carrying it, not the short period of time required for enrollment. Similarly, there is no risk that US–VISIT contacts will cause contraction or transmission of viral haemorhagic fevers (such as Ebola, Lassa, Marburg, Congo-Crimean), bioterrorism diseases (plague, anthrax, tularemia), bloodborne diseases (HIV, hepatitis B and C virus), soil-transmitted diseases (worms, dermatophytes, sporeforming bacteria), or vectorborne diseases (malaria, dengue, leishamaniasis, trypansomiasis).

CBP officers clean the fingerscan machines periodically using lint-free wipes and rubbing alcohol to mitigate the public's legitimate health concerns. This periodic cleaning helps DHS capture better quality fingerscans on the first try and reduces inspection wait times.

Finally, the DHS Chief Medical Officer (CMO) oversees and coordinates all medical activities of DHS to ensure appropriate preparation for, and response to, incidents having medical significance. The DHS CMO also coordinates the biodefense activities of DHS, including its pandemic influenza portfolio, and ensures that DHS has a unified approach to medical preparedness. Accordingly, any medical direction from the DHS CMO will be implemented to prevent transmission of pathogens through US–VISIT.

*I. Program Exemptions*

DHS received many comments concerning the populations of aliens who were, or should be, included in US–VISIT. A few discussed issues that did not directly involve US–VISIT, such as extension of the time period per visit for holders of a B–1/B–2 visa or BCC, or more parity between Mexican and Canadian visitors. *See* 70 FR 52037 (Sept. 1, 2005) (Western Hemisphere Travel Initiative, ANPRM); 71 FR 46155 (Aug. 11, 2006) (same, NPRM); 71 FR 68412 (Nov. 24, 2006) (same; airports; Final Rule).

Four commenters expressed support for the Canadian exemption and requested it be made permanent, whereas one commenter suggested eliminating the exemption. Creating a permanent US–VISIT exemption for applicants for admission from Mexico and Canada, or for some other nationality, is inconsistent with the statutory obligations of DHS to create a complete biometric entry-exit system. Moreover, no regulatory provision dealing with security can be considered permanent—programmatic requirements and implementing regulatory requirements and limitations must be adjusted to respond as security requirements change. DOS security measures in the issuance of a BCC do not relieve DHS of its statutory obligations. However, DHS considers the impact of processing additional alien classifications in US–VISIT and attempts to minimize negative impacts prior to implementation. DHS understands the economic ramifications of transborder travel and commerce and will implement large-scale changes through technology and processes to minimize their overall impact.

Another commenter focused specifically on the northern border with Canada, stating that there is not, in writing, a permanent exemption for Canadians. The comment is correct. No nationality was ever planned to be permanently exempt from US–VISIT.

*J. Privacy*

Twelve commenters raised privacy concerns in the collection of US–VISIT information, although these comments were about varying specific points of the program. DHS is required to protect the privacy of the individuals from whom DHS collects information through the US–VISIT process in accordance with the Privacy Act, 5 U.S.C. 552a. As part of this responsibility, DHS has published a series of Privacy Impact Assessments (PIAs) to explain the program, changes to the program, risks that have been identified to privacy, and steps undertaken to mitigate that risk. The PIAs affecting US–VISIT list the principal users of the data within DHS and notes that the information may also be shared with other law enforcement agencies at the federal, state, local, foreign, or tribal level who, in accordance with their responsibilities, are lawfully engaged in collecting law enforcement intelligence information and/or investigating, prosecuting, enforcing, or implementing civil and/or criminal laws, related rules, regulations, or orders. DHS has made available several PIAs and revisions for the US–VISIT program and noted that availability on the public record. *See* 71 FR 42653 (July 27, 2006); 71 FR 3873 (Jan. 24, 2006); 70 FR 39300 (July 7, 2005); 70 FR 35110 (June 16, 2005); 70 FR 17857 (Apr. 7, 2005) (Advanced Passenger Information System); 69 FR 57036 (Sept. 23, 2004); 69 FR 2608 (Jan. 16, 2004). All of the assessments and revisions are available on the DHS Web site at *http://www.dhs.gov/us-visit.* DHS continually considers the impact of US–VISIT on privacy interests and updates its assessments as the program is developed.

Two comments raised the issue of ''scope creep'' or ''mission creep,'' stating fears that the information collected in US–VISIT will be used for purposes not connected to the program. DHS believes that the PIAs, which identify the specific purposes for which the information is being collected, the intended use of the information, with whom the information will be shared, and how the information will be secured, protect the public from ''mission creep.'' The PIA process is also a transparent one, with the public being able to access it and comment on it. As DHS further considers integrating its border security databases, DHS will reassess the privacy impact of such integration, and the public will be invited to provide further comment.

One commenter stated, however, that the statements in the PIA on the purposes of information collection and to whom the information must be shared conflicted with the language of the August 31, 2004 interim rule, quoting that language where the interim rule stated:

> the [collected] information may also be shared with other law enforcement agencies at the federal, state, local, foreign, or tribal level, who, in accordance with their responsibilities, are lawfully engaged in collecting law enforcement intelligence information and/or investigating, prosecuting, enforcing, or implementing civil and/or criminal laws, related rules, regulations, or orders.

69 FR at 53324. The relevant PIA, however, contains the same language (section 4, p. 7).

The commenter also suggested that the purposes for which the PIA states that the information is being collected conflicts with the sharing of the data with the FBI and other law enforcement agencies. One of the stated purposes of US–VISIT in the PIA is, however, to provide information on whether a person ''should be apprehended or detained for law enforcement action.'' DHS believes that this purpose is not inconsistent with sharing data with law enforcement entities. DHS also published a revised PIA prior to the interim rule becoming effective on September 30, 2004. 69 FR 57036 (Sept. 23, 2004). Further, DHS published additional PIAs as necessary for additional steps in the program.

Finally, the commenter stated that DHS should recognize a right of judicial review for individuals adversely affected by US–VISIT. DHS has interpreted ''adversely affected'' to refer to inaccurate or incorrect information maintained by US–VISIT or a determination of inadmissibility. These situations have been excluded from judicial review per DHS and Department of Justice (DOJ) policy for many years, and the implementation of US–VISIT does not warrant reopening this issue. Moreover, a determination that the alien is inadmissible is reviewable only pursuant to other statutory and regulatory provisions. See, e.g., section 240 of the INA (8 U.S.C. 1229a) (removal proceedings to deciding inadmissibility).

If an individual believes that there is an error in the information contained in DHS systems and collected through the US–VISIT process, US–VISIT has provided a three-step redress process to

have records reviewed and amended or corrected based on accuracy, relevancy, timeliness, or completeness. This process includes confirming that mismatches and other errors are not retained as part of an alien's record. The first opportunity for data correction occurs at the port of entry where the CBP officer has the ability to correct manually most biographic-related errors, such as name, date of birth, flight information, and document errors. All of this process occurs without any action required by the individual.

If the individual still has questions about the travel record, he or she may contact the US–VISIT Privacy Officer. As of March 2007, US–VISIT's Privacy Office has received 175 requests for redress from the more than 78.5 million encounters through the US–VISIT process. The US–VISIT Privacy Officer will review the travel record, amend or correct it as necessary, and send a response to the traveler describing the action taken within 20 business days of receipt of the inquiry. If the individual is not satisfied with the action taken, he or she can appeal to the DHS Chief Privacy Officer, who will review the appeal, conduct an investigation, and make a final decision on the action to be taken. This redress policy is published on the DHS Web site at *http://www.dhs.gov/us-visit.* The US–VISIT Privacy Officer can also be contacted by e-mail at *usvisitprivacy@dhs.gov.*

One commenter suggested that aliens sent to secondary inspection for purposes related to US–VISIT be included in a line separate and apart from those sent to secondary for any other purpose. Unfortunately, this comment cannot be adopted. At the time a traveler is sent to secondary, the CBP officer does not know definitively whether the reason is a mismatched fingerprint (false positive) or some other reason, such as a passport substitution. Initial studies have determined, however, that the incidence of a traveler being identified incorrectly as a ''watchlist hit'' by US–VISIT and being referred to secondary as a result is low, less than one-tenth of one percent.

Another commenter discussed the impact of ''false hits'' and the need to eliminate them. DHS is actively attempting to decrease the likelihood of a false match—where one alien is incorrectly matched to a watchlist hit—with frequent upgrades of our matching algorithms. Further, DHS is constantly seeking ways to reduce the incidence of false hits.

*K. Fees*

One commenter stated that it would be inappropriate for DHS to raise traveler fees to fund the US–VISIT program because the commenter believed that US–VISIT provides no direct benefit to the international traveler at the time of inspection. This comment misapprehends the source of funding for US–VISIT. US–VISIT is funded through appropriations. *See* Department of Homeland Security Appropriations Act, 2007, Public Law 109–295, tit. II, 120 Stat. 1355, 1357 (Oct. 4, 2006). The commenter is correct in citing one of the factors in determining whether a fee should be charged under the Chief Financial Officers Act, 31 U.S.C. 902(a)(8); the Independent Offices Appropriations Act, 1952, 31 U.S.C. 9701; and Office of Management and Budget Circular A–25, *User Charges* (Revised), section 6, 58 FR 38142 (July 15, 1993). DHS is not, however, considering establishing a fee to support funding of US–VISIT at this time, and the proposed rule did not suggest that such a fee was being considered.

## IV. Statutory and Regulatory Reviews

*A. Regulatory Flexibility Act*

The Regulatory Flexibility Act (RFA) (5 U.S.C. 605(b)), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996 (SBREFA), requires an agency to prepare, and make available to the public, a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). DHS has considered the impact of this rule on small entities and certifies that this rule will not have a significant economic impact on a substantial number of small entities. The individual aliens to whom this rule applies are not small entities as that term is defined in 5 U.S.C. 601(6). There is no change expected in any process as a result of this rule that would have a direct effect, either positive or negative, on a small entity. Accordingly, this rule will not have a significant economic impact on a substantial number of small entities, and DHS does not believe that US–VISIT processing will impede the free flow of travel and trade, especially travel and trade related to small entities.

*B. Executive Order 12866—Regulatory Planning and Review*

Under section 3(f) of Executive Order 12866, ''Regulatory Planning and Review'' (58 FR 51735 (Sept. 30, 1993) (as amended), DHS has determined that this final rule is a ''significant regulatory action'' because there is a significant public interest in issues pertaining to national security, immigration policy, and international travel and trade related to this final rule. Accordingly, this rule has been submitted to the Office of Management and Budget (OMB) for review and approval.

DHS currently processes through US–VISIT, using biometrics, all aliens entering the United States with a nonimmigrant visa or under the VWP at any air, sea, or land port of entry. US–VISIT biometric screening has resulted in the ability of DHS to take adverse action against more than 3800 aliens who posed a security threat to the United States or whose prior criminal actions rendered them ineligible for admission. This final rule will strengthen the ability of CBP officers to identify and take action against persons whose conduct renders them a security threat and therefore ineligible for admission. For example, DHS expects that, just as 3,382 nonimmigrants have been intercepted by DHS using the biometric screening of US–VISIT, additional individuals applying for admission with permanent resident cards or reentry permits will be found, through the comparison of biometric identifiers, to have violated the terms of their permanent resident status. Such violations may be the result of the commission of various crimes, tampering with the actual permanent resident card, or attempting to gain entry by assuming the identity of another LPR. Such violations could ultimately result in the loss of permanent resident status and possible removal from the United States or the exclusion or removal of an individual from the United States for fraud. Based on the number of permanent resident cards that are seized by CBP officers at ports of entry (approximately 15,000 in FY 2005) and the number of DHS Forensic Document Laboratory analyses each month (approximately 250), DHS estimates that US–VISIT biometric screening has the potential to identify a significant number of aliens each month in need of additional investigation prior to being admitted to the United States. In addition, based on the numbers of refugee travel documents (519) and immigrant visas (2,287) that CBP officers intercepted in attempts to use the documents fraudulently by aliens during FY 2005, US–VISIT estimates that interception of fraudulently used documents will increase with the introduction of biometric verification of identity.

DHS expects similar results—an increase in the number of aliens identified with possible admission-

related or immigration problems—by including the other groups of aliens highlighted in this final rule into the US–VISIT biometric screening protocol. For example, aliens holding immigrant visas have a six-month validity window from the date that the visa is issued to arrive in the United States. Events could occur during this time period that could result in the alien being found inadmissible to the United States, and such inadmissibility might only be discovered as the result of biometric comparisons. Over the last several years, over 365,000 aliens have entered the United States annually on immigrant visas.

Refugees and asylees—appearing before government officers in many instances without the benefit of even the most basic form of identity documentation—potentially pose a risk to public safety and security. In many instances, the United States Government is providing these individuals with a new identity. It is important to recognize that for refugees and asylees, US–VISIT will be verifying the identity of these aliens by comparing the biometrics collected at the time of an application for admission to the United States with the biometrics that were already collected during the initial refugee or asylee adjudication process.

Similarly, aliens paroled into the United States warrant the additional screening derived by using US–VISIT. While the majority of these aliens have been screened overseas in order to determine whether a parole should be granted, it is in the security interests of the United States to verify that the individuals who arrive at the border are the same individuals originally screened for parole. Approximately 150,000 aliens are granted parole into the United States each year.

The costs associated with implementation of this final rule for select travelers not otherwise exempt from US–VISIT requirements include an increase of approximately 15 seconds in initial inspection processing time (additional biometric collection) per applicant over the current average inspection time. No significant difference is anticipated in the processing of an alien traveling with a visa or under the VWP, as compared to any other alien who is exempted from the visa requirements. These ports of entry handle over 99% of all air and sea border traffic and over 95% of all land border traffic for these alien classifications. DHS, through CBP, has carefully monitored the impact of US–VISIT biometric data collection on the inspection of applicants for admission at air, sea, and land borders. At air and sea ports, internal studies have established that the biometric collection adds no more than 15 seconds on average to the inspection processing time at primary inspection. At land border ports, internal studies have shown positive results, and in some ports of entry the amount of time to process an alien for admission using the US–VISIT process was actually shorter than it had been previously due to the automation of data collection and implementation of a standard process. A close examination of the first three land ports of entry to begin US–VISIT biometric collection as part of admission found that the average processing time for applicants requiring a Form I–94 or Form I–94W actually decreased and sometimes resulted in significantly reduced processing times.

| Port of entry | Average form I–94 processing time before implementing US–VISIT | Average form I–94 processing time after implementing US–VISIT |
|---|---|---|
| Port Huron, MI | 11 minutes, 42 seconds | 9 minutes, 58 seconds. |
| Douglas, AZ | 4 minutes, 16 seconds | 3 minutes, 12 seconds. |
| Laredo, TX | 12 minutes, 10 seconds | 2 minutes, 18 seconds. |

Accordingly, DHS does not believe that US–VISIT processing impedes the free flow of travel and trade.

In addition, over time, the efficiency with which the process is employed will increase, and the process can be expected to further improve. DHS will not apply this rule to all aliens crossing land borders until technological advancements are identified, tested, and implemented to ensure that the land border commerce and traffic concerns are significantly mitigated. DHS may choose to implement this rule in the air and sea environment before the land border environment. As mentioned in the August 31, 2004, rule, DHS has developed a number of mitigation strategies, not unlike those already available to CBP under other conditions to mitigate delays. DHS, while not anticipating significant delays for travelers, will nevertheless develop procedures and strategies to deal with any significant delays that may occur through unanticipated and unusually heavy travel periods.

*C. Executive Order 13132—Federalism*

Executive Order 13132 requires DHS to develop a process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' Such policies are defined in the Executive Order to include rules that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

DHS has analyzed this final rule in accordance with the principles and criteria in the Executive Order and has determined that this rule would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, DHS has determined that this rule does not have federalism implications. This rule codifies procedures for the collection by the federal government of biometric identifiers from certain aliens seeking to enter or depart from the United States, for the purpose of improving the administration of federal immigration laws and for national security. States do not conduct activities with which the provisions of this specific rule would interfere.

*D. Unfunded Mandates Reform Act*

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, 109 Stat. 48 (March 22, 1995) (2 U.S.C. 1501 et seq.), requires federal agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a federal mandate likely to result in the expenditure by state, local, or tribal governments, in the aggregate, or by the private sector of more than $100 million in any one year (adjusted for inflation with 1995 base year). Before promulgating a rule for which a written statement is needed, section 205 of the UMRA requires DHS to identify and consider a reasonable number of regulatory alternatives and to adopt the least costly, most cost-

effective, or least burdensome option that achieves the objective of the rule. Section 205 allows DHS to adopt an alternative, other than the least costly, most cost-effective, or least burdensome option if DHS publishes an explanation with the final rule. This final rule will not result in the expenditure, by state, local or tribal governments, or by the private sector, of more than $100 million annually. Thus, DHS is not required to prepare a written assessment under the UMRA.

*E. Small Business Regulatory Enforcement Fairness Act*

This final rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 804, as this rule will not result in an annual effect on the economy of $100 million or more.

*F. Trade Impact Assessment*

The Trade Agreement Act of 1979, Public Law 96–39, tit. IV, secs. 401–403, 93 Stat. 144, 242 (July 26, 1979), as amended (19 U.S.C. 2531–2533), prohibits federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for United States standards. DHS has determined that this final rule will not create unnecessary obstacles to the foreign commerce of the United States and that any minimal impact on trade that may occur is legitimate in light of this rule's benefits for the national security and public safety interests of the United States. In addition, DHS notes that this effort considers and utilizes international standards concerning biometrics, and DHS will continue to consider these standards when monitoring and modifying the program.

*G. National Environmental Policy Act*

DHS is required to analyze the proposed actions contained in this final rule for purposes of complying with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 et seq., and Council on Environmental Quality (CEQ) regulations, 40 CFR parts 1501–1508. An agency is not required to prepare either an environmental impact statement (EIS) or environmental assessment (EA) under NEPA if in fact the proposed action falls within a categorical exclusion, and no extraordinary circumstances preclude use of the categorical exclusion. 40 CFR 1508.4. DHS analyzed the interim final rule published on August 31, 2004, and concluded that there were no factors in the expansion of US–VISIT pursuant to this final rule that would limit the use of a categorical exclusion under 28 CFR part 61 App. C, as authorized under 6 U.S.C. 552(a). In the July 27, 2006 NPRM, DHS stated that it would analyze the environmental impacts to conduct the appropriate level of analysis in accordance with NEPA. DHS has done such an analysis and has concluded that there are no factors in the expansion of US–VISIT that would limit the use of a categorical exclusion, for similar reasons—that the impact to the land border ports of entry would be largely unnoticed since US–VISIT processing would take place in secondary inspection only. In addition, DHS will not implement US–VISIT processing at primary inspection locations at land border ports of entry without at least one additional round of notice and comment rulemaking. Since this final rule makes only minor changes to the existing regulations, and because DHS will not expand US–VISIT processing in the primary environment at land border ports of entry without additional notice and comment rulemaking, DHS finds that this final rule is also categorically excluded from further environmental documentation.

*H. Paperwork Reduction Act*

This final rule establishes the process by which DHS will require certain aliens who cross the borders of the United States to provide fingerprints, photograph(s), and potentially other biometric identifiers upon their arrival and departure at designated ports. These requirements constitute an information collection under the Paperwork Reduction Act (PRA), 44 U.S.C. 507 et seq. OMB, in accordance with the Paperwork Reduction Act, has previously approved this information collection for use. The OMB Control Number for this collection is 1600–0006.

Since this rule provides a mechanism for the addition of new aliens by Notice in the **Federal Register** who may be photographed and fingerprinted and who may be required to provide other biometric identifiers, DHS has submitted the required Paperwork Reduction Change Worksheet (OMB–83C) to OMB reflecting the increase in burden hours, and OMB has approved the changes.

*I. Public Privacy Interests*

As discussed in the January 5, 2004 (69 FR 468) and August 31, 2004 (69 FR 53318) interim final rules and the July 27, 2006 NPRM (71 FR 42605), US–VISIT records will be protected consistent with all applicable privacy laws and regulations. See also Parts II.K and III.E. Personal information will be kept secure and confidential and will not be discussed with, nor disclosed to, any person within or outside US–VISIT other than as authorized by law and as required for the performance of official duties. In addition, careful safeguards, including appropriate security controls, will ensure that the data are not used or accessed improperly. The DHS Chief Privacy Officer will review pertinent aspects of the program to ensure that these proper safeguards and security controls are in place. The information will also be protected in accordance with the DHS published privacy policy for US–VISIT. Affected persons will have a three-stage process for redress if there is concern about the accuracy of information. An individual may request a review or change, or a DHS officer may determine that an inaccuracy exists in a record. A DHS officer can modify the record. If the individual remains dissatisfied with this response, he or she can request assistance from the US–VISIT Privacy Officer and can ask that the DHS Privacy Officer review the record and address any remaining concerns.

The DHS Privacy Office will advise US–VISIT to further ensure that the information collected and stored in IDENT and other systems associated with US–VISIT is being properly protected under privacy laws and guidance. US–VISIT also has a program-dedicated Privacy Officer to handle specific inquiries and to provide additional advice concerning the program.

Finally, DHS will maintain secure computer systems that will ensure that the confidentiality of an individual's personal information is maintained. In doing so, DHS and its information technology personnel will comply with all laws and regulations applicable to government systems, such as the Federal Information Security Management Act of 2002, Title X, Public Law 107–296, 116 Stat. 2259–2273 (Nov. 25, 2002) (codified in scattered sections of titles 6, 10, 15, 40, and 44 U.S.C.); Information Management Technology Reform Act (Clinger-Cohen Act), 40 U.S.C. 11101 et seq.; Computer Security Act of 1987, 40 U.S.C. 1441 et seq. (as amended); Government Paperwork Elimination Act, 44 U.S.C. 101, 3504; and Electronic Freedom of Information Act of 1996, 5 U.S.C. 552.

**List of Subjects**

*8 CFR Part 215*

Administrative practice and procedure, Aliens, Travel restrictions.

*8 CFR Part 235*

Aliens, Immigration, Registration, Reporting and recordkeeping requirements.

■ Accordingly, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

## PART 215—CONTROL OF ALIENS DEPARTING FROM THE UNITED STATES

■ 1. The authority citation for part 215 continues to read as follows:

**Authority:** 8 U.S.C. 1104; 1184; 1185 (pursuant to E.O. 13323, published January 2, 2004), 1365a and note, 1379, 1731–32.

■ 2. Section 215.8 is amended by revising paragraph (a)(1) to read as follows:

**§ 215.8 Requirements for biometric identifiers from aliens on departure from the United States.**

(a)(1) The Secretary of Homeland Security, or his designee, may establish pilot programs at land border ports of entry, and at up to fifteen air or sea ports of entry, designated through notice in the **Federal Register**, through which the Secretary or his delegate may require an alien admitted to or paroled into the United States, other than aliens exempted under paragraph (a)(2) of this section or Canadian citizens under section 101(a)(15)(B) of the Act who were not otherwise required to present a visa or have been issued Form I–94 or Form I–95 upon arrival at the United States, who departs the United States from a designated port of entry, to provide fingerprints, photograph(s) or other specified biometric identifiers, documentation of his or her immigration status in the United States, and such other evidence as may be requested to determine the alien's identity and whether he or she has properly maintained his or her status while in the United States.

* * * * *

## PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

■ 3. The authority citation for part 235 continues to read as follows:

**Authority:** 8 U.S.C. 1101 and note, 1103, 1183, 1185 (pursuant to E.O. 13323 published on January 2, 2004), 1201, 1224, 1225, 1226, 1228, 1365a note, 1379, 1731–32.

■ 4. Section 235.1 is amended by revising paragraph (f)(1)(ii) to read as follows:

**§ 235.1 Scope of examination.**

**BILLING CODE 9111–97–P**

## FEDERAL RESERVE SYSTEM

## 12 CFR Part 229

**[Regulation CC; Docket No. R–1344]**

## Availability of Funds and Collection of Checks

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Final rule; technical amendment.

**SUMMARY:** The Board of Governors (Board) is amending the routing number guide to next-day availability checks and local checks in Regulation CC to delete the reference to the head office of the Federal Reserve Bank of St. Louis and to reassign the Federal Reserve routing symbols currently listed under that office to the head office of the Federal Reserve Bank of Atlanta. These amendments reflect the restructuring of check-processing operations within the Federal Reserve System.

**DATES:** The final rule will become effective on February 21, 2009.

**FOR FURTHER INFORMATION CONTACT:** Jeffrey S. H. Yeganeh, Financial Services Manager (202/728–5801), or Joseph P. Baressi, Financial Services Project Leader (202/452–3959), Division of Reserve Bank Operations and Payment Systems; or Sophia H. Allison, Senior Counsel (202/452–3565), Legal Division. For users of Telecommunications Devices for the Deaf (TDD) only, contact 202/263–4869.

**SUPPLEMENTARY INFORMATION:** Regulation CC establishes the maximum period a depositary bank may wait between receiving a deposit and making the deposited funds available for withdrawal.[1] A depositary bank generally must provide faster availability for funds deposited by a ''local check'' than by a ''nonlocal check.'' A check is considered local if it is payable by or at or through a bank located in the same Federal Reserve check-processing region as the depositary bank.

Appendix A to Regulation CC contains a routing number guide that assists banks in identifying local and nonlocal banks and thereby determining the maximum permissible hold periods for most deposited checks. The appendix includes a list of each Federal Reserve check-processing office and the first four digits of the routing number, known as the Federal Reserve routing symbol, of each bank that is served by that office for check-processing purposes. Banks whose Federal Reserve routing symbols are grouped under the same office are in the same check-processing region and thus are local to one another.

On February 21, 2009, the Reserve Banks will transfer the check-processing operations of the head office of the Federal Reserve Bank of St. Louis to the head office of the Federal Reserve Bank of Atlanta. As a result of this change, some checks that are drawn on and deposited at banks located in the St. Louis and Atlanta check-processing regions and that currently are nonlocal checks will become local checks subject to faster availability schedules. To assist banks in identifying local and nonlocal checks and making funds availability decisions, the Board is amending the list of routing symbols in appendix A associated with the Federal Reserve Banks of St. Louis and Atlanta to reflect the transfer of check-processing operations from the head office of the

[1] For purposes of Regulation CC, the term ''bank'' refers to any depository institution, including commercial banks, savings institutions, and credit unions.

Federal Reserve Bank of St. Louis to the head office of the Federal Reserve Bank of Atlanta. To coincide with the effective date of the underlying check-processing changes, the amendments to appendix A are effective February 21, 2009. The Board is providing notice of the amendments at this time to give affected banks ample time to make any needed processing changes. Early notice also will enable affected banks to amend their availability schedules and related disclosures if necessary and provide their customers with notice of these changes.[2]

**Administrative Procedure Act**

The Board has not followed the provisions of 5 U.S.C. 553(b) relating to notice and public participation in connection with the adoption of the final rule. The revisions to appendix A are technical in nature and are required by the statutory and regulatory definitions of ''check-processing region.'' Because there is no substantive change on which to seek public input, the Board has determined that the § 553(b) notice and comment procedures are unnecessary. In addition, the underlying consolidation of Federal Reserve Bank check-processing offices involves a matter relating to agency management, which is exempt from notice and comment procedures.

**Paperwork Reduction Act**

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506; 5 CFR 1320 Appendix A.1), the Board has reviewed the final rule under authority delegated to the Board by the Office of Management and Budget. The technical amendment to appendix A of Regulation CC will delete the reference to the head office of the Federal Reserve Bank of St. Louis and reassign the routing symbols listed under that office to the head office of the Federal Reserve Bank of Atlanta. The depository institutions that are located in the affected check-processing regions and that include the routing numbers in their disclosure statements would be required to notify customers of the resulting change in availability under § 229.18(e). However, all paperwork collection procedures associated with Regulation CC already are in place, and the Board accordingly anticipates that no additional burden will be imposed as a result of this rulemaking.

[2] Section 229.18(e) of Regulation CC requires that banks notify account holders who are consumers within 30 days after implementing a change that improves the availability of funds.

**List of Subjects in 12 CFR Part 229**

Banks, Banking, Reporting and recordkeeping requirements.

**Authority and Issuance**

■ For the reasons set forth in the preamble, the Board is amending 12 CFR part 229 to read as follows:

## PART 229—AVAILABILITY OF FUNDS AND COLLECTION OF CHECKS (REGULATION CC)

■ 1. The authority citation for part 229 continues to read as follows:

**Authority:** 12 U.S.C. 4001–4010, 12 U.S.C. 5001–5018.

■ 2. The Sixth and Eighth Federal Reserve District routing symbol lists in appendix A are amended by removing the headings and listings for the Eighth Federal Reserve District and revising the listings for the Sixth Federal Reserve District to read as follows:

**Appendix A to Part 229—Routing Number Guide to Next-Day Availability Checks and Local Checks**

**BILLING CODE 6210–01–P**

## CONSUMER PRODUCT SAFETY COMMISSION

### 16 CFR Part 1303

### Ban of Lead-Containing Paint and Certain Consumer Products Bearing Lead-Containing Paint

**AGENCY:** Consumer Product Safety Commission.

**ACTION:** Final rule.

**SUMMARY:** The Consumer Product Safety Commission (CPSC or Commission) is amending its regulations concerning the ban of lead-containing paint and certain consumer products bearing lead-containing paint.

**DATES:** This rule is effective on August 14, 2009.

**FOR FURTHER INFORMATION CONTACT:** Hyun Sun Kim, Office of the General Counsel, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, Maryland 20814, email: *hkim@cpsc.gov.*

**SUPPLEMENTARY INFORMATION:** The Commission's regulations at 16 CFR 1303.1 currently define as ''banned hazardous products'' certain consumer products, including paint and similar surface-coating materials, toys and other articles intended for use by children, and certain furniture articles that are or bear lead-containing paint, that is paint in which the lead content is in excess of 0.06 percent of the weight of the total nonvolatile content of the paint or the weight of the dried paint film. On August 14, 2008, Congress enacted the Consumer Product Safety Improvement Act of 2008 (CPSIA), Public Law 110–314. Section 101(f)(1) of CPSIA mandates that 0.06 percent lead limit of 16 CFR 1303.1 be reduced to 0.009 percent, effective August 14, 2009. Accordingly, the Commission amends 16 CFR 1303.1(a) by substituting ''0.009 percent'' for ''0.06 percent,'' to become effective on that date. In addition, section 101(g) provides that any ban or rule promulgated under 16 CFR 1303.1 shall be considered a regulation promulgated under or for the enforcement of section 2(q) of the Federal Hazardous Substances Act (15 U.S.C. 1261(q)). Section 1303.1 is amended accordingly.

**List of Subjects in 16 CFR Part 1303**

Consumer protection, Hazardous substances, Infants and children, Labeling, Lead poisoning.

■ Accordingly, 16 CFR part 1303 is amended as follows:

## PART 1303—BAN LEAD-CONTAINING PAINT AND CERTAIN CONSUMER PRODUCTS BEARING LEAD-CONTAINING PAINT

■ 1. The authority citation for part 1303 is revised to read as follows:

**Authority:** Secs. 8, 9, 86 Stat. 1215–1217, as amended 90 Stat. 506, 122 Stat. 3016, (15 U.S.C. 2057, 2058), Sec. 101, 122 Stat. 3016.

■ 2. Amend § 1303.1 by revising paragraphs (a) introductory text and (c) and adding paragraph (d) to read as follows:

**§ 1303.1 Scope and application.**

(a) In this part 1303, the Consumer Product Safety Commission declares that paint and similar surface-coating materials for consumer use that contain lead or lead compounds and in which the lead content (calculated as lead metal) is in excess of 0.06 percent (0.06 percent is reduced to 0.009 percent effective August 14, 2009 as mandated by Congress in section 101(f) of the Consumer Product Safety Improvement Act of 2008, Pub. L. 110–314) of the weight of the total nonvolatile content of the paint or the weight of the dried paint film (which paint and similar surface-coating materials are referred to hereafter as ''lead-containing paint'') are banned hazardous products under sections 8 and 9 of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2057, 2058. The following consumer products are also declared to be banned hazardous products:

* * * * *

(c) The Commission has issued the ban because it has found that there is an unreasonable risk of lead poisoning in children associated with lead content of over 0.06 percent in paints and coatings to which children have access and that no feasible consumer product safety standard under the CPSA would adequately protect the public from this risk. The 0.06 percent is reduced to 0.009 percent effective August 14, 2009 as mandated by Congress in section 101(f) of the Consumer Product Safety Improvement Act of 2008, Public Law 110–314.

(d) Any ban or rule promulgated under 16 CFR 1303.1 shall be considered a regulation of the Commission promulgated under or for the enforcement of section 2(q) of the Federal Hazardous Substances Act (15 U.S.C. 1261(q)).

■ 3. Amend § 1303.2 by revising paragraph (b)(2) to read as follows:

**§ 1303.2 Definitions.**

* * * * *

(b) * * *

(2) *Lead-containing paint* means paint or other similar surface coating materials containing lead or lead compounds and in which the lead content (calculated as lead metal) is in excess of 0.06 percent (0.06 percent is reduced to 0.009 percent effective August 14, 2009) by weight of the total nonvolatile content of the paint or the weight of the dried paint film.

* * * * *

Dated: December 15, 2008.

**Todd A. Stevenson,**

*Secretary, Consumer Product Safety Commission.*

[FR Doc. E8–30238 Filed 12–18–08; 8:45 am]

**BILLING CODE 6355–01–P**

## CONSUMER PRODUCT SAFETY COMMISSION

### 16 CFR Part 1500

### Exemption From Classification as Banned Hazardous Substance; Exemption for Boston Billow Nursing Pillow and Substantially Similar Nursing Pillows

**AGENCY:** Consumer Product Safety Commission.

**ACTION:** Final rule.

**SUMMARY:** The Commission is issuing a rule to exempt the Boston Billow Nursing Pillow and substantially similar nursing pillows from the Commission's regulations banning infant cushions/pillows set forth in the Commission's regulations at 16 CFR 1500.18(a)(16)(i).

**DATES:** The rule becomes effective on December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Suad Wanna-Nakamura, Directorate for Health Sciences, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, Maryland 20814; telephone (301) 504–7252; e-mail *snakamura@cpsc.gov.*

**SUPPLEMENTARY INFORMATION:**

**A. Background**

Between 1985 and 1992, there were 35 infant deaths associated with the use of infant cushions/pillows (also known, among other names, as ''baby beanbag pillows'' and ''beanbag cushions''). In almost all of the cases where the infant's position could be determined, the infant was in a prone, face down, position. 55 FR 42202. The Commission initiated a rulemaking proceeding to determine whether a ban was necessary to address an unreasonable risk of injury and death associated with these types of infant cushions/pillows. Due to the number of infant deaths associated with these products, the Commission proposed a rule to ban infant cushions/pillows with certain characteristics. 56 FR 32352. On June 23, 1992, the Commission issued a rule codified at 16 CFR 1500.18(a)(16)(i), banning infant cushions/pillows that: (1) Have a flexible fabric covering; (2) are loosely filled with a granular material, including but not limited to, polystyrene beads or pellets; (3) are easily flattened; (4) are capable of conforming to the body or face of an infant; and (5) are intended or promoted for use by children under one year of age. 57 FR 27912.

**B. Petition**

On July 17, 2005, Boston Billows, Inc. (Boston Billows) submitted a petition requesting an amendment to 16 CFR 1500.18(a)(16)(i)(A)–(E) to allow an exception to the ban. The petitioner is the manufacturer of the Boston Billow Nursing Pillow, a granularly filled, C-shaped pillow intended for use by mothers when breastfeeding.

**C. The ANPR**

The Commission issued an advance notice of proposed rulemaking (ANPR) on September 27, 2006, to assess whether a rulemaking was necessary to address any unreasonable risk of injury or death which may be associated with infant cushions/pillows. 71 FR 56418. In addition to the Boston Billow Nursing Pillow, which met the criteria of the ban, there appeared to be a proliferation of other infant cushions/pillows or pillow-like products in the marketplace, including nursing pillows which met some, but not all, of the criteria set forth in the ban. After review of the comments, incident reports and other available information, the Commission determined there was insufficient data or product information on infant cushions or pillow-like products, other than the Boston Billow Nursing Pillow, to proceed with further rulemaking on those products at this time. Accordingly, the Commission issued a notice in the **Federal Register** on September 3, 2008, terminating the rulemaking on infant cushions/pillows or pillow-like products intended for use by infants, other than with respect to the Boston Billow Nursing Pillow and substantially similar nursing pillows. 73 FR 51386.

**D. The Proposed Exemption**

The ban on infant cushions/pillows was promulgated pursuant to the Federal Hazardous Substances Act (FHSA), 15 U.S.C. 1261 *et seq.* Section 2(f)(1)(D) of the FHSA defines ''hazardous substance'' to include any toy or other article intended for use by children which the Commission determines, by regulation, presents an electrical, mechanical, or thermal hazard. 15 U.S.C. 1261(f)(1)(D). An article may present a mechanical hazard if its design or manufacture presents an unreasonable risk of personal injury or illness during normal use or when subjected to reasonably foreseeable damage or abuse. 15 U.S.C. 1261(s). To grant Boston Billows' request for an exemption, the Commission must find that the Boston Billow Nursing Pillow does not present an unreasonable risk of injury from the mechanical hazard that the banning rule was intended to prevent.

The Commission preliminarily found that based on the incident data on infant cushions and nursing pillows for the period of January 1992 through May 2008, there have been no reported deaths associated with infant cushions meeting the definition of a banned infant cushion/pillow since 1992. However, there were 531 infant deaths associated with pillows and cushions that did not meet the definition of a banned infant cushion/pillow. The majority of these incidents involved adult pillows and sofa cushions which possessed many of the same characteristics as the banned bean bag cushions. These products have soft covers and flexible filling material that can conform to an infant's face. A variety of pillow types and cushions with different types of filling including foam, feathers, and polyester were involved in the incidents.

The Commission also preliminarily found that in the vast majority of the 531 deaths associated with pillows and cushions, the infants were found in the prone position, lying on top of the pillow/cushion or with the head or neck propped on the pillow/cushion. A quarter of the deaths occurred in infant cribs, bassinets, cradles and playpens, while the rest occurred outside the normal infant sleep areas, such as on adult beds, on sofas, or on the floor. As with the banned infant bean bag cushion, these pillows and cushions can cause death by suffocation/asphyxiation when an infant is placed to sleep face down on them. The Commission preliminarily determined that the analysis of the data does not reveal an increased risk due to any specific type of pillow or cushion filling, but rather it was the softness and malleability which are inherent properties of pillows that are the primary risk factors. Although the comparative risk of suffocation based upon filling was unknown, the greatest common risk factor was that infants were found in the prone position, face down, in the majority of the 531 deaths.

In light of the ongoing risks posed by infant cushions/pillows when used in the sleep environment, the Commission found no justification for repealing the ban on infant cushions/pillows at this time. However, nursing pillows perform a related but different function than infant cushions/pillows. The purpose of nursing pillows is to provide a place for the mother to rest her arms while breastfeeding. The nursing pillow may also serve to give moldable but firm support to enhance comfort during extended periods when changing position during breastfeeding is difficult. The main risk of suffocation arises if the nursing pillow enters into the infant sleeping environment because suffocation can occur if children fall asleep on them in the prone position. However, an infant placed to sleep on any pillow or cushion, including a nursing pillow, in the prone position, is at risk for suffocation, regardless of size, type, shape of pillow or filling. The Commission's preliminary review showed that when used for its intended purpose—nursing—the risk of infant suffocation on nursing pillows, including the Boston Billow Nursing Pillow, is very low. Accordingly, based on the staff's assessment, the Commission issued a notice of proposed rulemaking (NPR) proposing an exemption for the Boston Billow Nursing Pillow and substantially similar nursing pillows that would otherwise be banned under the Commission's regulations banning infant cushions/pillows. 73 FR 51384.

**E. Comments on the NPR**

Seven comments were received on the NPR from board certified lactation consultants, all in support of an exemption of the Boston Billow Nursing Pillow. According to the commenters, the unique design and flexibility of the Boston Billow Nursing Pillow provides for better positioning and comfort of breastfeeding mothers, particularly mothers who have delivered by Caesarean section, had post-delivery surgery, or were nursing premature infants.

**F. The Final Rule**

Based on the staff's assessment, the incident data, and the comments, the Commission concludes that an exemption from the ban on infant cushions/pillows should be granted for the Boston Billow Nursing Pillow and substantially similar nursing pillows. A substantially similar nursing pillow is a pillow designed to be used only as a nursing aide for breastfeeding mothers. For example, one that is tubular in form, C- or crescent-shaped to fit around a nursing mother's waist, round in circumference and filled with granular material. An estimated 900,000 new nursing pillows are sold annually and nursing pillows are used by approximately 1.8 million mothers. Exempting the Boston Billow Nursing Pillow would increase consumer choice by allowing consumers an alternative to the nursing pillows already in the marketplace.

However, the Commission continues to emphasize that prone sleeping is a high risk factor for infant suffocation on cushions/pillows. The limited physical and developmental capabilities of infants render them susceptible to danger from suffocation in certain sleeping environments. Physiological abnormalities and delays in the development of vital systems can further hamper an infant's ability to react to a hazardous condition. Infants who are not placed on their backs are especially at risk for suffocation on any type of soft pillow, regardless of the type of filling.

In 1992, the American Academy of Pediatrics, in an effort to reduce the risk of Sudden Infant Death Syndrome (SIDS), recommended that babies always be placed on their backs when put to sleep. As a result of this campaign, SIDS deaths between 1992 and 2004 in the United States decreased from 5,000 per year to 2,246 per year (based on vital statistics data of the United States). Although there has been a steady decrease in SIDS deaths, the Commission has found that there has not been a similar decrease in infant deaths associated with pillows and cushions. Even though the recommendation to place infants to sleep on their backs is being promoted, the Commission believes that the data indicates that there are still a significant number of people who continue to place infants to sleep in the prone position. For this reason, the Commission intends to increase its dissemination of information targeted at the population of caregivers whose infants are not placed to sleep in the supine position. Increased compliance with the recommendation for supine sleep, as well as continued vigilance in ensuring a safe sleeping environment, would have benefits in reducing the risk of

infant suffocation deaths caused by adult pillows, sofa cushions, and other pillows as well as further reducing incidents involving SIDS.

**G. Effective Date**

This rule exempts the Boston Billow Nursing Pillow and substantially similar nursing pillows that would otherwise be banned under the FHSA. Because the rule grants an exemption, it is not subject to the requirement under the Administrative Procedure Act (APA) that a rule must be published 30 days before it takes effect. 5 U.S.C. 553(d)(1). The rule lifts an existing restriction and allows a product not previously permitted. Thus, the Commission believes it is appropriate for the rule to become effective upon publication in the **Federal Register**.

**H. Impact on Small Businesses**

The NPR discussed the Commission assessment of the impact that a rule to exempt the Boston Billow Nursing Pillow and similar nursing pillows might have on small businesses. There are approximately 15 firms that either manufacture or import nursing pillows. Most, if not all, firms are considered to be small businesses. Because the exemption is deregulatory in nature and will not increase production costs on businesses, the Commission concludes that the proposed amendment exempting the Boston Billow Nursing Pillow and substantially similar nursing pillows would not have a significant impact on a substantial number of small entities.

**I. Environmental Considerations**

The National Environmental Policy Act and the Council on Environmental Quality Act regulations, and CPSC procedures for environmental review require the Commission to assess the possible environmental effects associated with the proposed exemption. As discussed in the NPR, a proposed exemption for nursing pillows is expected to have little or no potential for affecting the human environment, and is considered to fall within the ''categorical exclusions'' under the CPSC regulations that cover its environmental review procedures (see 16 CFR 1021.5(c)(1)). The Commission concludes that the rule would have no adverse effect on the environment and thus, no environmental assessment or environmental impact statement is required in this proceeding.

**J. Executive Orders**

According to Executive Order 12988 (February 5, 1996), agencies must state in clear language the preemptive effect, if any, of new regulations. The preemptive effect of this exemption is stated in section 18 of the FHSA. 15 U.S.C. 1261n.

**List of Subjects in 16 CFR Part 1500**

Consumer protection, Hazardous materials, Hazardous substances, Imports, Infants and children, Labeling, Law enforcement, and Toys.

**K. Conclusion**

■ For the reasons stated above, the Commission amends title 16 of the Code of Federal Regulations as follows:

## PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES: ADMINISTRATION AND ENFORCEMENT REGULATIONS

■ 1. The authority for part 1500 continues to read as follows:

**Authority:** 15 U.S.C. 1261–1278.

■ 2. Amend section 1500.18 by revising paragraph (a)(16)(i) introductory text to read as follows:

**§ 1500.18 Banned toys and other banned articles intended for use by children.**

* * * * *

(a) * * *

(16) * * *

(i) Any article known as an ''infant cushion'' or ''infant pillow,'' and any other similar article, which has all of the following characteristics (But see § 1500.86(a)(9)):

* * * * *

■ 3. Section 1500.86 is amended by adding a new paragraph (a)(9) to read as follows:

**§ 1500.86 Exemptions from classification as banned toy or other banned article for use by children.**

(a) * * *

(9) Boston Billow Nursing Pillow and substantially similar nursing pillows that are designed to be used only as a nursing aide for breastfeeding mothers. For example, are tubular in form, C- or crescent-shaped to fit around a nursing mother's waist, round in circumference and filled with granular material.

Dated: December 15, 2008.

## DEPARTMENT OF TRANSPORTATION

### Federal Highway Administration

### 23 CFR Parts 620, 635, 636, and 710

**[FHWA Docket No. FHWA–2008–0136]**

**RIN 2125–AF29**

## Fair Market Value and Design-Build Amendments

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The FHWA is revising its regulations to require State departments of transportation (DOT) and other public authorities to obtain fair market value as part of any concession agreement involving a facility acquired or constructed with Federal-aid highway funds. Additionally, the FHWA is revising its regulations to permit public agencies to compete against private entities for the right to obtain a concession agreement involving such facilities. Also, the FHWA is revising its design-build regulations to permit contracting agencies to incorporate unsuccessful offerors' ideas into a design-build contract upon the acceptance of a stipend.

**DATES:** *Effective Dates:* This rule is effective January 18, 2009.

**FOR FURTHER INFORMATION CONTACT:** Mr. Marcus J. Lemon, Chief Counsel, Mr. Michael Harkins, Office of Chief Counsel, or Mr. Steve Rochlis, Office of Chief Counsel, (202) 366–0740, Federal Highway Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., *e.t.,* Monday through Friday, except Federal holidays.

**SUPPLEMENTARY INFORMATION:**

**Electronic Access and Filing**

Internet users may access this document, the notice of proposed rulemaking (NPRM), and all comments received by the U.S. DOT by visiting *http://www.regulations.gov.* It is available 24 hours each day, 365 days each year. Electronic submission and retrieval help and guidelines are available under the help section of the Web site.

An electronic copy of this document may also be downloaded by accessing the Office of the Federal Register's home page at: *http://www.archives.gov* or the Government Printing Office's Web page at *http://www.gpoaccess.gov/nara.*

**I. Background**

In recent years, some State and local governments have entered into

concession agreements to provide for the long-term development, construction, operation, and maintenance of a public highway. Under these agreements, which are typically in the form of lease agreements, the State or local government grants the right to a third party concessionaire to collect revenues or fees from the use of a public highway for a certain period of time in return for compensation, usually in the form of a large up-front lease payment or structured payments that are payable over the life of the agreement.

Current FHWA regulations do not contemplate the use of concession agreements. While 23 U.S.C. 156 requires State and local agencies to charge fair market value (FMV) for the sale, lease, or use of any real property acquired with funding made available under the Highway Trust Fund, it excludes sales, leases, or uses for utility use and occupancy or for a title 23, United States Code, eligible transportation project. In the context of concession agreements, the FHWA is concerned that this broad exception for transportation projects could be construed to exempt concession agreements from the fair market value requirement, which is contrary to the FHWA interpretation of 23 U.S.C. 156. Moreover, FHWA regulations at 23 CFR 620.203(j) specifically provide that State DOTs need not charge a public agency for a relinquishment of a Federal-aid facility when the facility will continue to operate as a public highway. This final rule confirms the application of the FMV requirement of 23 U.S.C. 156 to concession agreements. Additionally, this final rule amends the FHWA design-build regulations to permit State DOTs to incorporate the ideas of unsuccessful offerors to a design-build contract upon the acceptance of a stipend by the offeror.

As will be discussed in more detail below, a number of commenters were opposed to the adoption of the FMV requirements proposed in the NPRM. While some commenters were fundamentally opposed to the use of concession agreements in general, most of the comments expressing opposition to the adoption of the FMV requirements appear based on the belief that the proposed regulations would have forced a State to use a public-private partnership when that State wishes to utilize a public toll agency. This was not the intent. The purpose of these regulations is merely to implement the FMV requirement of 23 U.S.C. 156 whenever a federally funded highway is subject to a concession agreement. Given the requirement of 23 U.S.C. 156, and the increased use of concession agreements, it is important to ensure that these transactions result in a fair return for the taxpayers' investment.

The FHWA appreciates all of the comments received in response to the NPRM and has made a number of changes to the proposed regulations. These changes ensure the States are afforded maximum discretion in choosing to transfer highways to other public entities and the broadest flexibility in determining what constitutes FMV whenever the State chooses to utilize a concession. These changes are discussed in more detail below.

## II. Requests for Extension of the Comment Period

The FHWA received 8 requests to extend the comment period established in the NPRM, which ended on November 7, 2008. These requests came from the International Bridge, Tunnel and Turnpike Association (IBTTA), Texas Department of Transportation (TxDOT), Texas State Senator Robert Nichols, Harris County Judge Ed Emmett, Miami-Dade Expressway Authority, Georgia State Road and Tollway Authority (SRTA), Texas Council of Engineering Companies (TCEC), and American Highway Users Alliance (AHUA). One commenter, Robert W. Poole, Jr., supported the November 7, 2008, deadline. After considering the requests from the IBTTA and TxDOT, the FHWA extended the comment period until November 21, 2008. Notice of this extension was published in the **Federal Register** on November 13, 2008, at 73 FR 67117, and posted in the rulemaking docket on November 10, 2008. Since all other remaining requests for extension appear to relate to the original November 7, 2008, deadline, the FHWA deems the extension to November 21, 2008, to be responsive to these requests.

## III. Summary of Comments Received to the Notice of Proposed Rulemaking (NPRM)

The FHWA published its NPRM on October 8, 2008, at 73 FR 58908. In response to the NPRM, the FHWA received 34 comments. The commenters include State DOTs, toll authorities, elected officials, associations, public interest groups, contractors, and individuals. The majority of the comments regarding the fair market value (FMV) requirements were negative, and 8 commenters urged the FHWA to rescind the rulemaking. In general, the main objection to the adoption of the FMV requirements appears to be the perception that the FHWA is attempting to displace State and local decision-making. However, the majority of the comments regarding the design-build amendments were mainly supportive. The FHWA considered each of these comments in adopting this final rule.

The majority of the comments addressed several common issues. The following discussion summarizes the major comments submitted to the docket by the commenters on the NPRM, notes where and why changes have been made to the rule, and, where relevant, explains why particular recommendations or suggestions have not been adopted.

## IV. Discussion of NPRM Comments Concerning Fair Market Value Requirements

### *A. Legal Interpretation of 23 U.S.C. 156*

The American Association of State Highway Transportation Officials (AASHTO), the American Trucking Associations (ATA), the Pennsylvania Turnpike Commission (PTC), and Michael Baker Jr., Inc. (Baker), each commented that the FHWA's proposed regulation requiring FMV for concession agreements overrides an express statutory exemption to the FMV requirement in 23 U.S.C. 156. Specifically, AASHTO, PTC, and Baker argue that the FHWA's proposed regulation requiring FMV for concession agreements overrides an express statutory exemption for transportation projects. Section 156(a) of title 23, United States Code, provides ''[A] State shall charge, at a minimum, fair market value for the sale, use, lease, or lease renewal (other than for utility use and occupancy *or for a transportation project eligible for assistance under this title*) of real property acquired with Federal assistance made available from the Highway Trust Fund (other than the Mass Transit Account).'' (Emphasis added).

The FHWA respectfully disagrees with AASHTO's, PTC's, and Baker's analyses. A concession agreement is not a title 23, United States Code, eligible transportation project. Rather, a concession agreement is a transaction under which a public entity leases a public highway to a third party and grants the third party the authority to collect revenues from the operation of the highway in return for compensation to be paid to the public entity. The FHWA does not believe that such a lease transaction constitutes a transportation project within the meaning of the ''transportation project'' exemption in 23 U.S.C. 156(a). There is

certainly nothing related to the transactions costs, in and of themselves, that would be title 23, United States Code, eligible. Moreover, 23 U.S.C. 101(a)(21) defines ''project'' to mean ''[a]n undertaking to construct a particular portion of a highway, or if the context so implies, the particular portion of a highway so constructed or any other undertaking eligible for assistance under this title.'' Thus, the term ''transportation project'' is limited to the undertaking to construct a highway. While a concession agreement may provide for certain title 23, United States Code, eligible improvements to be made on the facility, the FHWA believes that the improvements to be made, which may be title 23, United States Code, eligible, must be separated from the lease whenever a concession agreement is involved for purposes of 23 U.S.C. 156.

Also, the ATA argues that the FMV requirement of 23 U.S.C. 156 applies only to non-highway uses of right-of-way (ROW) airspace. The FHWA agrees that 23 U.S.C. 156, as originally enacted at section 126 of the Surface Transportation and Uniform Relocation Assistance Act (STURAA) of 1987, Public Law 100–17, 101 Stat. 132, 167 (1987), limited the application of the statute to highway right-of-way airspace. However, in section 1205 of the Transportation Equity Act for the 21st Century (TEA–21), Public Law 105–178, 112 Stat. 107, 184 (1998), Congress amended 23 U.S.C. 156 to expand the application of the statute to all real property acquired with Federal assistance, not just the airspace. Additionally, while reference to non-highway uses to the application of the FMV requirement of 23 U.S.C. 156, as it was enacted in 1987, might have been a logical conclusion since the statute applied to only airspace, the TEA–21 amendments to 23 U.S.C. 156 expanded the application of the FMV requirement to all real property, including existing highways. There is nothing in the legislative history to the TEA–21 amendments to suggest that Congress intended to limit the expanded application of 23 U.S.C. 156 to only non-highway uses. Rather, the express statutory language provides that the FMV requirement applies to all real property acquired with assistance from the Highway Trust Fund (other than the Mass Transit Account).

*B. General Objections to Tolling, Public-Private Partnerships, and Characterization of Concession Payments as Operating Costs*

The ATA, the Owner-Operator Independent Drivers Association (OOIDA), and AHUA each objected to the use of tolls, statements that the fuel tax is not a sustainable form of revenue, public-private partnerships (although AHUA supports concessions and public-private partnerships for new capacity and new road construction), and the FHWA's characterization of concession payments as operating costs for purposes of the revenue use restrictions for the Federal toll programs. Additionally, the Wisconsin Department of Transportation (WisDOT) stated that it does not support public-private partnerships that involve long-term leases. The FHWA does not view these comments as directly relevant to the proposed regulations. The FHWA's reference to these issues in the NPRM was provided merely as background information. The use of tolling and public-private partnerships will continue to occur regardless of the implementation of these regulations. Similarly, the FHWA's characterization of a concession payment as an operating cost will also continue. Furthermore, nothing in these regulations would require WisDOT to enter into a public-private partnership involving a long-term lease. Therefore, the FHWA makes no changes to the proposed regulations as a result of these comments.

*C. Reduced State Flexibility and Displacement of State Law*

A number of commenters objected to what they perceived as reduced State and local government flexibility and/or a displacement of State law. These commenters include the Texas Toll Authorities (joint comments submitted by the following 9 Texas toll authorities: Alamo Regional Mobility Authority, Cameron County Regional Mobility Authority, Camino Real Regional Mobility Authority, Central Texas Regional Mobility Authority, Grayson County Regional Mobility Authority, Harris County Toll Road Authority, Hidalgo County Regional Mobility Authority, North East Texas Regional Mobility Authority, and North Texas Tollway Authority), PTC, Baker, IBTTA, New Hampshire Department of Transportation (NHDOT), New York State Department of Transportation (NYSDOT), New York State Thruway Authority, Senator Kay Bailey Hutchison, Texas State Senator Robert Nichols, Texas State Representative Linda Harper-Brown, and Harris County Judge Ed Emmett. Generally, these commenters expressed the concern that the proposed regulations would limit the ability of State and local governments to transfer highways between governmental entities without charge or for a charge in transactions that are not intended to represent consideration for a sale or a lease.

In developing the regulations proposed in the NPRM, the FHWA did not intend to adversely affect the ability of State and local governments to transfer highways to other governmental entities without charge whenever a transaction is intended to resolve inherently governmental decisions in determining governmental jurisdiction, ownership, control, or other responsibilities with respect to the operation of a public highway. Rather, the regulations were intended to apply only to those transactions that are essentially commercial in nature (that is, for purposes of this rule, where the transfer is conducted in the context of an arms-length transaction and where the price is intended to represent the FMV of the facility). As such, the proposed regulations retained the rules governing ''relinquishments'' under 23 CFR Part 620, except where a transaction between governmental entities would constitute a concession agreement.

The Texas Toll Authorities commented that there may be transactions between governmental entities that may involve a payment to reimburse the State for previously incurred costs in developing the facility. The Texas Toll Authorities recommended that the definition of ''concession agreement'' should be clarified to take this factor into account. After considering this comment, as well as all the comments regarding the lack of State and local government flexibility, the FHWA has amended its definition of ''concession agreement'' to exclude agreements between government entities, even when compensation is paid, where the primary purpose is to determine governmental ownership, control, jurisdiction, or other responsibilities with respect to the operation of a highway from the definition. The definition further provides that a highway agency's determination as to whether an agreement's primary purpose is to determine these governmental responsibilities is controlling.

The Florida Department of Transportation (FDOT) requested a clarification that the proposed rule change will not preclude Florida's Turnpike Enterprise from operating and collecting tolls on federally assisted facilities, whose ownership is still maintained by FDOT. The FHWA did not intend for the proposed rules to do so, and with the modifications made to the final rule, it should be clear that these regulations do not affect this

arrangement between FDOT and Florida's Turnpike Enterprise.

*D. Direct Competition Between Public and Private Entities*

SRTA, Texas State Representative Linda Harper-Brown, Texas State Senator Robert Nichols, Association of General Contractors (AGC), and Zachry Construction each commented that competition between public and private entities is unfair. SRTA, Texas State Representative Linda Harper-Brown, and Texas State Senator Robert Nichols commented that such competition would be unfair to public entities while AGC and Zachry Construction commented that such competition is unfair to private entities. SRTA notes that public sector agencies have more restrictions on how they may structure debt. Zachry Construction notes that both entities have different legal and accounting standards, such as with respect to the payment of taxes, insurance and bonding costs, different overhead cost structures, risk management profiles, and operation and maintenance philosophies. Additionally, the IBTTA notes that statutory constraints on public agencies, differences in legal and accounting standards, and risk assessment philosophies are some significant differences between public and private entities. The FHWA agrees that there may be some differences between public and private entities. However, the FHWA does not believe that these differences are so significant to conclude that either type of entity would have a significant competitive advantage for a concession agreement. More significantly, the FHWA is concerned that a highway agency's inability to permit any kind of competition between public and private entities for concession agreements may be discouraging any type of competition for concession agreements. Since the existing rules prohibit any kind of competition, States are forced to completely forego a competition if they wish to consider a public toll agency. Therefore, the FHWA has made no change to the rule allowing public entities to compete against private entities for concession agreements.

Corridor Watch commented that the use of concession agreements should be limited to agreements with private entities, contending that the public gains no benefit from requiring their own State agencies to demand FMV from another public entity. The FHWA disagrees with this comment and believes that highway agencies should have the flexibility to offer a concession agreement to another public agency if authorized to do so under State law.

*E. Best Value*

AASHTO, PTC, NYSDOT, IBTTA, and Debevoise & Plimpton each commented that the definition of ''best value'' should be expanded to include other qualitative considerations. NHDOT commented that FMV is much more than the maximum price that may be received, and should include other qualitative considerations. The FHWA agrees. The definition of ''best value'' was not intended to be an exhaustive list of factors. Therefore, the definition of ''best value'' is expanded to include policy considerations that are not necessarily quantifiable but that a highway agency considers important. It is the FHWA's intent that the list of factors in this definition continue to be a flexible, open-ended list to allow State and local governments to take into account factors that they feel best fits their needs.

The American Automobile Association (AAA) commented that the most appropriate method to award a concession agreement is on a best value basis. The PTC commented that the States should have flexibility in how they go about determining FMV and that, in no event, should the award to the highest bidder be universally required. The FHWA agrees that the States should have flexibility in determining FMV, and further agrees that the best value approach may be more desirable. However, in order to ensure maximum flexibility in the approach to be used in determining FMV, the FHWA declines to make best value the only approach that may be used.

Additionally, AGC commented that State and local agencies should spell out in detail the weight that will be given to each factor to be used in the FMV evaluation. Debevoise & Plimpton commented that, where best value is the method chosen to determine FMV, the highway agency should be required to identify the considerations that will be used to determine best value. The FHWA agrees that any process used by the highway agency should be as transparent as possible. However, the FHWA believes that the decision regarding how the process will be conducted is most appropriately addressed by State law. Thus, the FHWA has amended section 710.709(a) to specify that if best value is used, the highway agency should, but is not required to, identify the criteria to be used in determining best value as well as the weight to be afforded to the criteria.

*F. Guidance Regarding the Determination of Fair Market Value*

AASHTO, FDOT, Georgia Department of Transportation (GDOT), PTC, Texas Toll Authorities, IBTTA, AGC, Baker, Robert W. Poole, Jr., and Debevoise & Plimpton each commented that the FHWA should provide guidance regarding how FMV should be determined whenever a competitive process is not used. AASHTO, PTC, Texas Toll Agencies, AGC, and Baker, were concerned that the lack of standards to be used in determining FMV could subject a State to an arbitrary FHWA decision regarding whether FMV has been obtained. PTC and Baker further noted that the proposed regulations do not give effect to any State laws or court decisions that may be relevant for determining FMV within a particular State. These comments regarding the lack of standards in determining FMV also relate to comments made by Robert W. Poole, Jr., Greater Houston Partnership, Gulf Coast Regional Mobility Partners, Texas Council of Engineering Companies, Harris County Judge Ed Emmett, and Texas State Representative Linda Harper-Brown that the market valuation process in Texas is troublesome and unworkable. Greater Houston Partnership, Gulf Coast Regional Mobility Partners, and Harris County Judge Ed Emmett expressed further concern that the process used for establishing FMV could cause project delays.

AAA and Robert W. Poole, Jr., commented that the determination of FMV, in instances where a competition is not conducted, must not involve negotiated compromises and, instead, be arrived at through a transparent process. Mr. Poole suggests that a ''Public Sector Comparator'' process, such as the processes used in Australia and British Columbia, would be an acceptable transparent process. Debevoise & Plimpton also suggests that FMV may be determined by comparing the public benefits brought by the terms of a concession agreement against those where a highway agency retains the rights assigned to a concessionaire.

The FHWA agrees that the lack of standards regarding how to arrive at FMV could create problems. The FHWA further agrees that FMV is most appropriately determined in accordance with State law. Therefore, the FHWA has amended the regulations in section 710.709(d) to defer to a State as to whether FMV has been obtained in accordance with State law. The FHWA also agrees with the need for transparency. Thus, if there is no

competition and if the highway agency represents that it has entered into a concession agreement for FMV, whatever that amount may be, the highway agency must also obtain an independent third party assessment and make that assessment publicly available. While the highway agency is not bound to accept the third party assessment, the fact that the assessment is publicly available may compel the highway agency to disclose how it arrived at its amount.

With respect to the comments urging the FHWA to require highway agencies to use a Public Sector Comparator, or specify certain standards to be used in making the FMV determination, the FHWA declines to do so. While the FHWA agrees that a transparent process should be established, the FHWA believes that highway agencies should have the flexibility to determine FMV in accordance with their own laws and policies. However, the FHWA does support the use of the public sector comparator process, as recommended by Mr. Poole, and essentially embraced by Debevoise & Plimpton. By deferring to the States on how to arrive at FMV, as well as whether the amount obtained constitutes FMV, the potential for project delays should be minimal.

*G. Prospective Application*

AASHTO, PTC, IBTTA, and Zachry Construction commented that the regulations should be clarified to ensure that the regulations apply prospectively, and that any concession agreement that has already been executed is ''grandfathered'' under existing regulations. The FHWA agrees with this comment and has revised section 710.705 to clarify that the regulations apply only to concession agreements executed after the effective date of this rule.

*H. Price Established Through Competition*

Debevoise & Plimpton commented that any price established through a competitive process should be determinative of whether FMV has been received, not just presumed. Robert W. Poole, Jr., notes that a market value cannot be negotiated, but only realized through arm's length bidding. GDOT inquired whether a value arrived at through a competitive process involving only one bidder constitutes FMV. The FHWA agrees with the premise of the comments that a value established through a fair and open competitive process constitutes FMV. As such, the FHWA has modified section 710.709(c) to provide that any proposal procured through a competitive process with multiple bidders shall be deemed FMV. However, whenever only one bidder is involved, the highway agency will need to determine whether the proposal constitutes FMV. Like any solicitation, the highway agency will need to evaluate the proposal against its own estimate to determine whether to accept the bid. Thus, the FHWA has amended section 710.709(c) to provide that a concession agreement awarded through a competitive process with only one bidder is presumed to be FMV. The highway agency may overcome the presumption if not to be FMV based on its own estimates.

While the FHWA has established certain degrees of deference to proposals awarded through competitive processes, it is not the FHWA's intent for any highway agency to be forced to accept any proposal, even if awarded through a competitive process with multiple bidders. The highway agency may, for a variety of reasons, decide not to accept a proposal. Thus, the FHWA has added a sentence to ensure that nothing in the regulations can be construed to force a highway agency to accept a proposal.

*I. Highest Bid Received*

Robert W. Poole, Jr., commented that the phrase ''highest bid received'' could be construed to require States to seek the largest possible up-front payment. Mr. Poole notes that many arrangements involve long-term leases where payments are made on a regular basis throughout the term of the lease. As such, Mr. Poole recommends clarifying that FMV may mean the bid yielding the highest net present value of payments over the life of the concession agreement. The FHWA agrees with Mr. Poole that the method for determining FMV should include transactions that do not involve single, up-front payments. In the proposed regulations, the FHWA had intended the term ''best value'' to be broad enough to include any standard the State may use that is not simply high bid. However, in order to ensure the regulations are clear that structured payments over the life of the lease may be properly considered in determining FMV, the FHWA has added Mr. Poole's suggested edits to section 710.709(a). However, the FHWA declines to delete the phrase ''highest bid received'' from regulation. The FHWA believes that the States should have maximum flexibility in determining how they wish to determine FMV.

*J. Federally Funded Highway*

Zachry Construction commented that the definition of federally funded highway should be revised to exclude highways constructed with TIFIA loan proceeds. Section 156 of title 23, United States Code, applies to real property acquired with Federal assistance made available from the Highway Trust Fund (other than the Mass Transit Account). Since TIFIA funding is made available, at least in part, from the Highway Trust Fund, the FHWA declines to make Zachry Construction's suggested change. Also, Debevoise & Plimpton commented that the concept of Federal assistance in the definition of federally funded highway should be limited to funds made available from the Highway Trust Fund. Since 23 U.S.C. 156 limits the concept of Federal assistance to funds from the Highway Trust Fund, the FHWA accepts this change. Accordingly, the definition of federally funded highway has been amended to replace the phrase ''title 23, United States Code'' with ''Highway Trust Fund (other than the Mass Transit Account).''

*K. Definition of Fair Market Value*

Debevoise & Plimpton commented that the definition of FMV should be revised to reflect the customary market definition, where the terms reflect an agreement by both parties to a transaction. The FHWA agrees with this comment and has amended the definition of FMV to include this concept. Debevoise & Plimpton further commented that the word ''price'' should be substituted with the word ''terms.'' The FHWA declines to make this change because, consistent with Debevoise & Plimpton's earlier comment, the change would not reflect the customary definition. However, the FHWA does agree with the essence of Debevoise & Plimpton's concern that a proposal based on best value, which may include a consideration of qualitative factors, be considered to satisfy the definition of FMV. Accordingly, the FHWA has added a sentence providing that a concession agreement based on best value shall be deemed FMV. The FHWA has also added some clarifying language to the phrase ''on the open market'' to make clear that the highway agency is not required to compete a concession agreement on the open market. FMV may be satisfied if an amount is developed ''as if'' the concession agreement is offered on the open market.

*L. Relationship to Toll Programs*

Debevoise & Plimpton commented that there could be a potential conflict between the toll revenue use restrictions contained in the various Federal toll programs, such as 23 U.S.C. 129, and the concession agreement. As such,

Debevoise & Plimpton suggested that language should be added to clarify that the toll revenue use restrictions are automatically deemed satisfied once the tolled highway become subject to a concession agreement. The FHWA declines to incorporate this comment. Toll revenues generated from the operation of any highway operating under a Federal toll program must be used for the specified revenue use restrictions under such program. Provisions contained in concession agreements cannot trump these requirements. State DOTs are responsible for ensuring compliance with these provisions. While the FHWA declines to incorporate this comment, it is worth noting that all the toll facilities subject to both a Federal toll program and a concession agreement appear to be operating without any difficulty.

PTC commented that it is inappropriate to address the criteria for participation in the highway tolling pilot programs in the context of a rulemaking regarding how States should value concession agreements. Specifically, the PTC argues that the Federal tolling provisions establish no FMV criteria for what constitutes a valid operational cost. While the FHWA agrees with PTC that this rulemaking should not address any requirements with respect to the criteria for participation in a Federal tolling program, the FHWA disagrees with the PTC that there are no limits as to what constitutes a valid operating cost for lease payments.

As explained in the NPRM, the Federal toll programs generally require toll revenue to be used first for debt service, then to provide a reasonable return on investment to any private party financing a project, and for the costs that are necessary for the proper operation and maintenance of the facility. With the exception of the ISRRPP and ISCTPP, toll revenues in excess of these uses may be applied to other projects eligible for assistance under title 23, United States Code. If a lease payment is proposed that is based on factors completely unrelated to the value of the facility, such as Statewide transportation funding needs, then the lease payment becomes excess toll revenue. While such a payment could be made under toll programs allowing for excess toll revenue to be used for other title 23, United States Code, eligible purposes (after the needs for debt service, providing a reasonable return on investment to a private party, and operation and maintenance are provided for), the lease payment is problematic for programs, such as the ISRRPP and ISCTPP, that do not allow any excess toll revenue to be used.

The toll programs were referenced in the preamble of the NPRM merely to note that the establishment of FMV for concession agreements would help State and local governments comply with Federal toll program requirements, not to create a new rule of applicability for such programs. As such, the FHWA has amended the authority section for Subpart G to refer simply to FMV requirement of 23 U.S.C. 156.

**V. Discussion of NPRM Comments Concerning Design-Build Amendments**

Eleven entities submitted comments on the proposed design-build amendments. All but one of the comments submitted were supportive of the amendments. The major comments concerning the proposed design-build amendments are discussed below.

*A. Is the Stipend Mandatory?*

NYSDOT, New York State Thruway Authority, GDOT, and Zachry Construction requested that the FHWA clarify whether the offering or acceptance of a stipend is mandatory. NYSDOT and New York State Thruway Authority noted that they support the amendment so long as the decision to offer a stipend is optional on the part of the contracting agency. GDOT requested a clarification as to whether a State is prohibited from incorporating an unsuccessful offeror's ideas if a stipend is not offered. Zachry Construction noted that the acceptance of a stipend should be optional on the part of the contractor. In considering these comments, the FHWA agrees that the decision as to whether to offer a stipend is optional on the part of the contracting agency and that if a stipend is offered, its acceptance must be optional on the part of the contractor. Forcing a contractor to relinquish its ideas to a contract it did not win could stifle competition. The American Council of Engineering Companies (ACEC) makes the point that contractors may either decide not to submit a proposal or hold back on its most innovative ideas with the assumption that additional design concepts could be later incorporated into the final design. Thus, FHWA agrees that contracting agencies should have the flexibility to use unsuccessful offeror's ideas, but only if the contracting agency offers, and the contractor accepts, a stipend. The FHWA has modified section 636.113(b) to clarify these issues.

*B. Amount of the Stipend*

AGC and ACEC commented that the amount of the stipend should be for the FMV of those ideas or based on a formula related to the value of the project. The New York State Thruway Authority noted that it was concerned about potential disputes regarding the amount of the stipend. The FHWA does not believe it is necessary to specify how the amount of the stipend should be determined. The amount of a stipend should be determined by the contracting agency. The primary purpose of a stipend is to provide an incentive to a contractor to expend resources to develop a proposal. The amount of the stipend offered must be enough to induce a contractor to submit a proposal in order for it to be effective. Likewise, if a contracting agency wishes to appropriate an offeror's ideas into a contract it did not win, the contracting agency will need to determine how much its stipend will need to be in order for the contractor to accept.

*C. Predetermined Process*

Ms. Carolyn Bergeman Langelotti commented that allowing contracting agencies to incorporate unsuccessful offeror's concepts into the final contract will discourage competition and promote unethical actions by contracting agencies to select pre-determined contractors. The FHWA believes that the use of stipends, as well as the optional nature of the decision to accept a stipend, will encourage competition. Furthermore, the FHWA is unaware of any circumstance in which a contracting agency has engaged in any unethical practices or failed to properly follow a fair and competitive process in the manner Ms. Langelotti suggests. Therefore, the FHWA declines to accept this comment.

*D. Firms Submitting Multiple Bids*

WisDOT commented that it is concerned that a firm may break up into smaller units and submit multiple bids with the intent of receiving both a stipend and an actual contract. The FHWA does not believe this is a major concern. It does not seem to be advantageous for a firm to either divide its resources when developing a proposal or to expend extra resources to submit multiple bids, especially in light of the fact that a stipend is not intended to compensate a contractor for all the costs it incurred in developing a proposal. Therefore, no changes to the final regulation have been made as a result of this comment.

**Rulemaking Analyses and Notices**

*Executive Order 12866 (Regulatory Planning and Review) and USDOT Regulatory Policies and Procedures*

The FHWA and the Office of Management and Budget (OMB) have determined that this action is not a significant regulatory action within the meaning of Executive Order 12866 and is not significant within the meaning of U.S. Department of Transportation regulatory policies and procedures. It is anticipated that the economic impact of this rulemaking will be minimal. These changes will not adversely affect, in a material way, any sector of the economy. In addition, these changes will not interfere with any action taken or planned by another agency and will not materially alter the budgetary impact of any entitlements, grants, user fees, or loan programs. Consequently, a full regulatory evaluation is not required.

AASHTO, IBTTA, PTC, and Corridor Watch submitted comments contending that this action would be a significant regulatory action within the meaning of Executive Order 12866. AASHTO, IBTTA, and PTC contend this rule is economically significant because concession agreements can exceed $100 million. The FHWA disagrees with this assessment. This rule is procedural in nature and does not mandate concession agreements. Rather, it describes the processes that must be undertaken in determining FMV, as required by 23 U.S.C. 156.

Corridor Watch asserted that this rule is significant because it would adversely affect the economy by dramatically increasing the costs of public transportation and public transportation project delivery. The FHWA also disagrees with this assessment. This rule is procedural in nature and is not directed at public transportation. The purpose of the rule is to provide direction with respect to how States can comply with the FMV requirement of 23 U.S.C. 156 when entering into a concession agreement.

*Regulatory Flexibility Act*

In compliance with the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 60l–612) the FHWA has evaluated the effects of this action on small entities and has determined that the proposed action will not have a significant economic impact on a substantial number of small entities. OOIDA commented that this rulemaking will impact small businesses, because the policy promotes concession agreements, especially the implementation of tolls on non-tolled facilities. The FHWA disagrees with this comment. This action does not affect any funding distributed under any of the program administered by the FHWA. It ensures that State and local governments comply with both 23 U.S.C. 156 to receive FMV and the Federal tolling provision listed above regarding operating expenses whenever a concession agreement is executed involving a Federally funded highway. For these reasons, the FHWA certifies that this action will not have a significant economic impact on a substantial number of small entities.

*Unfunded Mandates Reform Act of 1995*

This rule will not impose unfunded mandates as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 109 Stat. 48). This rule will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $128.1 million or more in any one year (2 U.S.C. 1532).

*Executive Order 13132 (Federalism Assessment)*

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 13132, and the FHWA has determined that this action will not have sufficient federalism implications to warrant the preparation of a federalism assessment. The FHWA has also determined that this action will not preempt any State law or State regulation or affect the States' ability to discharge traditional State governmental functions. Corridor Watch and the Pennsylvania Turnpike Commission commented that the rule has federalism implications that require a federalism assessment under Executive Order 13132. Section 156, title 23, United States Code, requires States to obtain FMV for the sale, use, lease, or lease renewal of real property, which includes concession agreements. This rule provides for the procedures by which a State can comply with this statutory requirement. Any federalism implications arising from this rule are attributable to 23 U.S.C. 156. Additionally, the Federal Government has a substantial interest in ensuring that FMV is received on facilities in which there is a Federal investment.

*Executive Order 13211 (Energy Effects)*

The FHWA has analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use, dated May 18, 2001. The FHWA has determined that it is not a significant energy action under that order since it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

*Executive Order 12372 (Intergovernmental Review)*

Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

*Paperwork Reduction Act*

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501), Federal agencies must obtain approval from the OMB for each collection of information they conduct, sponsor, or require through regulations. The FHWA has determined that this action does not contain collection of information requirements for the purposes of the PRA.

*Executive Order 12988 (Civil Justice Reform)*

This action meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

*Executive Order 13045 (Protection of Children)*

The FHWA has analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. The FHWA certifies that this action would not cause any environmental risk to health or safety that might disproportionately affect children.

*Executive Order 12630 (Taking of Private Property)*

The FHWA has analyzed this proposed rule under Executive Order 12630, Governmental Actions and Interface with Constitutionally Protected Property Rights. The FHWA does not anticipate that this action would affect a taking of private property or otherwise have taking implications under Executive Order 12630.

*National Environmental Policy Act*

The agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4347) and has determined that this action will not have any effect on the quality of the environment. Corridor Watch

commented that a NEPA analysis is required because there are environmental justice issues associated with this rulemaking. FHWA disagrees with this comment. Additionally, FHWA notes that two categorical exclusions apply to this rulemaking; namely, 23 CFR 771.117(c)(11) (determination of payback under 23 U.S.C. 156 for property previously acquired with Federal-aid participation) and 23 CFR 771.117(c)(20) (promulgation of rules, regulations, and directives).

*Executive Order 12898 (Environmental Justice)*

The FHWA has analyzed this action under Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, dated February 16, 1994, and the U.S. Department of Transportation Order To Address Environmental Justice in Minority Populations and Low-Income Populations, dated April 15, 1997. Executive Order 12898 establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and/or low-income populations in the United States. In developing this rule in compliance with Executive Order 12898, the FHWA has determined that this rule does not raise any environmental justice concerns.

Corridor Watch commented that there are environmental justice issues with this rule because this rule will impact community, social fabric, and local economies. FHWA disagrees. This rule does not require the use of concession agreements or tolling. The purpose of this rule is to provide for procedures to ensure that State and local governments comply with both 23 U.S.C. 156 to receive FMV whenever a concession agreement is executed involving a federally funded highway.

*Regulation Identification Number*

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

**List of Subjects**

*23 CFR Part 620*

Grant programs—transportation, Highways and roads, Rights-of-way.

*23 CFR Part 635*

Construction and maintenance, Grant programs—transportation, Highways and roads, Reporting and recordkeeping requirements.

*23 CFR Part 636*

Design-build, Grant programs—transportation, Highways and roads.

*23 CFR Part 710*

Issued on: December 15, 2008.

**Thomas J. Madison, Jr.,**

*Federal Highways Administrator.*

■ In consideration of the foregoing, the FHWA amends chapter I of title 23, Code of Federal Regulations, as set forth below:

## PART 620—ENGINEERING

■ 1. The authority citation for part 620 continues to read as follows:

**Authority:** 23 U.S.C. 315 and 318; 49 CFR 1.48, 23 CFR 1.32.

■ 2. Amend § 620.203 by revising paragraph (b) to read as follows:

### § 620.203 Is the stipend amount eligible for Federal participation?

* * * * *

(b) Other than a conveyance made as part of a concession agreement as defined in section 710.703, for purposes of this section, *relinquishment* is defined as the conveyance of a portion of a highway right-of-way or facility by a State highway agency (SHA) to another Government agency for highway use.

* * * * *

## PART 635—CONSTRUCTION AND MAINTENANCE

■ 3. The authority citation for part 635 continues to read as follows:

**Authority:** Sec. 1503 of Public Law 109–59, 119 Stat. 1144; 23 U.S.C. 101 (note), 109, 112, 113, 114, 116, 119, 128, and 315; 31 U.S.C. 6505; 42 U.S.C. 3334, 4601 *et seq.*; Sec. 1041(a), Public Law 102–240, 105 Stat. 1914; 23 CFR 1.32; 49 CFR 1.48(b).

■ 4. Revise § 635.112(e) to read as follows:

### § 635.112 Advertising for bids and proposals.

* * * * *

(e) Except in the case of a concession agreement, as defined in section 710.703 of this title, no public agency shall be permitted to bid in competition or to enter into subcontracts with private contractors.

* * * * *

## PART 636—DESIGN-BUILD CONTRACTING

■ 5. The authority citation for part 636 continues to read as follows:

**Authority:** Sec. 1503 of Public Law 109–59, 119 Stat. 1144; Sec. 1307 of Public Law 105–178, 112 Stat. 107; 23 U.S.C. 101, 109, 112, 113, 114, 115, 119, 128, and 315; 49 CFR 1.48(b).

■ 6. Amend § 636.113 by revising paragraph (b) and adding paragraph (c) to read as follows:

### § 636.113 Is the stipend amount eligible for Federal participation?

* * * * *

(b) Unless prohibited by State law, you may retain the right to use ideas from unsuccessful offerors if they accept stipends. If stipends are used, the RFP should describe the process for distributing the stipend to qualifying offerors. The acceptance of any stipend must be optional on the part of the unsuccessful offeror to the design-build proposal.

(c) If you intend to incorporate the ideas from unsuccessful offerors into the same contract on which they unsuccessfully submitted a proposal, you must clearly provide notice of your intent to do so in the RFP.

■ 7. Revise § 636.513 by designating the existing text as paragraph (a) and adding a new paragraph (b) to read as follows:

### § 636.513 Are limited negotiations allowed prior to contract execution?

* * * * *

(b) Limited negotiations conducted under this section may include negotiations necessary to incorporate the ideas and concepts from unsuccessful offerors into the contract if a stipend is offered by the contracting agency and accepted by the unsuccessful offeror and if the requirements of section 636.113 are met.

## PART 710—RIGHT-OF-WAY AND REAL ESTATE

■ 8. The authority citation for part 710 continues to read as follows:

**Authority:** Sec. 1307 of Public Law 105–178, 112 Stat. 107; 23 U.S.C. 101(a), 107, 108, 111, 114, 133, 142(f), 156, 204, 210, 308, 315,

317, and 323; 42 U.S.C. 2000d *et seq.*, 4633, 4651–4655; 49 CFR 1.48(b) and (cc), 18.31, and parts 21 and 24; 23 CFR 1.32.

■ 9. Revise § 710.403(d)(5) to read as follows:

**§ 710.403 Management.**

* * * * *

(d) * * *

(5) Use for transportation projects eligible for assistance under title 23 of the United States Code, provided that a concession agreement, as defined in section 710.703, shall not constitute a transportation project.

* * * * *

■ 10. Add new Subpart G to Part 710 to read as follows:

## Subpart G—Concession Agreements

Sec.

**Authority:** 23 U.S.C. 156 and 315; 23 CFR 1.32; 49 CFR 1.48.

**§ 710.701 Purpose.**

The purpose of this subpart is to prescribe the standards that ensure fair market value is received by a highway agency under concession agreements involving federally funded highways.

**§ 710.703 Definitions.**

As used in this subpart:

(a) *Best value* means the proposal offering the most overall public benefits as determined through an evaluation of the amount of the concession payment and other appropriate considerations. Such other appropriate considerations may include, but are not limited to, qualifications and experience of the concessionaire, expected quality of services to be provided, the history or track record of the concessionaire in providing the services, timelines for the delivery of services, performance standards, complexity of the services to be rendered, and revenue sharing. Such appropriate considerations may also include, but are not limited to, policy considerations that are important, but not quantifiable, such as retaining the ability to amend the concession agreement if conditions change, having a desired level of oversight over the facility, ensuring a certain level of maintenance and operations for the facility, considerations relative to the structure and amount of the toll rates, economic development impacts and considerations, or social and environmental benefits and impacts.

(b) *Concession agreement* means an agreement between a highway agency and a concessionaire under which the concessionaire is given the right to operate and collect revenues or fees for the use of a federally funded highway in return for compensation to be paid to the highway agency. A concession agreement may include, but not be limited to, obligations concerning the development, design, construction, maintenance, operation, level of service, and/or capital improvements to a facility over the term of the agreement. Concession agreement shall not include agreements between government entities, even when compensation is paid, where the primary purpose of the transaction is not commercial in nature but for the purpose of determining governmental ownership, control, jurisdiction, or responsibilities with respect to the operation of a federally funded highway. The highway agency's determination as to whether an agreement between government entities constitutes a concession agreement shall be controlling.

(c) *Concessionaire* means any private or public entity that enters into a concession agreement with a highway agency.

(d) *Fair market value* means the price at which a highway agency and concessionaire are ready and willing to enter into a concession agreement for a federally funded highway on, or as if in, the open market for a reasonable period of time and in an arm's length transaction to any willing, knowledgeable, and able buyer. For purposes of this subpart, a concession agreement based on best value shall be deemed fair market value.

(e) *Federally funded highway* means any highway (including highways, bridges, and tunnels) acquired with Federal assistance made available from the Highway Trust Fund (other than the Mass Transit Account). A highway shall be deemed to be acquired with Federal assistance if Federal assistance participated in either the purchase of any real property, or in any capital expenditures in any fixtures located on real property, within the right-of-way, including the highway and any structures located upon the property.

(f) *Highway agency* means any State transportation department or other public authority with jurisdiction over a federally funded highway.

**§ 710.705 Applicability.**

This subpart applies to all concession agreements involving federally funded highways that are executed after January 18, 2009.

**§ 710.707 Fair Market Value.**

A highway agency shall receive fair market value for any concession agreement involving a federally funded highway.

**§ 710.709 Determination of Fair Market Value.**

(a) Fair market value may be determined either on a best value basis, highest net present value of the payments to be received over the life of the agreement, or highest bid received, as may be specified by the highway agency in the request for proposals or other relevant solicitation. If best value is used, the highway agency should identify, in the relevant solicitation, the criteria to be used as well as the weight afforded to the criteria.

(b) In order to be considered fair market value, the terms of the concession agreement must be both legally binding and enforceable.

(c) Any concession agreement awarded pursuant to a competitive process with more than one bidder shall be deemed to be fair market value. Any concession agreement awarded pursuant to a competitive process with only one bidder shall be presumed to be fair market value. Such presumption may be overcome only if the highway agency determines the proposal to not be fair market value based on the highway agency's estimates. Nothing in this subpart shall be construed to require a highway agency to accept any proposal, even if the proposal is deemed fair market value. For purposes of this subsection, a competitive process shall afford all interested proposers an equal opportunity to submit a proposal for the concession agreement and shall comply with applicable State and local law.

(d) If a concession agreement is not awarded pursuant to a competitive process, the highway agency must receive fair market value, as determined by the highway agency in accordance with State law, so long as an independent third party assessment is conducted and made publicly available.

(e) Nothing in this subpart is intended to waive the requirements of Part 172, Part 635, and Part 636 whenever any Federal-aid (including TIFIA assistance) is to be used for a project under the concession agreement.

[FR Doc. E8–30147 Filed 12–18–08; 8:45 am]

BILLING CODE 4910–22–P

**DEPARTMENT OF LABOR**

**Wage and Hour Division**

**29 CFR Parts 3 and 5**

**RIN 1215–AB67**

## Protecting the Privacy of Workers: Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction

**AGENCY:** Wage and Hour Division, Employment Standards Administration, Department of Labor.

**ACTION:** Final rule.

**SUMMARY:** In this final rule, the Department of Labor (Department or DOL) revises regulations issued pursuant to the Davis-Bacon and Related Acts and the Copeland Anti-Kickback Act to better protect the personal privacy of laborers and mechanics employed on covered construction contracts.

**DATES:** *Effective Date:* January 18, 2009, except § 5.5(a)(3)(ii)(A) and (a)(3)(ii)(B)(1), which contain information collection requirements that have not been approved by OMB. The Wage and Hour Division will publish a document in the **Federal Register** announcing the effective date. See **SUPPLEMENTARY INFORMATION** for dates of applicability.

**FOR FURTHER INFORMATION CONTACT:** Richard M. Brennan, Director, Office of Interpretations and Regulatory Analysis, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3506, 200 Constitution Avenue, NW., Washington, DC 20210; telephone: (202) 693–0051 (this is not a toll-free number). Copies of this notice may be obtained in alternative formats (Large Print, Braille, Audio Tape or Disc), upon request, by calling (202) 693–0023 (not a toll-free number). TTY/TDD callers may dial toll-free (877) 889–5627 to obtain information or request materials in alternative formats.

Questions of interpretation and/or enforcement of regulations issued by this agency or referenced in this notice may be directed to the nearest Wage and Hour Division (WHD) District Office. Locate the nearest office by calling our toll-free help line at (866) 4USWAGE ((866) 487–9243) between 8 a.m. and 5 p.m. in your local time zone, or log onto the WHD's Web site for a nationwide listing of WHD District and Area Offices at: *http://www.dol.gov/esa/whd/america2.htm*.

**SUPPLEMENTARY INFORMATION:**

### I. Background

The Department published a Notice of Proposed Rulemaking in the **Federal Register** on October 20, 2008 (73 FR 62229), inviting comments until November 19, 2008, on revisions to update certain regulatory standards to better protect worker privacy for contracts covering federally financed and assisted construction.

### II. Summary of Comments

The Department received 37 total comments on the NPRM from a variety of individuals (7), trade and professional associations (6), labor unions (12), governmental entities (5), Members of Congress (3 letters signed by a total of 16 members), law firms (2), and others (2).

Four commenters generally supported the proposed rule. Of the four, three cited protecting the employee's privacy as the major factor for their support. The fourth comment expressed support for the Department's goals of increased privacy and decreased burden through electronic reporting but noted that the commenter had business interests coextensive with such an initiative. One of these commenters, a state government entity, believed the employer is in a better position to protect an employee's personal information than government agencies enforcing prevailing wage requirements.

The agency also received from several trade associations and a government agency more specific comments in support of protecting worker privacy and/or reducing unnecessary burdens, but suggesting alternatives to the proposal. One commenter from a trade association supported the Department's efforts to protect workers' privacy under the proposed rule. The commenter, however, raised concerns that the proposed rule could be read to prohibit subcontractors from providing addresses and social security numbers in submissions to the prime contractors, even though prime contractors continue to have responsibility for compliance of subcontractors under the regulations. As a result, the commenter recommended that the Department proceed with the proposed rule, but clarify that ''prime contractors may continue to require subcontractors to provide such information to the prime contractors for its own records, without submission to the government.'' The commenter also recommended the government expand efforts allowing electronic payroll submission systems, to ensure the systems are cost-efficient, reliable, and user-friendly.

One commenter from a federal government agency (United States Department of Defense—Department of the Navy) suggested that if address and social security information are totally unavailable to contracting agencies, there could be an impediment for enforcement. The commenter generally endorsed requiring contractors and subcontractors to maintain and provide addresses and social security numbers to the government upon request and/or that the prime contractor be required to compile social security numbers and up-to-date addresses from subcontractors even if they are not included in the currently-required weekly certified payrolls. The commenter suggested adding explicit language to the regulations to make it clear that ''failure to provide such information on a timely basis would carry the same regulatory consequences as failure to provide timely certified payroll reports.'' The commenter also strongly supported the submission of certified payroll by electronic means to reduce burden.

A number of other commenters agreed that there were privacy issues with certified payroll requirements, particularly with regard to the use of social security numbers, but raised concerns that lack of access to addresses and social security numbers might work as a hardship for those monitoring compliance. For example, some noted that removing addresses from certified payrolls may impact the ability of agencies to locate and interview workers for the purposes of auditing prevailing wage compliance on contracts or disbursing back wages to employees following a finding of their employer's non-compliance. Four of these commenters supported the continued need for some level of an individual worker identification number and recommended the Department of Labor consider alternatives—three suggested using the last four digits of the social security number and one suggested creating a unique employee identification instead.

A majority of the comments raised concerns that the proposed changes could result in difficulties in enforcing the applicable prevailing wage laws because weekly submissions of certified payrolls containing social security numbers and addresses for individual workers are useful to government investigators and auditors in ensuring compliance with the Davis-Bacon and Related Acts and/or Copeland Act. Some commenters also noted that contractors and subcontractors do not always cooperate with government agencies in prevailing wage compliance

audits or investigations. Additional concerns raised by the commenters include: Prevailing wage enforcement at the state and federal level could become more costly; the change could result in increased opportunities for fraud by contractors and subcontractors; the rule is unnecessary because there are already safeguards in place to protect worker privacy; and/or a superior solution would be to require better protection (e.g., encryption of data) of the certified payrolls by government agencies and the regulated community.

Most comments in opposition (19) were simply blanket criticisms of the proposed changes with little to no analysis. Twelve of these comments also argued that, because federal law generally prohibits the release of addresses and social security numbers, the proposed rule is not needed. Several of these commenters were members of Congress who requested that the Department extend the comment period. Notably, however, no other stakeholders in the regulated community requested an extension of the comment period. A number of other commenters in this group, and others below, criticized the length of the comment period, but still provided timely comments.

Several commenters expressed concerns that lack of individual identifying information could increase the time and effort necessary for government agencies to conduct prevailing wage investigations or audits. With regard to the privacy of workers, several commenters suggested the alternative of requiring the government and contractors to restrict the information to only those who need access. Several commenters suggested that government agencies and stakeholders should consider increasing electronic submission of certified payroll records to improve efficiency, but did not believe that the current process was a public burden or endangered worker privacy.

One commenter referenced the Department of Labor's Office of Apprenticeship and the need to have individual information to verify apprenticeship status for workers. The commenter was concerned that with only a name to compare, and not an address and social security number, there could be difficulties in verifying the identity of individual workers in apprenticeship programs. The commenter also suggested that reducing reporting requirements in general, even to protect privacy, may increase the chance unscrupulous contractors and subcontractors will be able to hide violations of prevailing wage requirements to the detriment of honest contractors and subcontractors. Several other commenters also suggested that without the current weekly reporting requirements, some contractors and subcontractors could find it easier to intentionally not comply with the prevailing wage laws.

One commenter stated that the proposed change erroneously places too much value on personal privacy over the government duty to enforce the Davis-Bacon Act. This commenter and others recommended that the Department focus on requiring government agencies to better protect personal identifying information rather than reduce reporting requirements. Several commenters also questioned the Department's assertion that this change will reduce public ''reporting burdens.''

One commenter (International Union of Operating Engineers) opposed the proposed rule because of concerns that the change could somehow result in ''misclassification of workers, underpayment of wages, fringe benefit abuses and illegal kickbacks on federal construction projects.'' This commenter also questioned the Department's statement that contractors will continue to be required to maintain employee addresses and social security numbers, the Department's reliance on *Building & Construction Trades Department* v. *Donovan*, 712 F.2d 611 (D.C. Cir, 1983), and whether there was any evidence that government agencies and contractors are unable to appropriately protect personal information currently.

One state government agency (Illinois Department of Labor) raised concerns that the changes could hinder efforts to enforce applicable laws as well as its own use of home addresses and social security numbers in state investigations. The agency also recommended the Department consider requiring additional privacy protections from government agencies on releasing personal identifying information rather than reduce weekly reporting requirements.

One commenter from a state Construction Trades Council noted a specific situation in which certified payrolls could have helped to verify appropriate payment of prevailing wages, but the payrolls turned out to be unhelpful because of contractor errors. In addition, the commenter was concerned that the proposed changes could cause budget issues as state agencies could have greater difficulty and costs in monitoring prevailing wage compliance and conducting investigations. Other commenters also suggested that any reduction in reporting burden as a result of the proposed rule could be offset by the potential for an increase in time spent by contractors and subcontractors in responding to subsequent investigations.

One commenter, on behalf of its building and construction trade clients, opposed the proposed rule because of concerns that the comment period was too short, questioned whether there was any need to better protect worker's privacy, and disagreed that there would be any actual reduction in burden. The commenter suggested that the 30-day comment period did not provide enough time under the Administrative Procedure Act. Finally, the commenter noted the specific characteristics of the construction industry could make it more likely workers will not receive prevailing wages and/or fringe benefits without government having access to personally identifying information on weekly certified payrolls.

The Building and Construction Trade Department, AFL-CIO or ''BCTD'' submitted comments on behalf of 13 national and international organizations, and more than 300 State and Local Building and Construction Trades Councils. In addition to making a number of points similar to those discussed above, BCTD suggested that the proposed rule did not meet the requirements of a memorandum advising federal agencies that significant final regulatory changes should generally be implemented before November 2008. BCTD also: (1) Echoed concerns of other commenters that the Department misread the *Building & Construction Trades Department* v. *Donovan*, 712 F.2d 611 (D.C. Cir, 1983) opinion; (2) stated it did not believe the current requirements were ''unnecessarily intrusive and clearly outweigh the privacy concerns cited by DOL''; (3) noted the Office of Management and Budget did not mandate reductions in the collection of social security numbers and home addresses on certified weekly payrolls; (4) suggested the changes could ''embolden unscrupulous contractors and subcontractors to disregard their obligations;'' and (5) stated it did not believe the reasons offered by the Department ''individually or collectively'' supported the proposal.

## III. Summary of Pertinent Laws

Section 1 of the Davis-Bacon Act (DBA), as amended, 40 U.S.C. 3141 requires that each contract over $2,000 to which the United States or the District of Columbia is a party for the construction, alteration, or repair of public buildings or public works shall contain a clause setting forth the minimum wages to be paid to various

classes of laborers and mechanics employed under the contract. The DBA requires contractors or their subcontractors to pay workers employed directly upon the site of the work no less than the locally prevailing wages and fringe benefits paid on projects of a similar character as determined by the Secretary of Labor. Regulations in 29 CFR part 5 contain the Davis-Bacon and Related Acts required contract clauses, and descriptions and interpretations of the labor standards requirements.

The Copeland Anti-Kickback Act, 40 U.S.C. 3145, requires, among other things, that contractors and subcontractors performing work on most federally financed or assisted construction contracts furnish weekly a statement with respect to the wages paid each worker during the preceding week. *See* 29 CFR 3.3(b), 3.4. Under the regulations, contractors must submit weekly a copy of all payrolls to the federal agency contracting for or financing the construction project, if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the payrolls to the applicant, sponsor, or owner, as the case may be, for transmission to the contracting agency. 29 CFR 5.5(a)(3)(ii)(A). A signed ''Statement of Compliance'' indicating the payrolls are correct and complete and that each laborer or mechanic has been paid not less than the proper Davis-Bacon and Related Act prevailing wage rate for the work performed must accompany the payroll. *Id.* 3.3(b), 5.5(a)(3)(ii)(B). Regulations implementing the Copeland Act are contained in 29 CFR parts 3 and 5.

The current regulations for the Davis-Bacon and Related Acts (DBRA), 29 CFR part 5, require that certified payrolls be provided to the contracting government office for each week of work: ''The payrolls submitted shall set out accurately and completely all of the information required, including 'name, address, and Social Security number of each such worker * * *.''' 29 CFR 5.5(a)(3)(i), (ii). These requirements flow down to subcontractors as well. *Id.* 5.5(a)(6).

In addition to the statutory authorities above, Reorganization Plan No. 14 of 1950 conferred upon the Secretary of Labor the authority to coordinate the administration and enforcement of the labor standards provisions of the above laws by the federal agencies providing the federal funding or assistance for the covered construction activities. *See* 5 U.S.C. Appendix.

The Secretary delegated her authority under the Davis-Bacon Act, 40 U.S.C. 3141; the Copeland Act, 40 U.S.C. 3145; Reorganization Plan No. 14 of 1950; the Tennessee Valley Authority Act, 16 U.S.C. 831; and the Contract Work Hours and Safety Standards Act, as amended, 40 U.S.C. 3701, *et seq.* to the Assistant Secretary for Employment Standards Administration. *See* Secretary's Order 01–2008, issued May 30, 2008, and published in the **Federal Register** on June 6, 2008 (73 FR 32424).

## IV. Response to Comments and Discussion of Final Rule

The Department appreciates the many constructive suggestions and criticisms of the proposal, and it has carefully considered all of the comments, analyses, and arguments made for and against the proposed changes.

The Department has determined that its experience in enforcing the requirements of the Davis-Bacon and Related Acts and Copeland Act do not require weekly submissions to the government (in the form of certified payroll statements) to include complete social security numbers and home addresses for individual workers (alongside the workers' specific weekly income and benefits amounts as currently required). The Department finds that this information is personal to the worker and that any unnecessary disclosures and submittal to contractors, other entities, and/or the government creates an exposure to identity theft and the invasion of privacy for workers. The Department believes workers in the construction industry performing work on a covered project under the Davis-Bacon and Related Acts are entitled to have their personal addresses and social security numbers kept as private as possible.

In fact, the requirements for including complete social security numbers and home addresses on certified payrolls does not comport with recent efforts to limit the use of personally identifying information in government generally. For example, the President recently issued revised Executive Order No. 9397 on November 18, 2008, which amended a 1930s directive mandating the use social security numbers in interactions with government to make it permissible instead of mandatory: ''It is the policy of the United States that Federal agencies should conduct agency activity that involve personal identifiers in a manner consistent with protection of such identifiers against unlawful use.''

Moreover, reducing the collection of information on certified payrolls is in accord with Office of Management and Budget guidelines. As noted in the NPRM, the Office of Management and Budget issued a Memorandum in 2007 directing government agencies to reduce ''the volume of collected and retained [personal identifying] information to the minimum necessary; [and limit] access to only those individuals who must have such access.'' OMB Memorandum M–07–16 at 2. Although several commenters disagreed, the Department reads the Memorandum as clearly both a directive to safeguard information and to reduce collection of such information where possible.

Indeed, other government agencies have adopted privacy protection policies and noted the very real dangers of identity theft. As stated by the U.S. Social Security Administration: ''Identity theft is one of the fastest growing crimes in America. A dishonest person who has your Social Security number can use it to get other personal information about you. Identity thieves can use your number and your good credit to apply for more credit in your name. Then, they use the credit cards and do not pay the bills. You may not find out that someone is using your number until you are turned down for credit or you begin to get calls from unknown creditors demanding payment for items you never bought. Someone illegally using your Social Security number and assuming your identity can cause a lot of problems.'' *See http://www.ssa.gov/pubs/10064.html.*

As noted in more detail in the NPRM, Congress has also focused on protecting the privacy interests of workers (*see, e.g.,* the Privacy Act, the Health Insurance Portability and Accountability Act (HIPAA)) and courts have specifically noted the privacy issues regarding public disclosures of certified payrolls under the Freedom of Information Act. *See, e.g., Sheet Metal Workers Int'l Ass'n, Local No. 19* v. *U.S. Veterans Affairs*, 135 F.3d 891 (3d Cir. 1998) (disclosure of names, social security numbers, or addresses on certified payrolls would constitute unwarranted invasion of privacy); *Painting Indus. Of Haw. Mkt. Recovery Fund* v. *United States Dep't of Air Force*, 26 F.3d 1479 (9th Cir. 1994) (names and addresses).

The Department believes that the final rule strikes the appropriate balance between the ability to enforce the law and the need to protect the privacy interests of workers. Some commenters expressed concern that the proposed change may impact enforcement or increase costs. The Department, however, did not find the comments submitted compelling nor does the Department's enforcement experience suggest that continued effective enforcement and protecting the privacy interests of workers are mutually exclusive goals. The Department also

has determined that the added benefits of reducing burdens to the regulated community and government agencies and providing appropriate flexibility to Federal agencies, State agencies, and covered contractors and subcontractors argue in favor of the change.

In reviewing the comments, however, the Department has decided to make several modifications to the proposal. In order to address the concern that eliminating access to social security numbers could work as a hardship for those monitoring compliance in circumstances where there are multiple employees with the same names, the Department will continue to require an individual identifying number on certified payrolls. The Department will require that, in accord with suggestions received from the public, that certified payrolls continue to include a line item for contractors and subcontractors to include an individual identifying number for tracking purposes, which in virtually all cases, should be the last four digits of the workers' social security number. This will substantially limit the possibility of identity theft while still ensuring workers can be separately identified effectively by auditors and investigators.

In addition, contractors and subcontractors will be required to maintain and provide data to investigators demonstrating the appropriate payment of prevailing wages, including complete social security numbers and current home addresses for laborers and mechanics employed on covered contracts. This obligation is identified in the current regulations and will remain unchanged. Thus, government agencies and the Department of Labor remain entitled to request or review all relevant payroll information, including the addresses and social security numbers of individual workers, from contractors or subcontractors. In addition, prime contractors will continue to have an obligation to assist the government in auditing or investigating compliance, including assisting the government in obtaining records from subcontractors if necessary. In order to better delineate the obligations and responsibilities of contractors and subcontractors to cooperate and assist in audits or investigations regarding prevailing wage requirements, the Department has adopted the suggestion of one of the commenters to make this more explicit in the regulations as part of the final rule.

With regard to the suggestion that the Department instead require better safeguards of the information, the Department believes contractors, subcontractors and government agencies (as well as applicants, sponsors, and owners where they are involved in a covered project) have a general obligation to safeguard the personally identifying information of workers. The Department, however, does not believe it would be appropriate to require that certified payrolls be subject to some sort of one-size-fits-all protection such as encryption or restriction to use or review by specific persons only. Each government agency, contractor, and subcontractor may have different methods of safeguarding information, and the Department does not believe it is in a position to mandate any particular method that will be appropriate to all situations. In general, the Department believes the best way to prevent the misuse or loss of personally identifying information is not to require contractors, applicants, sponsors, owners, or government agencies to disseminate it unless necessary for a compelling government interest. To the extent information must be gathered to ensure prevailing wage law compliance, the individual government agencies and regulated community are in the best position to decide how to manage the information received and request additional information so personally identifying information is not lost or misused. As such, the Department has declined to add or substitute language mandating any particular type of security for certified payrolls.

With regard to concerns that any reduction in reporting will lead to fraud or less compliance or added costs, the Department does not believe the comments provide any concrete basis to support this allegation. Certified payrolls will continue to include all required wage and hour data, names and a personal identification number. Under the revised regulations, contractors and subcontractors will certify that they are maintaining the remaining information. The revised regulations require contractors and subcontractors to provide such information on request. Thus, the revised regulations do not limit the ability of investigators or auditors to get the appropriate information; rather, the revised regulations simply prevent the indiscriminate free-flow of personally identifiable information when the government has no need for it. In addition, most contractors and subcontractors on DBRA-covered projects make good faith efforts to abide by the law; violations often derive from a misunderstanding rather than intent. The Department does not believe this will change simply because the regulated community is no longer required to report their employees' home addresses and full social security numbers every week on certified payrolls. Moreover, contractors and subcontractors that falsify certify required certifications will continue to be subject to possible civil and criminal prosecution. *See* 29 CFR 5.5(a)(ii)(D).

With regard to suggestions that there is no evidence this change is necessary, the Department disagrees. Although the Department is unaware of any organized identity theft activity utilizing certified payrolls, there are daily examples of accidental disclosures of personally identifying information or intentional theft of such information. For example, on December 5, 2008, the Wall Street Journal reported that a state-level agency accidentally put the Social Security numbers of about 250,000 job seekers on the Internet for 19 days before a separate state agency noticed the security breach. The federal government has also lost computers or data containing significant amounts of personally identifying information (PII), including social security numbers and personal addresses. *See, e.g., http://www.usa.gov/veteransinfo.shtml* (discussing 2006 PII data breaches/computer thefts). Similarly, cities and labor unions have had identity theft occur in circumstances where personally identifying information is required to be disclosed to labor unions by the government. *See, e.g., Bell* v. *Michigan Council 25*, No. 246684, 2005 WL 356306 (Mich. App. Feb. 15, 2005) (City of Detroit employees and members of AFSCME Local 1023 sued union local and union treasurer for negligence when they suffered identity theft at hands of union treasurer's daughter). While it is unquestionable that government uses PII for legitimate purposes in many instances, there is certainly an interest in reducing the gathering and storing of PII to prevent the opportunity for identity theft and invasion of privacy. Moreover, the burden reduction identified below for the regulated community suggests there are added benefits that outweigh any alleged costs.

Several commenters questioned the Department's interpretation of *Building & Const. Trades' Dept., AFL–CIO* v. *Donovan*, 712 F.2d 611 (D.C. Cir. 1983). The court in that case held that the Copeland Act required covered contractors and subcontractors performing work on most federally financed or assisted construction contracts to furnish weekly a statement with respect to the wages paid each worker during the preceding week. Importantly, however, the court noted that there was no specific requirement

for what individualized wage information for each covered worker was necessary on the certified payroll submissions. *See id.* at 633. As noted in the NPRM, the Department does not believe there is any statutory requirement that the Department require social security numbers or addresses on certified payroll and a clear reading of the statutory law and the decision is that the Department has discretion for the specific requirements of weekly disclosures as long as the disclosures provide an appropriate amount of information. The Department therefore disagrees with the commenters' alternative characterization of the court's decision.

Similarly, one commenter's suggestion that there is some impropriety to the proposal based on the 30-day comment period under the Administrative Procedure Act is mistaken. The APA does not specify a particular comment period. For the very minor nature of the proposal in this case, 30 days is not overly short. Moreover, only a few commenters (all of whom were members of Congress) requested an extension at all, so there is no evidence the short period limited the public in their attempts to provide meaningful comments.

The Department also does not find that a May 2008 Memorandum from the White House Chief of Staff limits its right to finalize this rule as commenters suggested. The Memorandum specifically states that it was not intended to alter or impede government agencies in performing their responsibilities and that part of its purpose is to ensure agencies design regulations to minimize costs and maximize benefits. Therefore, the Department notes the May 2008 Memorandum does not preempt the 2007 OMB Memorandum M–07–16 discussed above nor the President's revised Executive Order No. 9397 of November 18, 2008—both of which promote agency compliance with limiting the collection and use generally of personally identifying information.

With regard to addresses of covered construction workers, it should be noted that this is not a substantial change to the current certified payroll requirements. The instructions to WHD's optional Form WH–347, which is a model for certified payroll submissions, currently specifies that addresses are only required for the first time the laborer or mechanic performs work on the contract and whenever there is a change of address. The final rule further limits that disclosure slightly by bringing the regulatory provisions in line with information collection needs—requiring contractors and subcontractors to make addresses and/or social security numbers of covered workers available to DOL or other government agency investigators and auditors upon request but not in weekly reports that are disseminated to a wider audience.

Accordingly, after a detailed review of the comments provided and consideration of the regulation in accordance with statutory requirements, the Department has determined that the requirement to furnish weekly a detailed payroll with respect to the wages paid each employee during the preceding week can be satisfied by a weekly submission of a payroll without home addresses and complete social security numbers. The regulatory changes merely remove the requirement to include a complete social security number and home address of each individual worker from documents that are provided weekly to the workers' non-employing government agencies, contractors, subcontractors, applicants, sponsors, and/or owners.

This change is in keeping with the Administration's overall objective of protecting the privacy interests of this nation's workers and reducing reporting burdens imposed on the public. Also, the Department believes the current requirement creates a burden on contractors and the government to safeguard copies of certified payrolls containing this type of personally identifying information regarding each week of every covered project. For example, one commenter noted a frequent need to redact just this sort of information in response to Freedom of Information Act (FOIA) requests. By removing this information from certified payrolls, the government will have less information to redact in responding to entities requesting copies of certified payrolls under the FOIA, which will save the government time and costs as well as improve speed in responding to such requests from the public.

Importantly, the final regulation does not change the requirement that the addresses and social security numbers of covered workers be maintained and made available to government agencies upon request to permit government agencies to investigate compliance with the requirements of the Davis-Bacon and Related Acts and/or Copeland Act, 29 CFR 5.5(a)(3)(i), (iii). In response to commenters noting some difficulty with retrieving this type of information upon occasion, however, the Department is providing explicitly in the revised text of the regulatory provisions (which is incorporated into covered construction contracts) that contractors and subcontractors must maintain this information and make it available upon request to government investigators and auditors.

Two implementing changes are needed to other aspects of the regulations to bring them in line with the final rule. WHD's optional Form WH–347, which is a model for certified payroll submissions, is to be amended to reflect these requirements and was the subject of a Paperwork Reduction Act notice as discussed more fully below. A conforming change to the certification required for certified payrolls is also included in the final rule regulatory text (changing the certification to that required to be provided by the final rule).

The Department received no comments on two issues noted in the proposal and so is implementing the two ministerial changes to reflect current practices. The first of these eliminates references in the regulations to Form WH–348, as the agency no longer sponsors the form. *See* 29 CFR 3.3(b). The information previously presented on Form WH–348 appears on Form WH–347 and was duplicative. In addition, the rule revises how interested parties may obtain Form WH–347, as the form is no longer available for purchase through the Government Printing Office. *See* 29 CFR 3.3(b) and 5.5(a)(3)(ii)(A).

Also, because the changes being made are minor and result in a net reduction in burden, the Department has determined that a 30-day effective date is appropriate. *See* section XVI below.

**V. Paperwork Reduction Act**

The Office of Management and Budget (OMB) has assigned control number 1215–0149 to the Davis-Bacon Certified Payroll information collection. In accordance with the Paperwork Reduction Act of 1995 (PRA), the October 20, 2008, NPRM solicited comments on the proposed revisions to this information collection. 44 U.S.C. 3506(c)(2). The Department also submitted a contemporaneous request for OMB review of the proposed revisions, in accordance with 44 U.S.C. 3507(d). On October 28, 2008, the OMB issued a notice that continued the current authority for existing information collection requirements. The OMB also asked the Department to resubmit the information collection request upon promulgation of a final rule and after considering public comments on the NPRM. While the Department received comments regarding substantive aspects of the information collection, no comments directly addressed the methodology for

estimating the public burden under the PRA.

Under the final rule, the contractor's staff must still perform a search/research function to pull each employee's social security number from its records to encode the last four digits as an identifier, and the burden computation for the final rule must include all the time involved in searching for and compiling the required data. Thus, there will be less of a reduction in burden for omitting portions of the Social Security numbers that are not put onto the weekly certified payroll report forms. DOL therefore is amending the burden reduction in the estimate from the original two minutes to a one minute reduction (per response). Accordingly, the Department has revised its estimate that each response to this information collection takes approximately 54 minutes to 55 minutes. In order to facilitate a full understanding of all the issues involved and avoid unnecessary duplicative statements, public comments addressing the information collection requirements imposed by this final rule are discussed in the comment summary portion of this preamble.

Interested parties may obtain a prototype Davis-Bacon Certified Payroll, Form WH–347, via the Wage and Hour Division's Forms Web site at *http://www.dol.gov/esa/whd/forms/wh347instr.htm*, by contacting the Wage and Hour Division at 1–866–4US–WAGE (1–866–487–9243), or by visiting a Wage and Hour Division District Office. A list of District Office addresses is available on the Internet at *http://www.dol.gov/esa/whd/america2.htm*. Form WH–347 is also available through the forms.gov Web site. While use of Form WH–347 is optional, it is mandatory for contractors performing on covered projects to provide the information specified in 29 CFR 3.3, 5.5(a)(3). Responses are not confidential; however, FOIA exemptions may allow for the redaction of certain information that respondents submit. In addition, the Department as well as contracting agencies use the information provided in administering the labor standards provisions of covered Federally financed or assisted construction projects. The information also may be used in administrative and legal proceedings.

Generally, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. 5 CFR 1320.8(b)(3)(vi). The Department has resubmitted the revised Davis-Bacon Certified Payroll information collection to the OMB for approval, and the Department intends to publish a notice announcing the OMB's decision regarding this information collection request. A copy of the information collection request can be obtained at *http://www.RegInfo.gov* or by contacting the Wage and Hour Division as shown in the **FOR FURTHER INFORMATION CONTACT** section of this preamble. The terms of the existing information collection authorization will remain in effect until the OMB finally approves the new information collection request or this final rule takes effect on January 18, 2009, whichever date is later.

*Purpose and Use:* The Copeland Act requires contractors and subcontractors performing work on most federally financed or assisted construction contracts to furnish weekly a statement with respect to the wages paid each worker during the preceding week. *See* 40 U.S.C. 3145; 29 CFR 3.3(b), 3.4. Contractors must submit weekly a copy of all payrolls to the federal agency contracting for or financing the construction project, if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the payrolls to the applicant, sponsor, or owner, as the case may be, for transmission to the contracting agency. 29 CFR 5.5(a)(3)(ii)(A). A signed ''Statement of Compliance'' indicating the payrolls are correct and complete and that each laborer or mechanic has been paid not less than the proper Davis-Bacon Act prevailing wage rate for the work performed must accompany the payroll. *Id.* 3.3(b), 5.5(a)(3)(ii)(B). Contractors must also maintain these records for three years after completion of the work. *Id.* 3.4(b), 5.5(a)(3)(i).

More specifically, the current regulations require contractors performing work on projects subject to Davis-Bacon Act provisions to retain the name, address, social security number, correct classification, hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in Davis-Bacon Act section 1(b)(2)(B)), daily and weekly number of hours worked, deductions made, and actual wages paid to each worker on the contract. *Id.* 5.5(a)(3)(i). Whenever the Secretary of Labor has found under 29 CFR 5.5(a)(1)(iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or program described in Davis-Bacon Act section 1(b)(2)(B), the contractor must maintain records showing that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, that the plan or program has been communicated in writing to the laborers or mechanics affected, and the anticipated or actual costs incurred in providing such benefits. *Id.* Contractors employing apprentices or trainees under approved programs must maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs. *Id.*

Under this final rule, the Department is only removing the regulatory requirement that the weekly payroll submitted to the contracting agency contain each worker's entire social security number and address. The proposal does not remove the requirement for worker addresses and social security numbers to be retained in records maintained by the contractor or subcontractor. *Id.* 5.5(a)(3)(i). *See also id.* 5.5(a)(6). Government contracting officials and WHD staff may use the records maintained by contractors and subcontractors as well as the weekly certified payrolls to verify payment of the required wages for the work performed.

The Department has developed optional use Form WH–347, Payroll Form, which contractors may use to meet the payroll reporting requirements. *Id.* 3.3(b), 5.5(a)(3)(ii)(A). The form contains the basic payroll information that contractors must furnish each week they perform any work subject to Davis-Bacon Act provisions. The contractor also completes, dates, and signs a statement on the reverse side of the form to meet the certification requirement. The contractor submits the completed form weekly to the contracting agency. 29 CFR 5.5(a)(3)(ii)(A).

*Information Technology:* In accordance with the Government Paperwork Elimination Act (GPEA), 44 U.S.C. 3504, the WHD has posted Form WH–347 on the Internet (*http://www.dol.gov/esa/whd/forms/wh347.pdf*) in a printable and fillable format that automatically performs some mathematical calculations. Individual contracting agencies determine any electronic submission options, because contractors submit the information directly to each contracting agency, not to the Department. 29 CFR 5.5(a)(3)(ii)(A).

In 2004, WHD issued a letter to the U.S. Army Corps of Engineers and the Federal Highway Administration advising that the submission of electronic signatures satisfied the

requirements of the Copeland Act and its regulations. Similarly, the submission of photocopies or other automated duplication of the contractor's regular payrolls containing all of the required information pertinent to the government construction project(s) is sufficient to satisfy the payroll data requirements. 29 CFR 5.5(a)(3)(ii)(A).

A number of commenters on the proposed rule noted that there were additional applications and methods to improve efficiency in satisfying regulatory requirements and all commenters who discussed the issue endorsed additional use of technology, including electronic filing of certified payrolls. It is the Department's understanding that Web-based certified payroll compliance solutions exist and that some agencies and contractors have set up systems to comply electronically already. While a number of commenters suggested that the Department further study and endorse these initiatives, the Department of Labor has determined that specific methods of implementing cost savings and efficiencies through more effective use of technology are best left to the contracting community and individual government agencies. DOL encourages all government agencies to review proposals to allow contractors to submit information electronically or through allowing access to an appropriate agency approved limited-access Web-based portal providing the required information and certification. The Department believes these efforts, if properly reviewed and implemented in accord with this final rule and data privacy requirements, will decrease burden, increase the efficient use of resources and better ensure timely submission of certified payrolls to improve compliance. The Department therefore supports agencies in exploring and implementing any additional methods to improve efficient compliance with the certified payroll requirements.

*Public Burden Estimates:* This final rule introduces no new information collection requirements nor proposes any substantive or material changes to the existing information collection requirements noted above. The Department, however, is removing the requirement to report an employee's entire social security number and home address weekly, which the Department estimates will reduce the average reporting time from an average of 56 minutes per response to 55 minutes per response.

The Department bases the following burden estimates for this information collection on agency experience, except as otherwise noted. F.W. Dodge Report data for the period June 1, 2007, through May 31, 2008, indicate there were 109,323 State and local construction projects and 3032 federal construction projects. The Department estimates that approximately 33 percent of State and local construction projects utilize federal funds, resulting in an estimated 36,077 State and local construction projects being subject to Davis-Bacon labor standards (109,323 projects × 33 percent). Added to the 3032 federal projects, this would be an estimated 39,109 annual projects subject to Davis-Bacon labor standards.

The Department estimates these projects have an average of 8 contractors or subcontractors, resulting in 312,872 individual contractor and subcontractor projects (39,109 projects × 8 contractors and subcontractors per project = 312,872 individual projects).

To yield the estimated number of respondents, the Department estimates that, on a per capita basis, each covered construction contractor annually works on an average of four projects subject to Davis-Bacon Act provisions. Thus, 312,872 individual projects divided by 4 Davis-Bacon projects per contractor equals 78,218 respondents.

The Department also estimates that a typical contractor or subcontractor on average submits 23 certified payrolls per individual project. Thus, 312,872 individual projects multiplied by 23 weekly responses equal 7,196,056 total annual responses.

The 7,196,056 responses multiplied by 55 minutes (estimated time to complete Form WH–347 or its equivalent) equal 395,783,080 minutes or 6,596,385 hours (rounded).

An agency may not conduct an information collection unless it has a currently valid OMB approval and the Department has submitted the identified information collections contained in the rule to the OMB for review under the PRA. *See* 44 U.S.C. 3507(d); 5 CFR 1320.11. Please note that the current authorization for the Davis-Bacon Certified Payroll information collection expires April 30, 2009. On December 1, 2008, the Department's routine Paperwork Reduction Act notice for extension of the existing Davis-Bacon information collection requirements that are also the subject of this final rule closed. 73 FR 57153. No comments were received.

## VI. Executive Order 12866; Small Business Regulatory Enforcement Fairness Act; Regulatory Flexibility

This rule is not economically significant within the meaning of Executive Order 12866, or a ''major rule'' under the Unfunded Mandates Reform Act or Section 801 of the Small Business Regulatory Enforcement Fairness Act.

The Department believes that a reduction in the amount of information required on certified payrolls provided weekly under Davis-Bacon is a reduction in regulatory compliance costs. While some contractors may have to slightly reconfigure their systems to produce the revised version, most have access to computerized systems that can easily be revised to remove data. Those contractors who currently use the optional WH Form will actually have an overall decrease of total administrative costs.

*Conclusion:* The Department concludes that incorporating these changes into the Davis-Bacon regulations will not impose any measurable costs on any private or public sector entity.

Furthermore, because the rule will not impose any measurable costs on employers, the Department certifies that it would not have a significant economic impact on a substantial number of small entities. Accordingly, the Department need not prepare a regulatory flexibility analysis under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The Department has certified this conclusion to the Chief Counsel for Advocacy of the Small Business Administration.

## VII. Unfunded Mandates Reform Act

This rule has been reviewed in accordance with the Unfunded Mandates Reform Act of 1995 (UMRA). 2 U.S.C. 1501 *et seq.* For the purposes of the UMRA, the Department certifies that this rule does not impose any federal mandate that may result in increased expenditures by State, local, or tribal governments, or increased expenditures by the private sector, of more than $100 million in any year.

## VIII. Executive Order 13132 (Federalism)

The Department has reviewed this rule in accordance with the Executive Order on Federalism (Executive Order 13132, 64 FR 43255, Aug. 10, 1999). This rule does not have federalism implications as outlined in E.O. 13132. The rule does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

**IX. Executive Order 13175, Indian Tribal Governments**

The Department has reviewed this rule under the terms of Executive Order 13175 and determined it did not have ''tribal implications.'' The rule does not have ''substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the federal government and Indian tribes.'' As a result, no tribal summary impact statement has been prepared.

**X. Effects on Families**

The Department certifies that this rule will not adversely affect the well-being of families, as discussed under section 654 of the Treasury and General Government Appropriations Act, 1999.

**XI. Executive Order 13045, Protection of Children**

The Department has reviewed this rule under the terms of Executive Order 13045 and determined this action is not subject to E.O. 13045 because it is not economically significant as defined in E.O. 12866 and it does not impact the environmental health or safety risks of children.

**XII. Environmental Impact Assessment**

The Department has reviewed this rule in accordance with the requirements of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, the regulations of the Council of Environmental Quality, 40 CFR part 1500 *et seq.*, and the Departmental NEPA procedures, 29 CFR part 11, and determined that this rule will not have a significant impact on the quality of the human environment. There is, thus, no corresponding environmental assessment or an environmental impact statement.

**XIII. Executive Order 13211, Energy Supply**

The Department has determined that this rule is not subject to Executive Order 13211. It will not have a significant adverse effect on the supply, distribution or use of energy.

**XIV. Executive Order 12630, Constitutionally Protected Property Rights**

The Department has determined that this rule is not subject to Executive Order 12630 because it does not involve implementation of a policy ''that has taking implications'' or that could impose limitations on private property use.

**XV. Executive Order 12988, Civil Justice Reform Analysis**

The Department drafted and reviewed this final rule in accordance with Executive Order 12988 and determined that the rule will not unduly burden the federal court system. The rule was: (1) Reviewed to eliminate drafting errors and ambiguities; (2) written to minimize litigation; and (3) written to provide a clear legal standard for affected conduct and to promote burden reduction.

**XVI. Dates of Applicability**

The revisions to § 5.5(a)(3)(ii)(A) and (B)(1) of Part 5 shall be applicable only as to contracts entered into pursuant to invitations for bids issued or negotiations concluded on or after the effective date of this rule, which is January 18, 2009.

**List of Subjects**

*29 CFR Part 3*

Government contracts, Labor, Paperwork, Law enforcement.

*29 CFR Part 5*

Government contracts, Labor, Paperwork, Law enforcement.

Signed at Washington, DC, this 11th day of December 2008.

**Victoria A. Lipnic,**

*Assistant Secretary, Employment Standards Administration.*

**Alexander J. Passantino,**

*Acting Administrator, Wage and Hour Division.*

■ For the reasons set forth above, Title 29, Subtitle A of the Code of Federal Regulations is amended by amending parts 3 and 5 as follows:

## PART 3—CONTRACTORS AND SUBCONTRACTORS ON PUBLIC BUILDING OR PUBLIC WORK FINANCED IN WHOLE OR IN PART BY LOANS OR GRANTS FROM THE UNITED STATES

■ 1. The authority citation for Part 3 is revised to read as follows:

**Authority:** R.S. 161, sec. 2, 48 Stat. 848; Reorg. Plan No. 14 of 1950, 64 Stat. 1267; 5 U.S.C. 301; 40 U.S.C. 3145; Secretary's Order 01–2008; and Employment Standards Order No. 2001–01.

■ 2. Amend § 3.3 by revising paragraph (b) to read as follows:

**§ 3.3 Weekly statement with respect to payment of wages.**

* * * * *

(b) Each contractor or subcontractor engaged in the construction, prosecution, completion, or repair of any public building or public work, or building or work financed in whole or in part by loans or grants from the United States, shall furnish each week a statement with respect to the wages paid each of its employees engaged on work covered by this part 3 and part 5 of this title during the preceding weekly payroll period. This statement shall be executed by the contractor or subcontractor or by an authorized officer or employee of the contractor or subcontractor who supervises the payment of wages, and shall be on the back of Form WH 347, ''Payroll (For Contractors Optional Use)'' or on any form with identical wording. Copies of Form WH 347 may be obtained from the Government contracting or sponsoring agency or from the Wage and Hour Division Web site at *http://www.dol.gov/esa/whd/forms/wh347instr.htm* or its successor site.

* * * * *

## PART 5—LABOR STANDARDS PROVISIONS APPLICABLE TO CONTRACTS COVERING FEDERALLY FINANCED AND ASSISTED CONSTRUCTION (ALSO LABOR STANDARDS PROVISIONS APPLICABLE TO NONCONSTRUCTION CONTRACTS SUBJECT TO THE CONTRACT WORK HOURS AND SAFETY STANDARDS ACT)

■ 3. The authority citation for part 5 is revised to read as follows:

**Authority:** 5 U.S.C. 301; R.S. 161, 64 Stat. 1267; Reorganization Plan No. 14 of 1950, 5 U.S.C. appendix; 40 U.S.C. 3141 *et seq.*; 40 U.S.C. 3145; 40 U.S.C. 3148; 40 U.S.C. 3701 *et seq.*; and the laws listed in 5.1(a) of this part; Secretary's Order 01–2008; and Employment Standards Order No. 2001–01.

■ 4. Amend § 5.5 paragraphs (a)(3)(ii)(A) and (a)(3)(ii)(B)(*1*) by revising to read as follows:

**§ 5.5 Contract provisions and related matters.**

(a) * * *

(3) * * * (ii)(A) The contractor shall submit weekly for each week in which any contract work is performed a copy of all payrolls to the (write in name of appropriate federal agency) if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the payrolls to the applicant, sponsor, or owner, as the case may be, for transmission to the (write in name of agency). The payrolls submitted shall set out accurately and completely all of the information required to be maintained under 29 CFR 5.5(a)(3)(i), except that full social security numbers and home addresses shall not be included on weekly transmittals. Instead the payrolls shall only need to include an individually

identifying number for each employee (*e.g.*, the last four digits of the employee's social security number). The required weekly payroll information may be submitted in any form desired. Optional Form WH–347 is available for this purpose from the Wage and Hour Division Web site at *http://www.dol.gov/esa/whd/forms/wh347instr.htm* or its successor site. The prime contractor is responsible for the submission of copies of payrolls by all subcontractors. Contractors and subcontractors shall maintain the full social security number and current address of each covered worker, and shall provide them upon request to the (write in name of appropriate federal agency) if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit them to the applicant, sponsor, or owner, as the case may be, for transmission to the (write in name of agency), the contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or audit of compliance with prevailing wage requirements. It is not a violation of this section for a prime contractor to require a subcontractor to provide addresses and social security numbers to the prime contractor for its own records, without weekly submission to the sponsoring government agency (or the applicant, sponsor, or owner).

(B) * * *

(1) That the payroll for the payroll period contains the information required to be provided under § 5.5 (a)(3)(ii) of Regulations, 29 CFR part 5, the appropriate information is being maintained under § 5.5 (a)(3)(i) of Regulations, 29 CFR part 5, and that such information is correct and complete;

## POSTAL REGULATORY COMMISSION

### 39 CFR Part 3020

**[Docket Nos. MC2009–8 and CP2009–9; Order No. 147]**

### Administrative Practice and Procedure, Postal Service

**AGENCY:** Postal Regulatory Commission.

**ACTION:** Final rule.

**SUMMARY:** The Commission is adding a new international mail product to the Competitive Product List. This product is a contract between the United States Postal Service and Canada Post for inbound competitive services. It modifies and extends an existing agreement. The Commission's action is consistent with changes to applicable federal law and regulations and with a recent Postal Service request. Republication of the lists of market dominant and competitive products is also consistent with requirements in the law.

**DATES:** Effective December 19, 2008.

**ADDRESSES:** Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.*

**FOR FURTHER INFORMATION CONTACT:** Stephen L. Sharfman, General Counsel, 202–789–6820 and *stephen.sharfman@prc.gov.*

**SUPPLEMENTARY INFORMATION:** *Regulatory History,* 73 FR 70681 (November 21, 2008).

The Postal Service seeks to add a new product identified as Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services (MC2009–8 and CP2009–9) to the Competitive Product List. For the reasons discussed below, the Commission approves the Request.

### I. Background

On November 13, 2008, the Postal Service filed a formal request pursuant to 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.* to add the Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services (Bilateral Agreement) to the Competitive Product List.[1] The Postal Service asserts that the Contractual Bilateral Agreement is a competitive product ''not of general applicability'' within the meaning of 39 U.S.C. 3632(b)(3). This Request has been assigned Docket No. MC2009–8.

The Postal Service contemporaneously filed notice, pursuant to 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5, that the Governors have established prices and classifications not of general applicability for inbound competitive services as reflected in the Bilateral Agreement. More specifically, the Bilateral Agreement, which has been assigned Docket No. CP2009–9, governs the exchange of Inbound Surface Parcel Post from Canada.

In support of its Request, the Postal Service filed a redacted version of the Governors' Decision establishing prices for the Bilateral Agreement. Attached to the Governors' Decision are proposed Mail Classification Schedule language; a redacted version of management's analysis of the Bilateral Agreement; certification of compliance with 39 U.S.C. 3633(a); certification of the Governors' vote;[2] and a Statement of Supporting Justification as required by 39 CFR 3020.32.[3] In addition, the Postal

[1] Request of United States Postal Service to Add Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services to the Competitive Product List, and Notice of Filing (Under Seal) the Enabling Governors' Decision and Agreement, November 13, 2008 (Request).

[2] *See* Attachment 1 to the Request.

[3] *See* Attachment 2 to the Request.

Service indicates that it filed an unredacted copy of the Governors' Decision, the Bilateral Agreement, and other supporting documents designed to establish compliance with 39 CFR 3015.5 under seal. Request at 2, n.2.

In the Statement of Supporting Justification, Lea Emerson, Executive Director, International Postal Affairs, asserts that ''[t]he addition of the [Bilateral] Agreement as a competitive product will enable the Commission to verify that the agreement covers its attributable costs and enables competitive products, as a whole, to make a positive contribution to coverage of institutional costs.'' *Id.* at 2. W. Ashley Lyons, Manager, Corporate Financial Planning, Finance Department, certifies that the contract complies with 39 U.S.C. 3633(a). Request, Attachment C. He observes that the Bilateral Agreement ''should not impair the ability of competitive products on the whole to cover an appropriate share of institutional costs.''*Id.*

The Postal Service filed much of the supporting materials, including the Governors' Decision and the Bilateral Agreement, under seal. It maintains that the Bilateral Agreement, related financial information, and the Governor's Decision should remain under seal as they contain pricing, cost, and other information that are highly confidential. Request at 2.[4]

The Postal Service has an existing bilateral agreement with Canada Post which is set to expire December 31, 2008. *Id.* at 3. The new prices and classifications modify the current agreement, extend it for 1 year, and are scheduled to take effect January 1, 2009, or ''after filing with and review by the Postal Regulatory Commission, whichever, is later.'' Request, Attachment 1, at 2.

In Order No. 134, the Commission gave notice of the two dockets, appointed a public representative, and provided the public with an opportunity to comment.[5] Pursuant to 39 CFR 3015.6, Chairman's Information Request No.1 was issued November 24, 2008. The Postal Service filed its response on December 1, 2008 as requested.[6]

## II. Comments

Comments were filed by the Public Representative.[7] No filings were submitted by other interested parties. The Public Representative's comments focus principally on confidentiality and pricing under the contract. Public Representative Comments at 3–4.

The Public Representative states that a sufficient rationale for maintaining the confidentiality of the documents under seal has been provided by the Postal Service. He reviewed the cost savings measures for the contract and determined that the contract is advantageous to the Postal Service and beneficial to the general public. *Id.* He notes that the Commission's 2007 Annual Compliance Determination (ACD) found that Inbound Surface Parcel Post under the bilateral agreement with Canada incurred a loss and the Postal Service is attempting to remedy this issue with this agreement.[8] Additionally, he observes that the pay-for-performance standards will improve the performance of both postal administrations. He concludes, *inter alia,* that the contract appears to meet each element of 39 U.S.C. 3633(a). *Id.* at 2.

## III. Commission Analysis

The Commission has reviewed the contract, the financial analysis provided under seal that accompanies it, the additional information filed by the Postal Service in response to the Chairman's Information Request, and the comments filed by the Public Representative.

*Statutory requirements.* The Commission's statutory responsibilities in this instance entail assigning the Bilateral Agreement with Canada Post for Inbound Competitive Services to either the Market Dominant Product List or to the Competitive Product List. 39 U.S.C. 3642. As part of this responsibility, the Commission also reviews the proposal for compliance with the Postal Accountability and Enhancement Act (PAEA) requirements. This includes, for proposed competitive products, a review of the provisions applicable to rates for competitive products. 39 U.S.C. 3633.

*Product list assignment.* In determining whether to assign the Bilateral Agreement with Canada Post for Inbound Competitive Services as a product to the Market Dominant Product List or the Competitive Product List, the Commission must consider whether

> the Postal Service exercises sufficient market power that it can effectively set the price of such product substantially above costs, raise prices significantly, decrease quality, or decrease output, without risk of losing a significant level of business to other firms offering similar products.

39 U.S.C. 3642(b)(1). If so, the product will be categorized as market dominant. The competitive category of products shall consist of all other products.

The Commission is further required to consider the availability and nature of enterprises in the private sector engaged in the delivery of the product, the views of those who use the product and the likely impact on small business concerns. 39 U.S.C. 3642(b)(3).

In Docket No. RM2007–1, Order No. 43, the Commission determined that Inbound Surface Parcel Post shipments tendered at negotiated rates are appropriately classified as competitive. The Canada Post Bilateral Agreement falls within this category.

The Postal Service asserts that its bargaining position is constrained by the existence of other shippers who can provide similar services, thus precluding it from taking unilateral action to increase prices without the risk of losing volume to private companies. Request, Attachment 2, at 2–3. The Postal Service also contends that it may not decrease quality or output without risking the loss of business to competitors that offer similar expedited delivery services. *Id.* Finally, the Postal Service states that the market for international parcel delivery services is highly competitive and that the agreement provides a benefit to Canada Post's and the Postal Service's small business customers by providing an additional option for shipping articles between the United States and Canada. It concludes that there should be little, if any negative impact on small business. *Id.* at 4.

No commenter opposes the proposed classification of the Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services, as competitive.

[4] The Postal Service indicates that the materials filed under seal constitute a subset of the overarching agreement between the parties, representing the parties' agreement concerning inbound competitive services. The Postal Service further indicates that the parties anticipate finalizing ''this and related agreements by mid-December, and any lingering details will not affect the rates, classification, or other fundamental basis for this Request and Notice.'' Request at 5, n.12.

[5] PRC Order No. 134, Notice and Order Concerning Bilateral Agreement with Canada Post For Inbound Competitive Services, November 18, 2008 (Order No. 134).

[6] Response of United States Postal Service to Chairman's Information Request No. 1 and Notice of Filing of Responsive Materials (Under Seal) December 1, 2008 (Response).

[7] Public Representative Comments in Response to United States Postal Service Request to add Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services, to the Competitive Product List, and Notice of Filing (Under Seal) the Enabling Governors' Decision and Agreement, December 3, 2008 (Public Representative Comments).

[8] In the ACD summary of International Mail, issued March 27, 2008, the Commission concludes that revenue for competitive Inbound Surface Parcel Post (at non-UPU rates) did not cover its corresponding attributable costs by a relatively small amount.

Having considered the statutory requirements and the support offered by the Postal Service, the Commission finds that the Canada Post-United Postal Service Contractual Bilateral Agreement for Inbound Competitive Services is appropriately classified as a competitive product and should be added to the Competitive Product List.

*Cost considerations.* The Postal Service's filing seeks to establish a new product for Inbound Surface Parcel Post from Canada. The Postal Service asserts the rates provide financial benefits for inbound competitive services which are better than those that would exist if the rates used are set by the Universal Postal Union (UPU) treaty. Request, Attachment 1B, at 1.

The Postal Service contends, as mentioned in the comments of the Public Representative, adding the Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services product will result in better cost coverage for Inbound Surface Parcel Post and address the Commission's concern about cost coverage as expressed in the Annual Compliance Determination for Fiscal Year 2007. The Commission's summary and findings for International Mail concluded that revenues for corresponding competitive Inbound Surface Parcel Post at non-UPU rates did not provide revenues that covered attributable costs. The Postal Service states that its financial analysis of the new prices negotiated in this agreement shows that this contract covers its attributable costs, and does not result in subsidization of competitive products by market dominant products and should not impair the ability of competitive products on the whole to cover an appropriate share of institutional costs. *Id.,* Attachment 1C, at 1.

Based on the data submitted and the comments received, the Commission finds that Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services should cover its attributable costs (39 U.S.C. 3633(a)(2)), should not lead to the subsidization of competitive products by market dominant products (39 U.S.C. 3633(a)(1)), and should have a positive effect on competitive products' contribution to institutional costs (39 U.S.C. 3633(a)(3)). Thus, an initial review of the proposed Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services indicates that it comports with the provisions applicable to rates for competitive products.

It is our understanding that this contract extension will terminate December 31, 2009. If this is not the case, the Postal Service shall promptly notify the Commission when the contract terminates, but no later than the actual termination date. The Commission will then remove the contract from the Mail Classification Schedule at the earliest possible opportunity.

In conclusion, the Commission approves the Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services as a new product. The revision to the Competitive Product List is shown below the signature of this Order and is effective upon issuance of this Order.

## IV. Ordering Paragraphs

*It is Ordered:*

1. Canada Post-United States Postal Service Contractual Bilateral Agreement for Inbound Competitive Services (MC2009–8 and CP2009–9) is added to the Competitive Product List as a new product under International Inbound Surface Parcel Post (at non-UPU) rates.

2. The Secretary shall arrange for the publication of this Order in the **Federal Register**.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 58

**[EPA–HQ–OAR–2006–0735; FRL–8754–9]**

**RIN 2060–AN83**

### National Ambient Air Quality Standards for Lead

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Correcting amendment.

**SUMMARY:** The EPA issued a final rule on November 12, 2008 (effective date January 12, 2009) that revised the National Ambient Air Quality Standard (NAAQS) for lead (Pb) and associated monitoring requirements. This document makes a minor correction to the November 12, 2008, action to correct a typographical error in the regulatory text for the rule.

**DATES:** This correction is effective January 12, 2009.

**FOR FURTHER INFORMATION CONTACT:** Mr. Kevin Cavender, Air Quality Assessment Division (C304–06), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–2364; fax number: (919) 541–1903; e-mail address: *Cavender.kevin@epa.gov.*

**SUPPLEMENTARY INFORMATION:**

#### Background

The EPA issued a final rule on November 12, 2008 (effective date January 12, 2009) that revised the NAAQS for Pb and associated Pb monitoring requirements. As part of the Pb monitoring requirements, monitoring agencies are required to develop a plan for establishing Pb monitoring sites in accordance with the requirements of appendix D of Part 58. A number of requirements for this plan were listed including the identification of (1) the designation of any Pb monitors as either source-oriented or non-source-oriented according to Appendix D to 40 CFR part 58, (2) any source-oriented monitors for which a waiver has been requested or granted by the EPA Regional Administrator as allowed for under paragraph 4.5(a)(ii) of Appendix D to 40 CFR part 58, and (3) any source-oriented or non-source-oriented site for which a waiver has been requested or granted by the EPA Regional Administrator for the use of Pb-$PM_{10}$ monitoring in lieu of Pb-TSP monitoring as allowed for under paragraph 2.10 of Appendix C to 40 CFR Part 58. These requirements were correctly included in the amended regulatory text for 40 CFR Part 58 in the final rule. In describing the amendments to the existing regulatory text, EPA accurately included a reference adding paragraph 58.10 (b)(9) (which contains the first requirement identified above). Although the notice included the text of paragraphs 58.10 (b)(10) and (b)(11) (which contain the second and third requirements identified above), EPA inadvertently failed to specify that these paragraphs were also being added to the existing regulatory text in the amendatory language.

#### Need for Correction

As published, the regulatory text in the final regulation contains a minor error that, if not corrected, would result in an error in the publication of the regulatory amendment in the Code of Federal Regulations. This action merely addresses an error in describing how the CFR regulatory text is amended, and not the amended regulatory text itself. Thus it is proper to issue this action with out notice and comment. Section 553 of the Administrative Procedure Act (APA), 5 U.S.C. 553(b)(B), provides that, when an Agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest, the Agency may issue a rule without providing notice and an opportunity for public comment. We have determined that there is good cause for making this action final without prior proposal and opportunity for comment because the change to the rule is a minor technical correction, is non-controversial, and does not substantively change the agency actions taken in the final rule. We similarly have determined there is good cause for making this rule effective January 12, 2009, because that is the same day the revisions to the Pb NAAQS and the monitoring requirements become effective under the rule published November 12, 2008.

#### Corrections of Publication

The EPA issued a final rule on November 12, 2008 that revised the NAAQS for Pb and associated monitoring requirements. Instruction 15 on how the Code of Federal Regulations is amended inadvertently failed to identify two paragraphs as amendments to 40 CFR 58.10. As published in the November 12, 2008 final rule, instruction 15 reads as follows:

''15. Section 58.10, is amended by added paragraph subsections (a)(4) and adding paragraph (b)(9) to read as follows:''

In FR Doc. E8–25654 published November 12, 2008 (73 FR 66964), make the following correction. On page 67059, in the center column, amendatory instruction 15 is corrected to read as follows:

''15. Section 58.10, is amended by adding paragraph (a)(4) and adding paragraphs (b)(9) through (b)(11) to read as follows:''

## GENERAL SERVICES ADMINISTRATION

### 41 CFR Part 102–74

**[FMR Amendment 2008-08; FMR Case 2008–102–3; Docket 2008–0001; Sequence 5]**

**RIN 3090–AI78**

### Federal Management Regulation; FMR Case 2008–102–3, Real Property Policies Update – Smoking Restrictions

**AGENCY:** Office of Governmentwide Policy, General Services Administration (GSA).

**ACTION:** Final rule.

**SUMMARY:** The General Services Administration is amending the Federal Management Regulation (FMR) to revise the restrictions on the smoking of tobacco products in leased or owned space under the jurisdiction, custody, or control of the Administrator of General Services. This final rule cancels and replaces in its entirety 41 CFR §§ 102–74.315 through 102–74.350 including the insertion of a new § 102–74.351.

**DATES:** *Effective Date*: December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Mr. Stanley C. Langfeld, Director, Regulations Management Division, Office of Governmentwide Policy, General Services Administration, at (202) 501–1737, or by e-mail at *stanley.langfeld@gsa.gov* for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat, Room 4041, GS Building, Washington, DC 20405, (202) 501–4755. Please cite FMR Amendment 2008–08, FMR Case 2008–102–3.

**SUPPLEMENTARY INFORMATION:**

## A. Background

1. On August 9, 1997, President Clinton signed Executive Order (E.O.) 13058, entitled ''Protecting Federal Employees and the Public From Exposure to Tobacco Smoke in the Federal Workplace,'' to establish a smoke-free environment for Federal employees and members of the public visiting or using Federal facilities (62 FR 43451, August 13, 1997).

2. On October 20, 1997, the U.S. General Services Administration (GSA) issued GSA Bulletin FPMR D–245, ''Protecting Federal Employees and the Public from Exposure to Tobacco Smoke in the Federal Workplace'' (62 FR 54461). In accordance with the requirements of E.O. 13058, GSA Bulletin FPMR D–245 prohibited the smoking of tobacco products in all interior space owned, rented or leased by the executive branch of the Federal Government, except in specially-equipped designated smoking areas, outdoor areas in front of air intake ducts and certain other residential and non-Federal occupied space. The bulletin also required the heads of executive agencies to evaluate the need to restrict smoking in courtyards and near doorways.

3. Studies conducted since the issuance of GSA Bulletin FPMR D–245 have concluded that cigarette smoking is the number one preventable cause of morbidity and premature mortality worldwide. Studies also have shown that the harmful effects of smoking are not confined solely to the smoker, but extend to co-workers and members of the general public who are exposed to secondhand smoke as well. Recognition of these facts is evidenced by the stricter laws on smoking enacted by several states over the past 10 years. Twenty-six states have banned smoking entirely in all of their State government buildings and 19 have banned smoking in all private work places.

4. Executive Order 13058 encourages the heads of executive agencies to evaluate the need to further restrict smoking at doorways and in courtyards under executive branch control and authorizes the agency heads to restrict smoking in these areas in light of this evaluation.

5. The proposed changes to the current smoking policy may affect conditions of employment for employees. Where there is an exclusive representative for the employees, executive branch agencies will be required to meet their collective bargaining obligations under the Federal Service Labor-Management Relations Act, as amended, 5 U.S.C. Ch. 71, Labor-Management Relations, before the proposed revisions to the existing smoking policy can be implemented.

## B. Executive Order 12866

The General Services Administration (GSA) has determined that this final rule is not a significant regulatory action for the purposes of Executive Order 12866.

## C. Regulatory Flexibility Act

This final rule is not required to be published in the **Federal Register** for comment. Therefore, the Regulatory Flexibility Act does not apply.

## D. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FMR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

## E. Small Business Regulatory Enforcement Fairness Act

This final rule is exempt from Congressional review under 5 U.S.C. 801 since it relates solely to agency management and personnel.

## List of Subjects in 41 CFR Part 102–74

Facility Management.

Dated: December 8, 2008

**James A. Williams,**

*Acting Administrator of General Services.*

■ For the reasons set forth in the preamble, GSA amends 41 CFR part 102–74 of Subchapter C as set forth below:

## PART 102–74—FACILITY MANAGEMENT

■ 1. The authority citation for 41 CFR part 102–74 continues to read as follows:

**Authority:** 40 U.S.C. 121(c).

■ 2. Amend Subpart B of part 102–74 by revising §§ 102.74–315 through 102.74–350 and adding new § 102.74–351 to read as follows:

### § 102–74.315 What is the smoking policy for interior space in Federal facilities?

Pursuant to Executive Order 13058, ''Protecting Federal Employees and the Public From Exposure to Tobacco Smoke in the Federal Workplace'' (3 CFR, 1997 Comp., p. 216), it is the policy of the executive branch to establish a smoke-free environment for Federal employees and members of the public visiting or using Federal facilities. The smoking of tobacco products is prohibited in all interior space owned, rented or leased by the executive branch of the Federal Government.

### § 102–74.320 Are there any exceptions to the smoking policy for interior space in Federal facilities?

Yes, the smoking policy does not apply in—

(a) Any residential accommodation for persons voluntarily or involuntarily residing, on a temporary or long-term basis, in a building owned, leased or rented by the Federal Government;

(b) Portions of Federally owned buildings leased, rented or otherwise provided in their entirety to non-Federal parties;

(c) Places of employment in the private sector or in other non-Federal Governmental units that serve as the permanent or intermittent duty station of one or more Federal employees; and

(d) Instances where an agency head establishes limited and narrow exceptions that are necessary to accomplish agency missions. Such exceptions must be in writing, approved by the agency head and, to the fullest extent possible, provide protection of nonsmokers from exposure to environmental tobacco smoke. Authority to establish such exceptions may not be delegated.

### § 102–74.325 Are designated smoking areas authorized in interior space?

No, unless specifically established by an agency head as provided by § 102–74.320(d). A previous exception for designated smoking areas is being eliminated. All designated interior

smoking areas will be closed effective June 19, 2009. This six-month phase-in period is designed to establish a fixed but reasonable time for implementing this policy change. This phase-in period will provide agencies with time to comply with their obligations under the Federal Service Labor-Management Relations Act, as amended, 5 U.S.C. Ch. 71, Labor-Management Relations, in those circumstances where there is an exclusive union representative for the employees.

**§ 102–74.330 What smoking restrictions apply to outside areas under Executive branch control?**

Effective June 19, 2009, smoking is prohibited in courtyards and within twenty-five (25) feet of doorways and air intake ducts on outdoor space under the jurisdiction, custody or control of GSA. This six-month phase-in period is designed to establish a fixed but reasonable time for implementing this policy change. This phase-in period will provide agencies with time to comply with their obligations under the Federal Service Labor-Management Relations Act, as amended, 5 U.S.C. Ch. 71, Labor-Management Relations, in those circumstances where there is an exclusive union representative for the employees.

**§ 102–74.335 Who is responsible for furnishing and installing signs concerning smoking restrictions in the building, and in and around building entrance doorways and air intake ducts?**

Federal agency building managers are responsible for furnishing and installing suitable, uniform signs in the building, and in and around building entrance doorways and air intake ducts, reading ''No Smoking,'' ''No Smoking Except in Designated Areas,'' ''No Smoking Within 25 Feet of Doorway,'' or ''No Smoking Within 25 Feet of Air Duct,'' as applicable.

**§ 102–74.340 Who is responsible for monitoring and controlling areas designated for smoking by an agency head and for identifying those areas with proper signage?**

Agency heads are responsible for monitoring and controlling areas designated by them under § 102–74.320(d) for smoking and identifying these areas with proper signage. Suitable, uniform signs reading ''Designated Smoking Area'' must be furnished and installed by the occupant agency.

**§ 102–74.345 Does the smoking policy in this part apply to the judicial branch?**

This smoking policy applies to the judicial branch when it occupies space in buildings controlled by the executive branch. Furthermore, the Federal Chief Judge in a local jurisdiction may be deemed to be comparable to an agency head and may establish exceptions for Federal jurors and others as provided in § 102–74.320(d).

**§ 102–74.350 Are agencies required to meet their obligations under the Federal Service Labor-Management Relations Act where there is an exclusive representative for the employees prior to implementing this smoking policy?**

Yes. Where there is an exclusive representative for the employees, Federal agencies must meet their obligations under the Federal Service Labor-Management Relations Act, 5 U.S.C. Ch. 71, Labor-Management Relations, prior to implementing this section. In all other cases, agencies may consult directly with employees.

**§ 102–74.351 If a state or local government has a smoke-free ordinance that is more strict than the smoking policy for Federal facilities, does the state or local law or Federal policy control?**

The answer depends on whether the facility is Federally owned or privately owned. If the facility is Federally owned, then Federal preemption principles apply and the Federal policy controls. If the facility is privately owned, then Federal tenants are subject to the provisions of the state or local ordinance, even in the Federally leased space, if the state or local restrictions are more stringent than the Federal policy.

## Medicaid Program; State Option To Establish Non-Emergency Medical Transportation Program

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.

**ACTION:** Final rule.

**SUMMARY:** This final rule implements section 6083 of the Deficit Reduction Act of 2005, which provides States with additional State plan flexibility to establish a non-emergency medical transportation (NEMT) brokerage program, and to receive the Federal medical assistance percentage matching rate. This authority supplements the current authority that States have to provide NEMT to Medicaid beneficiaries who need access to medical care, but have no other means of transportation.

**DATES:** *Effective date:* These regulations are effective January 20, 2009.

**FOR FURTHER INFORMATION CONTACT:** Fran Crystal (410) 786–1195.

**SUPPLEMENTARY INFORMATION:**

### I. Background

*A. General*

For more than a decade, States have asked for the tools to modernize their Medicaid programs. The enactment of the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171, February 8, 2006) provides States with new options to create programs that are more aligned with today's Medicaid populations and the health care environment. Cost sharing, benefit flexibility through benchmark plans, health opportunity accounts (HOA), and the flexibility to design cost-effective transportation programs provide opportunities to modernize Medicaid, make the cost of the program and health care more affordable, and expand coverage for the uninsured.

*B. Statutory Authority*

Section 6083 of the DRA amended section 1902(a) of the Social Security Act (the Act) by adding a new section 1902(a)(70), which allows States to amend their Medicaid State plans to establish a non-emergency medical transportation (NEMT) brokerage program without regard to statutory requirements for comparability, statewideness, and freedom of choice. This final regulation sets out provisions for implementing the brokerage programs which are within the flexibility granted by the statute.

### II. Provisions of the Proposed Rule

*A. Overview*

The Department of Health and Human Services (DHHS) began issuing guidance about the new flexibilities available to States within months of the enactment of the DRA. On March 31, 2006, DHHS issued a State Medicaid Director letter providing guidance on the implementation of section 6083 of the DRA. We issued an NPRM on August 24, 2007 (72 FR 48604). This proposed regulation proposed, among other things, to formalize the guidance issued on NEMT programs. The proposed regulation would add a new paragraph (4) to 42 CFR 440.170(a).

*B. Requirements for State Plans*

Under § 431.53, States are required in their title XIX State plans to ensure necessary transportation of Medicaid beneficiaries to and from providers. Expenditures for transportation may be claimed as administrative costs, or a State may elect to include transportation as medical assistance under its State Medicaid plan.

Before enactment of the DRA, if a State wanted to provide transportation as medical assistance under the State plan, it could not restrict beneficiary choice by selectively contracting with a broker, nor could it provide services differently in different areas of the State without receiving, under section 1915(b) of the Act, a waiver of freedom of choice, comparability, and state-wideness otherwise required by section 1902(a) of the Act. These waivers allowed States to selectively contract with brokers and to operate their programs differently in different areas of the State.

The DRA gives the States greater flexibility in providing NEMT. States are no longer required to obtain a section 1915(b) waiver in order to provide NEMT as an optional medical service through a competitively contracted broker. A State plan amendment for such a brokerage program eliminates the administrative burden of the 1915(b) biannual waiver renewal. Under new section 1902(a)(70) of the Act, a State may now use a NEMT brokerage program when providing transportation as medical assistance under the State plan, notwithstanding the provisions of sections 1902(a)(1), 1902(a)(10)(B), and 1902(a)(23) of the Act, concerning state-wideness, comparability, and freedom of choice, respectively.

Current regulations provide that when a State includes transportation in its State plan as medical assistance, it is required to use a direct vendor payment system that is consistent with applicable regulations at § 440.170(a)(2), and it must also comply with all other requirements related to medical services, including freedom of choice, comparability, and state-wideness. To implement the provisions of section 1902(a)(70) of the Act, we proposed revising § 440.170(a) to add a new paragraph (4), ''Non-emergency medical transportation brokerage program,'' to reflect the increased flexibility allowed by the DRA.

We proposed allowing, at the option of the State, the establishment of a NEMT brokerage program. We believe that this may prove to be a more cost-effective way of providing transportation for individuals eligible for medical assistance under the State plan, who need access to medical care or services, and have no other means of transportation.

As provided by the statute, we proposed specifying in § 440.170(a)(4) that the broker could provide for transport services that include wheelchair vans, taxis, stretcher cars, bus passes, tickets, secured transportation and other forms of transportation otherwise covered under the State plan. We interpreted ''secured transportation'' at section 1902(a)(70)(A) of the Act to mean a form of transportation containing an occupant protection system that addresses the safety needs of disabled or special needs individuals.

The DRA also provides that other forms of transportation may be included as determined by the Secretary to be appropriate. We did not propose to determine any additional transportation services to be generally appropriate. However, as noted above, we proposed to allow States to identify additional transportation alternatives that were otherwise covered under the State plan and which were not limited to services already available through transportation brokers. We proposed to review these alternatives in the State plan amendment approval process for transportation services generally. In that process, we proposed that CMS would consider the individual circumstances in the State and apply utilization controls as necessary. For example, air transportation could be appropriate in States with significant rural populations and low population density, but not in other States. Even in those States, air transportation might only be suitable with appropriate utilization controls. Thus, we proposed to make this determination in the context of our review of State plan amendments based on the information furnished by the State.

At § 440.170(a)(4), we proposed that the competitive bidding process be consistent with applicable DHHS regulations at 45 CFR 92.36, based on the State's evaluation of the broker's experience, performance, references, resources, qualifications and cost, and that the contract with the broker include oversight procedures to monitor beneficiary access and complaints, and ensure that transport personnel are licensed, qualified, competent, and courteous. We proposed that State and local bodies that wish to serve as brokers compete on the same terms as non-governmental entities.

We proposed in paragraph § 440.170(a)(4)(ii) to include prohibitions on broker self-referrals and conflict of interest, based on the prohibitions on physician referrals under section 1877 of the Act (42 U.S.C. 1395(nn)). Section 1877 of the Act generally prohibits a physician from making referrals for certain designated health services payable by Medicare to an entity with which he or she (or an immediate family member) has a financial relationship (ownership or compensation), unless an exception applies. In addition, to prevent other types of fraud and abuse, the anti-kickback provisions in section 1128B(b) of the Act (42 U.S.C. 1320a-7b(b)) and the provisions in the civil False Claims Act (31 U.S.C. 3729) also would apply to this transportation program as they apply to the Medicaid program generally.

We believe the statute provides that section 1877 of the Act and the applicable regulations be used as a model for establishing broker prohibitions on referrals, conflicts of interest, and impermissible kickbacks, in order to prevent fraud and abuse.

As we stated in the proposed rule, a financial relationship, as defined in the regulations implementing section 1877 of the Act at § 411.354(a), includes any direct or indirect ownership or investment interest in an entity that furnishes designated health services and any direct or indirect compensation arrangement with an entity that furnishes designated health services (DHS).

Section 1877 of the Act includes exceptions to certain ownership, investment, and compensation arrangements. In addition, section 1877(b)(4) of the Act allows the Secretary to create an exception in the case of any other financial relationship that does not pose a risk of program or patient abuse.

For purposes of new § 440.170(a)(ii)(A), we proposed that the term ''transportation broker'' include contractors, owners, investors, Boards of Directors, corporate officers, and employees.

We proposed to use the definition of ''financial relationship'' as set forth in regulations at § 411.354(a) by means of cross-reference, with the term ''transportation broker'' substituted for ''physician'' and ''non-emergency transportation'' substituted for ''DHS.'' We proposed to use the definition of ''immediate family member'' or ''member of a physician's immediate family'' as set forth in the physician self-referral provisions in § 411.351, with the term ''transportation broker'' substituted for ''physician.''

Based on the prohibitions in section 1877 of the Act, we proposed that the broker be an independent entity, in that the broker could not itself provide transportation under the contract with the State and that the broker could not refer or subcontract to a transportation service provider with which it has certain financial relationships, unless certain exceptions applied. Federal funds could not be used for any prohibited referrals.

Similar to some of the ownership exceptions in section 1877 of the Act, we proposed including exceptions for a non-governmental broker that provided transportation in a rural area (as defined in § 412.62(f)(1)(iii)) when there was no other qualified provider available; when the necessary transportation provided by the non-governmental broker was so specialized that no other qualified provider was available; or when the availability of qualified providers other than the non-governmental broker was insufficient to meet the existing need.

For purposes of this regulation we proposed that a qualified provider would be any Medicaid participating provider or other provider determined by the State to be qualified. A ''rural area,'' as defined in § 412.62(f) (1)(iii), is any area that is outside an urban area. An ''urban area'' is defined in § 412.62(f)(1)(ii). These exceptions would address specific circumstances in which there was a lack of transportation resources and there was documentation to support these exceptions.

Governmental Brokerages

We did not wish to prevent a government entity that was awarded a brokerage contract through the competitive bidding process from referring an individual in need of transportation service to a government transportation provider that was generally available in the community. Therefore we proposed to include an exception to allow such a governmental broker to provide an individual transportation service or to arrange for the individual transportation service by referring to or subcontracting with another government-owned or controlled transportation provider, when certain conditions were met that would assure an arms-length transaction.

The broker would first be required to be a distinct governmental unit, and the contract could not include payment of costs other than those unique to the distinct brokerage function. This means that the contract could not provide for payment of costs normally shared with or paid by other governmental units (such as a regional transportation authority). This requirement would ensure that the distinct broker unit did not have direct financial conflicts of interest resulting from commingling funding with State or local general revenue funds. Second, the broker would have to document, after considering the specific transportation needs of the individual, that the government provider was the most appropriate, effective, and lowest cost alternative for each individual transportation service. Third, the broker would have to document that for each individual transportation service, the Medicaid program was paying no more than the rate charged to the general public. Because there could still be conflicts of interest resulting from management oversight from a parent or related governmental unit, we considered proposing to limit the exception to circumstances where the distinct unit governmental broker was independent of external review and oversight by the parent entity. However, we believe that the proposed conditions will be sufficient to protect against inappropriate inter-governmental referrals.

We solicited comments, suggestions, and examples regarding the following exceptions mentioned above: The service area is rural and there is no other Medicaid participating or qualified provider available except the non-governmental broker; the transportation provided by the non-governmental broker is so specialized that no other qualified provider is available (including comments on how ''specialized'' should be defined); available qualified providers other than the non-governmental broker are insufficient to meet the need; the broker is a distinct government unit and is paid only for costs that are unique to the distinct brokerage function and the broker documents that services provided by any other governmental entity are the most appropriate, least costly alternative, and the Medicaid program is paying no more than the rate charged to the public.

Additionally, we proposed to include a prohibition on a broker accepting any form of remuneration or payment from a transportation provider in exchange for influencing a referral or subcontract for transportation services. We also proposed that in referring or subcontracting with transportation providers, the broker be prohibited from withholding necessary transportation from a recipient or providing transportation that was not the most appropriate and cost-effective means of transportation.

Under section 1905(a)(28) of the Act, the Secretary is given the authority to specify any other medical care which can be covered by the State. We therefore proposed using this authority to make Federal financial participation available at the medical assistance rate for the cost of the brokerage contract, providing that such a contract complied with the requirements set forth in this regulation.

In accordance with Federal requirements in sections 1902(a)(2) and 1903(w) of the Act and applicable Federal regulations described at § 433.50 through § 433.74, under the brokerage contract with the State Medicaid agency, the non-Federal share of the Medicaid payments made for operating a transportation brokerage program could only be derived from permissible sources and would have to comply with the applicable statute and regulations cited above. Also, the return of any Medicaid payments (directly or indirectly) to a State or local government entity under the NEMT brokerage program would be prohibited.

We proposed that the State, in contracting with the broker, would be required to specify that violation of these provisions would be deemed to be a breach of contract and that the State could move to terminate the contract with the broker.

## III. Analysis of and Response to Public Comments on the Proposed Rule

We received a total of 63 timely items of correspondence that raised many different issues. Many of the commenters represented State and local transportation agencies, regional transportation programs, non-profit and for-profit transportation providers, and national associations that represent various aspects of the transportation industry. The remaining comments were from individuals, medical associations and hospitals, human services agencies, and advocacy groups. A summary of the issues and our responses follow:

*General Comments:* Many commenters praised us for establishing a process which is consistent with the requirements set forth in section 6083 of the DRA of 2005 and which will facilitate the establishment of NEMT brokerage arrangements for State Medicaid programs. Many commenters also praised the overall flexibility provided to States in developing cost-effective quality transportation programs. However, many commenters raised concerns about other aspects of the proposed regulation. A summary of the public comments we received and our responses to the comments are set forth below.

Comments related to paperwork and other burdens are addressed in the Collection of Information Requirements and Regulatory Impact Statement sections in this preamble.

*Comment:* Several commenters said that the regulation required States to establish a brokerage program, and one commenter objected to CMS requiring States to establish a transportation brokerage because a transportation brokerage is counterproductive, costly and conflicts with the appropriate Federal and State roles of the Medicaid Federal/State partnership. Some commenters suggested that CMS clarify in the final rule that this regulation and the new transportation brokerage option applies only to transportation brokerages when a State chooses to adopt this new flexibility provided by section 6083 of the DRA and the regulation does not apply to the other options States have for assuring the availability of transportation to access Medicaid services.

*Response:* We wish to clarify that this final rule applies only to transportation brokerages when a State chooses to adopt this new flexibility provided by section 6083 of the DRA. In enacting section 6083 of the DRA, the Congress acted to supplement the current authority that States have to provide NEMT to Medicaid beneficiaries by adding an additional option for providing a NEMT brokerage program under State plan authority. Neither the statute nor this final rule requires States to select this new option. States continue to have the flexibility to provide NEMT as an administrative expense or as an optional medical service. States that wish to establish a NEMT brokerage program without being required to comply with the prohibitions against self-referral, or general Medicaid requirements such as freedom of choice, comparability and state-wideness may continue to do so through the 1915(b) waiver process. The requirements of this final rule apply only to those States that have chosen to obtain State Plan authority to provide NEMT as a medical service through a broker.

*Comment:* Most of the comments on prohibitions came from regional transportation associations or transportation providers. These commenters disagreed with the prohibition on the broker itself providing transportation, or making a referral to or subcontracting with a transportation provider with which it has a financial relationship. Several commenters asserted that this prohibition was not practical and would limit the number of entities that could bid on a brokerage contract or the number of participating providers. Further, the commenters declared that these prohibitions could possibly limit competition to for-profit brokers, reduce State flexibility in designing the Medicaid transportation program. Moreover, CMS was applying the principles of section 1877 of the Act too broadly and in a way that was not meaningful or useful to States. Some commenters said that CMS' interpretation of the DRA was not consistent with the intent of the DRA itself because the proposed conflict of interest language was being applied in a way that is not in the best interest of the overall management of the NEMT program. A commenter also said that a broker providing transportation is not analogous to a physician making referrals for certain designated health services because the organizational set-ups of the two are vastly different, and unlike physicians, profit is not a concern for governmental transportation agencies.

Several commenters said that the unintended consequence of restricting a company from both managing and providing transportation services would be the creation of an anti-business climate that would likely force already efficient and effective transportation agencies into choosing between the ''broker role'' and the ''provider role,'' and could potentially leave one of these roles unfilled.

*Response:* In enacting section 6083 of the DRA, the Congress responded in part to public concern that ownership by the broker of a company that provides transportation may result in higher costs and a greater potential for fraud and abuse. Therefore, the Congress looked to recognized prohibitions against self-referral under section 1877 of the Act to guide the Secretary in establishing safeguards against conflict of interest and fraud and abuse. The Congress expressly directed the Secretary to develop requirements for brokers that are similar to the prohibitions on self-referral and conflict of interest that are found under section 1877 of the Act.

Generally, section 1877 of the Act prohibits physicians from making referrals for certain designated health services payable by Medicare to an entity with which the physician or the physician's immediate family has a financial relationship, unless an exception applies. In some cases brokers who own or partly own provider companies may be actively involved in the businesses, while in other cases they may merely be passive investors. Nevertheless, these relationships constitute a conflict of interest because of the potential for fraud and abuse. As in similar physician cases, brokers that also provide transportation could possibly over-utilize higher cost services provided by their own transport companies or possibly bill for services that did not occur. It is this potential for fraud and abuse that these prohibitions have been designed to limit.

While the business of medicine and the business of providing transportation are not necessarily the same, we disagree that physician referral prohibition rules cannot be applied to transportation brokers. We can identify a number of operational similarities between physicians and brokers that justify our decision to include several prohibitions and exceptions. Similar to a physician who refers patients for medical services brokers refer beneficiaries for transportation services. In both cases the potential for over-utilization, inflated costs, and fraudulent billing is higher when the individual (be it a physician or broker) making the referral is allowed to refer to a service owned or partially owned by the individual.

Understanding that there are circumstances where there may be an insufficient number of available providers, we adopted exceptions similar to those in section 1877 of the Act and created exceptions where there are insufficient transportation resources. Under these exceptions, a non-governmental entity awarded a brokerage contract through the competitive bidding process will be permitted to provide transportation in order to meet access requirements. Similarly, we have created exceptions for governmental brokers that we believe will also guard against conflict of interest. We also understand that some rural areas may be underserved and we have created an exception to allow the broker to either use or create its own resources in order to assure that all beneficiaries have access to necessary medical services. Furthermore, we do not agree that the prohibitions would create an anti-business environment, but instead, we believe that such prohibitions would actually level the playing field and promote competition.

*Comment:* Several commenters disagreed with the prohibition on non-governmental broker self-referral unless the broker can prove that there is no other qualified provider available. One commenter felt that the exceptions should not be permanent because the capacity of other providers may increase over time. One commenter stated that, in general, the proposed rule provided

sound rules for State Medicaid brokerage programs. However, the commenter thought that the conflict of interest provisions were overly broad and suggested that the provisions be modified as follows: (1) The broker should be permitted the discretion to use its own resources or refer to another provider with which it has a financial relationship when deemed necessary by the broker to provide timely, cost-effective and quality transportation, or to otherwise protect the health and welfare of the beneficiary; (2) the broker should be subject to a 10% limit on self-referral in a calendar month, except during the first 90 days of the brokerage contract, when there should be no limit on broker self-referral.

*Response:* We do not agree with the suggestion that the broker be given blanket discretion to use its own resources or to refer to another provider in which it has a financial interest when deemed necessary by the broker to comply with the contractual requirements of timeliness, cost-effectiveness and quality. Allowing the broker unlimited discretion would be contrary to the prohibitions on self-referral that we believe are required by the statute, and could create opportunities for conflict of interest. We recognize that due to unforeseen circumstances a gap may occur in the provider network from time to time. However, should such a gap occur, we expect the State to: Determine when the broker may temporarily step in to fill such a gap; assure that insufficiencies in the provider network are not chronic or lengthy; and assure that the broker is fulfilling its contractual obligation to maintain an adequate network of available qualified contracted providers. We also expect the State to provide sufficient oversight to ensure that when contracting with transportation providers the broker does not offer reimbursement that is so low that local transportation providers are unwilling to participate, thus creating a need for the broker to provide the transportation itself.

Allowing the broker to self-refer no more than 10 percent of the time during a calendar month or to self refer an unlimited number of times during the first 90 days of the brokerage contract would not achieve the purpose of the prohibition against self-referral. By the starting date of the brokerage program the broker must have a contracted network of providers that is sufficient to provide adequate access for beneficiaries, and the broker should also be ready to meet all other requirements of the contract with the State.

*Comment:* One commenter wrote that the final rule should include other exceptions found in the Stark regulation so that ''innocent and appropriate'' financial relationships between a broker and a NEMT provider do not preclude the provider from participating in the network. The commenter also suggested that the final rule include provisions that allow the broker to have a contract with a NEMT provider for a line of business that is unrelated to the NEMT brokerage business, such as: Rental of space and equipment; personal services arrangements; payments for bona fide services; fair market value compensation arrangements; risk sharing arrangements; compliance training; indirect compensation arrangements; community wide health information systems; charitable donations; and isolated transactions, found at § 411.357(a), (b), (d), (f), (i), (j), (l), (n), (o), (p), and (u), and exceptions for publicly traded securities and mutual funds at § 411.356(a) and § 411.356(b). The commenter also requested that the final rule address the scenario in which the broker also provides emergency medical transportation (EMS) in the same community in which it acts as a NEMT broker. The commenter requested that the broker explicitly be permitted to provide NEMT services or make a referral to another transportation service provider even though a financial relationship for EMS services existed between the parties.

*Response:* We considered the commenters' suggestion that we include in the final rule additional exceptions for certain kinds of financial relationships similar to those found at § 411.356 and § 411.357. We are very concerned about financial relationships that may directly or potentially affect the financial interests that are attributed to either the broker or the subcontracted provider. Compensation relationships such as leasing agreements and contracts for similar lines of business between the broker and a potential subcontracted transportation provider, although seemingly innocent or unrelated, may pose the risk of program abuse. Therefore, in this final rule we have decided not to change the prohibitions or exceptions found in the NPRM.

*Comment:* Many of the commenters believed that the proposed rule contravenes the policies, concepts, and principles of Executive Order 13330 and the Interagency Coordinating Council on Access and Mobility (CCAM), which stresses the importance of coordination of public transportation at the Federal level. These commenters argued that the proposed rule would defeat the efforts of the CCAM and United We Ride to coordinate transportation. A number of commenters also stated that the proposed rule was inconsistent with the statutory creation of a locally-developed, coordinated public transit human service transportation planning process established by the Safe, Accountable, Flexible, Efficient Transportation Equity Act (SAFETEA–LU), Public Law 109–59 (codified at 49 U.S.C. sections 5301, *et seq.*) and carried out by the Federal Transit Administration (FTA). These commenters suggested that CMS withdraw the proposed rule and submit the matter to the Federal Interagency Transportation Coordinating Council on Access and Mobility (CCAM) and United We Ride program to ensure that the new CMS rulemaking is consistent with CCAM policy and the United We Ride Program initiatives.

*Response:* Executive Order 13330 (69 FR 9185, February 24, 2004) stresses the importance of coordination of public transportation at the Federal level. However, it does not direct Federal agencies to ignore the policies and rules of their particular programs in order to do so. For programs such as Medicaid, the policies of the CCAM are appropriate as long as they do not conflict with the policies and rules of the Medicaid program. The provisions of the proposed rule did not preclude State Medicaid agencies from participating in efforts to coordinate the use of transportation resources consistent with the guidance issued by the CCAM, as long as those coordination efforts recognize that the Medicaid program's responsibility is limited to ensuring cost-effective transportation for beneficiaries to and from Medicaid providers.

In terms of financing, Medicaid is not responsible for the general operation or deficit financing of public or private transportation providers. Medicaid is a joint federal-state financed program. Federal Medicaid funding must be matched by non-federal funding unless there is express authority under federal law for other federal funds to be used for purposes of the non-federal Medicaid matching share, and no such Medicaid authority currently exists. We understand that the FTA SAFETEA–LU statutory language at 49 U.S.C. 5310, 5311, 5316, and 5317 allows States to use Federal Medicaid dollars to fulfill State requirements to draw down Federal transportation grant funds. In that circumstance however, where Federal Medicaid matching funds are included as State match when drawing down FTA grants, Federal Medicaid

funding would not be available to match the part of any future State expenditures funded by the SAFETEA–LU grant because federal statutes authorizing the SAFETEA–LU grant program do not expressly authorize use of SAFETEA–LU funds for matching other federal funds.

*Comment:* Many commenters felt that if the proposed rule were implemented it would interfere with a State's ability to develop coordinated transportation services. Some commenters suggested that there needs to be a special section of the regulation that deals with coordinated transit services, that States that have rural regional transit agencies need to conceptualize an efficient mechanism to bring Medicaid into coordinated service, and that NEMT brokerages for coordinated rural regional systems should be allowed to reside with the rural regional transit system providing the regional transit agency can show that the total cost to Medicaid is significantly reduced by parallel coordinated service contracts with other human services agencies. One commenter said that human service transportation would be reduced if Medicaid were to be taken out of the coordination mix. One State transportation agency objected to any requirement that the brokerage function be devoted exclusively to Medicaid funded transportation. Another State Transportation Department suggested that CMS add language to the final rule that includes as a criterion for selecting the broker consideration of the benefits of a coordinated transportation system.

*Response:* The statute did not specifically address coordinated transportation. Coordination of transportation services is a positive goal and we encourage States to develop coordinated transportation systems in order to promote efficiency and cost-effectiveness. However, it should be noted that Medicaid funds may only be used for Medicaid services provided to eligible beneficiaries. When administering the Medicaid NEMT program, States must comply with all applicable Medicaid policies and rules regardless of whether the Medicaid rules interfere with their ability to coordinate their transportation efforts.

*Comment:* Many commenters disagreed with the requirement for governmental brokers to document with respect to the individual's specific transportation needs that the government provider is the most appropriate and lowest cost alternative, and that the Medicaid program is paying no more than the rate charged to the general public. The commenters said that the documentation requirement will result in additional and costly recording-keeping. One commenter objected to any requirement that a governmental broker using other governmental entities as transportation providers document that the transportation is the least costly and most appropriate for each beneficiary because it precludes government social service agencies from being used by the broker to provide transportation.

*Response:* We do not believe that this documentation requirement will result in significantly more record-keeping. Medicaid laws and regulations, as well as CMS guidance, have always required that there be documentation of medical services that are provided to beneficiaries and that they be made available to CMS upon request. In general, documentation should include verification of eligibility, verification that the service was provided on the date claimed and information about the cost of services. When NEMT is provided as a medical service there should be documentation, not only that the specific ride was provided, but that a Medicaid reimbursable service other than the transportation itself was actually provided on the dates when transportation was claimed. We do not agree that the documentation required when a governmental broker refers to another government entity would prohibit government social service agencies from being used as transportation providers. Given the nature of the client populations served by many of the social service agencies, governmental brokers should not find it difficult to document that the social service agency is the most appropriate and least costly provider of transportation for their client(s).

For the purposes of the final rule, the additional documentation required for the NEMT brokerage would not be significant and should be relatively simple. An annual comparison of the fees paid by Medicaid under the brokerage program for fixed route transportation to the fees charged to the general public for fixed route transportation, and a comparison of the fees paid by Medicaid for public paratransit services to the fees charged to other agencies for comparable public paratransit services, should be all that is necessary.

*Comment:* Many of the commenters disagreed with the proposed requirement that Medicaid pay no more than the rate charged to the general public for the same type of ride when a governmental broker is a provider of transportation or refers to or subcontracts with another governmental transportation provider. Commenters expressed concern that the actual cost of providing public transportation, particularly publicly provided paratransit rides (that is, door-to-door or curb-to-curb services usually provided to those who are disabled) to the Medicaid population far exceeds the fees charged to the general public because public transit services are subsidized by Federal, State, and local funds, which allows the fares paid by the general public to be set lower than the actual cost of providing the ride. The commenters maintain that prohibiting Medicaid from being charged its fully allocated cost will shift the financial burden of public transit and paratransit trips to State and local entities that fund public transportation. Therefore, the public fare, particularly for paratransit rides, should not be used as a measure to set Medicaid's payment. Medicaid should be charged the fully allocated costs for paratransit rides consistent with this provision and Medicaid's responsibility to assure NEMT.

Many commenters pointed out the fact that the Americans with Disability Act (ADA) requires that States provide disabled members of the public with comparable paratransit services wherever public fixed-route services are offered, and the amount that can be charged to disabled members of the public for comparable public paratransit services may not exceed twice the amount charged to the public for similar fixed-route services. However, these guidelines also say that agencies which purchase publicly-provided paratransit trips for their disabled clients may pay more than the rate charged to disabled individuals receiving a comparable paratransit ride.

*Response:* In general, States have established rules prohibiting Medicaid from paying more for a covered service than what other third-party payers (for example, health insurers) are charged for the same service. In the case of publicly-provided transportation on fixed routes, while there are other third-party payers (for example, State Human Service agencies) that often cover and reimburse these trips for their clients, we have been informed that such third-parties or agencies generally pay the same amount as the public is charged for these rides. Therefore, we are prohibited from paying more than the public is charged for public transportation on a fixed-route trip.

In the case of publicly-provided paratransit services and rides, based on the comments received and the information provided, we believe that it is appropriate and consistent with current practice for Medicaid to pay

more than the rate charged to disabled individuals for a comparable ride. Based on principles of accounting and financing found in OMB Circular A–87 and section 1902(a)(30) of the Act and 45 CFR 92.36, pertaining to procurements, we believe that Medicaid, through its NEMT program with government brokers, can pay a fare for publicly provided paratransit trips that represents reasonable costs and which is no more than the fare paid for similar paratransit trips by other State Human Services agencies. Therefore, in this final rule we have modified the regulations text at § 440.170(a)(4)(ii)(B)(4)(iii) to require the governmental broker to document that Medicaid is paying for public fixed-route transportation at a rate that is no more than the rate charged to the general public, and no more than the rate charged to other State human services agencies for public paratransit services.

The commenters appear to be concerned about potential limitations on Medicaid payment for public transportation services. The final rule as revised is consistent with current practice and when the State awards a brokerage contract to a governmental transportation broker that is itself a provider of transportation or who refers or subcontracts with another government entity this should not have a significant effect on Medicaid payments to transportation providers. We could have precluded governmental brokers from providing transportation or referring beneficiaries to governmentally-operated transportation altogether. Instead, we provided for safeguards to ensure that governmental brokers operate as independently as non-governmental brokers. We believe that these safeguards will ensure that such transportation will be cost-effective and that the transportation referral will be based on the best interests of the beneficiary, while at the same time meeting the mandate to provide transportation that is the least costly appropriate mode.

*Comment:* Several commenters disagreed with the requirements of the proposed rule and felt that States were best equipped to design their own systems to prevent the kind of abusive practices and conflicts of interest that might arise when a broker is involved in direct service delivery. These commenters believed that States should be permitted to decide how to institute proper controls that would eliminate any conflicts of interest. A number of commenters said that regional transportation systems and public transportation systems operating as the NEMT broker have the best opportunity and means to coordinate transportation for the benefit of the public. One commenter believed that the State's Department of Transportation and not the Health and Human Services Medicaid program should coordinate Medicaid transportation.

*Response:* States have broad flexibility to construct an array of NEMT programs that meet each State's diverse needs in terms of geography, transportation infrastructure, and targeted populations, and this final rule preserves this flexibility. However, Medicaid NEMT programs have long been identified by State and Federal Inspector General Reports (for example, HHS, OEI–04095–00 140) as having a high potential for fraud and abuse. As a means of reducing the risk of fraudulent and abusive practices that result in unnecessary or inappropriate use of Medicaid transportation and the loss of millions of Medicaid dollars, the statute specifies that certain provisions be included in the contract between the State and the NEMT broker. The statute also directs us to establish prohibitions on broker referrals and conflict of interest. As a result we have implemented the contract requirements and the prohibitions as provided for in statute.

*Comment:* One commenter stated that the proposed rule prohibited non-profit transportation providers from being paid more than a governmental broker.

*Response:* We assume the commenter intended to speak about how the proposed rule prohibited non-profit brokers from being paid more than a governmental broker and therefore believe the commenter misunderstood how the proposed rule distinguishes between two types of brokers, governmental and non-governmental. There is no restriction on a non-profit broker that is not a governmental entity from negotiating rates with public transportation providers.

*Comment:* Several commenters said the language requiring the contract with a governmental broker to ''provide for payment that does not exceed actual costs calculated as a distinct unit, excluding personnel or other costs shared with or allocated from parent or related entities,'' is ambiguous and can be read two ways, either to include or exclude these costs in the final analysis. Several commenters opposed requiring the public entity broker to be a distinct governmental unit. One commenter expressed the need for further clarification of the requirement that a public broker be a distinct governmental unit and was concerned that the brokerage function would be required to be devoted to only Medicaid-funded transportation, which is directly contrary to the policies established under EO 13330. Another commenter believed that this language was too restrictive and would potentially limit the number of entities that would be eligible to bid.

*Response:* We agree that this sentence is confusing. Therefore, we have amended this final rule by making it clear, at § 440.170(a)(4)(ii)(B)(4)(i), that if the government broker wishes to be excepted from the self-referral prohibition, the government broker's contract with the State Medicaid agency must specify that the government broker will not charge the Medicaid agency for any personnel or other costs that are shared with, or allocated from, parent or related governmental entities. We expect the governmental broker to maintain an accounting system as though it were a distinct unit, such that all funds allocated to the Medicaid brokerage program and all costs charged to the brokerage program will be completely separate from any other program. Costs that are shared with or allocated from other governmental entities will not be paid by Medicaid.

*Comment:* One commenter said that the proposed rule does not make allowances for currently existing models that meet the financial, oversight, and contracting requirements of the proposed rule. Another commenter wrote that the proposed rule failed to consider any best practices already in place.

*Response:* States with existing NEMT brokerage models that do not meet all of the requirements of the DRA and this final rule have other options available, such as obtaining 1915(b) waiver authority or providing NEMT as an administrative expense. The 1915(b) waiver authority process does not prohibit the broker from self-referring nor does it require that the broker be selected through competitive bidding. Providing NEMT as an administrative expense provides States with the greatest flexibility in designing their program.

*Comment:* One commenter noted that the proposed rule did not mandate provision of bus passes or other fare media for those Medicaid recipients who are able to use public transportation, while another commenter contended that bus passes were not addressed at all in the proposed rule. One commenter suggested that if a Medicaid trip were directed by a broker to a bus, a transit provider should be reimbursed by Medicaid for the cost of a monthly bus pass whether the cost is higher or lower

than the fare for a single trip on the same bus because the pass could be used indefinitely during the month. Several commenters also pointed out that mileage reimbursement was not specifically listed as a transportation service and the proposed rule was unclear as to whether the State could continue to provide this option without securing CMS approval. One commenter requested that CMS specify in the final rule that mileage reimbursement is permitted.

*Response:* In designing a NEMT brokerage program, States have the option to direct the broker to include bus passes and mileage reimbursement, or to allow the broker to determine which payment methodologies it will use to reimburse for transportation services, including mileage reimbursement and bus passes. Since public transportation is generally the least costly method of transporting beneficiaries, we would expect that the broker would first determine if the physical condition of the beneficiary allows them to use public fixed route transportation before scheduling a more costly paratransit service. However, when bus or transit passes are being considered as a method of paying for trips on public transportation, Medicaid cost effectiveness rules outlined in a December 26, 1996 State Medicaid Director Letter require that the cost of the bus pass must be compared to, and may not exceed, the aggregate cost of the individual trips that will be taken by the beneficiary to access Medicaid providers during that month and on the same bus.

*Comment:* One commenter stated that because this regulation will shift costs to States and local governments, CMS should examine the proposed rule in the context of the recently published proposed rule, ''Medicaid Program; Elimination of Reimbursement Under Medicaid for School Administration Expenditures and Costs Related to Transportation of School-Age Children Between Home and School'' (72 FR 51397) (September 7, 2007) which would eliminate Medicaid reimbursement for administrative costs related to school based transportation. The commenter indicated that the school-based transportation proposed rule is significantly related to this proposed rule because it would also shift a significant additional financial burden to State and local governments, and local transit agencies.

*Response:* While we understand the commenter's concerns about the proposed changes to Medicaid funding of school-based transportation, we believe it is only tangentially related to NEMT.

*Comment:* Several commenters felt that CMS should be more prescriptive about the quality, qualifications, operations standards, and State monitoring of brokers and beneficiary due process rights, and that the proposed rule provided no specificity or guidance on how States should provide and track oversight of the broker. One commenter said that CMS failed to require States to ensure that brokers offered the most appropriate and least costly ride, and that CMS should amend the regulation by adding a reference to 42 CFR 440.230, and also include the requirement that States provide in the State plan a description of the State's specific requirements for the broker. Another commenter provided the following list of requirements that should be included in the final rule: (1) Providers should prove financial stability; (2) provider vehicles should pass rigid vehicle inspections; (3) all providers should be required to carry insurance coverage that is equal to the coverage required for State and local commercial carriers; (4) all providers should be required to have a comprehensive driver training program; (5) providers should be required to meet all applicable Federal, State, and local licensing requirements; (6) companies providing Medicaid transportation should have experience and expertise in providing quality passenger transportation; and (7) Medicaid agency oversight should include annual inspections.

*Response:* We believe that States are in the best position to design their NEMT brokerage program and oversight procedures, and we expect States to set specific operations standards that at a minimum include: Quality standards for vehicle safety; staff competency; timeliness; access standards; licensing requirements; and grievance procedures. We also expect States to design and implement oversight procedures as required and outlined in the regulations text of this final rule at § 440.170(a)(4)(i)(B). The specific criteria for providers provided by the commenter presents a comprehensive guide and we expect States to include all of these in their oversight of brokers and the brokerage program. We believe that to be more prescriptive in this final rule would limit the flexibility that States need in order to develop their Medicaid transportation brokerage programs.

Section 1902(a)(30) of the Act requires that all Medicaid services be administered consistent with efficiency, economy, and quality of care and we interpret quality to include timeliness. The proposed rule at § 440.170(a)(4)(ii)(D) also requires the brokers to provide the most appropriate and cost-effective means of transportation for each beneficiary. We therefore expect the broker to provide each individual beneficiary with the most appropriate and cost-effective means of transportation and to provide that transportation in a timely fashion so that beneficiaries do not miss scheduled medical appointments. Because it is important that beneficiaries arrive at medical appointments in a timely fashion and that they not be subjected to excessively long waiting periods to return home, in the final rule we have revised the text at § 440.170(a)(4)(i)(B) to require the broker to also have oversight procedures to ensure that transportation is timely and at § 440.170(a)(4)(i)(C) we modified the regulations text to include the requirement that the State regularly audit the timeliness of transportation provided through the brokerage program.

We do not understand the commenters' suggestion that we amend the regulation by adding a reference to § 440.230, since this particular citation discusses the amount, duration, and scope of covered services under the State plan, and we do not believe it to be relevant. We believe the commenter may have thought that utilization control under § 440.230(d) included regulatory oversight.

*Comment:* One commenter stated that the terms ''broker and brokerage'' are misnomers and suggested that the terminology that should be used is ''transportation program'' or ''transportation services.''

*Response:* In this final rule we did not replace the terms ''broker and brokerage'' with ''transportation program'' or ''transportation services'' because the statute specifically uses ''broker and brokerage'' and, therefore clearly provides States with the option to establish a transportation brokerage program under the State plan authority. We understand that NEMT brokerage programs may vary from State to State. However, the most fundamental functions of a NEMT broker are to be a single point of contact for beneficiaries to request transportation assistance, and to directly arrange the least costly and most appropriate type of transportation for each beneficiary.

*Comment:* A number of commenters requested that in the final rule we clarify several terms used in the proposed rule. One commenter asked CMS to clarify the terms ''competent'' and ''courteous,'' while another said

that use of the definition of ''rural area'' found at § 412.62(f) would cause confusion, and that CMS should instead use the term ''non-urbanized area'' as defined in Federal transit laws.

*Response:* The statute allows both the State and the broker to take responsibility for ensuring that transportation is provided in a competent and courteous manner. In considering whether to define these terms in the final rule, we concluded that States, working with the broker, must determine the competency and courtesy of transport services and staff.

We understand that some commenters believe it would be less confusing if we replaced the term ''rural area'' with ''non-urbanized area'' and use the Federal Transit Administration definition. However, whenever possible, Medicaid regulations have maintained a long history of being consistent with Medicare regulations. For the purposes of this final rule the definition of ''rural area'' as defined at § 412.62(f)(1)(iii) will remain consistent with the definition as exists in the Medicare program.

*Comment:* Two commenters said that our proposed definition of ''secured transportation'' is unclear and must be clarified. Moreover, one commenter said that as written in the preamble to the proposed rule, it appears that standard airbags in a sedan would qualify, and if the intent of CMS is to address vehicle standards, including wheelchair security and occupant restraints such as those contained in 49 CFR 38.23(d), the regulation should so specify.

*Response:* In the proposed rule we requested comments on the definition of ''secured transportation'' but received only two comments. These comments expressed the need for clarification and one suggested that we adopt 49 CFR 38.23(d) as the definition of secured transportation if our intent was to define vehicle standards. In requesting comments on the definition of ''secured transportation'' it was not our intent to solicit comments on how to define vehicle standards. We therefore believe the definition in the proposed rule is sufficiently general to permit the State ample flexibility in the design of their brokerage program and have not changed this definition in the final rule.

*Comment:* One commenter, representing a State, said that some States delegate responsibility for NEMT to multiple regions or counties within the State, and that the rule should be amended to specifically allow a State to submit and receive State Plan approval of a general brokerage program template, including contract language, that would be used by each county or subdivision for implementing individual broker arrangements. Approval of such a template would eliminate the need for CMS to approve each individual brokerage program regardless of whether it was included in the initial SPA or added at a later date.

*Response:* We recognize that some States have chosen to delegate responsibility for the NEMT brokerage program to individual counties or regions of the State rather than contracting with a state-wide broker. In this model, each county or region operates a separate brokerage program that meets the needs of its beneficiaries, and each brokerage program may vary from area to area within the State. We believe that under this type of model we are obligated to review and approve each separate brokerage program in order to ensure that no conflict of interest exists in any of the various brokerages within the State and that each brokerage program complies with the other statutory and regulatory requirements of a brokerage program.

*Comment:* Several commenters said that the requirement that government entities and public transportation operators must compete in a competitive bidding process on the same terms as non-governmental entities conflicted with current State laws that allow government entities the right of first refusal. They believed that requiring governmental entities to compete on the same terms as non-governmental entities would create an additional burden just to avoid the perception that there is some inherent conflict of interest for governmental transportation providers that operate as a broker.

*Response:* While some States may have laws that allow governmental entities the right of first refusal, it is important to note that Section 6083 of the DRA expressly requires competitive bidding, and it did not specifically exempt State and local bodies that wish to serve as brokers from being selected through a fair and open competitive bidding process. We proposed to adopt the applicable provisions of the methodology for competitive bidding set out at 45 CFR 92.36 and do so in the final rule. We are adopting those provisions of 92.36 applicable to the competitive bidding program set out at 92.36(b)–(i). However, we note that we are excluding 92.36(a), which does not set out competitive bidding standards.

*Comment:* One commenter said that the regulation mirrors the DRA provisions in which the general Medicaid principles of freedom of choice, comparability, and state-wideness do not apply and that both the statute and the proposed rule contravene the intent of the Medicaid program by granting the State the authority to offer a higher level of service to some Medicaid beneficiaries but not to all.

*Response:* The statute provides that NEMT brokerage programs be implemented without regard to freedom of choice, comparability, and state-wideness in order to allow States to use competitive bidding to identify and select the most cost-effective and efficient NEMT broker. Because NEMT needs may differ from region to region it may be necessary to offer certain services in one area of the State but not in another. In creating this new option for States, the statute provides States with the greatest flexibility to customize their brokerage programs to meet the needs of all beneficiaries in all areas of the State, and for States to take advantage of the cost saving measures that NEMT brokers can offer. We note that for a number of years States have implemented NEMT brokerage programs under 1915(b) waiver authority in selected areas of the State without regard to freedom of choice, comparability, and or state-wideness. Both the statute and this final regulation make it possible to provide NEMT through a broker without regard to freedom of choice, comparability, and state-wideness, while maintaining the highest level of services for all Medicaid beneficiaries.

*Comment:* One commenter believed that the requirement that the beneficiary have no other means of transportation found in § 440.170(a)(4) of the proposed rule could significantly limit the number of Medicaid-enrolled individuals who could benefit from the Medicaid NEMT program. The commenter believed that CMS failed to take into account beneficiaries who normally have another means of transportation but cannot utilize it due to their current medical condition, and that this failure could lead to these beneficiaries being denied transportation assistance. The commenter requested that we amend the language to read ''that the beneficiary must have no other available'' means of transportation.

*Response:* We did not adopt in this final rule the commenter's suggestion that we amend the language in § 440.170(a)(4) by adding the word ''available,'' because we believe that States and brokers understand that they must take into consideration the beneficiary's physical condition when determining if the beneficiary has another means of getting to and from a medical service.

*Comment:* One commenter requested that we clarify treatment of a federally qualified health center (FQHC) with regard to NEMT services because FQHC services, including transportation, are mandatory and the State can include transportation costs in the Prospective Payment System (PPS) per visit payment or in its Alternative Payment Methodology (APM) per visit payment. The commenter further stated that a State's decision to contract with a broker does not eliminate the legal obligation to allow an FQHC to continue to provide and be reimbursed for transportation through the PPS or APM payment.

*Response:* In agreeing with the commenter we wish to clarify that a State's decision to establish a NEMT brokerage program does not preclude the State from allowing an FQHC to continue to provide for and be paid for transportation as part of the Prospective Payment System per visit payment or as part of the Alternative Payment Methodology per visit payment. We assume that a State's request for proposal would indicate this in accordance with the State's policy.

*Comment:* The August 24, 2007 proposed rule proposed an exception to the prohibition on self-referral for governmental brokers that prohibited Medicaid from paying more than the general public rate for public transit services. Many of the State transportation agencies that commented believed the regulation would create an unfunded mandate by shifting costs to State and local governments. These commenters contended that even though the general public fare is heavily subsidized by State and Federal funds it still does not accurately represent the full cost of providing paratransit services. The commenters also said the increased financial burden on States that would be created should Medicaid not pay the full cost of a paratransit trip, along with the additional capital costs that would be needed to fund the resulting increased demand for paratransit services, would exceed the $120 million dollar threshold for a major rule. Many commenters disagreed that the proposed rule would have no consequential effect on State, local and tribal governments and requested that CMS either reconsider this requirement and allow a Medicaid governmental broker to pay the fully allocated cost for public paratransit, or withdraw the regulation and perform and make publicly available a detailed study of the number of trips likely to be shifted to local responsibility, as well as the financial impact of those trips.

*Response:* We considered all of the comments on the governmental broker not paying more than the public rate and have revised § 440.170(a)(4)(ii)(B)(4)(iii) in this final rule so as to now require that in the case of a governmental broker, the rate paid by Medicaid for publicly provided fixed route transportation be no more than the rate paid by the public, and the rate paid by Medicaid for public paratransit represent reasonable costs and be comparable to the rate paid for similar paratransit trips by other State human services agencies. We therefore believe that this final rule does not create an unfunded mandate for States, localities, tribal governments, or the private sector.

*Comment:* In the proposed rule two commenters suggested that the collection of information requirements were significantly understated. One commenter said that according to their experience it took five hours to initially complete the State plan amendment preprint, and an additional nine hours to respond in writing to requests from CMS for additional information. Another commenter noted that the level of documentation required for governmental entities that are brokers is extensive, costly, and unnecessarily duplicative of the annual monitoring of expenditures that is required by the Department of Transportation.

*Response:* In order to minimize the amount of time needed to complete a State plan amendment establishing a NEMT brokerage program, we designed a five-page preprint that allows the State to complete almost all of the sections by checking a box next to each answer. We expect that prior to completing the preprint a State will have fully developed the information that describes the brokerage program and can insert or attach this information to the preprint. With that assumption in mind, we estimated that it would take no more than 12 minutes to check off the appropriate boxes and to insert or attach any already created information concerning the NEMT brokerage program that is necessary to complete the State plan amendment.

With regard to additional documentation requirements created by the proposed rule, Medicaid laws and regulations, as well as CMS guidance, have always required States to maintain documentation of the medical services that are provided to beneficiaries. The requirement in the proposed rule that States, through the broker, document each specific ride that was provided and that a Medicaid reimbursable service other than transportation was actually provided on the date transportation was provided is not a new collection of information.

In this final rule we revised the requirement that governmental brokers document that Medicaid paid no more for public transportation than the rate charged to the general public and have instead included a requirement that in the case of a governmental broker, there be documentation that Medicaid paid no more for public fixed route transportation than the general public, and no more for public paratransit services than the rate charged to other human services agencies for a comparable ride. We believe this documentation requirement to be relatively simple and to require no more than an annual comparison of the fees paid by Medicaid under the brokerage program to the fees charged to the general public for fixed route transportation, and a comparison of the fees paid by Medicaid (under the broker program) for public paratransit services to the fees paid by other human services agencies for comparable public paratransit services. We do not believe that the documentation requirement for government brokers set forth in the proposed rule represents any substantial additional time and cost. Therefore, we have not revised the collection of information estimate in this final rule.

## IV. Provisions of the Final Regulations

We are maintaining the majority of the provisions set out in the August 24, 2007 proposed rule, with several exceptions. The provisions of this final rule that differ from the proposed rule with comment period are as follows:

(1) We have modified the regulations text at § 440.170(a)(4)(i)(B) by adding the additional requirement that the broker have oversight procedures to monitor and ensure the timeliness of the transportation provided to beneficiaries.

(2) We have modified the regulations text at § 440.170(a)(4)(ii)(B)(4) by removing the requirement that the broker be a ''distinct government entity.'' However, in § 440.170(a)(4)(ii)(B)(4)(i), we continue to expect the governmental broker to maintain an accounting system as though it were a distinct unit, such that all funds allocated to the Medicaid brokerage program and all costs charged to the brokerage program will be completely separate from any other program. We have also clarified that costs shared with other governmental entities cannot be allocated to the brokerage program.

(3) We have modified the regulations text at § 440.170(a)(4)(ii)(B)(4)(iii) by removing the requirement that the broker document that the Medicaid

program is paying no more than the rate charged to the general public and replacing it with the requirement that the broker document that the Medicaid program is paying no more than the rate charged to the general public for public fixed-route transportation and no more than the rate charged to other agencies for comparable public paratransit services.

(4) We have modified the regulations text at § 440.170(a)(4)(i)(C) by adding the additional requirement that the State provide oversight and regularly audit the broker to ensure the timeliness of the transportation provided to beneficiaries.

## V. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995, we are required to provide 30-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506I(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

We solicited public comment on each of these issues for the following sections of this document that contain information collection requirements:

*State Option To Establish a Non-Emergency Medical Transportation Brokerage Program [§ 440.170(a)]*

Section § 440.170(a) provides States with the option to submit a State plan amendment (SPA) to establish a non-emergency medical transportation (NEMT) brokerage program. To effectuate this option, States must submit an amendment to their existing State plan. CMS has provided States with a letter providing guidance on this provision and the implementation of the DRA, and an associated SPA preprint for use by the States to modify their Medicaid State plan should they choose to implement this option.

The preprint is a total of 5 pages and we estimate that it will take no more than 12 minutes for a State to actually complete and submit the template to CMS. The potential number of respondents is 56 (50 States, the District of Columbia, and five territories); however, we do not expect the territories or all 50 states to respond. We estimate that only five States will submit annually. Once approved, the State will not need to resubmit unless it is materially changing the brokerage program. The burden associated with this requirement is approved under OMB #0938–0993. We submitted a copy of this final rule to OMB for its review of the information collection requirements described above. These requirements are not effective until they have been approved by OMB.

If you comment on these information collection and record keeping requirements, please mail copies directly to the following:

Centers for Medicare & Medicaid Services, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, *Attn.:* Melissa Musotto, CMS–2234–F, Room C5–14–03, 7500 Security Boulevard, Baltimore, MD 21244–1850.

Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503, *Attn:* CMS Desk Officer, CMS–2234–F, Fax (202) 395–6974.

## VI. Regulatory Impact Statement

We examined the impact of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), Executive Order 13132 on Federalism and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Order 12866 (as amended by Executive Order 13258, which merely reassigns responsibility of duties) directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million; or more in any 1 year). We estimate that this regulation will have estimated budget savings of $145 million between FY 2008 and FY 2012 due to the implementation of section 6083 of the Deficit Reduction Act of 2005. No single year will exceed $100 million, therefore, this rule will not reach the economic threshold and thus is not considered a major rule.

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of $6.5 million to $30.5 million in any 1 year. Individuals and States are not included in the definition of a small entity. We are not preparing an analysis for the RFA because we have determined, and the Secretary certifies, that this rule would not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 100 beds. We are not preparing an analysis for section 1102(b) of the Act because we have determined, and the Secretary certifies, that this rule would not have a significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. That threshold level is currently approximately $127 million. This rule would have no consequential effect on State, local, or tribal governments in the aggregate, or by the private sector, of $127 million.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. Since this regulation would not impose any costs on State or local governments, the requirements of E.O. 13132 are not applicable.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

**List of Subjects in 42 CFR Part 440**

Grant programs—health, Medicaid.

■ For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV as set forth below:

## PART 440—SERVICES: GENERAL PROVISIONS

■ 1. The authority citation for part 440 continues to read as follows:

**Authority:** Sec. 1102 of the Social Security Act (42 U.S.C. 1302), as amended.

■ 2. A new authority citation is added in numerical order to § 440.1 to read as follows:

**§ 440.1 Basis and purpose.**

* * * * *

1902(a)(70), State option to establish a non-emergency medical transportation program.

* * * * *

■ 3. Section 440.170 is amended by revising paragraph (a)(2) and adding new paragraph (a)(4) to read as follows:

**§ 440.170 Any other medical care or remedial care recognized under State law and specified by the Secretary.**

(a) * * *

(2) Except as provided in paragraph (a)(4), transportation, as defined in this section, is furnished only by a provider to whom a direct vendor payment can appropriately be made by the agency.

* * * * *

(4) Non-emergency medical transportation brokerage program. At the option of the State, and notwithstanding § 431.50 (statewide operation) and § 431.51 (freedom of choice of providers) of this chapter and § 440.240 (comparability of services for groups), a State plan may provide for the establishment of a non-emergency medical transportation brokerage program in order to more cost-effectively provide non-emergency medical transportation services for individuals eligible for medical assistance under the State plan who need access to medical care or services, and have no other means of transportation. These transportation services include wheelchair vans, taxis, stretcher cars, bus passes and tickets, secured transportation containing an occupant protection system that addresses safety needs of disabled or special needs individuals, and other forms of transportation otherwise covered under the state plan.

(i) Non-emergency medical transportation services may be provided under contract with individuals or entities that meet the following requirements:

(A) Is selected through a competitive bidding process that is consistent with 45 CFR 92.36(b) through (i) and is based on the State's evaluation of the broker's experience, performance, references, resources, qualifications, and costs.

(B) Has oversight procedures to monitor beneficiary access and complaints and ensure that transportation is timely and that transport personnel are licensed, qualified, competent, and courteous.

(C) Is subject to regular auditing and oversight by the State in order to ensure the quality and timeliness of the transportation services provided and the adequacy of beneficiary access to medical care and services.

(D) Is subject to a written contract that imposes the requirements related to prohibitions on referrals and conflicts of interest described at § 440.170(a)(4)(ii), and provides for the broker to be liable for the full cost of services resulting from a prohibited referral or subcontract.

(ii) Federal financial participation is available at the medical assistance rate for the cost of a written brokerage contract that:

(A) Except as provided in paragraph (a)(4)(ii)(B) of this section, prohibits the broker (including contractors, owners, investors, Boards of Directors, corporate officers, and employees) from providing non-emergency medical transportation services or making a referral or subcontracting to a transportation service provider if:

(*1*) The broker has a financial relationship with the transportation provider as defined at § 411.354(a) of this chapter with ''transportation broker'' substituted for ''physician'' and ''non-emergency transportation'' substituted for ''DHS''; or

(*2*) The broker has an immediate family member, as defined at § 411.351 of this chapter, that has a direct or indirect financial relationship with the transportation provider, with the term ''transportation broker'' substituted for ''physician.''

(B) Exceptions: The prohibitions described at clause (A) of this paragraph do not apply if there is documentation to support the following:

(*1*) Transportation is provided in a rural area, as defined at § 412.62(f), and there is no other available Medicaid participating provider or other provider determined by the State to be qualified except the non-governmental broker.

(*2*) Transportation is so specialized that there is no other available Medicaid participating provider or other provider determined by the State to be qualified except the non-governmental broker.

(*3*) Except for the non-governmental broker, the availability of other Medicaid participating providers or other providers determined by the State to be qualified is insufficient to meet the need for transportation.

(*4*) The broker is a government entity and the individual service is provided by the broker, or is referred to or subcontracted with another government-owned or operated transportation provider generally available in the community, if the following conditions are met:

(*i*) The contract with the broker provides for payment that does not exceed the actual costs calculated as though the broker were a distinct unit, and excludes from these payments any personnel or other costs shared with or allocated from parent or related entities; and the governmental broker maintains an accounting system such that all funds allocated to the Medicaid brokerage program and all costs charged to the brokerage program will be completely separate from any other program;

(*ii*) The broker documents that, with respect to the individual's specific transportation needs, the government provider is the most appropriate and lowest cost alternative; and

(*iii*) The broker documents that the Medicaid program is paying no more for fixed route public transportation than the rate charged to the general public and no more for public paratransit services than the rate charged to other State human services agencies for comparable services.

(C) Transportation providers may not offer or make any payment or other form of remuneration, including any kickback, rebate, cash, gifts, or service in kind to the broker in order to influence referrals or subcontracting for non-emergency medical transportation provided to a Medicaid recipient.

(D) In referring or subcontracting for non-emergency medical transportation with transportation providers, a broker may not withhold necessary non-emergency medical transportation from a Medicaid recipient or provide non-emergency medical transportation that is not the most appropriate and a cost-effective means of transportation for that recipient for the purpose of financial gain, or for any other purpose.

(E) The non-Federal share of all Medicaid payments under the transportation brokerage program must be in compliance with applicable Federal requirements in sections 1902(a)(2) and 1903(w) of the Act, and applicable Federal regulations set forth

at § 433.50 through § 433.74 of this chapter.

## DEPARTMENT OF HOMELAND SECURITY

### Transportation Security Administration

### 49 CFR Parts 1520 and 1580

**[Docket No. TSA–2006–26514; Amendment nos. 1520–6, 1580–1]**

**RIN 1652–AA51**

### Rail Transportation Security

**AGENCY:** Transportation Security Administration, DHS.

**ACTION:** Final rule.

**SUMMARY:** The Transportation Security Administration (TSA) extends the December 26, 2008 effective date of one section of the final rule entitled ''Rail Transportation Security,'' published in the **Federal Register** on November 26, 2008, 73 FR 72131, until April 1, 2009. This extension of the effective date is to afford affected freight railroad carriers, rail hazardous materials shippers, and rail hazardous materials receivers additional time to conduct training and implement procedures to come into compliance with the chain of custody and control requirements of the rule.

**DATES:** The effective date of 49 CFR 1580.107 of the final rule published in the **Federal Register** on November 26, 2008, at 73 FR 72131 is delayed until April 1, 2009. The effective date of the amendment to 49 CFR part 1520 and the effective date of all other sections of 49 CFR part 1580 remains December 26, 2008.

**FOR FURTHER INFORMATION CONTACT:** *For questions related to freight rail security:* Scott Gorton, Transportation Sector Network Management, Freight Rail Security, TSA–28, Transportation Security Administration, 601 South 12th Street, Arlington, VA 20598–6028; telephone (571) 227–1251; facsimile (571) 227–1923; e-mail *freightrailsecurity@dhs.gov*.

*For questions related to passenger rail security:* Morvarid Zolghadr, Mass Transit and Passenger Rail Security, TSA–28, Transportation Security Administration, 601 South 12th Street, Arlington, VA 20598–6028; telephone (571) 227–2957; e-mail *passengerrailcomments@dhs.gov*.

*For questions related to SSI:* Andrew E. Colsky, Office of the Special Counselor, SSI Office, TSA–31, Transportation Security Administration, 601 South 12th Street, Arlington, VA 20598–6031; telephone (571) 227–3513; facsimile (571) 227–2945; e-mail *SSI@dhs.gov*.

**SUPPLEMENTARY INFORMATION:** On November 26, 2008, TSA issued its Rail Transportation Security rule. 73 FR 72130. The effective date to comply with all provisions of the final rule was December 26, 2008.

The final rule on rail transportation security included a section to require a secure chain of physical custody for rail cars containing one or more rail security-sensitive materials. *See* 49 CFR 1580.107. On December 11, 2008, the Association of American Railroads and its member freight railroads requested that TSA delay the effective date of this provision. They presented information indicating that the initial 30-day period for compliance did not afford sufficient time for railroad carriers to implement procedures and train their workforce to meet the new regulatory requirement.

TSA recognizes that the affected regulated parties would have significant difficulty in complying with the chain of custody and control requirements in the time specified, and has decided to extend the effective date for compliance with 49 CFR 1580.107 to April 1, 2009.

Issued in Arlington, Virginia, on December 15, 2008.

**John Sammon,**

*Assistant Administrator.*

**[Docket No. 080407531–8840–02]**

**RIN 0648–AW68**

### Taking of Marine Mammals Incidental to Commercial Fishing Operations; Bottlenose Dolphin Take Reduction Plan

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Final rule.

**SUMMARY:** The National Marine Fisheries Service (NMFS) issues this final rule amending the Bottlenose Dolphin Take Reduction Plan's (BDTRP) implementing regulations by extending, for an additional three years, fishing restrictions expiring on May 26, 2009. This action continues, without modification, current nighttime fishing restrictions of medium mesh gillnets operating in the North Carolina portion of the Winter-Mixed Management Unit during the winter. Medium mesh fishing restrictions are extended for an additional three years to ensure continued conservation of the Western North Atlantic coastal bottlenose dolphin stock, should a directed spiny dogfish fishery reemerge in North Carolina.

**DATES:** This final rule is effective January 20, 2009.

**ADDRESSES:** Copies of the proposed rule to amend the BDTRP, the final BDTRP, Environmental Assessment, BDTRT meeting summaries, and background documents can be downloaded from the Take Reduction Plan web site at: *http://www.nmfs.noaa.gov/pr/interactions/trt/bdtrp.htm*.

**FOR FURTHER INFORMATION CONTACT:** Stacey Carlson, NMFS, Southeast Region, 727–824–5312, *Stacey.Carlson@noaa.gov*; or Melissa Andersen, NMFS, Protected Resources, 301–713–2322, *Melissa.Andersen@noaa.gov*. Individuals who use telecommunications devices for the deaf (TDD) may call the Federal Information Relay Service at 1–800–877–8339 between 8 a.m. and 4 p.m. eastern time, Monday through Friday, excluding Federal holidays.

**SUPPLEMENTARY INFORMATION:**

**Background**

In accordance with section 118(f)(7)(F) of the Marine Mammal Protection Act (MMPA), this final rule implements an amendment to the BDTRP (71 FR 24776) published on April 26, 2006. Details regarding the development and justification of this final rule were provided in the preamble of the proposed rule (73 FR 49634; August 22, 2008) and are not repeated here.

**Extension of Medium Mesh Gillnet Fishing Restrictions in North Carolina**

This final rule continues, without modification, current medium mesh nighttime fishing restrictions in North Carolina state waters. Specifically, prohibitions of nighttime medium mesh (greater than 5–inch (12.7 cm) to less than 7–inch (17.8 cm) stretch) gillnets in North Carolina state waters from November 1 through April 30, annually, will continue for an additional three years. These prohibitions are implemented with an expiration date of May 26, 2012. An expiration date is included to ensure the Bottlenose Dolphin Take Reduction Team continues to reexamine the spiny dogfish fishery and determine if these requirements are still necessary and/or sufficient given the dynamic nature of the fishery and its management.

**Comments on the Proposed Rule and Responses**

NMFS received five comment letters on the proposed rule via mail, fax, and the Federal eRulemaking Portal. Comments on the proposed rule were received from The Humane Society of the United States, Ocean Conservancy, Marine Mammal Commission, and two citizens.

In addition to receiving the specific comments detailed below, NMFS also received the following: (1) comments in support of developing an innovative take reduction plan to reduce serious injury and mortality of bottlenose dolphins; (2) concern that the BDTRP should be more protective of bottlenose dolphins; (3) a recommendation to pursue consensus recommendations made by the BDTRT at their June 2007 meeting for gear research related to the Summer Northern North Carolina Management Unit and increasing observer coverage in this Management Unit; and (4) a request that NMFS provide updates in this final rule on progress made towards enhancing and increasing observer coverage. After careful consideration, NMFS concluded these comments were previously considered or did not pertain to the proposed rule to extend the current nighttime medium mesh fishing restrictions in North Carolina state waters for continued conservation of bottlenose dolphins. NMFS continues to make efforts to implement all the BDTRT's consensus recommendations and will provide status updates at the next BDTRT meeting in March 2009.

*Comment 1:* Three commenters recommended NMFS adopt the final rule as proposed.

*Response:* NMFS is finalizing the rule as proposed.

*Comment 2:* Two commenters expressed support for extending the medium mesh gillnet restrictions and believe the fishing restrictions are critical for bottlenose dolphin conservation. Although the commenters are not opposed to extending the restrictions indefinitely, they agree extending the restrictions for three years is important to ensure the BDTRT periodically reviews the status of the spiny dogfish fishery.

*Response:* Extending the medium mesh nighttime gillnet restrictions in North Carolina is necessary to ensure continued conservation of coastal bottlenose dolphins. NMFS also believes establishing a three-year timeframe for the restriction provides the opportunity and assurance for the BDTRT to regularly review the fishing restrictions and spiny dogfish fishery, as well as to evaluate if additional modifications to the BDTRP are warranted due to the dynamic nature of the fishery and its management.

**Changes from Proposed Rule**

This action is finalized unchanged from the proposed rule.

Classification

This final rule was determined not significant for purposes of Executive Order 12866.

As required by section 603 of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), an initial regulatory flexibility analysis (IRFA) was prepared, which is based on the Environmental Assessment, Regulatory Impact Review, and Final Regulatory Flexibility Act Analysis (FRFA) for the BDTRP, dated April 2006. The IRFA described the economic impact the proposed rule, if adopted, would have on small entities. No substantive comments on the IRFA or the economic impacts of the proposed rule were received, and no changes were made to the final rule as a result. A summary of the FRFA follows.

The purpose of this final rule is to reduce serious injuries and mortalities to bottlenose dolphins incidental to commercial fishing operations and ensure serious injuries and mortalities do not exceed PBR levels, as mandated by the MMPA. The specific objectives of this final action are to: (1) meet the BDTRP's short- and long-term objectives by maintaining reductions in serious injuries and moralities of dolphins associated with the medium mesh spiny dogfish fishery in North Carolina state waters; and (2) ensure the BDTRT is provided with continued opportunities to review the status of the dynamic spiny dogfish fishery and recommend revisions to the BDTRP, as necessary. These objectives will be accomplished by continuing reduced soak times in medium mesh gillnet gear in North Carolina via the seasonal, nighttime medium mesh gear prohibitions for an additional three years. The MMPA provides the statutory basis for this rule.

This final rule will not impose any additional reporting or recordkeeping requirements. The compliance requirements of the final rule are as described in this analysis.

A total of 1,321 unique participants were identified as having recorded landings using medium mesh gillnet gear during the 2001 fishing season (November 2000 - October 2001) in North Carolina. Total harvests with this gear were valued at approximately $13.8 million (nominal ex-vessel value), or approximately 18 percent of total fishing revenues by these entities of approximately $77 million (nominal ex-vessel value). The average annual revenue from the harvest of all marine species by these vessels was approximately $58,000.

A business involved in fish harvesting is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $4.0 million (NAICS code 114111, finfish fishing) for all its affiliated operations worldwide. All medium mesh gillnet commercial fishing operating in the manner and location encompassed by this final action will be affected by the final rule. The available estimate of the average annual revenues by vessels operating in the medium mesh gillnet commercial fisheries in North Carolina provided above ($58,000) is from the 2001 fishing season. Since that time, as a result of the implementation of the Spiny Dogifsh Fishery Management Plan (FMP) under the Magnuson-Stevens Fishery Conservation and Management Act and a subsequent Interstate Fishery Management Plan for Spiny Dogfish, spiny dogfish fishery revenues have decreased. Therefore, NMFS determined that all entities affected by the final rule

are small businesses. Because all entities affected by the final rule are considered small entities, the issue of disproportional impacts between large and small entities as a result of the final action does not arise.

Information on the current profit profile of participants in the North Carolina medium mesh gillnet fishery is not available. Inferences on the effects of the final rule on profitability of the impacted small entities, however, may be drawn from examination of the expected impacts on ex-vessel revenues. In 2001, total costs associated with harvest reductions (lost ex-vessel revenue) for the medium mesh gillnet fisheries in North Carolina during the winter were estimated to be approximately $296,000 for the initial implementation of the prohibition in the BDTRP. This reduction in ex-vessel revenues represented less than 1 percent of total ex-vessel revenues for the entities that used this gear in North Carolina during the winter for the 2001 fishing year. Updated analyses are not available. Spiny dogfish were the primary target of the medium mesh gillnet sector, and the spiny dogfish fishery was essentially eliminated in 2000 through regulations implementing the Spiny Dogfish Fishery Management Plan under the Magnuson-Stevens Fishery Conservation and Management Act and emergency actions by the Atlantic States Marine Fisheries Commission creating a similar Interstate Fishery Management Plan for Spiny Dogfish. Since then, there has not been a large-scale directed fishery for this species in North Carolina. This prevents meaningful quantification of current revenues that might be foregone as a result of the final action, as well as the identification and description of fishing entities that might desire to re-enter the fishery should the fishery reemerge in North Carolina in the future.

It should be emphasized that this final action is not expected to directly affect any current fishing revenues or fishing practices because the medium mesh spiny dogfish gillnet fishery in North Carolina has not operated since the May 26, 2006, implementation of the BDTRP, nor in any substantive manner since 2000 when the FMPs were implemented. Instead, the continuation of the nighttime fishing prohibition would have an effect only if a directed spiny dogfish fishery reemerges in North Carolina because of changes in Federal or Interstate FMP actions. In that case, the final action will reduce potential medium mesh gillnet fishing opportunities by limiting soak times, and will limit the redevelopment and prosecution of a fishery that, prior to the FMPs and BDTRP, contributed a relatively minor share of fishing revenues to the fishery participants.

NMFS considered two alternatives for this final action. The first alternative, the status quo, would continue current restrictions until May 26, 2009, when the medium mesh gillnet prohibitions in North Carolina would expire. This alternative would allow increased soak times associated with the directed spiny dogfish fishery and associated revenues, if FMP actions allow for the reemergence of a directed fishery in North Carolina. However, this alternative would not prevent future incidental mortality and serious injury to dolphins from extended soak time of medium mesh commercial gillnet gear, and therefore, would not meet the objectives of the BDTRP. The second alternative, the final action, continues, without modification, current nighttime medium mesh gillnet restrictions in North Carolina state waters during the winter for an additional three years (until May 26, 2012). This is a consensus recommendation of the Bottlenose Dolphin Take Reduction Team and is expected to achieve the BDTRP's objectives, as mandated by the MMPA, by continuing to reduce serious injuries and mortalities of dolphins incidental to commercial gillnet fishing.

NMFS determined this action is consistent to the maximum extent practicable with the enforceable policies of the approved coastal management program of North Carolina. NMFS provided a consistency determination to North Carolina's Coastal Zone Management Program under section 307 of the Coastal Zone Management Act and enclosed the following reference information: a summary of the proposed action; the final rule implementing the BDTRP (71 FR 24776, April 26, 2006); and the BDTRT's June 2007 meeting summary. The letter was provided to the State on June 20, 2008. North Carolina did not provide comments; therefore, consistency is inferred.

This action contains policies with federalism implications that were sufficient to warrant preparation of a federalism summary impact statement under Executive Order 13132 and a federalism consultation with officials in the state of North Carolina. Accordingly, the Assistant Secretary for Legislative and Intergovernmental Affairs provided notice of the proposed action to the appropriate officials in North Carolina. North Carolina did not respond.

This final rule does not contain collection-of-information requirements subject to the Paperwork Reduction Act.

### 50 CFR Part 648

**[Docket No. 071212833-8179-02]**

**RIN 0648–XM22**

## Fisheries of the Northeastern United States; Atlantic Bluefish Fishery; Quota Transfer

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; inseason quota transfer.

**SUMMARY:** NMFS announces that the State of Maine is transferring commercial bluefish quota to the State of New York from its 2008 quota. By this action, NMFS adjusts the quotas and announces the revised commercial quota for each state involved.

**DATES:** Effective December 16, 2008 through December 31, 2008.

**FOR FURTHER INFORMATION CONTACT:** Emily Bryant, Fishery Management Specialist, (978) 281–9244, fax (978) 281–9135.

**SUPPLEMENTARY INFORMATION:** Regulations governing the Atlantic bluefish fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is apportioned among the coastal states from Florida through Maine. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.160.

Two or more states, under mutual agreement and with the concurrence of the Administrator, Northeast Region, NMFS (Regional Administrator), can transfer or combine bluefish commercial quota under § 648.160(f). The Regional Administrator is required to consider the criteria set forth in § 648.160(f)(1) in the evaluation of requests for quota transfers or combinations.

Maine has agreed to transfer 45,000 lb (20,412 kg) of its 2008 commercial quota to New York. The Regional Administrator has determined that the criteria set forth in § 648.160(f)(1) have been met. The revised bluefish quotas for calendar year 2008 are: New York, 1,202,057 lb (545,244 kg); and Maine, 6,418 lb (2,911 kg).

### Classification

This action is taken under 50 CFR part 648 and is exempt from review under Executive Order 12866.

**Authority:** 16 U.S.C. 1801 *et seq.*

**RIN 0648–XM30**

## Fisheries of the Exclusive Economic Zone Off Alaska; Greenland Turbot and Rougheye Rockfish in the Bering Sea and Aleutian Islands Management Area

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; apportionment of reserves; request for comments.

**SUMMARY:** NMFS apportions amounts of the non-specified reserve to the initial total allowable catch (ITAC) of Greenland turbot in the Aleutian Islands subarea and rougheye rockfish in the Bering Sea and Aleutian Islands (BSAI) management area. This action is necessary to allow the fisheries to continue operating. It is intended to promote the goals and objectives of the fishery management plan for the BSAI.

**DATES:** Effective December 16, 2008 through 2400 hrs, Alaska local time, December 31, 2008. Comments must be received at the following address no later than 4:30 p.m., Alaska local time, December 31, 2008.

**ADDRESSES:** Send comments to Sue Salveson, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region, NMFS, Attn: Ellen Sebastian. You may submit comments, identified by [RIN], by any one of the following methods:

- Electronic Submissions: Submit all electronic public comments via the Federal eRulemaking Portal website at *http://www.regulations.gov*.
- Mail: P. O. Box 21668, Juneau, AK 99802.
- Fax: (907) 586–7557.
- Hand delivery to the Federal Building: 709 West 9th Street, Room 420A, Juneau, AK.

All comments received are a part of the public record and will generally be posted to *http://www.regulations.gov* without change. All Personal Identifying Information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

NMFS will accept anonymous comments (enter N/A in the required fields, if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, WordPerfect, or Adobe portable document file (pdf) formats only.

**FOR FURTHER INFORMATION CONTACT:** Mary Furuness, 907–586–7228.

**SUPPLEMENTARY INFORMATION:** NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2008 ITAC of Greenland turbot in the Aleutian Islands subarea was established as 672 metric tons (mt) and rougheye rockfish in the BSAI was established as 187 mt by the 2008 and 2009 harvest specifications for groundfish of the BSAI (73 FR 10160, February 26, 2008). The Regional Administrator, Alaska Region, NMFS, has determined that the ITAC for Greenland turbot in the Aleutian Islands subarea and rougheye rockfish in the BSAI needs to be supplemented from the non-specified reserve in order to continue fishing operations.

Therefore, in accordance with § 679.20(b)(3), NMFS apportions from the non-specified reserve of groundfish 118 mt to the Greenland turbot ITAC in the Aleutian Islands subarea and 15 mt of rougheye rockfish ITAC in the BSAI. These apportionments are consistent with § 679.20(b)(1)(i) and do not result in overfishing of a target species because the revised ITACs are equal to or less than the specifications of the acceptable biological catch in the 2008 and 2009 final harvest specifications for groundfish in the BSAI (73 FR 10160, February 26, 2008).

The harvest specification for Greenland turbot and rougheye rockfish included in the harvest specifications for groundfish in the BSAI (73 FR 10160, February 26, 2008) for the 2008 ITAC are revised as follows: 790 mt for Greenland turbot in the Aleutian Islands subarea and 202 mt for rougheye rockfish in the BSAI.

**Classification**

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, (AA) finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) and § 679.20(b)(3)(iii)(A) as such a requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the apportionment of the non-specified reserves of groundfish to the Greenland turbot fishery in the Aleutian Islands subarea and rougheye rockfish in the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of December 4, 2008.

The AA also finds good cause to waive the 30–day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Under § 679.20(b)(3)(iii), interested persons are invited to submit written comments on this action (see **ADDRESSES**) until December 31, 2008.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

**Authority:** 16 U.S.C. 1801, *et seq.*

Dated: December 16, 2008.

**Emily H. Menashes,**

*Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.*

# Proposed Rules

Federal Register
Vol. 73, No. 245
Friday, December 19, 2008

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

### 6 CFR Part 5

**[Docket No. DHS–2008–0173]**

## Privacy Act of 1974: Implementation of Exemptions, DHS/CBP—014 Regulatory Audit Archive System

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Department of Homeland Security (DHS) is giving concurrent notice of a revised and updated system of records pursuant to the Privacy Act of 1974 for the U.S. Customs and Border Protection Regulatory Audit Archive System (RAAS) system of records and this proposed rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

**DATES:** Comments must be received on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0173, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 799 Ninth Street, NW., Washington, DC 20001–4501. For privacy issues contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/United States Customs and Border Protection (CBP) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern records on regulatory audits of customs brokers and other persons engaged in international trade, who are the subject of audits or within the scope of an audit.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a DHS/CBP system of records under the Privacy Act (5 U.S.C. 552a) that deals with regulatory audits of customs brokers and other persons engaged in international trade. These audits are part of CBP's continuing oversight of Customs Brokers, who are licensed by CBP, pursuant to 19 U.S.C. 1641, to act as agents for importers in the entry of merchandise and payment of duties and fees. This SORN also notes the expansion of CBP's regulatory audit authority to other persons engaged in international trade.

In this notice of proposed rulemaking, DHS now is proposing to exempt DHS/CBP—014 Regulatory Audit Archive System (RAAS), in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/CBP–014 Regulatory Audit Archive System (RAAS). Some information in DHS/CBP–014 Regulatory Audit Archive System (RAAS) system of records relates to official DHS national security, law enforcement, immigration, and intelligence activities. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; to protect the privacy of third parties; and to safeguard classified information. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate

circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

A notice of system of records for DHS/CBP–014 Regulatory Audit Archive System (RAAS) is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, Exemption of Record Systems under the Privacy Act, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security/United States Customs and Border Protection—014 Regulatory Audit Archive System (RAAS) system of records consists of electronic and paper records and will be used by DHS and its components. DHS/CBP–014 Regulatory Audit Archive System (RAAS) is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: the enforcement of civil and criminal laws; investigations, inquiries, and proceedings there under; and national security and intelligence activities. DHS/CBP–014 Regulatory Audit Archive System (RAAS) contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies. Pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act, this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

**[Docket No. DHS–2008–0190]**

## Privacy Act of 1974: Implementation of Exemptions; DHS/CBP–011 TECS

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Department of Homeland Security (DHS) is giving concurrent notice of a revised and updated system of records pursuant to the Privacy Act of 1974 for the U.S. Customs and Border Protection—011 TECS system of records and this proposed rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

**DATES:** Comments must be received on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0190, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 799 Ninth Street, NW., Washington, DC 20001–4501. For privacy issues contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of

2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and U.S. Customs and Border Protection (CBP) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern the Treasury Enforcement Communications System (TECS).

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a DHS/CBP system of records under the Privacy Act (5 U.S.C. 552a) that deals with CBP's priority mission of preventing terrorists and terrorist weapons from entering the country while facilitating legitimate travel and trade.

In this notice of proposed rulemaking, DHS now is proposing to exempt TECS, in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/CBP–011 TECS. Some information in DHS/CBP–011 TECS relates to official DHS national security, law enforcement, immigration, and intelligence activities. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; and to protect the privacy of third parties. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

A notice of system of records for DHS/CBP–011 TECS is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, Exemption of Record Systems under the Privacy Act, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security/U.S. Customs and Border Protection—011 TECS system of records consists of electronic and paper records and will be used by DHS, DHS Components, and other Federal agencies. DHS/CBP–011 TECS is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: The enforcement of civil and criminal laws; investigations, inquiries, and proceedings thereunder; and national security and intelligence activities. DHS/CBP–011 TECS contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies. Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act, this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to national security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because

requiring that information be collected from the subject of an investigation or subject of interest would alert the subject to the nature or existence of an investigation, thereby interfering with the related investigation and law enforcement activities or national security matter.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information would impede law enforcement in that it could compromise investigations by: Revealing the existence of an otherwise confidential investigation and thereby provide an opportunity for the subject of an investigation to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential informants, which would negatively affect the informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating as confidential informants in any future investigations.

(f) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS' ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal, and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) to the extent that the system is exempt from other specific subsections of the Privacy Act relating to individuals' rights to access and amend their records contained in the system. Therefore DHS is not required to establish rules or procedures pursuant to which individuals may seek a civil remedy for the agency's: Refusal to amend a record; refusal to comply with a request for access to records; failure to maintain accurate, relevant timely and complete records; or failure to otherwise comply with an individual's right to access or amend records.

Dated: December 10, 2008.

**[Docket No. DHS–2008–0157]**

## Privacy Act of 1974: Implementation of Exemptions; DHS/CBP–012 Closed Circuit Television System

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Department of Homeland Security (DHS) is giving concurrent notice of a revised and updated system of records pursuant to the Privacy Act of 1974 for the U.S. Customs and Border Protection Closed Circuit Television System system of records and this proposed rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

**DATES:** Comments must be received on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0157, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 799 Ninth Street, NW., Washington, DC 20001–4501. For privacy issues contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern the DHS/CBP—012 Closed Circuit Television System.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a DHS/CBP system of records notice under the Privacy Act (5 U.S.C. 552a) that concerns people involved in incidents or disturbances related to customs or inspection while attempting to enter the U.S. This record system will allow DHS/CBP to videotape persons being escorted into, as well as inside a port of entry. The collection and maintenance of this information will assist DHS/CBP in recording individuals who are part of an incident or disturbance during a secondary inspection or individuals who received a secondary inspection due to an incident or disturbance.

In this notice of proposed rulemaking, DHS now is proposing to exempt Television System, in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of

each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/CBP—012 Closed Circuit Television System. Some information in Television System relates to official DHS national security, law enforcement, immigration, and intelligence activities. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; to protect the privacy of third parties; and to safeguard classified information. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

A notice of system of records for DHS/CBP–012 Closed Circuit Television System is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, Exemption of Record Systems under the Privacy Act, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security/U.S. Customs and Border Protection–012 Closed Circuit Television System system of records consists of electronic and paper records and will be used by DHS and its components. The Closed Circuit Television System is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: the enforcement of civil and criminal laws; investigations, inquiries, and proceedings there under; and national security and intelligence activities. DHS/CBP–012 Closed Circuit Television System contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies. Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act, this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of an investigation, thereby interfering with the related investigation and law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information would impede law enforcement in that it could compromise investigations by: revealing the existence of an otherwise confidential investigation and thereby provide an opportunity for the subject of an investigation to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential informants, which would negatively affect the informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating as confidential informants in any future investigations.

(f) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses,

and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS' ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal, and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) to the extent that the system is exempt from other specific subsections of the Privacy Act relating to individuals' rights to access and amend their records contained in the system. Therefore DHS is not required to establish rules or procedures pursuant to which individuals may seek a civil remedy for the agency's: refusal to amend a record; refusal to comply with a request for access to records; failure to maintain accurate, relevant timely and complete records; or failure to otherwise comply with an individual's right to access or amend records.

Dated: December 10, 2008.

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 799 Ninth Street, NW., Washington, DC 20001–4501. For privacy issues contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records pertaining to persons engaged in international trade in CBP licensed/regulated activities.

As part of its efforts to streamline and consolidate its record systems, DHS is establishing a component system of records under the Privacy Act (5 U.S.C. 552a) for DHS/CBP that deals with persons engaged in international trade in CBP licensed/regulated activities. This record system is titled, U.S. Customs and Border Protection Persons Engaged in International Trade in CBP Licensed/Regulated Activities. This system will be used by DHS/CBP to collect and maintain records on persons engaged in international trade in CBP licensed/regulated activities.

In this notice of proposed rulemaking, DHS now is proposing to exempt Persons Engaged in International Trade in CBP Licensed/Regulated Activities, in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for Persons Engaged in International Trade in CBP Licensed/Regulated Activities. Some information in Persons Engaged in International Trade in CBP Licensed/Regulated Activities relates to official DHS national security, law enforcement, immigration, and intelligence activities. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's

ability to obtain information from third parties and other sources; and to protect the privacy of third parties; to safeguard classified information. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

A notice of system of records for Persons Engaged in International Trade in CBP Licensed/Regulated Activities is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, Exemption of Record Systems under the Privacy Act, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security/U.S. Customs and Border Protection—010 Persons Engaged in International Trade in CBP Licensed/Regulated Activities system of records consists of electronic and paper records and will be used by DHS and its components. Persons Engaged in International Trade in CBP Licensed/Regulated Activities is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: the enforcement of civil and criminal laws; investigations, inquiries, and proceedings there under; and national security and intelligence activities. Persons Engaged in International Trade in CBP Licensed/Regulated Activities contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies. Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act, this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to national security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of an investigation, thereby interfering with the related investigation and law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information would impede law enforcement in that it could compromise investigations by: revealing the existence of an otherwise confidential investigation and thereby provide an opportunity for the subject of an investigation to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential informants, which would negatively affect the informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating as confidential informants in any future investigations.

(f) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS' ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal, and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) to the extent that the system is exempt from other specific subsections of the Privacy Act relating to individuals' rights to access and amend their records contained in the system. Therefore DHS is not required to establish rules or procedures pursuant to which individuals may seek a civil remedy for the agency's refusal to amend a record; refusal to comply with a request for access to records; failure to maintain accurate, relevant timely and complete records; or failure to otherwise comply with an individual's right to access or amend records.

Dated: December 10, 2008.

## Privacy Act of 1974: Implementation of Exemptions; DHS/USSS–003 Non-Criminal Investigation Information System

**AGENCY:** Department of Homeland Security.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Department of Homeland Security (DHS) is giving concurrent notice of a revised and updated system of records pursuant to the Privacy Act of 1974 for the DHS United States Secret Service—003 Non-Criminal Investigation Information System system of records and this proposed rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

**DATES:** Comments must be received on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0176, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions and privacy issues, please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, the Department of Homeland Security (DHS) and United States Secret Service (USSS) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern DHS/USSS–003 Non-Criminal Investigation Information System records.

As part of its efforts to streamline and consolidate its Privacy Act record systems, DHS/USSS is updating and reissuing a DHS/USSS system of records under the Privacy Act (5 U.S.C. 552a) for USSS records that concern individuals involved in non-criminal statutory investigations and/or requirements. Information related investigations into employee activities is retired into DHS/All 020 Internal Affairs published in the **Federal Register** on November 14, 2008 73 FR 67529; information related to claims against USSS is retired into DHS/All–013 Claims published in the **Federal Register** on October 28, 2008 at 73 FR 63987; and information related to employment and security clearance suitability are retired in DHS/OS1 Office of Security Files, published September 12, 2006 71 FR 53700. This will ensure that all organizational parts of USSS follow the same privacy rules for collecting and handling records non-criminal USSS investigation records. In this notice of proposed rulemaking, DHS now is proposing to exempt DHS/USSS–003 Non-Criminal Investigation Information System, in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/USSS–003 Non-Criminal Investigation Information System. Some information in Non-Criminal Investigation Information System relates to law enforcement, training, and protective services to the President of the United States or other individuals pursuant to Section 3056 and 3056A of Title 18. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS' ability to obtain information from third parties and other sources; to protect the privacy of third parties; to protect testing materials; and to safeguard records in connection with providing protective services to the President of the United States or other individuals pursuant to Section 3056 and 3056A of Title 18. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

A notice of system of records for DHS/USSS–003 Non-Criminal Investigation Information System is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** 6 U.S.C. 101 *et seq.*; Public Law 107–296, 116 Stat. 2135; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security DHS/USSS–003 Non-Criminal Investigation Information System system of records consists of electronic and paper records and will be used by DHS and its components. DHS/USSS–003 Non-Criminal Investigation Information System is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: The enforcement of civil and criminal laws; investigations, inquiries, and proceedings thereunder; protection of the President of the United States or other individuals pursuant to Section 3056 and 3056A of Title 18; and protection of testing materials. DHS/USSS–003 Non-Criminal Investigation Information System contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies. Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(2), (3), (5), and (6) this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of an investigation, thereby interfering with the related investigation and law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information would impede law enforcement in that it could compromise investigations by: Revealing the existence of an otherwise confidential investigation and thereby provide an opportunity for the subject of an investigation to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential informants, which would negatively affect the informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating as confidential informants in any future investigations.

(f) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with (e)(5) would preclude DHS agents from using their investigative training, and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS' ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal, and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) to the extent that the system is exempt from other specific subsections of the Privacy Act relating to individuals' rights to access and amend their records contained in the system. Therefore DHS is not required to establish rules or procedures pursuant to which individuals may seek a civil remedy for the agency's: refusal to amend a record; refusal to comply with a request for access to records; failure to maintain accurate, relevant timely and complete records; or failure to otherwise comply with an individual's right to access or amend records.

**[Docket No. DHS–2008–0175]**

## Privacy Act of 1974: Implementation of Exemptions; DHS/USSS—001 Criminal Investigation Information System

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Department of Homeland Security (DHS) is giving concurrent notice of a revised and updated system of records pursuant to the Privacy Act of 1974 for the DHS/United States Secret Service—001 Criminal

Investigation Information System system of records and this proposed rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

**DATES:** Comments must be received on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0175, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions and privacy issues, please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and United States Secret Service (USSS) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern DHS/USSS—001 Criminal Investigation Information System records.

As part of its efforts to streamline and consolidate its Privacy Act record systems, DHS/USSS is updating and reissuing a USSS.003 Criminal Investigation Information System under the Privacy Act (5 U.S.C. 552a) as DHS/USSS—001 Criminal Investigation Information System system records. This will ensure that all organizational parts of USSS follow the same privacy rules for collecting and handling criminal investigation information system records.

In this notice of proposed rulemaking, DHS is now proposing to exempt Criminal Investigation Information System, in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for Criminal Investigation Information System. Some information in Criminal Investigation Information System relates to official DHS national security, law enforcement, immigration, intelligence activities, and protective services to the President of the United States or other individuals pursuant to Section 3056 of Title 18. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; to protect the privacy of third parties; to safeguard classified information; and to safeguard records in connection with providing protective services to the President of the United States or other individuals pursuant to Section 3056 of Title 18. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case-by-case basis.

A notice of system of records for Criminal Investigation Information System is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, Exemption of Record Systems under the Privacy Act, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security/United States Secret Service—001 Criminal Investigation Information System system of records consists of electronic and paper records and will be used by DHS and its components. DHS/USSS—011 Criminal Investigation Information System is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: The enforcement of civil and criminal laws; investigations, inquiries, and proceedings thereunder; national security and intelligence activities; protection of the President of the United States or other individuals pursuant to Section 3056 Title 18. DHS/USSS—001 Criminal Investigation Information System contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or

international government agencies. Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(1),(k)(2), and (k)(3) of the Privacy Act, this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of an investigation, thereby interfering with the related investigation and law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information would impede law enforcement in that it could compromise investigations by: Revealing the existence of an otherwise confidential investigation and thereby provide an opportunity for the subject of an investigation to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential informants, which would negatively affect the informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating as confidential informants in any future investigations.

(f) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS' ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal, and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) to the extent that the system is exempt from other specific subsections of the Privacy Act relating to individuals' rights to access and amend their records contained in the system. Therefore DHS is not required to establish rules or procedures pursuant to which individuals may seek a civil remedy for the agency's: Refusal to amend a record; refusal to comply with a request for access to records; failure to maintain accurate, relevant timely and complete records; or failure to otherwise comply with an individual's right to access or amend records.

Dated: December 10, 2008.

- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions and privacy issues, please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer,

Privacy Office, Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records pertaining to seizures and violators.

As part of its efforts to streamline and consolidate its record systems, DHS is establishing a component system of records under the Privacy Act (5 U.S.C. 552a) for DHS/CBP that deals with seizures made, and persons found violating laws and regulations enforced, by DHS/CBP. This record system will allow DHS/CBP to collect and maintain records regarding or related to seizures and violators.

In this notice of proposed rulemaking, DHS now is proposing to exempt DHS/CBP—013 Seized Assets and Case Tracking System (SEACATS), in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for the DHS/CBP—013 SEACATS. Some information in DHS/CBP—013 SEACATS relates to official DHS national security, law enforcement, customs, immigration and intelligence activities. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; and to protect the privacy of third parties. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case-by-case basis.

A notice of system of records for Seized Assets and Case Tracking System (SEACATS) is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, Exemption of Record Systems under the Privacy Act, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security/United States Customs and Border Protection—013 Seized Assets and Case Tracking System (SEACATS) system of records consists of electronic and paper records and will be used by DHS and its components. DHS/CBP—013 Seized Assets and Case Tracking System (SEACATS) is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: The enforcement of civil and criminal laws; investigations, inquiries, and proceedings thereunder; and national security and intelligence activities. Seized Assets and Case Tracking System (SEACATS) contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies. Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act, this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to national security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of an investigation, thereby interfering with the related investigation and law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information would impede law enforcement in that it could compromise investigations by: Revealing the existence of an otherwise confidential investigation and thereby provide an opportunity for the subject of an investigation to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential informants, which would negatively affect the informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating as confidential informants in any future investigations.

(f) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS' ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal, and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) to the extent that the system is exempt from other specific subsections of the Privacy Act relating to individuals' rights to access and amend their records contained in the system. Therefore DHS is not required to establish rules or procedures pursuant to which individuals may seek a civil remedy for the agency's: Refusal to amend a record; refusal to comply with a request for access to records; failure to maintain accurate, relevant timely and complete records; or failure to otherwise comply with an individual's right to access or amend records.

**SUPPLEMENTARY INFORMATION:**

### Background

The Department of Homeland Security (DHS), elsewhere in this edition of the **Federal Register**, published a Privacy Act system of records notice describing records in the Automated Commercial System (ACS).

To help prevent terrorist weapons from being transported to the United States, vessel carriers bringing cargo to the United States are required to transmit certain information to Customs and Border Protection (CBP) about the cargo they are transporting prior to lading that cargo at foreign ports of entry. CBP is issuing an interim final rule that requires both importers and carriers to submit additional information pertaining to cargo to CBP before the cargo is brought into the United States by vessel. This information must be submitted to CBP by way of a CBP-approved electronic data interchange system. The required information is necessary to improve CBP's ability to identify high-risk shipments so as to prevent smuggling and ensure cargo safety and security, as required by section 203 of the Security and Accountability for Every (SAFE) Port Act of 2006 and section 343(a) of the Trade Act of 2002, as amended by the Maritime Transportation Security Act of 2002.

The proposed rule was known to the trade as both the ''Importer Security Filing proposal'' and the ''10 + 2 proposal.'' The name ''10 + 2'' is shorthand for the number of advance data elements CBP was proposing to collect. Carriers would be generally required to submit two additional data elements—a vessel stow plan and container status messages regarding certain events relating to containers loaded on vessels destined to the United States—to the elements they are already required to electronically transmit in advance (the ''2'' of ''10 + 2''); and importers, as defined in the proposed regulations, would be required to submit ten data elements—an Importer Security Filing containing ten data elements (the ''10'' of ''10 + 2'').

The Automated Commercial System (ACS) is the comprehensive system used

by U.S. Customs and Border Protection to track, control, and process all commercial goods imported into the United States. ACS is a sophisticated and integrated large-scale business-oriented system which employs multiple modules to perform discrete aspects of its functionality: including receiving data transmissions from a variety of parties involved in international commercial transactions, and providing CBP with the capability to track both the transport transactions and the financial transactions associated with the movement of merchandise through international commerce. Through the use of Electronic Data Interchange (EDI), ACS facilitates merchandise processing, significantly cuts costs, and reduces paperwork requirements for both Customs and the importing community.

ACS has two principal methods for electronic data interchange, the Automated Broker Interface (ABI) and the Automated Manifest System (AMS). Under the ''10 + 2'' program, importers who submit the Importer Security Filing (ISF), will use either ABI or Vessel AMS to provide their information to CBP. ACS, upon receipt of the ISF, will transfer the data to the Automated Targeting System (ATS) for screening and targeting purposes. Once screened the ISF data will be returned with embedded targeting links to ACS to be maintained in accordance with the ACS stated retention policy.

No exemption shall be asserted with respect to information maintained in the system as it relates to data submitted by or on behalf of a person who travels to visit the United States, nor shall an exemption be asserted with respect to the resulting determination (authorized to travel, not authorized to travel, pending).

This system may contain records or information pertaining to the accounting of disclosures made from ACS to other law enforcement agencies (Federal, State, local, foreign, international, or tribal) in accordance with the published routine uses. For the accounting of these disclosures only, in accordance with 5 U.S.C. 552a(j)(2) and (k)(2), DHS will claim the original exemptions for these records or information from subsection (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as necessary and appropriate to protect such information. Moreover, DHS will add this exemption to Appendix C to 6 CFR part 5, DHS Systems of Records Exempt from the Privacy Act. Such exempt records or information may be law enforcement or national security investigation records, law enforcement activity and encounter records, or terrorist screening records.

DHS needs these exemptions in order to protect information relating to law enforcement investigations from disclosure to subjects of investigations and others who could interfere with investigatory and law enforcement activities. Specifically, the exemptions are required to: Preclude subjects of investigations from frustrating the investigative process; avoid disclosure of investigative techniques; protect the identities and physical safety of confidential informants and of law enforcement personnel; ensure DHS's and other federal agencies' ability to obtain information from third parties and other sources; protect the privacy of third parties; and safeguard sensitive information.

Nonetheless, DHS will examine each request on a case-by-case basis, and, after conferring with the appropriate component or agency, may waive applicable exemptions in appropriate circumstances and where it would not appear to interfere with or adversely affect the law enforcement or national security investigation.

Again, DHS will not assert any exemption with respect to information maintained in the system that is collected from a person and submitted by that person's air or vessel carrier, if that person, or his or her agent, seeks access or amendment of such information.

**List of Subjects in 6 CFR Part 5**

Freedom of information, Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552.

2. At the end of Appendix C to Part 5, add the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. DHS/CBP–015, Automated Commercial System (ACS). A portion of the following system of records is exempt from 5 U.S.C. 552a(c)(3), (e)(8), and (g) pursuant to 5 U.S.C. 552a(j)(2) and (k)(2). Further, no exemption shall be asserted with respect to information maintained in the system as it relates to data submitted by or on behalf of a person who travels to visit the United States and crosses the border, nor shall an exemption be asserted with respect to the resulting determination (approval or denial). After conferring with the appropriate component or agency, DHS may waive applicable exemptions in appropriate circumstances and where it would not appear to interfere with or adversely affect the law enforcement purposes of the systems from which the information is recompiled or in which it is contained. Exemptions from the above particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, when information in this system of records may impede a law enforcement or national security investigation:

(a) From subsection (c)(3) (Accounting for Disclosure) because making available to a record subject the accounting of disclosures from records concerning him or her would specifically reveal any investigative interest in the individual. Revealing this information could reasonably be expected to compromise ongoing efforts to investigate a violation of U.S. law, including investigations of a known or suspected terrorist, by notifying the record subject that he or she is under investigation. This information could also permit the record subject to take measures to impede the investigation, e.g., destroy evidence, intimidate potential witnesses, or flee the area to avoid or impede the investigation.

(b) From subsection (e)(8) (Notice on Individuals) because to require individual notice of disclosure of information due to compulsory legal process would pose an impossible administrative burden on DHS and other agencies and could alert the subjects of counterterrorism or law enforcement investigations to the fact of those investigations when not previously known.

(c) From subsection (g) (Civil Remedies) to the extent that the system is exempt from other specific subsections of the Privacy Act.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

### 6 CFR Part 5

**[Docket No. DHS–2008–0171]**

### Privacy Act of 1974: Implementation of Exemptions; DHS/CBP–009 Nonimmigrant Inspection System

**AGENCY:** Privacy Office, Department of Homeland Security.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Department of Homeland Security is amending its regulations to exempt portions of a system of records from certain provisions of the Privacy Act. Specifically, the Department

proposes to exempt portions of the Nonimmigrant Inspection System from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

**DATES:** Written comments must be submitted on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0171 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Regulations and Rulings, Office of International Trade, Mint Annex, 1300 Pennsylvania Ave., NW., Washington, DC 20229. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* The Department of Homeland Security (DHS), elsewhere in this edition of the **Federal Register**, published a Privacy Act system of records notice describing records in the Nonimmigrant Inspection System (NIIS). Pursuant to 6 U.S.C. 552(a)(1) DHS and Customs and Border Protection (CBP) have maintained the Nonimmigrant Information System (NIIS) in conformance with the terms of the previous NIIS SORN, 68 FR 5048.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a DHS/CBP system of records under the Privacy Act (5 U.S.C. 552a) to reflect CBP's current and future practices regarding the processing of foreign nationals entering the U.S. CBP inspects all persons applying for admission to the U.S. As part of this inspection process, CBP establishes the identity, nationality, and admissibility of persons crossing the border and may create a border crossing record, which would be covered by DHS/CBP–007 Border Crossing Information System of Records Notice (73 FR 43457 published on July 25, 2008), or additional CBP records, which would be covered by the TECS System of Records Notice (re-published concurrently with this notice) during this process. Similarly, CBP has authority to keep records of departures from the U.S.

In addition to information collected from the alien during the inspection process, CBP primarily uses two immigration forms to collect information from nonimmigrant aliens as they arrive in the U.S.: The I–94, Arrival/Departure Record and, for aliens applying for admission under the visa waiver program, the I–94W Nonimmigrant Visa Waiver Arrival/Departure Form. Separately, Canadian nationals, who travel to the U.S. as tourists or for business, and Mexican nationals, who possess a nonresident alien Mexican Border Crossing Card, are not required to complete an I–94 upon arrival, but their information will be maintained in this system. Additionally, DHS/CBP has been implementing an Electronic System for Travel Authorization (ESTA) to permit nationals of VWP countries to submit their biographic and admissibility information online in advance of their travel to the U.S. Applicants under this program will have access to their accounts so that they may check the status of their ESTA and make limited amendments. ESTA is covered by privacy documentation including a SORN published on June 10, 2008, 73 FR 32720.

No exemption shall be asserted with respect to information maintained in the system that is collected from a person's travel documents or submitted by a government computer system in support of a proffered travel document, if that person, or his or her agent, seeks access or amendment of such information.

This system, however, may contain records or information pertaining to the accounting of disclosures made from NIIS to other law enforcement agencies (Federal, State, Local, Foreign, International or Tribal) in accordance with the published routine uses and 5 U.S.C. 552a (b)(7). For the accounting of these disclosures only, in accordance with 5 U.S.C. 552a (j)(2), and (k)(2), DHS will claim the original exemptions for these records or information from subsection (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as necessary and appropriate to protect such information.

DHS needs these exemptions in order to protect information relating to law enforcement investigations from disclosure to subjects of investigations and others who could interfere with investigatory and law enforcement activities. Specifically, the exemptions are required to: Preclude subjects of investigations from frustrating the investigative process; avoid disclosure of investigative techniques; protect the identities and physical safety of confidential informants and of law enforcement personnel; ensure DHS's and other federal agencies' ability to obtain information from third parties and other sources; protect the privacy of third parties; and safeguard sensitive information.

Nonetheless, DHS will examine each request on a case-by-case basis, and, after conferring with the appropriate component or agency, may waive applicable exemptions in appropriate circumstances and where it would not appear to interfere with or adversely affect the law enforcement purposes of the systems from which the information is recompiled or in which it is contained.

Again, DHS will not assert any exemption with respect to information maintained in the system that is collected from a person and submitted by that person's air or vessel carrier, if that person, or his or her agent, seeks access or amendment of such information.

**List of Subjects in 6 CFR Part 5**

Privacy, Freedom of information.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552.

2. At the end of Appendix C to Part 5, add the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. DHS/CBP–009, Nonimmigrant Inspection System (NIIS). This system may contain records or information pertaining to the accounting of disclosures made from NIIS to other law enforcement and counterterrorism agencies (Federal, State, Local, Foreign, International or Tribal) in accordance with the published routine uses. For the accounting of these disclosures only, in accordance with 5 U.S.C. 552a (j)(2), and (k)(2), DHS will claim the original exemptions for these records or information from subsection (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as necessary and appropriate to protect such information. Further, no exemption shall be asserted with respect to biographical or travel information submitted by, and collected from, a person's travel documents or

submitted from a government computer system to support or to validate those travel documents. After conferring with the appropriate component or agency, DHS may waive applicable exemptions in appropriate circumstances and where it would not appear to interfere with or adversely affect the law enforcement purposes of the systems from which the information is recompiled or in which it is contained. Exemptions from the above particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, when information in this system of records is recompiled or is created from information contained in other systems of records subject to exemptions for the following reasons:

(a) From subsection (c)(3) (Accounting for Disclosure) because making available to a record subject the accounting of disclosures from records concerning him or her would specifically reveal any investigative interest in the individual. Revealing this information could reasonably be expected to compromise ongoing efforts to investigate a violation of U.S. law, including investigations of a known or suspected terrorist, by notifying the record subject that he or she is under investigation. This information could also permit the record subject to take measures to impede the investigation, e.g., destroy evidence, intimidate potential witnesses, or flee the area to avoid or impede the investigation.

(b) From subsection (e)(8) (Notice on Individuals) because to require individual notice of disclosure of information due to compulsory legal process would pose an impossible administrative burden on DHS and other agencies and could alert the subjects of counterterrorism or law enforcement investigations to the fact of those investigations when not previously known.

(c) From subsection (g) (Civil Remedies) to the extent that the system is exempt from other specific subsections of the Privacy Act.

Dated: December 10, 2008.

### Office of Security

### 6 CFR Part 5

**[Docket No. DHS–2008–0177]**

## Privacy Act of 1974: Implementation of Exemptions; DHS/USSS—004 Protection Information System

**AGENCY:** Department of Homeland Security.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Department of Homeland Security (DHS) is giving concurrent notice of a revised and updated system of records pursuant to the Privacy Act of 1974 for the United States Secret Service Protection Information System system of records and this proposed rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

**DATES:** Comments must be received on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0177, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions and privacy issues, please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, the Department of Homeland Security (DHS) and United States Secret Service (USSS) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern DHS/USSS protection records.

As part of its efforts to streamline and consolidate its Privacy Act record systems, DHS/USSS is updating and reissuing a DHS/USSS system of records under the Privacy Act (5 U.S.C. 552a) for DHS/USSS Protection Information System records. This will ensure that all organizational parts of USSS follow the same privacy rules for collecting and handling records regarding the protections of USSS protectees.

In this notice of proposed rulemaking, DHS is now proposing to exempt Protection Information System, in part, from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for Protection Information System. Some information in Protection Information System relates to official DHS national security, law enforcement, immigration, intelligence activities, and protective services to the President of the United States or other individuals pursuant to Section 3056 and 3056A of Title 18. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; to protect the privacy of third parties; to safeguard classified information; and to safeguard records in connection with providing protective services to the President of the United States or other individuals pursuant to

Section 3056 of Title 18. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case-by-case basis.

A notice of system of records for Protection Information System is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Public Law 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.*; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, Exemption of Record Systems under the Privacy Act, the following new paragraph ''14'':

**Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act**

* * * * *

14. The Department of Homeland Security/United States Secret Service-004 Protection Information System system of records consists of electronic and paper records and will be used by DHS and its components. Protection Information System is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: the enforcement of civil and criminal laws; investigations, inquiries, and proceedings there under; national security and intelligence activities; protection of the President of the United States or other individuals pursuant to Section 3056 Title 18. Protection Information System contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies. Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(1), (k)(2), and (k)(3) of the Privacy Act, this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of an investigation, thereby interfering with the related investigation and law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information would impede law enforcement in that it could compromise investigations by: revealing the existence of an otherwise confidential investigation and thereby provide an opportunity for the subject of an investigation to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential informants, which would negatively affect the informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating as confidential informants in any future investigations.

(f) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS' ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal, and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) to the extent that the system is exempt from other specific subsections of the Privacy Act relating to individuals' rights to access and amend their records contained in the system. Therefore DHS is not required to establish rules or procedures pursuant to which individuals may seek a civil remedy for the agency's: refusal to amend a record; refusal to comply with a request for access to records; failure to maintain accurate, relevant timely and complete records; or failure to otherwise comply with an individual's right to access or amend records.

Dated: December 10, 2008.

- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

*Instructions:* All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: David Roberts (202–475–3521), United States Coast Guard Privacy Officer, United States Coast Guard. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

*Background:* Pursuant to the savings clause in the Homeland Security Act of 2002, the Department of Homeland Security (DHS) United States Coast Guard (USCG) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern the Department of Homeland Security to administer the DHS/USCG–028 United States Coast Guard Family Advocacy Program.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a DHS/USCG system of records under the Privacy Act (5 U.S.C. 552a) that deals with USCG Family Advocacy Program. The collection and maintenance of this information will assist DHS/USCG in meeting its obligation to administer the USCG Family Advocacy Program.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/USCG–028 Family Advocacy Case Records. Some information in DHS/USCG–028 Family Advocacy Case Records relates to law enforcement. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; and to protect the privacy of third parties. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

A notice of system of records for DHS/USCG–028 Family Advocacy Program is also published in this issue of the **Federal Register**.

**List of Subjects in 6 CFR Part 5**

Freedom of information; Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

## PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for Part 5 continues to read as follows:

**Authority:** 6 U.S.C. 101 *et seq.*; Public Law 107–296, 116 Stat. 2135; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. Add at the end of Appendix C to Part 5, the following new paragraph ''14'':

### Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act

* * * * *

14. The Department of Homeland Security/United States Coast Guard—028 Family Advocacy Case Records system of records consists of electronic and paper records and will be used by DHS and its components. DHS/USCG–028 Family Advocacy Case Records is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to: The enforcement of civil and criminal laws; investigations, inquiries, and proceedings thereunder. DHS/USCG–028 Family Advocacy Case Records contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, State, local, tribal, foreign, or international government agencies.

Pursuant to 5 U.S.C. 552a(k)(2) this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of the investigation, and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation, to the existence of the investigation, and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsections (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

Dated: December 10, 2008.

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

### 9 CFR Part 2

**[Docket No. APHIS–2006–0159]**

### Handling of Animals; Contingency Plans

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Proposed rule; extension of comment period.

**SUMMARY:** We are extending the comment period for our proposed rule that would amend the Animal Welfare Act regulations to add requirements for contingency planning and training of personnel by research facilities and by dealers, exhibitors, intermediate handlers, and carriers. This action will allow interested persons additional time to prepare and submit comments.

**DATES:** We will consider all comments that we receive on or before February 20, 2009.

**ADDRESSES:** You may submit comments by either of the following methods:

- Federal eRulemaking Portal: Go to *http://www.regulations.gov/fdmspublic/component/main?main=DocketDetail&d=APHIS-2006-0159* to submit or view comments and to view supporting and related materials available electronically.
- *Postal Mail/Commercial Delivery:* Please send two copies of your comment to Docket No. APHIS–2006–0159, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2006–0159.

*Reading Room:* You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

*Other Information:* Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov.*

**FOR FURTHER INFORMATION CONTACT:** Dr. Jodie Kulpa-Eddy, Staff Veterinarian, Animal Care, APHIS, 4700 River Road Unit 84, Riverdale, MD 20737; (301) 734–7833.

**SUPPLEMENTARY INFORMATION:** On October 23, 2008, we published in the **Federal Register** (73 FR 63085–63090, Docket No. APHIS–2006–0159) a proposal to amend the Animal Welfare Act regulations to add requirements for contingency planning and training of personnel by research facilities and by dealers, exhibitors, intermediate handlers, and carriers.

Comments on the proposed rule were required to be received on or before December 22, 2008. We are extending the comment period on Docket No. APHIS–2006–0159 for an additional 60 days. This action will allow interested persons additional time to prepare and submit comments.

**Authority:** 7 U.S.C. 2131–2159; 7 CFR 2.22, 2.80, and 371.7.

Done in Washington, DC, this 16th day of December 2008.

**Kevin Shea,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

## FEDERAL RESERVE SYSTEM

**[Docket No. R–1340]**

### 12 CFR Part 226

### Regulation Z; Truth in Lending

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Proposed rule; extension of comment period.

**SUMMARY:** On December 10, 2008, the Board published a proposal to amend Regulation Z that would conform the regulation to reflect recent amendments to the Truth in Lending Act (73 FR 74989). The Board is extending the public comment period on the proposal.

**DATES:** Comments must be received on or before February 9, 2009.

**ADDRESSES:** You may submit comments on the proposed amendments to Regulation Z, identified by Docket No. R–1340, by any of the following methods:

- *Agency Web site: http://www.federalreserve.gov.* Follow the instructions for submitting comments at

*http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm.*

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *E-mail: regs.comments@federalreserve.gov.* Include the docket number in the subject line of the message.

• *Fax:* (202) 452–3819 or (202) 452–3102.

• *Mail:* Address to Jennifer J. Johnson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, NW., Washington, DC 20551.

All public comments will be made available on the Board's Web site at *http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm* as submitted, unless modified for technical reasons. Accordingly, comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room MP–500 of the Board's Martin Building (20th and C Streets, NW.) between 9 a.m. and 5 p.m. on weekdays.

**FOR FURTHER INFORMATION CONTACT:** Jamie Z. Goodson or Nikita M. Pastor, Attorneys; Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551, at (202) 452–2412 or (202) 452–3667. For users of Telecommunications Device for the Deaf (TDD) only, contact (202) 263–4869.

**SUPPLEMENTARY INFORMATION:** On December 10, 2008, the Board published a proposal to amend Regulation Z to implement the provisions of the Mortgage Disclosure Improvement Act of 2008 (the MDIA), which amends the Truth in Lending Act. The Board's proposed rule would revise Regulation Z's requirements for the timing and content of disclosures for closed-end mortgage transactions secured by a consumer's dwelling. The notice of proposed rulemaking stated that the public comment period would close on January 23, 2009. The Board is now extending the public comment period until February 9, 2009, consistent with the requirements of the Paperwork Reduction Act, which requires a 60-day comment period.

**Jennifer J. Johnson,**

*Secretary of the Board.*

**[Docket No. FAA–2007–0074; Directorate Identifier 2007–NM–151–AD]**

**RIN 2120–AA64**

## Airworthiness Directives; McDonnell Douglas Model MD–90–30 Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Supplemental notice of proposed rulemaking (NPRM); reopening of comment period.

**SUMMARY:** We are revising an earlier proposed airworthiness directive (AD) for certain McDonnell Douglas Model MD–90–30 airplanes. The original NPRM would have required replacement of the wire harness of the auxiliary hydraulic pump with a new wire harness, and routing the new wire harness outside of the tire burst area. The original NPRM resulted from fuel system reviews conducted by the manufacturer, as well as reports of shorted wires in the right wheel well and evidence of arcing on the power cables of the auxiliary hydraulic pump. This action revises the original NPRM by proposing to require modifying the auxiliary hydraulic power system (including doing all applicable related investigative and corrective actions). We are proposing this supplemental NPRM to prevent shorted wires or electrical arcing at the auxiliary hydraulic pump, which could result in a fire in the wheel well. We are also proposing this supplemental NPRM to reduce the potential of an ignition source adjacent to the fuel tanks, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

**DATES:** We must receive comments on this supplemental NPRM by January 13, 2009.

**ADDRESSES:** You may send comments by any of the following methods:

• *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Fax:* 202–493–2251.

• *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

• *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this AD, contact Boeing Commercial Airplanes, Long Beach Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Data and Service Management, Dept. C1–L5A (D800–0024); telephone 206–544–9990; fax 206–766–5682; e-mail *DDCS@boeing.com*; Internet *https://www.myboeingfleet.com.* You may review copies of the referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221 or 425–227–1152.

### Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov*; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

**FOR FURTHER INFORMATION CONTACT:** Ken Sujishi, Aerospace Engineer, Cabin Safety/Mechanical and Environmental Systems Branch, ANM–150L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5353; fax (562) 627–5210.

**SUPPLEMENTARY INFORMATION:**

### Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2007–0074; Directorate Identifier 2007–NM–151–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

**Discussion**

We issued a notice of proposed rulemaking (NPRM) (the ''original NPRM'') to amend 14 CFR part 39 to include an airworthiness directive (AD) that would apply to certain McDonnell Douglas Model MD–90–30 airplanes. That original NPRM was published in the **Federal Register** on October 23, 2007 (72 FR 59969). That original NPRM proposed to require replacement of the wire harness of the auxiliary hydraulic pump with a new wire harness, and routing the new wire harness outside of the tire burst area.

**Actions Since Original NPRM Was Issued**

Since we issued the original NPRM, we have reviewed Boeing Alert Service Bulletin MD90–29A021, Revision 1, dated August 29, 2008. We referred to Boeing Alert Service Bulletin MD90–29A021, dated May 15, 2007, as the appropriate source of service information for doing the replacement and routing of auxiliary hydraulic pump wire harnesses specified in the original NPRM. Revision 1 of the alert service bulletin describes different procedures for modifying the auxiliary hydraulic power system (including doing all applicable related investigative and corrective actions). Revision 1 of the alert service bulletin describes procedures for doing the following actions, depending on the group and configuration identified in the alert service bulletin:

- Installing auxiliary hydraulic pump wire harness support brackets.
- Replacing and routing auxiliary hydraulic pump wire harnesses.
- Installing clamps.
- Installing a wire harness assembly support bracket in the right wheel well if necessary.
- Doing related investigative and corrective actions. Related investigative and corrective actions include doing a general visual inspection of the wire harness protective sleeving dimensions, and changing wire harness sleeving if necessary.

We have revised paragraphs (c) and (f) of this supplemental NPRM to refer to Boeing Alert Service Bulletin MD90–29A021, Revision 1, dated August 29, 2008.

**Comments**

We gave the public the opportunity to participate in developing this AD. We considered the comment received.

**Request To Revise Compliance Time**

Japan Airlines requests that we revise the compliance time specified in the original NPRM of ''within 18 months'' to a compliance time that is ''18 months or more.'' Japan Airlines states that parts would not be available until June 8, 2008, and that a longer compliance would support its maintenance schedule.

We do not agree to revise the compliance time. Boeing confirmed that necessary parts will be available within the proposed compliance time. In developing an appropriate compliance time for this action, we considered the urgency associated with the subject unsafe condition, the availability of required parts, and the practical aspect of accomplishing the required actions within a period of time that corresponds to the normal scheduled maintenance for most affected operators. Operators may request an alternative method of compliance in accordance with the procedures specified in paragraph (g) of the supplemental NPRM. We have not changed the supplemental NPRM in this regard.

**Revision to Costs of Compliance**

We have revised the ''Costs of Compliance'' paragraph of this supplemental NPRM to reflect the revised work hours and parts cost specified in Boeing Alert Service Bulletin MD90–29A021, Revision 1, dated August 29, 2008.

**FAA's Determination and Proposed Requirements of the Supplemental NPRM**

We are proposing this supplemental NPRM because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design. Certain changes described above expand the scope of the original NPRM. As a result, we have determined that it is necessary to reopen the comment period to provide additional opportunity for the public to comment on this supplemental NPRM.

**Costs of Compliance**

There are about 110 airplanes of the affected design in the worldwide fleet. This proposed AD would affect about 16 airplanes of U.S. registry. The proposed actions would take between 3 and 7 work hours per airplane, depending on the configuration, at an average labor rate of $80 per work hour. Required parts would cost up to $5,343 per airplane. Based on these figures, the estimated cost of the proposed AD for U.S. operators is up to $94,448, or $5,903 per airplane.

**Authority for This Rulemaking**

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

**Regulatory Findings**

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866,

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979), and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

You can find our regulatory evaluation and the estimated costs of compliance in the AD Docket.

**List of Subjects in 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

**The Proposed Amendment**

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

**§ 39.13 [Amended]**

2. The FAA amends § 39.13 by adding the following new AD:

**McDonnell Douglas:** Docket No. FAA–2007–0074; Directorate Identifier 2007–NM–151–AD.

**Comments Due Date**

(a) We must receive comments by January 13, 2009.

**Affected ADs**

(b) None.

**Applicability**

(c) This AD applies to McDonnell Douglas Model MD–90–30 airplanes, certificated in any category; as identified in Boeing Alert Service Bulletin MD90–29A021, Revision 1, dated August 29, 2008.

**Unsafe Condition**

(d) This AD results from fuel system reviews conducted by the manufacturer, as well as reports of shorted wires in the right wheel well and evidence of arcing on the power cables of the auxiliary hydraulic pump. We are issuing this AD to prevent shorted wires or electrical arcing at the auxiliary hydraulic pump, which could result in a fire in the wheel well. We are also issuing this AD to reduce the potential of an ignition source adjacent to the fuel tanks, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

**Compliance**

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

**Modification**

(f) Within 18 months after the effective date of this AD, modify the auxiliary hydraulic power system and do all applicable related investigative and corrective actions by accomplishing all applicable actions specified in the Accomplishment Instructions of Boeing Alert Service Bulletin MD90–29A021, Revision 1, dated August 29, 2008. Do all applicable related investigative and corrective actions before further flight.

**Alternative Methods of Compliance (AMOCs)**

(g)(1) The Manager, Los Angeles Aircraft Certification Office, FAA, ATTN: Ken Sujishi, Aerospace Engineer, Cabin Safety/Mechanical and Environmental Systems Branch, ANM–150L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5353; fax (562) 627–5210; has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) To request a different method of compliance or a different compliance time for this AD, follow the procedures in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

Issued in Renton, Washington, on December 12, 2008.

**Michael J. Kaszycki,**

*Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.*

**RIN 0648–AX34**

## Changes to the Florida Keys National Marine Sanctuary Regulations; Technical Corrections and Minor Substantive Changes

**AGENCY:** Office of National Marine Sanctuaries (ONMS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

**ACTION:** Proposed rule; request for public comments.

**SUMMARY:** NOAA proposes to amend the regulations implementing the Florida Keys National Marine Sanctuary to make technical corrections and modifications to clarify intent to several areas in the regulations. As part of these modifications, NOAA proposes to amend the definition of coral to specifically include the common sea fan, Gorgonia ventalina and Venus sea fan, Gorgonia flabellum, which are both important sanctuary resources and are currently managed under the category ''live rock;'' specify that ''touching'' coral is an injury and therefore, a prohibited activity in the FKNMS; amend the safe distance between vessels and ''divers down'' flags to be 100 yards instead of 100 feet; clarify that the prohibitions listed for Sanctuary Preservation Areas and Ecological Reserves also apply in Research-only Areas; and Correct several citations that are currently out of date.

**DATES:** Comments on this proposed rule may be made until January 20, 2009.

**ADDRESSES:** Comments may be submitted by any of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Submit electronic comments via the Federal e-Rulemaking Portal.
- *Mail:* David A. Score, Superintendent, Florida Keys National Marine Sanctuary, 33 East Quay Road, Key West, FL 33040.
- *Instructions:* All comments received are a part of the public record and will be generally posted to *http://www.regulations.gov* without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. NOAA will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, Wordperfect, or Adobe PDF file formats only.

**FOR FURTHER INFORMATION CONTACT:** David A. Score, Superintendent, Florida Keys National Marine Sanctuary, 33 East Quay Road, Key West, FL 33040.

**SUPPLEMENTARY INFORMATION:**

**Electronic Access**

This **Federal Register** document is also accessible via the Internet at *http://www.access.gpo.gov/su-docs/aces/aces_1_40.html.*

**I. Background**

In recognition of its important ecological role as a rich and unique marine environment with seagrass meadows, mangrove islands, and extensive living coral reefs, Congress designated the Florida Keys National Marine Sanctuary (FKINMS or Sanctuary) in 1990 (Pub. L. 101–605). Through this designation, Congress directed NOAA and the State of Florida to jointly develop a comprehensive program to reduce the risk of damage to these living marine resources, reduce the pollution in the waters of the Florida Keys, and to protect and restore the water quality, coral reefs, and other living marine resources of the Florida Keys. As such, NOAA and the State of Florida worked together to create the management plan for the FKNMS. The FKNMS regulations implementing the designation were published on June 12, 1997 (62 FR 32154) and became effective on July 1, 1997.

In the 18 years since designation, several regulatory issues have arisen that were not clearly addressed when the FKNMS regulations were adopted. In addition, there have been several changes to the Florida state laws during the same period and several technical errors identified in the current FKNMS regulations. NOAA is thus proposing to update the FKNMS regulations to make technical corrections, minor substantive clarifications, and codification of existing regulatory interpretation to address these issues and provide consistency with state law.

## II. Summary of the Proposed Revisions

*A. Changes to Section 922.162 and Section 922.163, Modification of Existing Regulations on Corals and Prohibited Activities*

1. Definition of Coral (§ 922.162(a))

The FKNMS regulations to protect corals and live rock include a list of activities that are prohibited, and include a definition of ''coral'' and ''live rock'' to which these protections extend. NOAA is concerned that the common sea fan, Gorgonia ventalina, and Venus sea fan, Gorgoniaflabellum, are not currently listed as coral species in the definition of coral. Although these species of Gorgonia are actually coral, to date, they have been managed under the category of live rock because live rock, defined as any living marine organism or an assemblage thereof attached to a hard substrate, including dead coral or rock, is not limited to identified species. NOAA proposes to make a provision to explicitly include Gorgonia ventalina and Gorgoniafiabellum in the list of protected corals in the FKNIMS regulations and to make the list of corals non-exclusive in case additional coral species are identified in the future.

In addition, the subclass for black corals was incorrectly listed in the original regulations as Hexacorallia. The correct subclass designation is Ceriantipatharia. The definition of coral would be corrected to identify black corals as part of the subclass Ceriantipatharia.

2. Touching Coral (§ 922.163(a)(2))

The act of touching coral or live rock is an injury to the resource and has been historically interpreted as such by the FKNMS staff, charter dive and snorkeling operations, and enforcement personnel. When corals are touched or handled, the organisms are injured, and could suffer mortality. However, touching is not specifically listed in the injury prohibition in the FKNMS regulations. NOAA proposes to clarify and codify the interpretation of injury to coral and live rock by adding ''touching'' to the list of prohibited activities in the FKNMS. NOAA believes that by clarifying that touching coral and live rock causes injury aids in sanctuary education and outreach efforts to inform the public that this activity is harmful to the coral, and will help public compliance with the prohibition.

*B. Other Proposed Modifications and Technical Corrections to Section 922.163*

1. Permit Live Rock Aquaculture (§ 922.163(a)(2)(i))

Section 922.1 63(a)(2)(i) currently cites 50 CFR part 638 for authority to permit certain types of live rock aquaculture under the Magnuson-Stevens Act (MSA). However, that part of the CFR no longer exists. The authority to permit certain types of live rock aquaculture under the MSA is now located at 50 CFR part 622. Therefore, we propose to make a correction to our regulatory citations to reflect this change.

2. Dive Areas (§ 922.163(a)(5)(iii)(C))

NOAA regulations regarding dive area restrictions are inconsistent with regulations that both the State of Florida (Chapter 27 of the 2003 Florida Statutes: 327.331 Divers; definitions; divers-down flag required; obstruction to navigation of certain waters; penalty) and the U.S. Coast Guard (USCG: Rule 27e—Vessel Engaged in Diving Operations) use to specify the safe distance between vessels and ''divers down'' flags. The State of Florida and the USCG regulations both indicate that the safe distance between vessels and ''divers down'' flags is 100 yards. In contrast, the FKNMS regulations currently indicate that the safe distance between vessels and ''divers down'' flags is 100 feet. In order to be consistent with the regulations issued by the State of Florida and the USCG, we propose to change our regulations from ''100 feet'' in 922.163(a)(5)(iii)(C) to ''100 yards.'' Improved consistency allows for better public education and compliance. The change to regulations improves safety and reduces conflict between divers and vessel operations.

3. Marine Life Rule (§ 922.163(a)(12))

NOAA proposes a few technical corrections related to Florida's Marine Life Rule (MLR). NOAA proposes to edit the language at § 922.163(a)(12) to update Florida Marine Life Rule citation as 68B–42, F.A.C. NOAA also proposes to delete Appendix VIII to Subpart P of Part 922 to eliminate the excerpts of the MLR from the FKNMS regulations and simply reference the MLR citation in the regulation.

4. Updating CFR References (§ 922.163)

Sections 922.163(c) and 922.168 are no longer applicable because persons conducting any pre-existing otherwise prohibited activities pursuant to a valid authorization in the Sanctuary area were given 90 days from the designation of the Sanctuary (July 1, 1997) to notify the Director and request certification of the activity. Therefore, these provisions are no longer needed because the certification period expired over ten years ago. Therefore, NOAA proposes to delete these sections from the FKNMS regulations, and to renumber the remaining sections accordingly. Because section 922.168 is referenced in other sections of the FKNMS regulations, we also propose to delete the references to that section. Finally, NOAA proposes to amend the language to the newly redesignated section 922.163(c) to reflect the appropriate citation for authorization of current activities which is § 922.49.

*C. Special-Use (Research-Only) Areas (§ 922.1 64(e)(1))*

Research-only areas are a type of Special-use Area defined in the FKNMS regulations at § 922.1 64(e)(1)(iii). Except for passage without interruption or for law enforcement purposes, access to research-only areas is restricted to scientific research or educational use specifically authorized by and conducted in accordance with the scope, purpose, terms and conditions of a sanctuary permit. In addition, even if access is allowed by permit, only the activities described in the permit may be conducted because all other activities within the research-only area are prohibited. However, the prohibition against conducting activities in research-only areas is not stated clearly in the FKNMS regulations and, therefore, NOAA proposes to amend § 922.164(d) and add a new paragraph (e)(5) to the section to specify that the prohibited activities listed for Sanctuary Preservation Areas (SPAs) and Ecological Reserves (ERs) as listed at § 922.164(d) also apply in Research-only Areas. This change would provide better notice to the public and to permittees who receive access to conduct activities in Research-only Areas, and would facilitate voluntary compliance as well as enforcement of sanctuary regulations.

## III. Classification

*A. National Environmental Policy Act*

The technical corrections and minor substantive changes to the FKNMS regulations do not have significant environmental impacts and are categorically excluded for the need to prepare an environmental assessment pursuant to the National Environmental Policy Act (NAO 2 16–6 Section 6.03c.3(i)).

*B. Executive Order 12866: Regulatory Impact*

This proposed rule has been determined to be not significant within the meaning of Executive Order 12866.

*C. Executive Order 13132: Federalism Assessment*

NOAA has concluded this regulatory action does not have federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 13132. The State of Florida was consulted during the promulgation of this rule.

*D. Paperwork Reduction Act*

This rule does not contain any new or revisions to the existing information collection requirement that was approved by 0MB (0MB Control Number 0648–0141) under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid 0MB Control Number.

*E. Regulatory Flexibility Act*

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities.

The factual basis for this certification is as follows:

- Making the technical corrections to correct citations and obsolete sections of the regulations as proposed by this rule would not substantively change the effect or impact from the current regulations;
- Amending the definition of coral to specifically include the common sea fan and Venus sea fan also do not impact small entities because these species are already currently managed as sanctuary resources under the category ''live rock;''
- Clarifying and codifying that ''touching'' coral is an injury and therefore, a prohibited activity in the FKNMS does not change the practices of small business operators, such as dive or snorkel charter boats, because they already interpret the regulation as such and currently inform tourists that touching coral or live rock while diving or snorkeling injures the organisms;
- Amending the safe distance between vessels and ''divers down'' flags to be 100 yards instead of 100 feet provides consistency with regulations already in place by the U.S. Coast Guard and the State of Florida and will therefore not change the current operations of small business operators; and
- Specifying that the prohibitions listed for Sanctuary Preservation Areas and Ecological Reserves also apply in Research-only Areas also does not affect small businesses because entering Research-only Areas is already prohibited unless a permit is obtained from the Sanctuary. The amendment is intended to clarify and promote enforcement of specific activity violations.

## IV. Request for Comments

NOAA requests comments on this proposed rule to make technical corrections and amendments to the FKNMS regulations.

Dated: December 11, 2008.

**John H. Dunnigan,**

*Assistant Administrator for Ocean Services and Coastal Zone Management.*

**List of Subjects in 15 CFR Part 922**

Administrative practice and procedure, Coastal zone, Fish, Fisheries, Historic preservation, Intergovernmental relations, Marine resources, Monuments and memorials, Natural resources, Wildlife, Wildlife refuges, Wildlife management areas, Sanctuary preservation areas, Ecological reserves, Areas to be avoided, State of Florida, U.S. Coast Guard.

For the reasons above, the National Oceanic and Atmospheric Administration proposes to amend title 15, part 922 of the Code of Federal Regulations as follows:

## PART 922—NATIONAL MARINE SANCTUARY PROGRAM REGULATIONS

1. The authority citation for part 922 continues to read as follows:

**Authority:** 15 U.S.C. 1431 *et seq.*

2. Amend § 922.162(a) by revising the definition for ''Coral'' to read as follows:

**§ 922.162 Definitions.**

(a) * * *

*Coral* means but is not limited to the corals of the Class Hydrozoa (stinging and hydrocorals); Class Anthozoa, Subclass Hexacorallia, Order Scieractinia (stony corals); Class Anthozoa, Subclass Ceriantipatharia, Order Antipatharia (black corals); and Class Anthozoa, Subclass Ocotocorallia, Order Gorgonacea, species Gorgonia ventalina and Gorgonia flabellum (sea fans).

* * * * *

3. In § 922.163 revise paragraphs (a)(2)(i), (a)(5)(iii)(C), and (a)(12), remove paragraph (c), redesignate paragraphs (d) through (h) as (c) through (g), and revise the newly redesignated paragraph (c) to read as follows:

**§ 922.163 Prohibited activities—Sanctuary-wide.**

(a) * * *

(2) * * *

(i) Moving, removing, taking, harvesting, damaging, disturbing, touching, breaking, cutting, or otherwise injuring, or possessing (regardless of where taken from) any living or dead coral, or coral formation, or attempting any of these activities, except as permitted under 50 CFR part 622.

* * * * *

(5) * * *

(iii) * * *

(C) Within 100 yards of the red and white ''divers down'' flag (or the blue and white ''alpha'' flag in Federal waters);

* * * * *

(12) Harvest or possession of marine life species. Harvesting, possessing, or landing any marine life species, or part thereof, within the Sanctuary, except in accordance with rules 68B–42 of the Florida Administrative Code, and such rules shall apply mutatis mutandis (with necessary editorial changes) to all Federal and State waters within the Sanctuary.

* * * * *

(c) Notwithstanding the prohibitions in this section and in § 922.164, and any access and use restrictions imposed pursuant thereto, a person may conduct an activity specifically authorized by any valid Federal, State, or local lease, permit, license, approval, or other authorization issued after the effective date of these regulations, provided that the applicant complies with § 922.49, the Director notifies the applicant and authorizing agency that he or she does not object to issuance of the authorization, and the applicant complies with any terms and conditions the Director deems reasonably necessary to protect Sanctuary resources and qualities. Amendments, renewals and extensions of authorizations in existence on the effective date of these regulations constitute authorizations issued after the effective date of these regulations.

* * * * *

4. In § 922.164, revise paragraph (d)(l) and add paragraph (e)(5) to read as follows:

**§ 922.164 Additional activity regulations by Sanctuary area.**

* * * * *

(d) Ecological Reserves, Sanctuary Preservation Areas, and Special Use (Research only) Areas. (1) The following activities are prohibited within the Ecological Reserves described in Appendix IV to this subpart, within the Sanctuary Preservation Areas described in Appendix V to this subpart, and within the Special Use (Research only Areas) described in Appendix VI to this subpart:

* * * * *

(e) * * * (5) In addition to paragraph (e)(3) of this section no person shall conduct activities listed in paragraph (d) of this section in ''Research-only Areas.''

* * * * *

**§ 922.168 [Removed and reserved]**

5. Remove and reserve § 922.168.

**Appendix VIII to Subpart P of Part 922 [Removed]**

6. Remove Appendix VIII to Subpart P of Part 922—Marine Life Rule [As Excerpted from Chapter 46–42 of the Florida Administrative Code].

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

### 18 CFR Part 40

**[Docket No. RM08–16–000; Notice of Proposed Rulemaking]**

### Electric Reliability Organization Interpretations of Specific Requirements of Frequency Response and Bias and Voltage and Reactive Control Reliability Standards

December 15, 2008.

**AGENCY:** Federal Energy Regulatory Commission.

**ACTION:** Notice of proposed rulemaking; extension of time for filing comments.

**SUMMARY:** On November 20, 2008, the Commission issued a Notice of Proposed Rulemaking (NOPR) proposing to accept North American Electric Reliability Corporation's (NERC) interpretation of certain specific requirements of one Commission-approved Reliability Standard, BAL–003–0, Frequency Response and Bias; and to remand NERC's proposed interpretation of VAR–001–1, Voltage and Reactive Control, for reconsideration. (73 FR 71971). This document extends the time for filing comments in response to the Commission's NOPR.

**DATES:** *Effective Date:* The date for comments on the NOPR in this proceeding is extended to January 7, 2009.

**FOR FURTHER INFORMATION CONTACT:** Richard M. Wartchow (Legal Information), Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, (202) 502–8744.

**SUPPLEMENTARY INFORMATION:**

**Notice of Extension of Time**

On November 20, 2008, the Commission issued a Notice of Proposed Rulemaking (NOPR) in the above-referenced proceeding. The document was published in the **Federal Register** on November 26, 2008.[1] The NOPR requested comments to be submitted 30 days following publication in the **Federal Register**, which date would fall on December 29, 2008.[2] To provide interested persons additional time to consider the technical issues raised in the NOPR, and in light of the press of other business, including the intervening holiday period, the Commission, acting *sua sponte,* hereby extends the time to prepare and file comments on the NOPR.

Upon consideration, notice is hereby given that an extension of time for filing comments in response to the NOPR is granted until and including January 7, 2009.

**Kimberly D. Bose,**

*Secretary.*

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 300

**[EPA–HQ–SFUND–1987–0002; FRL–8753–3]**

### National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of Intent for Partial Deletion of portions of the Griffiss Air Force Base Superfund Site from the National Priorities List.

**SUMMARY:** The United States Environmental Protection Agency (EPA) Region 2 Office announces its intent to delete specific properties of the former Griffiss Air Force Base (GAFB) site located in Rome, New York, from the National Priorities List (NPL) and requests public comment on this proposed action. The NPL constitutes Appendix B to the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), 40 CFR part 300, which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended. The entire GAFB Site, approximately 3,552 acres, includes 32 areas of concern located on property currently or formerly owned by the United States Department of Defense. EPA and the State of New York, through the New York State Department of Environmental Conservation (NYSDEC), have determined that for the specified areas identified in this Notice of Intent for Partial Deletion (NOIPD), all appropriate response actions pursuant to CERCLA have been implemented and, aside from monitoring, operations, maintenance, and Five-Year Reviews, no further response actions, pursuant to CERCLA, are appropriate. Moreover, EPA and NYSDEC have determined that the specified properties at the GAFB Site (i.e., the soil and groundwater beneath) either pose no significant threat to public health or the environment or all appropriate response actions have been implemented, and therefore this NOIPD may proceed. The NOIPD is only for those properties specified herein and does not include other properties located at the GAFB Site.

**DATES:** Comments must be received by January 20, 2009.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA–HQ–SFUND–1987–0002, by one of the following methods:

*Web site: http://www.regulations.gov.* Follow the on-line instructions for submitting comments.

*E-mail: pocze.doug@epa.gov.*

*Fax:* To the attention of Douglas M. Pocze at (212) 637–3256.

*Mail:* To the attention of Douglas M. Pocze, Remedial Project Manager, Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region 2, 290 Broadway, 18th Floor, New York, NY 10007–1866.

---

[1] *Electric Reliability Organization Interpretations of Specific Requirements of Frequency Response and Bias and Voltage and Reactive Control Reliability Standards,* NOPR, Docket No. RM08–16–000, 73 FR 71971 (Nov. 26, 2008), 125 FERC ¶ 61,204 (2008).

[2] Accounting for the effect of the Executive Order, Closing of Executive Departments and Agencies of the Federal Government on Friday, December 26, 2008 (Dec. 12, 2008).

*Hand Delivery:* Superfund Records Center, 290 Broadway, 18th Floor, New York, NY 10007–1866 (telephone: 212–637–4308). Such deliveries are only accepted during the Docket's normal hours of operation (Monday to Friday from 9 a.m. to 5 p.m.). Special arrangements should be made for deliveries of boxed information.

*Instructions:* Direct your comments to Docket ID No. EPA–HQ–SFUND–1987–0002. EPA's policy is that all comments received will be included in the Docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider CBI or otherwise protected through *http://www.regulations.gov* or via e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comments. If you send comments to EPA via e-mail, your e-mail address will be included as part of the comment that is placed in the Docket and made available on the Web site. If you submit electronic comments, EPA recommends that you include your name and other contact information in the body of your comments and with any disks or CD–ROMs that you submit. If EPA cannot read your comments because of technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comments. Electronic files should avoid the use of special characters and any form of encryption and should be free of any defects or viruses.

*Docket:* All documents in the Docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available Docket materials can be viewed electronically at *http://www.regulations.gov* or obtained in hard copy at: U.S. Environmental Protection Agency, Region 2, Superfund Records Center, 290 Broadway, 18th Floor, New York, NY 10007–1866, Phone: 212–637–4308, *Hours:* Monday to Friday from 9 a.m. to 5 p.m.; and Griffiss Business and Technology Park, Information Repository/Administrative File, 153 Brooks Road, Rome, NY 13441, (315) 356–0810.

*Hours:* Please call to determine hours of operation and whether an appointment is needed.

**FOR FURTHER INFORMATION CONTACT:** Mr. Douglas M. Pocze, Remedial Project Manager, by mail at Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region 2, 290 Broadway, 18th floor, New York, NY 10007–1866; Telephone (212) 637–4432, (or) fax at (212) 637–3256, (or) E-mail: *pocze.doug@epa.gov.*

**SUPPLEMENTARY INFORMATION:**

**Table of Contents**

## I. Introduction

The EPA, Region 2, announces its intent to delete properties at the GAFB Site, located in Rome, NY, from the NPL, and requests comments on this action. This proposal for partial deletion pertains to soil and groundwater at specified areas of the GAFB. The parcel areas listed below either in their entirety or in portion are proposed for deletion and should be reviewed with the Partial Deletion map provided (See Figure 1).

| | Acres |
|---|---|
| 1. Property A1A—Airfield | 1324.45 |
| 2. Building 750—Former Air Force Special Investigations | 4.07 |
| 3. Central Heating Plant | 17.78 |
| 4. Parcel F1 | 61.40 |
| 5. Parcel F2 | 88.37 |
| 6. Electrical Power Substation | 3.20 |
| 7. Parcel F3A | 75.99 |
| 8. Parcel F3B | 14.04 |
| 9. Parcel F4A | 107.59 |
| 10. Parcel F4C | 56.96 |
| 11. Parcel F6A | 52.20 |
| 12. Parcel F7NR | 52.09 |
| 13. Parcel F7R | 223.75 |
| 14. Parcel F8 Housing | 69.22 |
| 15. Parcel F9A | 135.25 |
| 16. Parcel F9B | 64.99 |
| 17. Parcel F10A | 11.05 |
| 18. Parcel F10B | 275.82 |
| 19. Parcel F11A Housing | 152.56 |
| 20. Parcel F11C | 4.24 |
| 21. Parcel F11D | 45.23 |
| 22. Parcel F12A | 41.82 |
| 23. MGC—Mohawk Glen Club | 15.13 |

The NPL is set forth at Appendix B of 40 CFR part 300, which is an appendix to the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as those sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). This partial deletion of certain properties at the GAFB is proposed in accordance with 40 CFR 300.425(e) and is consistent with the Notice of Policy Change: Partial Deletion of Sites Listed on the National Priorities List. 60 FR 55466 (Nov. 1, 1995). As described in § 300.425(e)(3) of the NCP, a portion of a site deleted from the NPL remains eligible for Fund-financed remedial action if future conditions warrant such actions.

The property proposed for deletion can also be reviewed via the Air Force's (AF's) Web site *http://www.griffiss.com.* Property coordinates for these parcels are identified in Figure 1 and are also defined in the corresponding transfer documents for each parcel. Transfer documents (e.g., deeds) and supporting documentation can be viewed either at the repositories or via the Web site.

To effectively manage the GAFB cleanup and property transfers, the base has been subdivided into management areas. These management areas or parcels were evaluated for various environmental concerns. The AF sets priorities for cleanup in each parcel based on the reuse priorities of the Local Reuse Authority (LRA). Environmental cleanup was expedited in some areas so that the property could be transferred from the AF to the LRA. The areas where cleanup was expedited and where the property was transferred are considered as candidates for deletion.

While reviewing the properties for deletion, EPA has based its recommendation for partial deletion upon the Records of Decision (RODs), Findings of Suitability to Transfer (FOST) and/or Findings of Suitability for Early Transfer (FOSET) and the Five-Year Review. In areas where the RODs were issued and the remedy was implemented (e.g., the institutional controls in the form of deed restrictions have been incorporated into a deed), EPA evaluated the area for consideration in this NOIPD.

As part of the NPL partial deletion process, EPA will accept public comments concerning this proposed NOID related to portions of the GAFB for thirty (30) days after publication of this notice in the **Federal Register**.

Section II further explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action, and Section IV discusses the GAFB Site and demonstrates how it meets the partial

deletion criteria. Properties and parcels that meet the criteria for demonstrating that the releases of hazardous substances pose no significant threat to human health or the environment, and therefore no remedial measures are needed, are indicated in Section IV as containing no CERCLA sites within its boundaries. Properties and parcels that meet the criteria that all appropriate response actions have been implemented are also indicated in Section IV as having some removal or remediation of contamination, and most include land and groundwater use restrictions in the property deed as required in the ROD.

**II. NPL Deletion Criteria**

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making this determination, EPA, in consultation with the State of New York, must establish whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required; or

ii. All appropriate Fund-financed responses under CERCLA have been implemented and no further cleanup by responsible parties is appropriate; or

iii. The remedial investigation has shown that the release of hazardous substances poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, EPA conducts Five-Year Reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such Five-Year Reviews even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

**III. Deletion Procedures**

The following procedures were used for the intended deletion of the specified properties at the GAFB Site:

(1) EPA has recommended the partial deletion and has prepared the relevant documents.

(2) EPA consulted with the State before developing this NOIPD.

(3) EPA has provided the State 30 working days for review of this notice prior to publication of it today.

(4) In accordance with the criteria discussed above, EPA has determined that no further response is appropriate.

(5) The State of New York through the NYSDEC concurs with this partial deletion.

(6) Concurrent with this national NOIPD, a notice has been published in a newspaper of record and has been distributed to appropriate federal, State, and local officials and other interested parties. These notices announce a thirty (30) day public comment period on the partial deletion package, which commences on the date of publication of this notice in the **Federal Register** and a newspaper of record.

(7) EPA has made all relevant documents available at the information repositories listed previously.

If comments are received within the 30-day comment period on this document, EPA will evaluate and respond accordingly to the comments before making a final decision to delete the parcels. If necessary, EPA will prepare a Responsiveness Summary to address any significant public comments received. After the public comment period, if EPA determines it is still appropriate to delete the soil and groundwater portions of the 23 parcels at the GAFB Superfund Site, the Regional Administrator will publish a final Notice of Partial Deletion in the **Federal Register**. Public notices, public submissions, and copies of the Responsiveness Summary, if prepared, will be made available to interested parties and included in the site information repositories listed above.

Deletion of a portion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a portion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

**IV. Basis for Intended Site Deletion**

*A. Background*

The GAFB NPL Site is comprised of 3,552 acres and is considered ''fence-line'' to ''fence-line''. The mission of the former GAFB varied over the years. In 1942, the base was activated as the Rome Air Depot with the mission of storage, maintenance, and shipment of material for the U.S. Army Air Corps. Upon creation of the AF, the depot was renamed Griffiss Air Force Base in 1947, and, three years later, it became an electronics center with a mission of accomplishing applied research, development, and testing of electronic air-ground systems. Later, the 49th Air Squadron was added, and in June of 1958, the Ground Electronics Engineering Installations Agency was established to engineer and install ground communications equipment throughout the world. On July 1, 1970, the 416th Bombardment Wing of the Strategic Air Command (SAC) was activated with the mission of maintenance and implementation of both refueling operations and long-range bombardment capability. GAFB was designated for realignment under the Base Realignment and Closure Act in 1993 and 1995, resulting in deactivation of all AF flying missions. Today, federal agencies such as the Air Force Research Laboratory Information Directorate, the Northeast Air Defense Sector, and the Defense Finance and Accounting Services remain in operation at GAFB.

Since 1942 when construction of the base began, various hazardous and toxic substances were used and hazardous wastes were generated, stored, or disposed at GAFB. Numerous studies and investigations under the U.S. Department of Defense Installation Restoration Program (IRP) have been performed to locate, assess and quantify the past toxic and hazardous storage, disposal, and spill sites. These investigations include: records searches; interviews with base personnel; field inspections; compilation of waste inventory; evaluation of disposal practices; an assessment to determine the nature and extent of site contamination; Problem Confirmation and Quantification studies; soil and groundwater analysis; a base-wide health assessment; base specific hydrology investigations; and various site specific investigations. Based upon such studies and information, GAFB was included on the NPL on July 15, 1987 and on August 20, 1990, the AF entered into a Federal Facility Agreement (FFA) with EPA and NYSDEC under Section 120 of CERCLA. Under the terms of the FFA, the AF was required to submit various reports to NYSDEC and EPA for review and comment. These reports address response activities required under CERCLA and included: the identification of Areas of environmental

Concern (AOCs); a scope of work for Remedial Investigation (RI); a work plan for the RI, including a sampling and analysis plan and a quality assurance plan; a baseline risk assessment; a community relations plan; and an RI report. On December 20, 1996, the AF submitted a draft-final RI report for regulatory review covering 31 AOCs located throughout the base.

Although a draft-final RI was submitted, environmental studies at GAFB did not stop there. Other studies such as the Areas of Interest study (AOI) evaluated over 300 possible environmental factors, many of which had not been formally evaluated under previous studies. The AOI study first collected all available information which was then reviewed by the AF, NYSDEC, and EPA. Based upon the review, sites were either recommended for no further action or for further sampling. Based upon the subsequent sampling, those sites either became no further action sites, were addressed with removal actions with confirmatory sampling, or were elevated to AOCs which then proceeded through the more comprehensive CERCLA cleanup process. The AF has completed its RI for the only AOI site that was elevated in this manner, AOC 9, and is currently reviewing possible alternatives for cleanup.

Some sites (e.g., the AOC Landfills) proceeded to presumptive remedies following the RI. Presumptive remedies are preferred technologies for common categories of sites based upon historical patterns of remedy selection and EPA's scientific and engineering evaluations of performance data on technology implementation. These sites were evaluated by the AF, NYSDEC, and EPA and, where determined to be appropriate presumptive remedy candidates based upon site sampling data and EPA's Presumptive Remedy Guidance for Military Landfills (dated April 29, 1996), and were proposed to the public. Following the public comment period where any comments specific to each landfill site were addressed, these remedies were approved and subsequently implemented. However, these presumptive remedy sites (i.e., the landfills) are not proposed for deletion at this time.

In addition to the AOCs, nine source removal sites as listed within the FFA have undergone cleanup with EPA and NYSDEC oversight. When the cleanup activities at these sites are completed, these sites will be closed with regulatory approval of a final remedy documented in a ROD.

Throughout this NOIPD, the term ''CERCLA site'' is used to mean the AOCs described generally above which have been investigated and, as necessary, addressed under the FFA.

*B. Records of Decision, Remedial Actions and Five-Year Reviews*

To date 26 remedies have been selected for various locations throughout the base. When accounting for all environmental factors which will necessitate some form of future regulatory approval, 13 of these sites still remain open. In managing the on-going activities, the AF has divided the base into various parcels. The periodic Five-Year Reviews which evaluate the protectiveness of each remedy as required by law also provides a summary of each parcel and its associated environmental activities. EPA and NYSDEC reviewed the most recent Five-Year Review document and provided their concurrence on September 15, 2005. Therefore, that document also was relied upon in the development of this NOIPD. Based upon that Five-Year Review document, the remedies as selected in the various RODs, and other documentation, this NOIPD was prepared with the understanding that only the parcel areas which meet the criteria of Section 300.425(e)(1) can be proposed for deletion, namely all appropriate response actions have been implemented or previous investigations have shown that remedial actions are not appropriate to protect human health or the environment. The parcels listed below meet this criteria and a summary of the parcel's environmental factors have been provided. Additional parcel information can be found on Figure 1 of this NOIPD and in the deeds via the Web site (*http://www.griffiss.com*).

*Parcel A1A—The Airfield.* This parcel was deeded to Oneida County via a Public Benefit Conveyance (PBC). It was comprised of 1,337.72 acres and contained two sites addressed under CERCLA. However, of the two sites located in the parcel, Six Mile Creek (approximately 13.27 acres) will remain on the NPL. Therefore, the area of the parcel that is proposed for deletion (approximately 1324.45 acres) contains just one CERCLA site within its boundaries. The following is a summary of the CERCLA site proposed for deletion:

*Fire Demonstration Area.* The Fire Demonstration Area is located north of Building 100. The site was used by the AF for fire demonstrations from 1987 to 1992. In 1994, an RI was initiated to characterize the full extent of contamination and determine potential threats to human health and the environment. Based upon sampling and analysis and a risk assessment, no further action in the form of land use restrictions was proposed by the AF as a remedy. After the public comment period, EPA with the concurrence of the NYSDEC approved a ROD on September 30, 1999, requiring institutional controls in the form of land use restrictions. The ROD required the site be restricted to industrial reuse, groundwater restrictions be implemented, and the AF to perform Five-Year reviews to ensure the remedy is protective of human health and the environment. The recorded deed contains the land and groundwater use restrictions required in the ROD.

*Building 750—Former Air Force Special Investigations.* This 4.07 acre parcel was deeded to the LRA via an Economic Development Conveyance (EDC) agreement. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Central Heating Plant.* This 17.78 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. A petroleum spill which is not regulated by CERCLA exists within the boundary (Spill #8903144); however, this area was remediated, and the AF is awaiting final closure approval from NYSDEC Spills Program. The parcel contains no CERCLA sites within its boundaries.

*Parcel F1.* This 64.90 acre parcel was deeded to the LRA via an EDC. However, because the property contained CERCLA sites undergoing cleanup, a Finding of Suitability for Early Transfer (FOSET) was required. A FOSET allows property to be transferred prior to cleanup with EPA and the Governor's approval, provided appropriate restrictions are in-place and the AF provides an assurance to complete cleanup the property. The transfer of this parcel received the Governor's concurrence on February 8, 1999, and was approved by EPA on April 2, 1999. As part of the assurances provided, the AF was required to address the CERCLA sites within the parcel. However, only those CERCLA sites which have remedies operating properly and successfully or which require no further action can be considered for deletion. The parcel contains four CERCLA sites within its boundaries (See Figure 1). Of the four sites located in the parcel, one site known as the Coal Yard Storage Area (approximately 3.50 acres) will remain on the NPL. Therefore, the area of the parcel that is proposed for deletion (approximately 61.40 acres) contains

three CERCLA sites within the proposed partial NPL deletion area. The following is a summary of only the CERCLA sites in areas of Parcel F1 proposed for deletion:

*Building 20.* The Building 20 site, located in Parcel F1, was used as a locomotive roundhouse to service diesel locomotives. During operation, lubricants, diesel parts, and hydraulic fluids were stored, used, and at times spilled in the area. An initial soil investigation was performed in 1985, and soil was removed at the northwest corner of Building 20. However, during the investigation an oily liquid was encountered. Subsequent soil and groundwater investigations continued and additional soil and liquid contamination was removed. In 1994, an RI was initiated to characterize the full extent of contamination and determine potential threats to human health and the environment. In 1998, an interim remedial action was performed to remove contaminated soil beneath the floor near the northwest corner of the building. Based upon sampling and analysis, previous removal actions, and a risk assessment, the AF developed a plan for public comment proposing institutional controls. EPA with the concurrence of the NYSDEC approved a ROD on September 27, 2001, requiring institutional controls in the form of land use restrictions. The ROD required the site area be restricted to commercial/industrial reuse, groundwater restrictions be implemented and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. The recorded deed does contain the institutional controls/land and groundwater use restrictions required in the ROD.

*T–9 Storage Area.* The T–9 Storage Area (T–9), also located in Parcel F1, was reportedly an open lot used to store heavy equipment, herbicides, and petroleum based paving products. At one time, Building 9, which no longer exists, was used as a motor pool facility. In the mid 1980s, soil and groundwater studies were conducted which detected contaminants of concern above background and guidance values, and, as a result, in 1994, an RI was performed to evaluate the potential threats to human health and the environment. In 1998, an interim response action was performed at the T–9 Storage Area at three locations. These locations were identified based on soil contamination data from previous investigations including the RI. Based upon sampling and analysis, previous removal actions, and a risk assessment, no further action in the form of land use restrictions was proposed by the AF as a remedy. After the public comment period, EPA with the concurrence of the NYSDEC approved a ROD on September 27, 2001, requiring institutional controls in the form of land use restrictions. The ROD required that the site be restricted to commercial/industrial reuse, groundwater restrictions be implemented, and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. The recorded deed does contain the land and groundwater use restrictions required in the ROD.

*Lot 69—Former Haz Waste Storage Yard.* Lot 69 is located in the south central industrialized portion of the former Griffiss AFB base. The site contains a Vehicle Maintenance Facility, including Buildings 11 and 15, and an asphalt-covered vehicle parking and storage area. From 1965 to 1982, this site was used as an unrestricted interim drum storage area for containers of liquid and solid hazardous wastes generated on the base. In 1994, an RI was initiated to characterize the full extent of contamination and determine potential threats to human health and the environment. Based upon sampling and analysis and a risk assessment, the AF developed a plan for public comment proposing institutional controls. EPA with the concurrence of the NYSDEC approved a ROD on March 17, 2005, requiring institutional controls in the form of land use restrictions. The ROD required the site area be restricted to commercial/industrial reuse, groundwater restrictions be implemented, and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. The recorded deed does contain the institutional controls/land and groundwater use restrictions required in the ROD.

*Parcel F2.* This 93.11 acre parcel was deeded to the LRA via an EDC. However, because the property contained CERCLA sites undergoing cleanup, a FOSET was required. This early transfer received the Governor's concurrence on February 23, 2000, and was approved by EPA on May 10, 2000. As part of the assurances provided, the AF was required to address the CERCLA sites within the parcel. However, only those CERCLA sites which have implemented remedies operating properly and successfully or which require no further action can be considered for deletion. Subsequent to the transfer of the property, the AF completed all the required actions at one of the two sites located in parcel F2. The Building 775 site, comprised of 4.75 acres, is not proposed for deletion and will remain on the NPL. As a result, 88.37 acres of the Parcel F2's 93.11 acres are proposed for deletion, and it is within these 88.37 acres that the other CERCLA site which has been remediated is located. A summary of the CERCLA site is provided as follows:

*Building 112.* The Building 112 site, located in the central industrial area of the base, serves as the High Power Laboratory. The CERCLA site was comprised of four areas: A drywell; a rooftop transformer spill; the loading dock area; and the polychlorinated biphenyl (PCB) dump area. Beginning in the early 1980s, various studies were conducted in the Building 112 area. In 1994, soil sampling, groundwater sampling, and a risk assessment were performed as part of the RI investigation. In conjunction with the RI, the AF performed excavation of several areas containing elevated levels of PCBs. Based upon the RI and the removal of the PCB contaminated material, the AF developed a plan for public comment proposing no further action with land use restrictions. EPA, with the concurrence of the NYSDEC, approved the ROD on September 27, 2001, requiring institutional controls in the form of land use restrictions. The ROD required the site be restricted to commercial/industrial reuse, soil relocation restrictions, groundwater restrictions be implemented, and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. The recorded deed contains the land and groundwater use restrictions required in the ROD.

*Parcel Electrical Power Substation.* This parcel is comprised of 3.2 acres and contains one site addressed under CERCLA. The parcel was deeded to LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. A summary of the CERCLA site proposed for deletion is provided as follows:

*Electric Power Substation (EPS).* The EPS is located in the south-central portion of the base along the southern margin of the industrial complex. Since the start of operations at Griffiss AFB in the 1940s, the EPS has served as an electrical unit to relay power to various facilities throughout the base. Prior to conversion, some of the transformers contained polychlorinated biphenyl (PCB) dielectric fluids. Dielectric fluids have reportedly been drained from the transformers directly onto the ground surface over an extended period of time. A transformer rupture reportedly occurred in 1987 at Transformer No. 1, during which PCB fluids were released on the east side. In 1994, soil sampling, groundwater sampling, and a risk assessment were performed as part of an RI.

In conjunction with the RI, the AF performed excavation of several areas containing elevated levels of PCBs. In 1998, the AF conducted a removal action by excavating soil and disposing the PCB contaminated soil off-site. Based upon the RI and the removal actions, the AF developed a plan for public comment proposing no further action with land use restrictions. EPA with the concurrence of the NYSDEC, approved the ROD on March 17, 2005, requiring institutional controls in the form of land use restrictions. The ROD required the site be restricted to commercial/industrial reuse, soil relocation restrictions, groundwater restrictions be implemented, and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. The recorded deed contains the land and groundwater use restrictions required in the ROD.

*Parcel F3A.* This 87.90 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. Of the 87.90 acres, only 75.99 acres are proposed for deletion. Within these 75.99 acres, there

are three CERCLA sites; however, the RODs for these sites were issued and the remedies implemented prior to the property being transferred. Therefore, the transfer was not considered an early transfer. Within the remaining 11.91 acres there are three sites known as Drywell 211, Washrack 222, and Building 255 Drywell which are individual area parcels and shall remain on the NPL (See Figure 1). A summary of the CERCLA sites is provided as follows:

*Building 214.* Building 214 is located in the west-central portion of the base. Adjacent to Building 214 are several other industrial buildings that form the area on base known as ''Tin City.'' Building 214 was a former vehicle maintenance shop, and solvents and petroleum were reported to have been released in a gravel-covered parking area adjacent to the building. In addition, an Underground Storage Tank (UST) was reported to have overflowed during past operations, and two drywells were reported to have existed at the southeast and southwest corners of the building. Beginning in the mid 1980s, various studies were conducted in this area, and thereafter soil sampling, groundwater sampling, and a risk assessment were performed as part of the RI in 1993. Based upon the RI, the AF developed a plan for public comment proposing no further action with land use restrictions. EPA, with the concurrence of the NYSDEC, approved the ROD on September 30, 1999, requiring institutional controls in the form of land use restrictions. The ROD required the site be restricted to commercial/industrial reuse, groundwater restrictions be implemented, and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. Following the approval of the ROD, groundwater monitoring continued, and based upon this monitoring EPA approved an Explanation of Significant Difference (ESD) on September 26, 2003, which found that the constituents sampled as part of a groundwater long-term monitoring program were below acceptable standards. The recorded deed contains land and groundwater use restrictions required in the ROD.

*Building 219.* The Building 219 site is located in the west-central portion of the base. This building and several other buildings form the Tin City area. The building was used as an Electric Power Production Shop, and based upon previous history a drywell existed south of the building. Liquid waste spills, neutralized battery acids, ethylene glycol, and shop wash-water may have been disposed in the drywell during the 1970s while the building was in operation. In 1994, an RI was performed to determine the nature and extent of contamination. Based upon the RI and a risk assessment, the AF developed a plan for public comment proposing no further action with land use restrictions. EPA, with the concurrence of the NYSDEC, approved the ROD on September 30, 1999, requiring institutional controls in the form of land use restrictions. The ROD required the site be restricted to commercial/industrial reuse, groundwater restrictions be implemented, and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. Following the approval of the ROD, groundwater monitoring continued, and based upon this monitoring EPA approved an ESD on September 26, 2003, which found that the constituents sampled as part of a groundwater long-term monitoring program did not exceed acceptable standards. The recorded deed contains land and groundwater use restrictions required in the ROD.

*Building 222.* The Building 222 site, located in the west-central portion of the base, is also part of the Tin City area. The building was used as a truck maintenance facility and entomology laboratory, and based upon previous history a battery acid disposal pit existed inside the building. The pit had an opening approximately 2 square feet in the floor and was covered with a steel grate. From 1940 until 1984, neutralized battery acids were discharged into the pit. In 1994, an RI was performed to determine the nature and extent of contamination. In 1998, and interim response action was performed to remove contaminated soil beneath the floor in the area of the battery acid disposal pit. Based upon the RI and the risk assessment, the AF developed a plan for public comment proposing no further action with land use restrictions. EPA, with the concurrence of the NYSDEC, approved the ROD on September 27, 2001, requiring institutional controls in the form of land use restrictions. The ROD required the site be restricted to commercial/industrial reuse, groundwater restrictions be implemented, and the AF to perform Five-Year Reviews to ensure the remedy is protective of human health and the environment. Following the approval of the ROD, groundwater monitoring continued, and based upon this monitoring EPA approved an ESD on September 26, 2003, which found that the constituents sampled as part of a groundwater long-term monitoring program did not exceed acceptable standards. The recorded deed contains land and groundwater use restrictions required in the ROD.

*Parcel F3B.* This 14.04 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F4A.* This 107.59 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F4C.* This 56.96 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F6A.* This 55.40 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. Of the 55.40 acres only 52.20 acres are proposed for deletion. There are no CERCLA sites within these acres. The one remaining site known as Building 301 Drywell is an individual area and will remain on the NPL (See Figure 1).

*Parcel F7NR.* This 52.09 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F7R.* This 223.75 acre parcel was deeded to Oneida County via a deed reversion clause. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F8—Housing.* This 69.22 acre parcel was offered to the LRA, but it decided not to take ownership of the property. The FOST, however, was submitted and reviewed by EPA and NYSDEC. All comments were addressed and the property was disposed by Government Services Agency via a public auction. The parcel contains no CERCLA sites within its boundaries.

*Parcel F9A.* This 135.25 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F9B.* This 64.99 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F10A.* This 11.05 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel 10B.* This 281.44 acre parcel was deeded to the LRA via an EDC, and of these acres, 275.82 acres are proposed for deletion. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC.

All comments were addressed. Four CERCLA sites are located within the parcel. Three of these sites known as Drywell 842, Drywell 846, and AOC 9 are individual areas and will remain on the NPL. Therefore, the parcel contains just one CERCLA site within its boundaries that is proposed for deletion (See Figure 1). A summary of the CERCLA site is provided as follows:

*Suspected Fire Training Area.* The Suspected Fire Training Area was located on the eastern boundary of the base. It was investigated as part of an RI in 1994. Based upon the RI, a ROD was proposed to the public for No Further Action. After the public comment period, EPA with the concurrence of the NYSDEC, approved the ROD on September 30, 1999. No reuse restrictions are required for the area.

*Parcel F11A Housing.* This 152.56 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F11C.* This 4.24 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F11D.* This 45.23 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*Parcel F12A.* This 45.83 acre parcel was deeded to the LRA via an EDC. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. A small portion of parcel F12A (4.01 acres) contains groundwater contamination. This area of contamination is currently being addressed and will not be deleted from the NPL. Therefore, 41.82 acres of the parcel which are proposed for deletion contain no CERCLA sites within its boundaries (See Figure 1).

*MGC—Mohawk Glen Club.* This 15.13 acre parcel which was originally the Officer's Club was deeded to Oneida County via a deed reversion clause. Prior to the property being deeded, a FOST was submitted by the AF and reviewed by EPA and NYSDEC. All comments were addressed. The parcel contains no CERCLA sites within its boundaries.

*C. Community Involvement*

The AF published its first Community Relations Plan in May 1991 and created a Restoration Advisory Board (RAB) to facilitate participation of and input from the public throughout the CERCLA cleanup process. The RAB acts as a focal point for the exchange of information between the AF and the local community, and it enables the early communication of information, concerns, and needs between them. In addition, each decision document at the Site has been made available for public comment, discussed at public meetings, and placed in the information repository before the decision document is finalized.

*D. Deletion Action Determination*

EPA, with the concurrence of the State of New York dated August 7, 2008, has determined that all appropriate responses under CERCLA have been completed and that no further response actions under CERCLA, other than O&M and Five-Year Reviews, are necessary or that an investigation has shown a release poses no significant threat to public health or the environment and, therefore, no response action is appropriate. Therefore, EPA is deleting the properties and parcels described above from the NPL. While EPA does not believe that any future response actions in the areas identified above will be needed, if future conditions warrant such action, the proposed deletion area of GAFB remains eligible for future response actions. Furthermore, this partial deletion does not alter the status of the remaining areas of GAFB which are not proposed for deletion and remain on the NPL. Likewise, this deletion does not alter the status of any other cleanup activities occurring under other federal and state programs (e.g., many of the parcels proposed for deletion include cleanup under New York State authorities such as the New York State Spills Program which addresses releases of petroleum products to the environment).

## Endangered and Threatened Wildlife and Plants; Revised Designation of Critical Habitat for the Quino Checkerspot Butterfly (Euphydryas editha quino)

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Proposed rule; reopening of comment period, notice of availability of draft economic analysis, and amended required determinations.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), announce the reopening of the comment period on our January 17, 2008, proposed revised designation of critical habitat for the Quino checkerspot butterfly under the Endangered Species Act of 1973, as amended (Act). We also announce the availability of the draft economic analysis (DEA), a revision to proposed critical habitat Unit 2, and an amended required determinations section of the proposal. We are reopening the comment period to allow all interested parties an opportunity to comment simultaneously on the proposed revision of critical habitat (including the changes to proposed critical habitat Unit 2), the associated DEA, and the amended required determinations section. If you submitted comments previously, then you do not need to resubmit them because they are included in the public record for this rulemaking and we will fully consider them in preparation of our final determination.

**DATES:** We will accept comments received on or before January 20, 2009.

**ADDRESSES:** You may submit comments by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: RIN 1018–AV23; Division of Policy and Directives Management; U.S. Fish and Wildlife Service; 4401 N. Fairfax Drive, Suite 222; Arlington, VA 22203.

We will not accept e-mail or faxes. We will post all comments on *http://www.regulations.gov*. This generally means that we will post any personal information you provide us (see the ''Public Comments'' section below for more information).

**FOR FURTHER INFORMATION CONTACT:** Jim Bartel, Field Supervisor, U.S. Fish and Wildlife Service, Carlsbad Fish and Wildlife Office, 6010 Hidden Valley Road, Suite 101, Carlsbad, CA 92011; telephone 760/431–9440; facsimile 760/431–5901. If you use a telecommunications device for the deaf (TDD), call the Federal Information Relay Service (FIRS) at 800–877–8339.

**SUPPLEMENTARY INFORMATION:**

### Public Comments

We will accept written comments and information during this reopened comment period on our proposed revision to critical habitat for the Quino checkerspot butterfly published in the **Federal Register** on January 17, 2008 (73 FR 3328), as revised by this notice, the DEA of the proposed revised designation, and the amended required determinations provided in this document. We will consider information and recommendations from all interested parties. We are particularly interested in comments concerning:

(1) The reasons why we should or should not designate habitat as critical habitat under section 4 of the Act (16 U.S.C. 1531 *et seq.*), including whether there are threats to the subspecies from human activity, the degree of which can be expected to increase due to the designation, and whether that increase in threat outweighs the benefit of designation such that the designation of critical habitat is not prudent.

(2) Specific information on:

- The amount and distribution of Quino checkerspot butterfly habitat,
- Locations within the geographical area occupied at the time of listing that contain features essential to the conservation of the subspecies that we should include in the designation and why, and
- Locations not within the geographical area occupied at the time of listing that are essential to the conservation of the subspecies and why.

(3) Land use designations and current or planned activities in the subject areas and their possible impacts on proposed revised critical habitat.

(4) Probable economic, national security, or other impacts of designating particular areas as critical habitat. We are particularly interested in any impacts on small entities, and the benefits of including or excluding areas that exhibit these impacts.

(5) The potential exclusion of non-Federal lands covered by the City of Chula Vista Subarea Plan (under the San Diego County Multiple Species Conservation Program) from final revised critical habitat, and whether such exclusion is appropriate and why.

(6) The potential exclusion of non-Federal lands covered by the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP) from final revised critical habitat, and whether such exclusion is appropriate and why. (Please note that although Tribal lands and Metropolitan Water District of Southern California (MWDSC) lands are located within the geographic boundary/area covered by the MSHCP, they are not a part of the MSHCP).

(7) Inclusion of all proposed MWDSC lands in the final critical habitat designation, and whether inclusion is appropriate and why. Through a mapping error we included MWDSC lands in Figure 2 of the proposed revised rule (73 FR 3328, January 17, 2008) that depicted areas considered for exclusion from critical habitat. Our intent was not to group these non-Federal lands with other lands considered for exclusion. We did not specify in the proposed revised rule that MWDSC would not be excluded from the final critical habitat designation. As noted in question 6 above, MWDSC is not a signatory to the MSHCP even though their non-Federal lands occur within the MSHCP plan area.

(8) Whether we should include or exclude Tribal lands of the Cahuilla Band of Mission Indians (preferred name ''Cahuilla Band of Indians'') and Ramona Band of Cahuilla Mission Indians of California (preferred name ''Ramona Band of Cahuilla Indians'') in Riverside County, and Campo Band of Diegueno Mission Indians (preferred name ''Campo Band of Kumeyaay Indians'') in San Diego County from final revised critical habitat and why. Economic impacts to the Cahuilla Band of Indians and the Campo Band of Kumeyaay Indians are analyzed in this DEA. During the first public comment period for proposed revisions to critical habitat that opened January 17, 2008, and closed March 17, 2008, we received a letter from the Ramona Band of Cahuilla Indians informing us that land proposed for critical habitat included tribally-owned fee lands of the Ramona Band of Cahuilla Indians. These tribally owned fee lands were classified as privately owned in Table 2 of the proposed revisions to critical habitat, therefore economic impacts to the Ramona Band of Cahuilla Indians are not analyzed in the DEA. However,

economic impacts to the Ramona Band of Cahuilla Indians will be analyzed in the final EA, and will be taken into consideration for possible exclusion from the final revised critical habitat.

(9) Whether there are areas we previously designated, but did not include in our proposed revision to critical habitat, that should be designated as critical habitat.

(10) Information on the extent to which any Federal, State, and local environmental protection measures we reference in the DEA were adopted largely as a result of the subspecies' listing.

(11) Information on whether the DEA identifies all Federal, State, and local costs and benefits attributable to the proposed revision of critical habitat, and information on any costs or benefits that we may have overlooked.

(12) Information on whether the DEA makes appropriate assumptions regarding current practices and any regulatory changes that likely may occur if we designate revised critical habitat.

(13) Information on whether the DEA correctly assesses the effect on regional costs associated with any land use controls that may result from the revised designation of critical habitat.

(14) Information on areas that the revised critical habitat designation could potentially impact to a disproportionate degree.

(15) Information on whether the DEA identifies all costs that could result from the proposed revised designation.

(16) Information on any quantifiable economic benefits of the revised designation.

(17) Whether the benefits of excluding any particular area outweigh the benefits of including that area under section 4(b)(2) of the Act.

(18) Economic data on the incremental costs of designating a particular area as revised critical habitat.

(19) Whether we could improve or modify our approach to designating critical habitat to provide for greater public participation and understanding, or assist us in accommodating public concerns and comments.

(20) Any foreseeable impacts on energy supplies, distribution, and use resulting from the proposed designation and, in particular, any impacts on electricity production, and the benefits of including or excluding areas that exhibit these impacts.

If you submitted comments or information on the proposed revised rule (73 FR 3328) during the initial comment period from January 17, 2008, to March 17, 2008, please do not resubmit them. These comments are included in the public record for this rulemaking and we will fully consider them in the preparation of our final determination. Our final determination concerning revised critical habitat will take into consideration all written comments and any additional information we receive during both comment periods. On the basis of public comments, we may, during the development of our final determination, find that areas within those proposed do not meet the definition of critical habitat, that some modifications to the described boundaries are appropriate, or that areas are appropriate for exclusion under section 4(b)(2) of the Act.

You may submit your comments and materials concerning the proposed revised rule or DEA by one of the methods listed in the **ADDRESSES** section. We will not consider comments sent by e-mail or fax or to an address not listed in the **ADDRESSES** section.

If you submit a comment via *http://www.regulations.gov*, your entire comment—including any personal identifying information—will be posted on the Web site. If you submit a hardcopy comment that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy comments on *http://www.regulations.gov*.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed revised rule, will be available for public inspection on *http://www.regulations.gov*, or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Carlsbad Fish and Wildlife Office (see **FOR FURTHER INFORMATION CONTACT**).

You may obtain copies of the original proposed revision of critical habitat and the DEA on the Internet at *http://www.regulations.gov*, or by mail from the Carlsbad Fish and Wildlife Office (see **FOR FURTHER INFORMATION CONTACT**).

## Background

For more information on previous Federal actions concerning the Quino checkerspot butterfly, refer to the proposed revised designation of critical habitat published in the **Federal Register** on January 17, 2008 (73 FR 3328). In March 2005, the Homebuilders Association of Northern California, *et al.*, filed suit against us challenging the merits of the final critical habitat designations for several species, including the Quino checkerspot butterfly. In March 2006, a settlement was reached that required us to re-evaluate five final critical habitat designations, including critical habitat designated for the Quino checkerspot butterfly. The settlement (as modified by subsequent court-approved amendments) stipulated that any proposed revisions to the Quino checkerspot butterfly critical habitat designation would be submitted for publication to the **Federal Register** on or before January 8, 2008, and the final critical habitat determination would be submitted on or before June 6, 2009.

Section 3 of the Act defines critical habitat as the specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features essential to the conservation of the species and that may require special management considerations or protection, and specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species. If the proposed rule is made final, section 7 of the Act will prohibit destruction or adverse modification of critical habitat by any activity funded, authorized, or carried out by any Federal agency. Federal agencies proposing actions affecting areas designated as critical habitat must consult with us on the effects of their proposed actions, under section 7(a)(2) of the Act.

Under section 4(b)(2) of the Act, we may exclude an area from critical habitat if we determine that the benefits of such exclusion outweigh the benefits of including that particular area as critical habitat, unless failure to designate that specific area as critical habitat will result in the extinction of the species. In making a decision to exclude areas, we consider the economic impact, impact on national security, or any other relevant impact of the designation.

## Draft Economic Analysis

Section 4(b)(2) of the Act requires that we designate or revise critical habitat based upon the best scientific and commercial data available, after taking into consideration the economic impact, impact on national security, or any other relevant impact of specifying any particular area as critical habitat. We have prepared a draft economic analysis of our January 17, 2008 (73 FR 3328), proposed revised rule to designate critical habitat for the Quino checkerspot butterfly.

The intent of the DEA is to identify and analyze the potential economic impacts associated with the proposed

revised critical habitat designation for the Quino checkerspot butterfly. Additionally, the economic analysis looks retrospectively at costs incurred since the January 16, 1997 (62 FR 2313), listing of the Quino checkerspot butterfly as endangered. The DEA quantifies the economic impacts of all potential conservation efforts for the Quino checkerspot butterfly; some of these costs will likely be incurred regardless of whether we designate revised critical habitat. The economic impact of the proposed revised critical habitat designation is analyzed by comparing scenarios both ''with critical habitat'' and ''without critical habitat.'' The ''without critical habitat'' scenario represents the baseline for the analysis, considering protections already in place for the species (for example, under the Federal listing and other Federal, State, and local regulations). The baseline, therefore, represents the costs incurred regardless of whether critical habitat is designated. The ''with critical habitat'' scenario describes the incremental impacts associated specifically with the designation of critical habitat for the species. The incremental conservation efforts and associated impacts are those not expected to occur absent the designation of critical habitat for the species. In other words, the incremental costs are those attributable solely to the designation of critical habitat above and beyond the baseline costs; these are the costs we may consider in the final designation of critical habitat. The analysis looks retrospectively at baseline impacts incurred since the species was listed, and forecasts both baseline and incremental impacts likely to occur if we finalize the proposed revised critical habitat.

The current DEA estimates the foreseeable economic impacts of the proposed revised critical habitat designation. The economic analysis identifies potential incremental costs as a result of the proposed revised critical habitat designation; these are those costs attributed to critical habitat over and above those baseline costs coextensive with listing. The DEA describes economic impacts of Quino checkerspot butterfly conservation efforts associated with the following categories of activity: (1) Residential development; (2) Tribal activities; (3) habitat management; and (4) non-residential development.

Baseline economic impacts are those impacts that result from listing and other conservation efforts for the Quino checkerspot butterfly. Conservation efforts related to development activities constitute the majority of total baseline costs (approximately 97 percent) in areas of proposed revised critical habitat. Impacts to Tribal activities and habitat management compose the remaining 3 percent of impacts. Total future baseline impacts are estimated to be $967 to $973 million ($52.08 to $52.48 million annualized) in present value terms using a 3 percent discount rate, and $686 to $691 million ($55.34 to $55.74 million annualized) in present value terms using a 7 percent discount rate over the next 23 years (2008 to 2030) in areas proposed as revised critical habitat.

Almost all incremental impacts attributed to the proposed revised critical habitat designation are expected to be related to development (approximately 61 to 86 percent) and Tribal activities (approximately 38 to 14 percent). The DEA estimates total potential incremental economic impacts in areas proposed as revised critical habitat over the next 23 years (2008 to 2030) to be $18.4 million to $70.7 million ($1.09 million to $4.17 million annualized) in present value terms using a 3 percent discount rate, and $13.1 million to $50.4 million ($1.09 to $4.18 million annualized) in present value terms using a 7 percent discount rate.

The DEA considers both economic efficiency and distributional effects. In the case of habitat conservation, efficiency effects generally reflect the ''opportunity costs'' associated with the commitment of resources to comply with habitat protection measures (e.g., lost economic opportunities associated with restrictions on land use). The DEA also addresses how potential economic impacts are likely to be distributed, including an assessment of any local or regional impacts of habitat conservation and the potential effects of conservation activities on government agencies, private businesses, and individuals. The DEA measures lost economic efficiency associated with residential and commercial development and public projects and activities, such as economic impacts on water management and transportation projects, Federal lands, small entities, and the energy industry. Decision-makers can use this information to assess whether the effects of the revised designation might unduly burden a particular group or economic sector.

As we stated earlier, we are soliciting data and comments from the public on the DEA, as well as on all aspects of the proposed revised critical habitat rule and our amended required determinations. The final revised rule may differ from the proposed revised rule based on new information we receive during the public comment periods. In particular, we may exclude an area from critical habitat if we determine that the benefits of excluding the area outweigh the benefits of including the area as critical habitat, provided the exclusion will not result in the extinction of the subspecies.

*Additional Areas Currently Considered for Exclusion Under Section 4(b)(2) of the Act*

Tribal Lands

In the proposed revised critical habitat designation published on January 17, 2008 (73 FR 3328), we identified Tribal lands in Units 6 and 9 as meeting the definition of critical habitat for the Quino checkerspot butterfly. At that time, we indicated the inclusion of Tribal lands in these units would serve to ensure the persistence of Core Occurrence Complexes in those units and would contribute to the conservation and recovery of the subspecies overall. However, we also indicated that we recognized the importance of government-to-government relationships with Tribes, and we solicited public comment on the appropriateness of the inclusion or the exclusion of those lands in the final designation of critical habitat. With the availability of the DEA, we are now considering exclusion of approximately 1,203 acres (ac) (487 hectares (ha)) of Tribal lands of the Cahuilla Band of Indians within proposed Unit 6, and 3,156 ac (1277 ha) of Tribal lands of the Campo Band of Kumeyaay Indians within proposed Unit 9. As discussed in section 6 of the DEA, socioeconomic data demonstrate a high impact to Tribal economies and economic vulnerability of the Tribes. Using a 3 percent discount rate, approximately $7.07 to $9.81 million in incremental impacts are anticipated to be incurred by the Campo Band of Kumeyaay Indians over the next 23 years (2008 to 2030); using a 7 percent discount rate, those impacts are approximately $5.04 to $6.99 million. The cost of conservation efforts for the butterfly and its habitat on the Cahuilla Band of Indians' Tribal lands are not estimated because their development plans do not yet specify implementation programs and dates for specific projects, thus no project modifications can be forecast. There will likely be costs, but these cannot be forecast at this time. Although projections provided by the Southern California Association of Governments Western Riverside Council of Governments for purposes of the DEA estimated no residential development impacts to the Cahuilla Band of Indians, Tribal members indicated to the Service at meetings and during telephone conversations that they have economic

plans similar to those of the Campo Band of Kumeyaay Indians, and the DEA indicated similar economic vulnerability for the Cahuilla Band of Indians as well.

Department of Defense Lands

Based on comments submitted during the initial public comment period from January 17, 2008, to March 17, 2008, we are also considering exclusion of the San Diego Air Force Space Surveillance Station (Surveillance Station; 109 ac (44 ha) within the 36,726–ac (14,862–ha) Unit 8) and the Navy-owned La Posta Mountain Warfare Training Facility (La Posta Facility; 1,083 ac (438 ha) within the 8,393–ac (3,397–ha) Unit 9) from critical habitat. Under section 4(a)(3)(B)(i) of the Act, the Secretary is prohibited from designating as critical habitat any lands or other geographical areas owned or controlled by the Department of Defense, or designated for its use, that are subject to an Integrated Natural Resources Management Plan (INRMP) prepared under section 101 of the Sikes Act (16 U.S.C. 670a), if the Secretary determines in writing that such plan provides a benefit to the species for which critical habitat is proposed for designation. However, the Surveillance Station and the La Posta Facility do not currently have IMRMPs that meet these requirements. Therefore, we are considering excluding these areas under section 4(b)(2) of the Act for reasons of national security, as explained below.

The Surveillance Station is a U.S. Air Force (Air Force) installation used for space surveillance. The Air Force's mission of the Surveillance Station is to detect, track, and identify man-made objects in near-earth and deep space orbits as part of a series of receiving stations equipped with linear antenna arrays. Activities on the grounds of the Surveillance Station consist of occasional equipment inspection, maintenance, and mowing of nonnative plants to reduce the risk of fire damage. The need for additional consultations and possible conservation restrictions would limit the amount of natural infrastructure available for ongoing and future mission execution and training needed for national security. Short-notice, mission-critical activities not previously analyzed may be delayed in order to conduct section 7 consultation.

The Service already consulted with the Air Force regarding all current and foreseen activities and issued a biological opinion concluding that the Air Force is not likely to destroy or adversely modify the existing critical habitat, assuming identified conservation measures are implemented. An Integrated Natural Resources Management Plan (INRMP) is currently being prepared in coordination with the Service and the California Department of Fish and Game that will ensure conservation of the subspecies. The Air Force must implement the INRMP in accordance with the Sikes Act (16 U.S.C 670a), and must comply with the Sikes Act to provide for the conservation and rehabilitation of natural resources on military installations. Because the INRMP is not yet final and approved by the Secretary, the statutory prohibition on designation of these lands as critical habitat is inapplicable. However, the lands may be excluded from designation as critical habitat if the Secretary determines that the benefits of exclusion, including the benefits with respect to national security, outweigh the benefits of such designation.

The Navy-owned La Posta Facility provides training for Navy Special Operations Forces (SOF) to deploy to the U.S. Pacific and Central Commands in support of missions in the global war on terrorism. The La Posta Facility contains areas for critical, mission-essential training for these SOF troops prior to deployment into hostile areas of the world. With the closure of several contract sites previously conducting U.S. Navy Sea, Air and Land Forces (SEAL) Unit Level Training, the La Posta Facility is now the sole training site for Naval Special Warfare (NSW) commands and military support functions in the San Diego region for developing small, well-trained, highly mobile, and independent operational units. The La Posta Facility is also the only semi-remote, NSW-controlled complex supporting Assault and Tactical Weapons Training, and the only cold weather/mountain warfare site that provides training in unconventional warfare and special tactical intelligence in the San Diego region.

Delays in construction schedules due to additional environmental regulations would disrupt mission-critical training and the ability to acquire and perform special warfare skills. The SEAL training schedule is extremely concentrated and does not allow for any shifting of training blocks. By Department of Defense training policy, SEALs require a remote range built specifically for the skill set required, close to home, and without distractions. Attempts to duplicate this training at sites outside the San Diego area, either by contract forces or other military owned and operated sites, would not provide the qualified personnel needed for the NSW commitment to the global war on terrorism.

Aside from these additional areas now being considered for exclusion from the final revised critical habitat designation, the remainder of the exclusion discussion presented in the proposed rule remains unchanged.

**Changes to Proposed Revised Critical Habitat**

In this document we are proposing revisions to the area of proposed revised critical habitat in Unit 2 as described in the January 17, 2008, proposed rule (73 FR 3328). This revision involves removal of approximately 27 acres of proposed revised critical habitat from two areas along the shoreline of Lake Skinner in Riverside County. Based on new GIS database information, we determined these two areas do not contain the features essential to the conservation of the Quino checkerspot butterfly because they are primarily wetlands. Removal of these areas from proposed revised critical habitat does not alter the textual description of Unit 2 as described in the January 17, 2008, proposed rule (73 FR 3328). A revised legal description and revised map for proposed critical habitat Unit 2 are included with this notice.

**Required Determinations—Amended**

In our proposed rule dated January 17, 2008 (73 FR 3328), we indicated that we would defer our determination of compliance with several statutes and Executive Orders until the information concerning potential economic impacts of the designation and potential effects on landowners and stakeholders became available in the DEA. We have now made use of the DEA to make these determinations. In this document, we affirm the information in our proposed rule concerning Executive Order (E.O.) 13132, E.O. 12988, the Paperwork Reduction Act, the National Environmental Policy Act, and the President's memorandum of April 29, 1994, ''Government-to-Government Relations with Native American Tribal Governments'' (59 FR 22951). However, based on the DEA data, we revised our required determinations concerning E.O. 12866 and the Regulatory Flexibility Act, E.O. 13211 (Energy, Supply, Distribution, and Use), the Unfunded Mandates Reform Act, and E.O. 12630 (Takings).

*Regulatory Planning and Review (E.O. 12866)*

The Office of Management and Budget (OMB) has determined that this proposed rule is not significant and has not reviewed this proposed rule under

Executive Order 12866 (E.O. 12866). OMB bases its determination upon the following four criteria:

(a) Whether the rule will have an annual effect of $100 million or more on the economy or adversely affect an economic sector, productivity, jobs, the environment, or other units of the government.

(b) Whether the rule will create inconsistencies with other Federal agencies' actions.

(c) Whether the rule will materially affect entitlements, grants, user fees, loan programs, or the rights and obligations of their recipients.

(d) Whether the rule raises novel legal or policy issues.

*Regulatory Flexibility Act (5 U.S.C. 601 et seq.)*

Under the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act (5 U.S.C. 802(2)), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies the rule will not have a significant economic impact on a substantial number of small entities. Based on our DEA of the proposed revised designation, we provide our analysis for determining whether the proposed rule would result in a significant economic impact on a substantial number of small entities. Based on comments we receive, we may revise this determination as part of a final rulemaking.

According to the Small Business Administration (SBA), small entities include small organizations, such as independent nonprofit organizations; small governmental jurisdictions, including school boards and city and town governments that serve fewer than 50,000 residents; and small businesses (13 CFR 121.201). Small businesses include manufacturing and mining concerns with fewer than 500 employees, wholesale trade entities with fewer than 100 employees, retail and service businesses with less than $5 million in annual sales, general and heavy construction businesses with less than $27.5 million in annual business, special trade contractors doing less than $11.5 million in annual business, and agricultural businesses with annual sales less than $750,000. To determine if potential economic impacts to these small entities are significant, we considered the types of activities that might trigger regulatory impacts under this designation as well as types of project modifications that may result. In general, the term significant economic impact is meant to apply to a typical small business firm's business operations.

To determine if the proposed revised designation of critical habitat for the Quino checkerspot butterfly would affect a substantial number of small entities, we consider the number of small entities affected within particular types of economic activities, such as residential and commercial development. In order to determine whether it is appropriate for our agency to certify that this rule would not have a significant economic impact on a substantial number of small entities, we considered each industry or category individually. In estimate the numbers of small entities potentially affected, we also considered whether their activities have any Federal involvement. Critical habitat designation will not affect activities that do not have any Federal involvement; designation of critical habitat affects activities conducted, funded, permitted, or authorized by Federal agencies.

Designation of critical habitat only affects activities conducted, funded, permitted, or authorized by Federal agencies. Some kinds of activities are unlikely to have any Federal involvement and so will not be affected by critical habitat designation. In areas where the species is present, Federal agencies already are required to consult with us under section 7 of the Act on activities they fund, permit, or implement that may affect the Quino checkerspot butterfly. Federal agencies also must consult with us if their activities may affect critical habitat.

In the DEA of the proposed revision to critical habitat, we evaluate the potential economic effects on small business entities resulting from implementation of conservation actions related to the proposed revision to critical habitat for the Quino checkerspot butterfly. The DEA identifies the estimated incremental impacts associated with the proposed rulemaking as described in sections 2 through 7 of the DEA, and evaluates the potential for economic impacts related to activity categories including residential development, Tribal activities, habitat management, and non-residential development. The DEA concludes that the incremental impacts resulting from this rulemaking that may be borne by small businesses will be associated only with residential development. Incremental impacts are either not expected for the other types of activities considered or, if expected, will not be borne by small entities.

As discussed in Appendix A of the DEA, the largest impacts of the proposed rule on small businesses would result from section 7 consultations with the Service on development projects not subject to an existing or proposed habitat conservation plan. In the 23-year time frame for the analysis, 14 developers may experience significant impacts. Furthermore, approximately 6 developers per year will experience impacts that likely represent less than 1 percent of the value of a new home. In the high estimate scenario, 5 projects in Unit 9 and 9 projects in Unit 10 are likely to require consultation with the Service as a result of the proposed rule. Conservatively assuming that each project is undertaken by a separate entity, as many as 14 developers are likely to be affected over the 23-year time frame of the analysis. At the high-end, the one-time costs resulting from the consultation process, including administrative time spent by the businesses, compensation costs, and the value of time delays, total approximately $16.1 million for the projects in Unit 9 and $26.8 million for the projects in Unit 10. Additionally, over the 23-year time frame, a high-end estimate of 131 projects (approximately 6 projects per year) will experience additional administrative costs as a result of the consultation. These costs result from the need to address adverse modification in a consultation that would occur even in the absence of critical habitat. These additional administrative costs are estimated to be $1,000 per project. No information regarding the probability that these businesses are small entities is available. However, assuming they are small businesses, the number of small entities significantly affected is not likely to be substantial.

In summary, we considered whether the proposed rule would result in a significant economic impact on a substantial number of small entities. For the above reasons and based on currently available information, we certify that, if promulgated, the proposed revision to critical habitat would not have a significant economic impact on a substantial number of small entities. Therefore, an initial regulatory flexibility analysis is not required.

*Executive Order 13211—Energy Supply, Distribution, and Use*

On May 18, 2001, the President issued E.O. 13211 on regulations that significantly affect energy supply, distribution, and use. E.O. 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. This proposed revision to critical habitat for the Quino checkerspot butterfly is not considered a significant regulatory action under E.O. 12866. OMB's guidance for implementing this Executive Order outlines nine outcomes that may constitute ''a significant adverse effect'' when compared to no regulatory action. As discussed in Appendix A, the DEA finds that none of these criteria are relevant to this analysis. The DEA identified Calpine Corporation, San Diego Gas and Electric, and Southern California Edison as entities involved in the production of energy; however, designation of critical habitat is not expected to lead to any adverse outcomes (such as a reduction in electricity production or an increase in the cost of energy production or distribution), and a Statement of Energy Effects is not required.

*Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)*

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501), the Service makes the following findings:

(a) This rule will not produce a Federal mandate. In general, a Federal mandate is a provision in legislation, statute, or regulation that would impose an enforceable duty upon State, local, or Tribal governments, or the private sector, and includes both ''Federal intergovernmental mandates'' and ''Federal private sector mandates.'' These terms are defined in 2 U.S.C. 658(5)–(7). ''Federal intergovernmental mandate'' includes a regulation that ''would impose an enforceable duty upon State, local, or Tribal governments,'' with two exceptions. It excludes ''a condition of federal assistance.'' It also excludes ''a duty arising from participation in a voluntary Federal program,'' unless the regulation ''relates to a then-existing Federal program under which $500,000,000 or more is provided annually to State, local, and Tribal governments under entitlement authority,'' if the provision would ''increase the stringency of conditions of assistance'' or ''place caps upon, or otherwise decrease, the Federal Government's responsibility to provide funding'' and the State, local, or Tribal governments ''lack authority'' to adjust accordingly. ''Federal private sector mandate'' includes a regulation that ''would impose an enforceable duty upon the private sector, except (i) a condition of Federal assistance; or (ii) a duty arising from participation in a voluntary Federal program.''

Critical habitat designation does not impose a legally binding duty on non-Federal Government entities or private parties. Under the Act, the only regulatory effect is that Federal agencies must ensure that their actions do not destroy or adversely modify critical habitat under section 7. Designation of critical habitat may indirectly impact non-Federal entities that receive Federal funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action may be indirectly impacted by the designation of critical habitat. However, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency. Furthermore, to the extent that non-Federal entities are indirectly impacted because they receive Federal assistance or participate in a voluntary Federal aid program, the Unfunded Mandates Reform Act would not apply, nor would critical habitat shift the costs of the large entitlement programs listed above on to State governments.

(b) We do not believe that this rule would significantly or uniquely affect small governments because it would not produce a Federal mandate of $100 million or greater in any year; that is, it is not a ''significant regulatory action'' under the Unfunded Mandates Reform Act. The DEA concludes incremental impacts may occur due to project modifications that may need to be made for development and Tribal activities; however, these are not expected to affect small governments. Incremental impacts stemming from various species conservation and development control are expected to be borne by the Campo Band of Kumeyaay Indians, the Ramona Band of Cahuilla Indians, and the Cahuilla Band of Indians, which are not considered small governments. Consequently, we do not believe that the revised critical habitat designation would significantly or uniquely affect small government entities. As such, a Small Government Agency Plan is not required.

*Executive Order 12630—Takings*

In accordance with E.O. 12630 (''Government Actions and Interference with Constitutionally Protected Private Property Rights''), we have analyzed the potential takings implications of proposing revised critical habitat for the Quino checkerspot butterfly in a takings implications assessment. Our takings implications assessment concludes that the proposed revision to critical habitat for the Quino checkerspot butterfly does not pose significant takings implications.

**BILLING CODE 4310–55–C**

## DEPARTMENT OF COMMERCE

## National Oceanic and Atmospheric Administration

## 50 CFR Part 216

**[Docket No. 0808041027–81574–01]**

**RIN 0648–AX08**

## Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to Space Vehicle and Test Flight Activities from Vandenberg Air Force Base (VAFB), California

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Proposed rule; request for comments.

**SUMMARY:** NMFS has received a request from the U.S. Air Force (USAF) for authorization for the take of marine mammals, by harassment, incidental to launching space launch vehicles, intercontinental ballistic and small missiles, and aircraft and helicopter operations at VAFB. By this document, NMFS is proposing regulations to govern that take. In order to issue a Letter of Authorization (LOA) and issue final regulations governing the take, NMFS must determine that the taking will have a negligible impact on the species or stocks and will not have an unmitigable adverse impact on the availability of such species or stock for taking for subsistence uses. NMFS must also prescribe the means of effecting the least practicable adverse impact on such species or stock and their habitats.

**DATES:** Comments and information must be received no later than January 5, 2009.

**ADDRESSES:** You may submit comments, identified by 0648–AX08, by any one of the following methods:

- Electronic Submissions: Submit all electronic public comments via the Federal eRulemaking Portal: *http://www.regulations.gov*.
- Hand delivery or mailing of paper, disk, or CD-ROM comments should be addressed to P. Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910–3225.

*Instructions:* All comments received are a part of the public record and will generally be posted to *http://www.regulations.gov* without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

NMFS will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

A copy of the application containing a list of references used in this document and the Draft Environmental Assessment (EA) may be obtained by writing to the above address, by telephoning the contact listed under **FOR FURTHER INFORMATION CONTACT**, or on the Internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications*. Documents cited in this proposed rule may also be viewed, by appointment, during regular business hours at the above address. To help NMFS process and review comments more efficiently, please use only one method to submit comments.

**FOR FURTHER INFORMATION CONTACT:** Candace Nachman, Office of Protected Resources, NMFS, (301) 713–2289, ext. 156.

**SUPPLEMENTARY INFORMATION:**

### Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq*.) direct the Secretary of Commerce (Secretary) to allow, upon request, the incidental, but not intentional taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, notice of a proposed authorization is provided to the public for review.

Authorization for incidental takings may be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for certain subsistence uses, and that the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such taking are set forth.

NMFS has defined ''negligible impact'' in 50 CFR 216.103 as:

> an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The National Defense Authorization Act of 2004 (NDAA) (Public Law 108–136) removed the ''small numbers'' and ''specified geographical region'' limitations and amended the definition of ''harassment'' as it applies to a ''military readiness activity'' to read as follows (Section 3(18)(B) of the MMPA):

> (i) any act that injures or has the significant potential to injure a marine mammal or marine mammal stock in the wild [Level A Harassment]; or (ii) any act that disturbs or is likely to disturb a marine mammal or marine mammal stock in the wild by causing disruption of natural behavioral patterns, including, but not limited to, migration, surfacing, nursing, breeding, feeding, or sheltering, to a point where such behavioral patterns are abandoned or significantly altered [Level B Harassment].

### Summary of Request

On March 21, 2008, NMFS received an application from the USAF requesting authorization for the take of four species of marine mammals incidental to space vehicle and test flight activities from VAFB, which would impact pinnipeds on VAFB and the Northern Channel Islands (NCI). NMFS proposes regulations to govern these activities, to be effective from February 7, 2009, through February 6, 2014. These regulations, if implemented, would allow NMFS to issue annual LOAs to the USAF. The current regulations and LOA expire on February 6, 2009. These training activities are classified as military readiness activities. Marine mammals may be exposed to continuous noise due mostly to combustion effects of aircraft and launch vehicles and impulsive noise due to sonic boom effects. The USAF requests authorization to take four pinniped species by Level B Harassment.

### Description of the Specified Activity

VAFB (see Figure 1 in the USAF application) is headquarters to the 30th Space Wing (SW), the Air Force Space Command unit that operates VAFB and the Western Range. VAFB operates as a missile test base and aerospace center, supporting west coast space launch activities for the USAF, Department of Defense, National Aeronautics and Space Administration, and commercial contractors. VAFB is the main west coast launch facility for placing commercial, government, and military

satellites into polar orbit on expendable (unmanned) launch vehicles, and for testing and evaluation of intercontinental ballistic missiles (ICBM) and sub-orbital target and interceptor missiles. In addition to space vehicle and missile launch activities at VAFB, there are helicopter and aircraft operations for purposes such as search-and-rescue, delivery of space vehicle components, launch mission support, and security reconnaissance. The USAF expects to launch a maximum of 30 rockets and missiles per year from VAFB.

There are currently six active space launch vehicle (SLV) facilities at VAFB (VAFB, 2007), used to launch satellites into polar orbit. These facilities support the launch programs for space vehicles including the Atlas V, Delta II, Delta IV, Falcon, Minotaur, and Taurus. The Falcon has yet to launch from VAFB and is scheduled for its first launch in August, 2009 (30 SW, 2008a). Details on the vehicle types and the sound exposure levels (SELs) produced by each missile or rocket are described in the following sections.

**Atlas V**

The Atlas V vehicle is launched from Space Launch Complex (SLC)-3E on south VAFB, the site of the previous Atlas IIAS program. This SLC is approximately 9.9 km (6.2 mi) from the main haul-out area on VAFB, known as Rocky Point (see Figure 2 in the USAF application), which encompasses several smaller haul-outs. SLC–3E is approximately 11.1 km (6.9 mi) from the closest north VAFB haul-out, known as the Spur Road haul-out site (Figure 3 in the application) and 13.5 km (8.4 mi) from the next closest haul-out, the nearby Purisima Point haul-out site (Figure 3 in the application).

The Atlas V is a medium lift vehicle that can be flown in two series of configurations - the Atlas V400 series and the Atlas V500 series. Both series use the Standard Booster as the single body booster. The V400 series accommodates a 4.2 m (13.8 ft) payload fairing and as many as three solid rocket boosters. The V500 series accommodates a 5.4 m (17.7 ft) fairing and as many as five solid rocket boosters. The Atlas V400 series will lift as much as 7,800 kg (17,196 lbs) into geosynchronous transfer orbit or as much as 13,620 kg (30,027 lbs) into low earth orbit. The Atlas V500 series will lift as much as 8,700 kg (19,180 lbs) into geosynchronous transfer orbit or as much as 21,050 kg (46,407 lbs) into low earth orbit. The Atlas V consists of a common booster core (CBC; 3.8 m (12.5 ft) in diameter and 32.5 m (106.6 ft) high) powered by an RD180 engine that burns a liquid propellant fuel consisting of liquid oxygen and RP1 fuel (kerosene). The RD180 engine provides 840,000 lbs of thrust on liftoff. There is a Centaur upper stage (3.1 m (10.2 ft) in diameter and 12.7 m (41.7 ft) high) powered by a liquid oxygen and liquid hydrogen fuel.

The first Atlas V launch occurred on March 13, 2008. Acoustic monitoring was conducted for this launch at VAFB. However, an equipment malfunction during the launch prevented the proper functioning of the digital audio tape (DAT) recorder during the launch. Since acoustic data was only gathered with the sound level meter (SLM), not all metrics were obtained for that launch. The Atlas V launch had an A-weighted SEL (ASEL) of 96.5 dB (MSRS, 2008c). The Atlas V was predicted to create a sonic boom of as much as 7.2 pounds per square foot (psf), impacting the NCI including San Miguel Island (SMI; see Figure 4 in the USAF application). The size of the actual sonic boom would depend on meteorological conditions, which can vary by day and season and with the trajectory of the vehicle. A sonic boom greater than 1 psf was predicted for the initial Atlas V launch, thus acoustic monitoring was performed on SMI. Measurements conducted at Cardwell Point indicated a sonic boom of 1.24 psf with a rise time of 2.4 milliseconds (ms).

**Delta II**

The Delta II is launched from SLC–2 on north VAFB (see Figure 3 in the USAF application) approximately 2 km (1.2 mi) from the Spur Road harbor seal haul-out site and 2.3 km (1.4 mi) from the Purisima Point haul-out site. The Delta II is a medium-sized launch vehicle approximately 38 m (124.7 ft) tall. The Delta II uses a Rocketdyne RS–27A main liquid propellant engine and additional solid rocket strap-on graphite epoxy motors (GEMs) during liftoff. A total of three, four, or nine GEMs can be attached for added boost during liftoff. When nine GEMs are used, six are ignited at liftoff and three are lit once the rocket is airborne. When three or four GEMs are used they are all ignited at liftoff. The number of GEMs attached to each vehicle will determine the amount of sound power produced by the vehicle.

Eight Delta II launches have been acoustically quantified near the Spur Road harbor seal haul-out site. The Delta II is the second loudest of the SLVs at the Spur Road haul-out site, the Taurus vehicle being the loudest (see Table 2 in the application). The Delta II has an unweighted SEL measurements (based on the six initial acoustically-measured launches) ranging from 126.5 to 128.8 dB and averaging 127.4 dB, as measured by the DAT recorder. The C-weighted SEL (CSEL) ranged from 124.3 to 126.7 dB with an average of 125.4 dB (DAT). The ASEL measurements from both a SLM and the DAT were similar and ranged from 111.8 to 118.2 dB and had an average of 114.5 dB (DAT). The maximum fast A-weighted sound level (Lmax) values ranged from 104.2 to 112.5 dB and averaged 109.5 dB.

Sonic booms have been measured on SMI from three Delta II launches: the EO–1, Iridium MS–12, and AURA (November 2000, February 2002, and July 2004, respectively). Both the Iridium MS–12 and AURA had two small sonic booms impact the Point Bennett area of SMI. Iridium MS–12 had peak overpressures of 0.47 and 0.64 psf and rise times of 18 and 91 ms, while AURA had peak overpressures of 0.79 and 1.34 psf and rise times of 9.5 and 10.5 ms. The Delta II EO 1 had a single sonic boom with a peak overpressure of 0.4 psf and rise time of .041 ms.

**Delta IV**

The Delta IV is launched from SLC–6, which is 2.8 km (1.7 mi) north of the main harbor seal haul-out site at South Rocky Point (see Figure 2 in the USAF application). The Delta IV family of launch vehicles consists of five launch vehicle configurations utilizing a CBC first stage (liquid fueled) and zero, two, or four strap on solid rocket GEMs. The Delta IV comes in four medium lift configurations and one heavy lift configuration consisting of multiple CBCs (Table 4 in the application). The Delta IV can carry payloads from 4,210 to 13,130 kg (9,281 to 28,947 lbs) into geosynchronous transfer orbit.

Previously the Athena launch vehicle was launched from SLC–6. The Athena was a much smaller vehicle than the Delta IV but was one of the top three loudest vehicles (Table 1 in the application) at the haul-out, given its close proximity. Because the Delta IV was predicted to be the loudest vehicle at the south VAFB harbor seal haul-out site, it was required that acoustic and biological monitoring be conducted for its first three launches. In addition, harbor seal hearing tests were required before and after each of the first three launches.

The first two Delta IV launches occurred in 2006. Although the Delta IV is larger than the Athena, it was found after its initial launch (NROL–22, June 2006) that the Delta IV had similar noise levels to the Athena vehicle. As measured by the DAT, the unweighted SEL was 127.7 dB, while the CSEL was

122.9 dB, and the ASEL was 106.2 dB (Fillmore *et al.*, 2006). The Lmax was found to be 103.1 dB (Fillmore *et al.*, 2006).

During its second launch (DMSP–17, November 2006), the DAT recorder was located at the VAFB Boathouse (near where the harbor seal hearing tests were performed), rather than at the more usual sound monitoring location of Oil Well Canyon, where an SLM was placed. The DAT measured the unweighted SEL at 131.3 dB, the CSEL at 127.5 dB, and the ASEL at 111.3 dB. The Lmax was measured at 102.6 dB (Thorson *et al.*, 2007).

The Delta IV was predicted to create maximum sonic booms of as much as 7.2 psf for the largest of the medium configurations and 8 to 9 psf for the heavy configuration (Table 4 in the application). The size of the actual sonic boom would depend on meteorological conditions, which can vary by day and season, and with the trajectory of the vehicle. A sonic boom greater than one psf was predicted for the initial Delta IV launch, thus acoustic monitoring was performed on SMI. An equipment malfunction resulted in uncertainty regarding the amplitude of the sonic boom that was recorded for the launch, and the peak overpressure from the boom could have ranged from 0.77 psf to as much as 3.36 psf. The rise time was able to be determined and was measured at 8.7 ms. Because a sonic boom was not predicted for the second Delta IV launch, monitoring was not performed on SMI.

Capture attempts of harbor seals for the initial Delta IV launch were unsuccessful; therefore, no hearing tests were performed on seals for that launch. Capture attempts for the second Delta IV launch were successful, and hearing tests were performed. There was no evidence that the launch noise from the Delta IV DMSP 17 caused a loss in harbor seal hearing acuity. However, given a 2 hr delay in starting the hearing test due to safety constraints, it is possible that a mild temporary threshold shift (TTS) could have been fully recovered by the time the testing was started. Even so, no long-term hearing loss from the Delta IV launch noise was found (Thorson *et al.*, 2007).

The third Delta IV launch is currently scheduled for December, 2010. Appropriate biological and acoustic monitoring, as well as hearing testing, are planned for this launch.

**Falcon**

The Falcon is the launch vehicle for Space Exploration Technologies (Space X). Space X is a commercial program planning to launch small payloads into low earth orbit from VAFB. While it has not been officially decided (30 SW, 2008a), it is anticipated that Space X will utilize SLC–4E, instead of SLC–3W as originally planned (30 SW, 2008c). The Space X launch vehicle includes the Falcon I SLV, classified as a light-lift vehicle. It is a two-stage liquid oxygen and rocket grade kerosene powered launch vehicle and is 21.3 m (69.9 ft) in length and 1.7 m (5.6 ft) in diameter (Space X, 2007). Beginning in 2009, the Falcon 1e vehicle will also be available. It is also 1.7 m (5.6 ft) in diameter, but will have an extended first stage and will be 26.8 m (87.9 ft) in length (Space X, 2007). The Falcon I has a thrust of 105,500 lbs (in vacuum) and the Falcon 1e has 115,000 lbs (in vacuum) and are capable of delivering approximately 554 kg (1,221 lbs) into sun synchronous low earth orbit (Space X, 2007). The first Falcon launch from VAFB is currently scheduled for August, 2009 (30 SW, 2008a).

**Minotaur**

The Orbital Suborbital Program launch vehicle, known as Minotaur I, is launched from SLC–8 on south VAFB (see Figure 2 in the USAF application), approximately 2.3 km (1.4 mi) from the south VAFB haul-out sites. The Minotaur I is a four stage, all solid propellant ground launch vehicle (Orbital Sciences Corporation, 2006a). The launch vehicle consists of modified Minuteman II Stage I and Stage II segments, mated with Pegasus upper stages (Orbital Sciences Corporation, 2006a). The Minotaur is a small vehicle, approximately 19.2 m (63 ft) tall (Orbital Sciences Corporation 2006b), with approximately 215,000 lbs of thrust.

Two Minotaur launches were acoustically monitored at VAFB (January 2000 and July 2000). The unweighted SEL measurements varied by 3.5 dB between the two launches and were measured to be 119.4 and 122.9 dB. The CSELs varied less and were measured at 116.6 and 117.9 dB. From the DAT and SLM measurements, the ASEL ranged from 104.9 to 107.0 dB. The launch noise reached an Lmax level of 101.7 and 103.4 dB. No sonic booms of greater than one psf were predicted to impact the NCI for these two launches, nor for a third launch for which only biological monitoring was performed at VAFB given that acoustics had been previously quantified.

**Taurus**

The Taurus SLV is launched from 576E on north VAFB, approximately 0.5 km (0.3 mi) from the Spur Road harbor seal haul-out site and 2.3 km (1.4 mi) from the Purisima Point haul-out site (see Figure 3 in the USAF application). The standard Taurus is a small launch vehicle, at approximately 24.7 m (81 ft) tall and is launched in two different configurations (Defense Advanced Research Projects Agency (DARPA) and standard) with different first stages providing 500,000 or 400,000 lbs of thrust, respectively. The different vehicle configurations have different thrust characteristics, with the standard configuration providing less thrust than DARPA.

The launch noise from five Taurus launches has been measured near the Spur Road haul-out site. The Taurus is the loudest of the launch vehicles at the Spur Road haul-out site, due to the close proximity of its launch pad to the haul-out site. The unweighted SEL measurements from the four initially measured Taurus vehicles ranged from 135.8 to 136.8 and averaged 136.4 dB. The CSEL measurements were slightly lower as expected, ranging from 133.8 to 134.8 dB and averaged 134.5 dB. The ASEL measurements ranged from 123.5 to 128.9 dB with an average of 126.6 dB (SLM). The Lmax values were measured to range from 118.3 to 122.9 dB and averaged 120.9 dB (SLM). No sonic booms greater than one psf were predicted to impact the NCI for any of the six Taurus launches monitored since 1998.

**ICBM and Missile Defense Agency Interceptor and Target Vehicles**

There are a variety of small missiles launched from north VAFB, including the Minuteman III and several types of interceptor and target vehicles for the Missile Defense Agency (MDA) program. The Peacekeeper missile program was recently deactivated. Active missile launch facilities (LFs) are spread throughout northern VAFB (see Figure 3 in the application), and are within approximately 1 to 3.9 km (0.6 to 2.4 mi) of the Lion's Head haul-out site, and approximately 11 to 16.5 km (6.8 to 10.3 mi) north of the Spur Road and Purisima Point haul-out sites. In addition to the LFs, Test Pad (TP)-01 is present on north VAFB. Although not currently active or associated with a missile program, MDA may eventually utilize this pad. The trajectories of ICBM and MDA launches are generally westward and therefore do not cause sonic boom impacts on the NCI.

*ICBM:* The Minuteman III missile is an ICBM developed as part of the U.S. strategic deterrence force. The Minuteman III is launched from an underground silo. It is composed of three rocket motors, and is 18 m (59 ft) in length by 1.7 m (5.6 ft) in diameter with a first stage thrust of 202,600 lbs.

The launch noise from the June 7, 2002, launch from LF–26 (see Figure 3 in the USAF application) was measured at the Lion's Head haul-out site. This LF is approximately 3 km (1.9 mi) away from the haul-out site. The ASEL measurement of the launch noise was 100.6 dB and the Lmax value of 98.2 dB.

The launch noise from the May 24, 2000, launch from LF–09 (Figure 3 in the application) was measured at the Spur Road haul-out site. At a distance of over 15 km from LF–09, the unweighted SEL measurement was 114.7 dB and the CSEL measurement was 111.6 dB. The ASEL measurement was 26 dB down from the unweighted value and was measured at 88.7 dB. The Lmax was measured to be 83.3 dB.

*MDA Interceptor and Target Vehicles:* The MDA continues development of various systems and elements, including the Ballistic Missile Defense System (BMDS), the Ground-based Midcourse Defense (GMD) element of BMDS, the Kinetic Energy Interceptor (KEI) element, and the Air-Borne Laser (ABL) element.

The BMDS mission is to defend against threat missiles in each phase or segment of the missile's flight. MDA has been conducting and will continue to conduct BMDS testing at VAFB through 2014 and beyond.

The GMD element is designed to protect the U.S. in the event of a limited ballistic missile attack by destroying the threat missile in the mid-course phase of its flight. During the mid-course phase, which occurs outside the earth's atmosphere for medium and long-range missiles, the missile coasts in a ballistic trajectory. The missiles are comprised of a commercially available, solid propellant booster consisting of two or three stages, and an exo-atmospheric kill vehicle or emulator. A two-stage booster is being added to the current three-stage booster. The Ground Based Interceptor (GBI) was previously approved for launching from VAFB (68 FR 25347, May 12, 2003). GBI flight tests are planned from LF–23. As a scheduled risk mitigation, some limited testing may occur from LF–24 (currently being refurbished for use).

The second element of BMDS, the KEI element, includes development of the KEI booster and its flight tests. MDA anticipates a minimum of three KEI launches per year from 2009 to at least 2012. Candidate launch sites include 576E, TP–01, and LF–06.

The third element of BMDS, the ABL element, is being developed to provide an effective defense to limited ballistic missile threats during the boost segment of an attacking missile's flight. Under the ABL program, there could be as many as 10 launches per year. Launches could occur from LF–06a, which would be a new LF, yet to be constructed, near the current LF–06. Possible launch vehicles could include Black Brant IX, Hera, Terrier/Orion, two-stage Terrier, Liquid Fueled Target System (LFTS), Terrier Lynx, Storm, ARIES, Castor I, Lance, Patriot PAC–2, STRYPI-II, and Hermes.

As a part of BMDS testing, MDA envisions launching a wide variety of target missiles from VAFB northern LFs on westerly trajectories. Table 5 in the USAF application identifies missiles being considered by MDA for use at VAFB. Many of the small missiles under 13 m (42.7 ft), including the Hera, Lance, Patriot As A Target (PAAT), Black Brant, Terrier, SRTYPI II, Castor I, Storm, ARIES and Hermes, in addition to missiles already approved for VAFB (such as Minuteman missiles and the three-stage GBIs), and the new generation of missiles from the MDA, such as the KEI and the GBI two-stage, are to be covered under this application for the five-year programmatic permit because of their launch site's proximity to the Lion's Head harbor seal pupping site that was established in 2002.

The LFTS target missile is a single-stage, short range, ballistic missile with a non-separating payload. The missile is fueled by kerosene, initiator fuel, and an oxidizer (Inhibited Red Fuming Nitric Acid). The Flexible Target Family target missiles include the LV 2 and the LV 3 missiles, which are solid-fueled.

As shown in Table 5 in the application, all of the target and interceptor missiles are smaller than the Minuteman III or Peacekeeper missiles previously or currently launched from VAFB. The MDA notes that the actual heights of the missiles shown in Table 5 will vary depending on the payload and associated electronic packages (e.g., flight termination system) or special modifications. Many of the missile types have interchangeable first or second stage motors; therefore, most may have similar noise characteristics, depending on their configuration. Missiles for which acoustic measurements have previously been made, as well as vehicle size, are included in Table 6 of the application.

The main missile programs and missile types are described herein, but others may be implemented before this permit expires. The USAF would notify NMFS of any new missile programs that would be implemented at VAFB. Completely new types of missiles would be monitored acoustically and biologically, during their first launch, even if the launch occurs outside of the pupping season, using the standard launch monitoring protocol for VAFB. However, configuration changes in existing missiles would only be monitored during the pupping season, as is done for all other missile launches.

The MDA's BMDS test plans, including those involving tests from VAFB, are subject to constant change as the BMDS is being developed through spiral evolution. Therefore, it is difficult for the MDA to predict with accuracy its future launch schedule or number of launches over the next five years. However, due to test resource limitations, the MDA does not envision conducting more than three missile tests per quarter (on average) over the next five years from VAFB, and none of the missiles would be larger than the Minuteman III. This limitation (i.e., one missile per quarter and none being larger than the Minuteman III) can be used to establish the potential impacts posed by the MDA testing at VAFB over the next five years.

In order to compare launch noise from past and current SLVs, as it was received near the north and south VAFB marine mammal haul-out sites, Tables 1 through 3 in the USAF application provide information on the SELs that were measured during previous launch events. Table 1 in the application provides a comparison of SELs as measured at the sound monitoring site by the south VAFB marine mammal haul-out site. Table 2 in the application provides the SELs as measured at the sound monitoring site by the north VAFB Spur Road marine mammal haul-out site. Finally, Table 3 in the application provides the SELs as measured at the sound monitoring site by the north VAFB Lion's Head marine mammal haul-out site.

**Aircraft Operations**

The VAFB runway, located on north VAFB (see Figure 3 in the application), supports various aircraft operations further described below. Aircraft operations include tower operations, such as take offs and landings (training operations) from the airfield, and range operations, such as overflights and flight tests. Using data from fiscal years (FY) 2003, 2006, and 2007 (FY 2004 and 2005 data are not available), the number of tower operations averaged 12,325 operations per FY, while range operations averaged 502 operations per FY.

*Flight Test Operations:* VAFB is a limited site for flight testing and evaluation of fixed-wing aircraft. Three approved routes are used that avoid the established pinniped haul-out sites. Aircraft flown through VAFB airspace and supported by 30 SW include, but

are not limited to, B1 and B2 bombers, F–15, F–16, and F–22 fighters, V/X–22, Unmanned Aerial Vehicles, and KC–135 tankers.

*Fixed-wing Aircraft Operations:* Various fixed-wing aircraft (jet and propeller aircraft) use VAFB for a variety of purposes, including delivery of space or missile vehicle components, launching of space vehicles at high altitude (e.g., the Pegasus), and emergency landings. All aircraft are required to remain outside of the 305–m (1,000–ft) bubble around pinniped rookeries or haul-out sites, except when performing a life-or-death rescue mission, when responding to a security incident, or during an aircraft emergency. There have been no observed impacts to pinnipeds from fixed-wing aircraft operations during launch monitoring or pinniped surveys.

*Helicopter Operations:* The number of helicopter operations at VAFB decreased in 2008 with the deactivation of the VAFB helicopter squadron. However other squadrons and units continue to use VAFB for purposes which include, but are not limited to, transit through, exercises, and launch mission support. All helicopters are required to remain outside of the 305–m (1,000–ft) bubble around pinniped rookeries or haul-out sites. Exceptions may occur when performing a life-or-death rescue mission, when responding to a security incident, or during an aircraft emergency. There have been no observed impacts to pinnipeds from helicopter operations during launch monitoring or pinniped surveys.

**Description of Habitat and Marine Mammals Affected by the Activity**

*VAFB*

VAFB is composed of approximately 99,000 acres of land and approximately 64.4 km (40 mi) of coastline on the coast of central California, within Santa Barbara County (see Figure 1 in the USAF application). The most common marine mammal inhabiting the VAFB coastline is the Pacific harbor seal (*Phoca vitulina richardii*). Harbor seals are local to the area, rarely traveling more than 50 km (31 mi) from the haul-out site. They haul out on small offshore rocks or reefs and sandy or cobblestone cove beaches. There are four main harbor seal haul-out sites on VAFB; three are on north VAFB and one is on south VAFB.

On north VAFB, harbor seals primarily use the offshore rocky area near Spur Road; the Purisima Point reef; and the offshore rocky area of Lion's Head (Figure 3 in the application). The Spur Road and Purisima Point haul-out sites are in the vicinity of the Delta II launch site, SLC–2, and the Taurus launch site, referred to as 576E. The Lion's Head haul-out site is located in the vicinity of the LFs. As many as 110 seals may haul out at Spur Road and as many as 45 seals may haul out at Purisima Point (SRS Technologies, 2003b). Based on monthly counts conducted in 2005 through 2007, only one to two pups were observed at the Spur Road and Purisima Point haul-out sites. As many as 17 seals may haul out at Lion's Head, with as many as three pups (Thorson *et al.*, 2004). These three sites are mostly to completely under water at higher tides (above 1.2 m (3.9 ft)), preventing seals from hauling out at those times.

The main haul-out area on south VAFB, from the VAFB Harbor north to South Rocky Point beach, is comprised of many sand and cobblestone coves and rocky ledges, with most seals found between Harbor Seal Beach and South Rocky Point (approximately 1.5 km (0.9 mi) of coastline; Figure 2 in the application). The raised rocky ledge of Flat Iron Rock provides an area to haul out during most tides (except for very high tides combined with high swells and wind); therefore, this area is used more often and by more seals than any other VAFB haul-out site. Weaned pups, juveniles and some adult females use Weaner Cove, just to the north of Flat Iron Rock, throughout most of the year. During periods of high winds, seals may move from Flat Iron Rock into the more protected Weaner Cove. Peak numbers, as many as 515 seals hauled out at one time (SRS Technologies, 2003b), usually occur at the south VAFB haul-out site in the afternoon (1100 to 1600 Pacific Time), but the number of seals present is also influenced by a combination of high tides and large swells, high temperature, or strong winds (SRS Technologies, 2003b). During the pupping season (March through June), as many as 49 mother-pup pairs can be found hauled out in the area just north of Harbor Seal Beach and at Weaner Cove, making these areas the main pupping sites on VAFB (SRS Technologies, 2003b). During molting (May through July) adult and some juvenile harbor seals primarily use the Flat Iron Rock area, while weaned pups, juveniles and a few adult females use the coves just north and south of Flat Iron Rock (SRS Technologies, 2002).

*NCI*

The Northern Channel Islands (NCI) are located approximately 50 km (31 mi) south of the southern point on VAFB (see Figure 4, inset in the USAF application). Three islands, San Miguel, Santa Cruz, and Santa Rosa, make up the main NCI, with San Miguel Island being the primary site for pinniped rookeries. The NCI are part of the Channel Islands National Park and the Channel Islands National Marine Sanctuary.

*San Miguel Island*

On SMI, commonly found species of pinnipeds include California sea lions (*Zalophus californianus*), northern elephant seals (*Mirounga angustirostris*), northern fur seals (*Callorhinus ursinus*) and Pacific harbor seals. Guadalupe fur seals (*Arctocephalus townsendi*) and Steller sea lions (*Eumetopias jubatus*) have bred in the past on SMI, but sightings have been rare since the mid–1980's. The main rookeries of sea lions, elephant seals and fur seals are found at Point Bennett on the west end of SMI (see Figure 4 in the USAF application). California sea lions occur at Point Bennett, along the south side of the island, to Cardwell Point, on the east. Northern elephant seals occur at Point Bennett and from Crook Point to Cardwell Point, with small numbers along the north coast. Northern fur seals occur in the Point Bennett area. Harbor seals occur along the north coast and from Crook Point to Cardwell Point.

There are approximately 23,000 California sea lion pups (30 SW, 2008c), over 10,000 elephant seal pups (Lowry, 2002) and over 4,000 fur seal pups born on SMI each year (Carretta *et al.*, 2007). Pacific harbor seals pup on the north and east end of SMI; 2,500 northern elephant seals and several hundred sea lions also pup on the east end of SMI at Cardwell Point (Lowry, 2002). Most sea lions and elephant seals on the south and east end of SMI are non-breeding (juvenile or molting) animals. This area is composed of high cliffs with small sandy coves where several hundred seals haul out. From approximately December through July, pupping and breeding activities overlap between the four main species (see Table 7 in the application and Table 1 here).

Currently, the main impacts to species on SMI are: environmental conditions, food limitations (i.e., El Nino or fisheries interactions), and competition with other pinniped species for breeding space. For all species, adverse impacts to populations occur periodically because of a decrease in the availability of food items due to El Nino events. Commercial fisheries have impacted Steller sea lion and northern fur seal populations (Sydeman and Allen, 1999). Competition among pinniped species is occurring as the growing populations of sea lions and

elephant seals displace less aggressive harbor seals for haul-out space.

TABLE 1. SUMMARY OF THE PUPPING (BIRTHING AND NURSING PERIOD), BREEDING, AND MOLTING SEASONS OF THE FOUR MAIN PINNIPED SPECIES ON SMI.

| Species | Pupping Season | Breeding Season | Molting Season |
|---|---|---|---|
| California sea lion | May-July | May-August | August-December |
| Northern fur seal | May-July | May-July | August-October |
| Northern elephant seal | December-March | December-March | April-August |
| Pacific harbor seal | March-May | March-June | May-July |

*Santa Cruz Island*

On Santa Cruz Island the main species of marine mammal inhabiting the island is the harbor seal. California sea lions and northern elephant seals rarely haul out on Santa Cruz Island, except when sick or injured. There are approximately 1,050 harbor seals found on Santa Cruz Island during the spring aerial surveys (Lowry and Carretta, 2003). Based on sonic boom prediction models for previous launches, the majority of sonic booms produced by launches from VAFB do not impact Santa Cruz Island.

*Santa Rosa Island*

On Santa Rosa Island, the main species of marine mammals inhabiting the island are the harbor seal and the northern elephant seal. In 2001, 1,567 elephant seal pups were born on Santa Rosa (Lowry, 2002). There are approximately 900 harbor seals found on Santa Rosa Island during the spring aerial surveys (Lowry and Carretta, 2003). Some California sea lions pup on Santa Rosa, but it has not been established as a rookery to date. Pinnipeds generally use the west end of the island, adjacent to SMI. Based on sonic boom prediction models for previous launches, the majority of sonic booms produced by launches from VAFB do not impact Santa Rosa Island.

**Comments and Responses**

On July 25, 2008, NMFS published a notice of receipt of application for an LOA in the **Federal Register** (73 FR 43410) and requested comments and information from the public for 30 days. NMFS received comments from the Marine Mammal Commission (Commission) and one private citizen. The Commission supports NMFS' decision to publish proposed regulations for the specified activities provided that the research, mitigation, and monitoring activities described in the application and the current regulations are incorporated into the rule. NMFS has incorporated the research, mitigation, and monitoring into the proposed rule. The other comment opposed the issuance of an authorization without any specific substantiation for why such an authorization should not be issued. For the reasons set forth in this preamble, NMFS believes issuance of the authorization is appropriate.

**Marine Mammals Potentially Affected by the Activity**

At both VAFB and the NCI, Pacific harbor seals, California sea lions, and northern elephant seals haul out on beaches throughout the year. Northern fur seals, Steller sea lions, and Guadalupe fur seals have not been reported on VAFB. However, northern fur seals and Guadalupe fur seals can be found on SMI. Northern fur seals are only found on the west end of SMI at Point Bennett and Castle Rock, just offshore of SMI. Each year at SMI, zero to two Guadalupe fur seals are seen generally in the summer (Melin and DeLong, 1999). Steller sea lions have not been sighted on SMI since 1998. This was a single observation of a sub-adult male in the spring prior to the breeding season (Thorson *et al.*, 1999a). Previously, the last observation of a Steller sea lion was made in the mid–1980's.

The USAF has compiled information on the abundance, status, and distribution of the species on VAFB and the NCI from surveys that they have conducted over the last decade and from NMFS Stock Assessment Reports (SARs). This information may be viewed in the USAF's LOA application (see **ADDRESSES**). Additional information is available in the NMFS SARs, which are available at: *http://www.nmfs.noaa.gov/pr/pdfs/sars/po2007.pdf*.

**Potential Effects of Specified Activities on Marine Mammals**

The activities under these regulations create two types of noise: Continuous (but short-duration) noise, due mostly to combustion effects of aircraft and launch vehicles; and impulsive noise, due to sonic boom effects. Launch operations are the major source of noise on the marine environment from VAFB. The operation of launch vehicle engines produces significant sound levels. Generally, noise is generated from four sources during launches: (1) Combustion noise from launch vehicle chambers; (2) jet noise generated by the interaction of the exhaust jet and the atmosphere; (3) combustion noise from the post-burning of combustion products; and (4) sonic booms. Launch noise levels are highly dependent on the type of first-stage booster and the fuel used to propel the vehicle. Therefore, there is a great similarity in launch noise production within each class size of launch vehicles.

The noise generated by VAFB activities will result in the incidental harassment of pinnipeds, both behaviorally and in terms of physiological (auditory) impacts. The noise and visual disturbances from SLV and missile launches and aircraft and helicopter operations may cause the animals to lift their heads, move towards the water, or enter the water. The following information provides background on marine mammal responses to launch noise that has been gathered under previous LOAs for these activities, as well as a scientific research permit issued to VAFB by NMFS for a research program (Permit No. 859–1680–01) to determine the short and long-term effects of SLV noise and sonic booms on affected marine mammals.

*Marine Mammal Response to Launch Noise*

Seals may leave the haul-out site and enter the water due to the noise created by launch vehicles during launch operations. The percentage of seals leaving the haul-out increases with noise level up to approximately 100 dB ASEL, after which almost all seals leave, although data have shown that some

percentage of seals have remained on shore during launches. Time-lapse video photography during four launch events revealed that the seals that reacted to the launch noise but did not leave the haul-out were all adults. Because adult seals reacted less strongly than other younger seals, this suggests that adults had possibly experienced other launch disturbances and had habituated to them.

The louder the launch noise, the longer it took for seals to begin returning to the haul-out site and for the numbers to return to pre-launch levels. Seals may begin to return to the haul-out site within 2–55 min of the launch disturbance and the haul-out site usually returned to pre-launch levels within 45–120 min. In two past Athena IKONOS launches with ASELs of 107.3 and 107.8 dB at the closest haul-out site, seals began to haul-out again approximately 16–55 min post-launch (Thorson *et al.*, 1999a; 1999b). In contrast, noise levels from an Atlas launch and several Titan II launches had ASELs ranging from 86.7 to 95.7 dB at the closest haul-out and seals began to return to the haul-out site within 2–8 min post-launch (Thorson and Francine, 1997; Thorson *et al.*, 2000).

The main concern on the NCI from VAFB launch activities is potential impacts from sonic booms created during launches of SLVs from VAFB. During the period of 1997 through 2005, and in 2007 there were no sonic booms above 2 psf recorded on the NCI. Small sonic booms between 1 and 2 psf usually elicit a heads up response or slow movement toward and entering the water, particularly for pups. In 2006, due to an equipment malfunction, there was uncertainty about the peak overpressure from the Delta IV NROL–22 launch, which could have ranged between 0.77 and 3.36 psf. During the 1996 Titan IV K–22 launch, sonic booms of 1 to 9.2 psf reached SMI and caused many sea lions and some elephant seals to enter the water near the loudest sonic boom (Stewart *et al.*, 1996). There were no injuries or mortalities as a result of that sonic boom or the reactions by pinnipeds on SMI.

*Haul-out Behavior and Population Dynamics*

During the scientific research program, haul-out behavior was determined by capturing and attaching radio frequency transmitters to the hind flippers of 41 harbor seals. Twenty-four seals were tagged in the Rocky Point area of south VAFB, and 17 were tagged at Point Conception (control site; see Figure 1 in the USAF application). The tagged seals ranged in age from pups (4 months) through adults. A radio receiver-scanner and electronic data logger were stationed on the cliffs above each haul-out site and recorded the presence of any radio tagged seal every 15 min while the seals are hauled out of the water. The time of arrival, time of departure, and time on shore, could be calculated from the data collected by the telemetry system.

The main influence on the daily haul-out patterns of harbor seals on south VAFB was the time of day ($r^2 = 0.72$; n = 423) rather than tide height ($r^2 = 0.23$; n = 423), as the peak number of seals hauled out occurred daily between 1100 and 1700 hours. Haul-out behavior was also influenced by combinations of high tide and large swell or high temperature and no wind. Either of these combinations may cause seals not to haul out at all or to leave the haul-out site early. Seals remained on shore for 8.1 hr plus or minus 1.6 hr (range 1.2 - 14.7 hr). There was no significant difference in the time of day or duration of hauling out between south VAFB and Point Conception (t-test, P>.05).

Site fidelity, which is defined herein as an individual's continued use of the same haul-out area for at least 6 months, was high at both south VAFB and Point Conception. The mean site fidelity at VAFB was 77 percent (adults 84 percent, juveniles 72 percent, and pups 63 percent), and at Point Conception was 71 percent (adults 81 percent, juveniles 74 percent, and pups 53 percent). The trend of increasing site fidelity with age is common in all harbor seal populations, as young seals cannot compete for haul-out space with adults, and move to other less preferred haul-out sites (Kovacs *et al.*, 1990; Suryan and Harvey, 1998). There have been four juveniles tagged at Point Conception that have moved to VAFB, but no juveniles have moved from VAFB to Point Conception.

The total population of harbor seals at VAFB in 2002 was estimated to be 1,115 (850 on south VAFB and 265 on north VAFB; SRS Technologies, 2003a), using telemetry data to correct for seals that were at sea during the census. A correction factor of 1.7 times the ground count was used. From 2000 through 2007 there were three to seven SLV launches per year (average of 4.4 SLV launches annually), and there appeared to be only short-term disturbance effects to harbor seals as a result of launch noise. The harbor seal population increased from 1997 to 2002 at an annual rate of 12.7 percent; however, the number of total harbor seals on south VAFB was lower in 2007 (356 seals) than 2006 (511 seals). The only decrease in the population during the 1997 to 2002 period occurred during the 1998 El Nino season, when there was a 13.6 percent decrease from the previous year. The number of harbor seal pups observed increased at a rate of 26.7 percent annually through 2003, except during the El Nino events. The number of pups on south VAFB continued to increase from 2004 through 2006 (high of 53 pups) but fell again in 2007 (38 pups). Pup production grew at a rate of 7.9 percent at Point Conception through 2006, except during El Nino events. Point Conception has limited area where females and pups can haul out without being harassed by other seals or exposed to high tides and swells. There are more haul-out areas for females with pups at VAFB; therefore only an El Nino type disturbance, which includes weather and food availability effects, should affect pup production at VAFB.

*Auditory Brainstem Response (ABR) Tests*

To determine if harbor seals experience changes in their hearing sensitivity as a result of launch noise, ABR testing was conducted on 18 harbor seals for four Titan IV launches, one Taurus launch, and one Delta IV launch.

Following standard ABR testing protocol, the ABR was measured from one ear of each seal using sterile, sub-dermal, stainless steel electrodes. A conventional electrode array was used, and low-level white noise was presented to the non-tested ear to reduce any electrical potentials generated by the non-tested ear. A Bio-logic Systems Corporation evoked potential computer was used to produce the click and an 8 kilohertz (kHz) tone burst stimuli, through standard audiometric headphones. Over 1,000 ABR waveforms were collected and averaged per trial. Initially the stimuli were presented at sound pressure levels (SPL) loud enough to obtain a clean reliable waveform, and then decreased in 10 dB steps until the response was no longer reliably observed. Once response was no longer reliably observed, the stimuli were then increased in 10 dB steps to the original SPL. By obtaining two ABR waveforms at each SPL, it was possible to quantify the variability in the measurements.

Good replicable responses were measured from most of the seals, with waveforms following the expected pattern of an increase in latency and decrease in amplitude of the peaks, as the stimulus level was lowered. One seal had substantial decreased acuity to the 8 kHz tone-burst stimuli prior to the launch. The cause of this hearing loss was unknown but was most likely

congenital or from infection. Another seal had a great deal of variability in waveform latencies in response to identical stimuli. This animal moved repeatedly during testing, which may have reduced the sensitivity of the ABR testing on this animal for both the click and 8 kHz tone burst stimuli. Two of the seals were released after pre-launch testing but prior to the launch of the Titan IV B–34, as the launch was delayed for many days, and five days is the maximum duration permitted to hold the seals for testing.

Detailed analysis of the changes in waveform latency and waveform replication of the ABR measurements for the 14 seals, showed no detectable changes in the seals' hearing sensitivity as a result of exposure to the launch noise. The delayed start (1.75 to 3.5 hr after the launches) for ABR testing allows for the possibility that the seals may have recovered from a TTS before testing began. However, it can be said with confidence that the post-launch tested animals did not have permanent hearing changes due to exposure to the launch noise from the Titan IV, Taurus, or Delta IV SLVs. These results are consistent with previous NMFS conclusions for such activities in its prior rulemakings (63 FR 39055, July 21, 1998; 69 FR 5720, February 6, 2004).

NMFS also notes that stress from long-term cumulative sound exposures can result in physiological effects on reproduction, metabolism, and general health, or on the animals' resistance to disease. However, this is not likely to occur as a result of the activities from VAFB, because of the infrequent nature and short duration of the noise, including the occasional sonic boom. Research indicates that population levels at these haul-out sites have remained constant in recent years, giving support to this conclusion.

The USAF does not anticipate a significant impact on any of the species or stocks of marine mammals from launches from VAFB. For even the largest launch vehicles, such as Delta IV, the launch noises and sonic booms can be expected to cause a startle response and flight to water for those harbor seals, California sea lions and other pinnipeds that are hauled out on the coastline of VAFB and on the NCI. The noise may cause TTS in hearing depending on exposure levels, but no PTS is anticipated.

**Numbers of Marine Mammals Estimated to be Taken by Harassment**

The marine mammal species NMFS believes likely to be taken by Level B harassment incidental to launch and aircraft and helicopter operations at VAFB are harbor seals, California sea lions, northern elephant seals, and northern fur seals. All of these species are protected under the MMPA, and none are listed under the Endangered Species Act (ESA). Numbers of animals that may be taken by Level B harassment are expected to vary due to factors such as type of SLV, location of the sonic boom, weather conditions (which can influence the size of the sonic boom), the time of day, and the time of year. For this reason, ranges are given for the harassment estimates of marine mammals. Aircraft operations will occur frequently but will avoid pinniped haul-out areas and are unlikely to disturb pinnipeds.

As noted earlier, sightings of Steller sea lions and Guadalupe fur seals have been extremely rare the last few decades or low at VAFB and on the NCI. Therefore, no takes by harassment are anticipated for either of these species incidental to the proposed activities.

*Estimated Takes at VAFB*

Harbor seals: As many as 600 harbor seals per launch may be taken. Depending on the type of rocket being launched, the time of day, time of the year, weather conditions, tide and swell conditions, the number of seals that may be taken will range between 0 and 600. Launches and aircraft operations may occur at any time of the year so any age classes and gender may be taken.

*California sea lions:* As many as 200 sea lions per launch may be taken. Sea lions at VAFB are usually juveniles of both sexes and sub-adult males that haul out in the fall during the post breeding dispersal. Births generally do not occur at VAFB, but five pups were observed at VAFB in 2003, an El Nino year, although all were abandoned by their mothers and died within several days of birth. Sick or emaciated weaned pups may also haul out briefly. The number of sea lions that may be taken will range between 0 and 200.

*Northern elephant seals:* As many as 200 elephant seals per launch may be taken. Weaned elephant seal pups, juveniles, or young adults of both sexes, may occasionally haul out at VAFB for several days to rest or as long as 30 days to molt. Injured or sick seals may also haul out briefly. The number of northern elephant seals that may be taken will range between 0 and 200.

*Northern fur seals:* There are no reports of northern fur seals at VAFB. Therefore, it is unlikely that any fur seals will be taken.

*Estimated Takes on the NCI*

Sonic booms created by SLVs may impact marine mammals on the NCI, particularly SMI. Missile launches utilize westward trajectories so do not cause sonic boom impacts to the NCI. The PCBoom sonic boom modeling program will continue to be used to predict the area of sonic boom impact and magnitude of the sonic boom on the NCI based on the launch vehicle, speed, trajectory, and meteorological conditions. Prior to each SLV launch, a predictive sonic boom map of the impact area and magnitude of the sonic boom will be generated. Based on previous monitoring of sonic booms created by SLVs on SMI (Thorson *et al.*, 1999a: 1999b), it is estimated that as much as approximately 25 percent of the marine mammals may be disturbed on SMI (Thorson *et al.*, 1999a; 1999b). Most sonic booms that reach SMI are small (<1 psf), although larger sonic booms are possible, but rarely occur. A conservative take estimate of as much as 25 percent of the animals present is used for each species per launch.

*Harbor seals:* As many as 200 harbor seals of all age classes and sexes may be taken per launch on the NCI. The number of harbor seals that may be taken will range between 0 and 200.

*California sea lions:* As many as 5,800 sea lion pups and 2,500 juvenile and adult sea lions of either sex may be taken on the NCI per launch. The number of sea lions that may be taken will range between 0 and 8,300.

*Northern elephant seals:* As many as 3,000 northern elephant seal pups and 10,000 northern elephant seals of all age classes and sexes may be taken per launch on the NCI. The number of elephant seals that may be taken will range between 0 and 13,000.

*Northern fur seals:* As many as 300 northern fur seal pups and 1,100 juvenile and adult northern fur seals of both sexes may be taken per launch at SMI. The number of fur seals that may be taken will range between 0 and 1,400.

With the incorporation of mitigation measures proposed later in this document, the USAF and NMFS expect that only Level B incidental harassment may occur as a result of the proposed activities and that these events will result in no detectable impact on marine mammal species or stocks or on their habitats.

**Potential Effects of Specified Activities on Marine Mammal Habitat**

Impacts on marine mammal habitat are part of the consideration in making a finding of negligible impact on the species and stocks of marine mammals. Habitat includes, but is not necessarily limited to, rookeries, mating grounds, feeding areas, and areas of similar

significance. Only short-term disturbance of marine mammals is expected as a result of the proposed activities. No impacts to marine mammal habitats are anticipated on VAFB or the NCI.

**Potential Effects of Specified Activities on Subsistence Needs**

NMFS has preliminarily determined that the issuance of an LOA for USAF space vehicle and missile launches and aircraft and helicopter operations at VAFB would not have an unmitigable adverse impact on the availability of the affected species or stocks for subsistence use since there are no such uses for these pinniped species in California.

**Mitigation**

To minimize impacts on pinnipeds on beach haul-out sites and to avoid any possible sensitizing or predisposing of pinnipeds to greater responsiveness towards the sights and sounds of a launch, the USAF has prepared the following mitigation measures.

All aircraft and helicopter flight paths must maintain a minimum distance of 1,000 ft (305 m) from recognized seal haul-outs and rookeries (e.g., Point Sal, Purisima Point, Rocky Point), except in emergencies or for real-time security incidents (e.g., search-and-rescue, fire-fighting) which may require approaching pinniped haul-outs and rookeries closer than 1,000 ft (305 m). For missile and rocket launches, unless constrained by other factors including, but not limited to, human safety, national security concerns or launch trajectories, holders of LOAs must schedule launches to avoid, whenever possible, launches during the harbor seal pupping season of March through June. NMFS also proposes to expand the requirement so that the USAF must avoid, whenever possible, launches which are predicted to produce a sonic boom on the NCI during harbor seal, elephant seal, California sea lion, and northern fur seal pupping seasons.

If post-launch surveys determine that an injurious or lethal take of a marine mammal has occurred, the launch procedure and the monitoring methods must be reviewed, in cooperation with NMFS, and appropriate changes must be made through modification to an LOA, prior to conducting the next launch of the same vehicle under that LOA.

**Monitoring**

As part of its application, the USAF provided a monitoring plan, similar to that in the current regulations (50 CFR 216.125), for assessing impacts to marine mammals from rocket and missile launches at VAFB. This monitoring plan is described, in detail, in their application (30 SW, 2008c). The USAF will conduct the following monitoring under the regulations.

The monitoring will be conducted by a NMFS-approved marine mammal biologist experienced in surveying large numbers of marine mammals. Monitoring at the haul-out site closest to the launch facility will commence at least 72 hours prior to the launch and continue until at least 48 hours after the launch.

*Monitoring for VAFB*

Biological monitoring at VAFB will be conducted for all launches during the harbor seal pupping season, 1 March to 30 June. Acoustic and biological monitoring will be conducted on new space and missile launch vehicles during at least the first launch, whether it occurs within the pupping season or not. Also, the third Delta IV launch will be monitored, and ABR testing of seals in close proximity to the launch is planned. The testing will be authorized under a scientific research permit issued under Section 104 of the MMPA. Such work is currently conducted under Permit No. 859–1680–01, which expires on January 1, 2009. The USAF has submitted an application to NMFS for issuance of a new scientific research permit to continue the ABR tests, as well as other research projects. The ABR tests would be required once NMFS issues the Section 104 research permit. NMFS estimates that the tests would be required for years 2–5 of these proposed regulations.

Monitoring will include multiple surveys each day that record, when possible, the species, number of animals, general behavior, presence of pups, age class, gender, and reaction to launch noise, sonic booms, or other natural or human-caused disturbances. Environmental conditions such as tide, wind speed, air temperature, and swell will also be recorded. Time-lapse photography or video will be used during daylight launches to document the behavior of mother-pup pairs during launch activities. For launches during the harbor seal pupping season (March through June), follow-up surveys will be made within 2 weeks of the launch to ensure that there were no adverse effects on any marine mammals. A report detailing the species, number of animals observed, behavior, reaction to the launch noise, time to return to the haul-out site, any adverse behavior and environmental conditions will be submitted to NMFS within 90 days of the launch.

*Monitoring for the NCI*

Monitoring will be conducted on the NCI (San Miguel, Santa Cruz, and Santa Rosa Islands) whenever a sonic boom over 1 psf is predicted (using the most current sonic boom modeling programs) to impact one of the Islands. Monitoring will be conducted at the haul-out site closest to the predicted sonic boom impact area. Monitoring will be conducted by a NMFS-approved marine mammal biologist experienced in surveying large numbers of marine mammals. Monitoring will commence at least 72 hours prior to the launch and continue until at least 48 hours after the launch.

Monitoring will include multiple surveys each day that record the species, number of animals, general behavior, presence of pups, age class, gender, and reaction to launch noise, sonic booms, or other natural or human-caused disturbances. Environmental conditions such as tide, wind speed, air temperature, and swell will also be recorded. Due to the large numbers of pinnipeds found on some beaches of SMI, smaller focal groups should be monitored in detail rather than the entire beach population. A general estimate of the entire beach population should be made once a day and their reaction to the launch noise noted. Photography or video will be used during daylight launches to document the behavior of mother-pup pairs or dependent pups during launch activities. During the pupping season of any species affected by a launch, follow-up surveys will be made within 2 weeks of the launch to ensure that there were no adverse effects on any marine mammals. A report detailing the species, number of animals observed, behavior, reaction to the launch noise, time to return to the haul-out site, any adverse behavior and environmental conditions will be submitted to NMFS within 90 days of the launch.

**Reporting**

A report containing the following information must be submitted to NMFS within 90 days after each launch: (1) Date(s) and time(s) of each launch; (2) date(s), location(s), and preliminary findings of any research activities related to monitoring the effects on launch noise and sonic booms on marine mammal populations; and (3) results of the monitoring programs, including but not necessarily limited to (a) numbers of pinnipeds present on the haul-out prior to commencement of the launch, (b) numbers of pinnipeds that may have been harassed as noted by the number of pinnipeds estimated to have

entered the water as a result of launch noise, (c) the length of time(s) pinnipeds remained off the haul-out or rookery, (d) the numbers of pinniped adults or pups that may have been injured or killed as a result of the launch, and (4) any behavioral modifications by pinnipeds that likely were the result of launch noise or the sonic boom.

If a freshly dead or seriously injured pinniped is found during post-launch monitoring, the incident must be reported within 48 hours to the NMFS Office of Protected Resources and the NMFS Southwest Regional Office.

An annual report must be submitted to NMFS at the time of renewal of the LOA described in § 216.127, that describes any incidental takings under an LOA not reported in the 90–day launch reports, such as the aircraft test program and helicopter operations and any assessments made of their impacts on hauled-out pinnipeds.

A final report must be submitted to NMFS no later than 180 days prior to expiration of these regulations. This report must summarize the findings made in all previous reports and assess both the impacts at each of the major rookeries and the cumulative impact on pinnipeds and any other marine mammals from Vandenberg activities.

**ESA**

In December, 2003, NMFS determined that these activities are not likely to adversely affect any species or their habitats that are listed as threatened or endangered under the ESA. Therefore, consultation under section 7 of the ESA is not required.

**NEPA**

The USAF prepared a Final EA and issued a Finding of No Significant Impact (FONSI) in 1997 as part of its application for an incidental take authorization. On March 1, 1999 (64 FR 9925), NMFS adopted this EA as provided for by the Council on Environmental Quality regulations. In 2003, NMFS prepared its own EA and issued a FONSI for the final rule issued in February, 2004. NMFS has prepared a new Draft EA for issuance of regulations and annual LOAs to the USAF for these proposed activities. The Draft EA will be made available for public comment concurrently with these proposed regulations (see **ADDRESSES**). NMFS will either finalize the EA and prepare a FONSI or prepare an Environmental Impact Statement prior to issuance of the final rule.

**Coastal Zone Management Act Consistency**

The USAF conducts separate consultations with the California Coastal Commission (CCC) for each launch activity, as each one is considered a separate Federal action. Past consultations between the USAF and the CCC have indicated that activities from VAFB similar to those described in this document are consistent to the maximum extent practicable with the enforceable policies of the California Coastal Act (CCA). The USAF is in consultation with the CCC for those launch activities that have not yet been found to be consistent with the CCA. Therefore, NMFS has preliminarily determined that the activities described in this document are consistent to the maximum extent practicable with the enforceable policies of the CCA.

**National Marine Sanctuaries Act**

NMFS has preliminarily determined that this action is not likely to destroy, cause the loss of, or injure any national marine sanctuary resources. NMFS will conclude any necessary consultation with the National Ocean Service's Office of National Marine Sanctuaries prior to issuance of the final rule.

**Preliminary Determinations**

NMFS has preliminarily determined that the launching of SLVs, ICBMs, and small missiles and aircraft and helicopter operations at VAFB, as described in this document and in the application for regulations and subsequent LOAs, will result in no more than Level B harassment of harbor seals, California sea lions, northern elephant seals, and northern fur seals. The effects of these military readiness activities from VAFB will be limited to short term and localized changes in behavior, including temporarily vacating haul-outs, and possible TTS in the hearing of any pinnipeds that are in close proximity to a launch pad at the time of a launch. NMFS has also preliminarily determined that any takes will have no more than a negligible impact on the affected species and stocks. No take by injury and/or death is anticipated, and the potential for permanent hearing impairment is unlikely. Harassment takes will be at the lowest level practicable due to incorporation of the mitigation measures mentioned previously in this document. NMFS has proposed regulations for these exercises that prescribe the means of affecting the least practicable adverse impact on marine mammals and their habitat and set forth requirements pertaining to the monitoring and reporting of that taking. Additionally, the launch activities and aircraft and helicopter operations will not have an unmitigable adverse impact on the availability of marine mammal stocks for subsistence use, as there are no subsistence uses of these four pinniped species in California waters.

**Classification**

Pursuant to the procedures established to implement section 6 of Executive Order 12866, the Office of Management and Budget has determined that this proposed rule is not significant.

Pursuant to section 605(b) of the Regulatory Flexibility Act, the Chief Counsel for Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The 30th SW, USAF, is the entity that will be affected by this rulemaking, not a small governmental jurisdiction, small organization or small business, as defined by the Regulatory Flexibility Act. As a result, NMFS concludes the action would not result in a significant economic impact on a substantial number of small entities.

**List of Subjects in 50 CFR Part 216**

Exports, Fish, Imports, Indians, Labeling, Marine mammals, Penalties, Reporting and recordkeeping requirements, Seafood, Transportation.

Dated: December 15, 2008.

**John Oliver,**

*Deputy Assistant Administrator for Operations, National Marine Fisheries Service.*

For reasons set forth in the preamble, 50 CFR part 216 is proposed to be amended as follows:

## PART 216—REGULATIONS GOVERNING THE TAKE OF MARINE MAMMALS INCIDENTAL TO SPECIFIED ACTIVITIES

1. The authority citation for part 216 continues to read as follows:

**Authority:** 16 U.S.C. 1361 *et seq.*

2. Subpart K is added to part 216 to read as follows:

### Subpart K—Taking Of Marine Mammals Incidental To Space Vehicle And Test Flight Activities

Sec.

## Subpart K—Taking Of Marine Mammals Incidental To Space Vehicle And Test Flight Activities

### § 216.120 Specified activity and specified geographical region.

(a) Regulations in this subpart apply only to the incidental taking of those marine mammals specified in paragraph (b) of this section by the 30th Space Wing, United States Air Force, and those persons it authorizes to engage in:

(1) Launching up to 30 space and missiles vehicles each year from Vandenberg Air Force Base, for a total of up to 150 missiles and rockets over the 5–year period of these regulations,

(2) Launching up to 20 rockets each year from Vandenberg Air Force Base, for a total of up to 100 rocket launches over the 5–year period of these regulations,

(3) Aircraft flight test operations, and

(4) Helicopter operations from Vandenberg Air Force Base.

(b) The incidental take of marine mammals on Vandenberg Air Force Base and in waters off southern California, under the activity identified in paragraph (a) of this section, is limited to the following species: Harbor seals (*Phoca vitulina*); California sea lions (*Zalophus californianus*); northern elephant seals (*Mirounga angustirostris*); and northern fur seals (*Callorhinus ursinus*).

### § 216.121 Effective dates.

Regulations in this subpart are effective from February 7, 2009, through February 6, 2014.

### § 216.122 Permissible methods of taking.

(a) Under Letters of Authorization issued pursuant to § 216.106 and 216.127, the 30th Space Wing, U.S. Air Force, its contractors, and clients, may incidentally, but not intentionally, take marine mammals by harassment, within the area described in § 216.120, provided the activity is in compliance with all terms, conditions, and requirements of these regulations and the appropriate Letter of Authorization.

(b) The taking of marine mammals is authorized for the species listed in § 216.120(b) and is limited to Level B Harassment.

### § 216.123 Prohibitions.

Notwithstanding takings contemplated in § 216.120 and authorized by a Letter of Authorization issued under §§ 216.106 and 216.127, no person in connection with the activities described in § 216.120 may:

(a) Take any marine mammal not specified in § 216.120(b);

(b) Take any marine mammal specified in § 216.120(b) other than by incidental, unintentional harassment;

(c) Take a marine mammal specified in § 216.120(b) if such taking results in more than a negligible impact on the species or stocks of such marine mammal; or

(d) Violate, or fail to comply with, the terms, conditions, and requirements of this subpart or a Letter of Authorization issued under §§ 216.106 and 216.127.

### § 216.124 Mitigation.

(a) The activity identified in § 216.120(a) must be conducted in a manner that minimizes, to the greatest extent practicable, adverse impacts on marine mammals and their habitats. When conducting operations identified in § 216.120(a), the mitigation measures contained in the Letter of Authorization issued under §§ 216.106 and 216.127 must be implemented. These mitigation measures include (but are not limited to):

(1) All aircraft and helicopter flight paths must maintain a minimum distance of 1,000 ft (305 m) from recognized seal haul-outs and rookeries (e.g., Point Sal, Purisima Point, Rocky Point), except in emergencies or for real-time security incidents (e.g., search-and-rescue, fire-fighting), which may require approaching pinniped haul-outs and rookeries closer than 1,000 ft (305 m).

(2) For missile and rocket launches, holders of Letters of Authorization must avoid, whenever possible, launches during the harbor seal pupping season of March through June, unless constrained by factors including, but not limited to, human safety, national security, or for space vehicle launch trajectory necessary to meet mission objectives.

(3) Vandenberg Air Force Base must avoid, whenever possible, launches which are predicted to produce a sonic boom on the Northern Channel Islands during harbor seal, elephant seal, California sea lion, and northern fur seal pupping seasons of March through June.

(4) If post-launch surveys determine that an injurious or lethal take of a marine mammal has occurred, the launch procedure and the monitoring methods must be reviewed, in cooperation with the National Marine Fisheries Service (NMFS), and appropriate changes must be made through modification to a Letter of Authorization, prior to conducting the next launch under that Letter of Authorization.

(5) Additional mitigation measures as contained in a Letter of Authorization.

(b) [Reserved]

### § 216.125 Requirements for monitoring and reporting.

(a) Holders of Letters of Authorization issued pursuant to §§ 216.106 and 216.127 for activities described in § 216.120(a) are required to cooperate with NMFS, and any other Federal, state or local agency with authority to monitor the impacts of the activity on marine mammals. Unless specified otherwise in the Letter of Authorization, the Holder of the Letter of Authorization must notify the Administrator, Southwest Region, NMFS, by letter or telephone, at least 2 weeks prior to activities possibly involving the taking of marine mammals. If the authorized activity identified in § 216.120(a) is thought to have resulted in the mortality or injury of any marine mammals or in any take of marine mammals not identified in § 216.120(b), then the Holder of the Letter of Authorization must notify the Director, Office of Protected Resources, NMFS, or designee, by telephone (301–713–2289), within 48 hours of the discovery of the injured or dead animal.

(b) Holders of Letters of Authorization must designate qualified, on-site individuals approved in advance by NMFS, as specified in the Letter of Authorization, to:

(1) Conduct observations on harbor seal, elephant seal, and sea lion activity in the vicinity of the rookery nearest the launch platform or, in the absence of pinnipeds at that location, at another nearby haul-out, for at least 72 hours prior to any planned launch occurring during the harbor seal pupping season (1 March through 30 June) and continue for a period of time not less than 48 hours subsequent to launching.

(2) For launches during the harbor seal pupping season (March through June), conduct follow-up surveys within 2 weeks of the launch to ensure that there were no adverse effects on any marine mammals,

(3) Monitor haul-out sites on the Northern Channel Islands, if it is determined by modeling that a sonic boom of greater than 1 psf could occur in those areas (this determination will be made in consultation with NMFS),

(4) Investigate the potential for spontaneous abortion, disruption of effective female-neonate bonding, and other reproductive dysfunction,

(5) Supplement observations on Vandenberg and on the Northern Channel Islands with video-recording of mother-pup seal responses for daylight launches during the pupping season,

(6) Conduct acoustic measurements of those launch vehicles that have not had sound pressure level measurements made previously, and

(7) Include multiple surveys each day that surveys are required that record the species, number of animals, general behavior, presence of pups, age class, gender and reaction to launch noise, sonic booms or other natural or human caused disturbances, in addition to recording environmental conditions such as tide, wind speed, air temperature, and swell.

(c) Holders of Letters of Authorization must conduct additional monitoring as required under an annual Letter of Authorization.

(d) Holders of Letters of Authorization must submit a report to the Southwest Administrator, NMFS, within 90 days after each launch. This report must contain the following information:

(1) Date(s) and time(s) of the launch,

(2) Design of the monitoring program, and

(3) Results of the monitoring program, including, but not necessarily limited to:

(i) Numbers of pinnipeds present on the haul-out prior to commencement of the launch,

(ii) Numbers of pinnipeds that may have been harassed as noted by the number of pinnipeds estimated to have entered the water as a result of launch noise,

(iii) The length of time pinnipeds remained off the haul-out or rookery,

(iv) Numbers of pinniped adults, juveniles or pups that may have been injured or killed as a result of the launch, and

(v) Behavioral modifications by pinnipeds that were likely the result of launch noise or the sonic boom.

(e) An annual report must be submitted at the time of renewal of the Letter of Authorization.

(f) A final report must be submitted at least 180 days prior to expiration of these regulations. This report will:

(1) Summarize the activities undertaken and the results reported in all previous reports,

(2) Assess the impacts at each of the major rookeries,

(3) Assess the cumulative impacts on pinnipeds and other marine mammals from Vandenberg activities, and

(4) State the date(s), location(s), and findings of any research activities related to monitoring the effects on launch noise and sonic booms on marine mammal populations.

**§ 216.126 Applications for Letters of Authorization.**

(a) To incidentally take marine mammals pursuant to these regulations, the U.S. citizen (as defined by § 216.103) conducting the activity identified in § 216.120(a) (30th Space Wing, U.S. Air Force) must apply for and obtain either an initial Letter of Authorization in accordance with § 216.127 or a renewal under § 216.128.

(b) The application must be submitted to NMFS at least 30 days before the activity is scheduled to begin.

(c) Applications for a Letter of Authorization and for renewals of Letters of Authorization must include the following:

(1) Name of the U.S. citizen requesting the authorization,

(2) A description of the activity, the dates of the activity, and the specific location of the activity, and

(3) Plans to monitor the behavior and effects of the activity on marine mammals.

(d) A copy of the Letter of Authorization must be in the possession of the persons conducting activities that may involve incidental takings of pinnipeds.

**§ 216.127 Letters of Authorization.**

(a) A Letter of Authorization, unless suspended or revoked, will be valid for a period of time not to exceed the period of validity of this subpart, but must be renewed annually subject to annual renewal conditions in § 216.128.

(b) Each Letter of Authorization will set forth:

(1) Permissible methods of incidental taking;

(2) Means of effecting the least practicable adverse impact on the species, its habitat, and on the availability of the species for subsistence uses (i.e., mitigation); and

(3) Requirements for mitigation, monitoring and reporting.

(c) Issuance and renewal of the Letter of Authorization will be based on a determination that the total number of marine mammals taken by the activity as a whole will have no more than a negligible impact on the affected species or stock of marine mammal(s).

**§ 216.128 Renewal of Letters of Authorization.**

(a) A Letter of Authorization issued under § 216.106 and § 216.127 for the activity identified in § 216.120(a) will be renewed annually upon:

(1) Notification to NMFS that the activity described in the application submitted under § 216.126 will be undertaken and that there will not be a substantial modification to the described work, mitigation or monitoring undertaken during the upcoming 12 months;

(2) Timely receipt of the monitoring reports required under § 216.125(d) and (e), and the Letter of Authorization issued under § 216.127, which has been reviewed and accepted by NMFS; and

(3) A determination by NMFS that the mitigation, monitoring and reporting measures required under §§ 216.124 and 216.125 and the Letter of Authorization issued under §§ 216.106 and 216.127, were undertaken and will be undertaken during the upcoming annual period of validity of a renewed Letter of Authorization.

(b) If a request for a renewal of a Letter of Authorization issued under §§ 216.106 and 216.128 indicates that a substantial modification to the described work, mitigation or monitoring undertaken during the upcoming season will occur, NMFS will provide the public a period of 30 days for review and comment on the request. Review and comment on renewals of Letters of Authorization are restricted to:

(1) New cited information and data indicating that the determinations made in this document are in need of reconsideration, and

(2) Proposed changes to the mitigation and monitoring requirements contained in these regulations or in the current Letter of Authorization.

(c) A notice of issuance or denial of a renewal of a Letter of Authorization will be published in the **Federal Register**.

**§ 216.129 Modifications of Letters of Authorization.**

(a) Except as provided in paragraph (b) of this section, no substantive modification (including withdrawal or suspension) to the Letter of Authorization by NMFS, issued pursuant to §§ 216.106 and 216.127 and subject to the provisions of this subpart shall be made until after notification and an opportunity for public comment has been provided. For purposes of this paragraph, a renewal of a Letter of Authorization under § 216.128, without modification (except for the period of validity), is not considered a substantive modification.

(b) If the Assistant Administrator determines that an emergency exists that poses a significant risk to the well-being of the species or stocks of marine mammals specified in§ 216.120(b), a Letter of Authorization issued pursuant to §§ 216.106 and 216.127 may be substantively modified without prior notification and an opportunity for public comment. Notification will be

published in the **Federal Register** within 30 days subsequent to the action.

**BILLING CODE 3510–22–S**

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

### 50 CFR Part 660

**[Docket No. 080226308–81499–01]**

**RIN 0648–AW50**

## Fisheries Off West Coast States; Highly Migratory Species Fisheries

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Proposed rule; request for comments.

**SUMMARY:** NMFS issues a proposed rule to initiate collection of a permit fee for vessel owners participating in commercial and charter recreational fishing for highly migratory species (HMS) in the Exclusive Economic Zone (EEZ) off the West Coast of California, Oregon, and Washington. The HMS permits are issued under implementing regulations for the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species (HMS FMP).

**DATES:** Comments must be received by January 20, 2009.

**ADDRESSES:** You may submit comments, identified by 0648–AW50, by any one of the following methods:

- Electronic Submissions: Submit all electronic public comments via the Federal eRulemaking Portal *http://www.regulations.gov*
- Fax: 562–980–4047, Attn: Chris Fanning, Permits Coordinator.
- Mail: Rodney R. McInnis, Regional Administrator, Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802 4213.

Instructions: All comments received are a part of the public record and will generally be posted to *http://www.regulations.gov* without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted to Rodney R. McInnis at the address listed above and by e-mail to *David__Rostker@omb.eop.gov*, or fax to (202) 395–7285.

**FOR FURTHER INFORMATION CONTACT:** Chris Fanning, Permits Coordinator, Sustainable Fisheries Division, NMFS, 562–980–4198.

**SUPPLEMENTARY INFORMATION:** On April 7, 2004, NMFS published a final rule to implement the HMS FMP (69 FR 18444) that included mandatory permit requirements at 50 CFR 660.707. At the time, there was no cost passed on to the vessel owners for the preparation and issuance of the permit. NMFS now proposes to charge an administrative fee for the recovery of HMS permit processing and issuance expenses. NMFS initiates rulemaking for this action pursuant to procedures established at 50 CFR 660.717(d) of the implementing regulations for the HMS FMP.

This proposed rule would specify that an application for an HMS permit, including the renewal of an existing permit, would include a fee payable by the vessel owner. The fee amount required will be determined in accordance with the NOAA Finance Handbook available at (*http://www.corporateservices.noaa.gov/~finance/FinanceHandbook.htm*) and specified on the application form. The fee amount is expected to be approximately $30-$40 at this time.

### Background

Section 303(b)(1) of the Magnuson-Stevens Fishery Conservation and Management Act (MSA), 16 U.S.C. 1853(b)(1), authorizes the inclusion of a requirement for permit fees in fishery management plans. Section 304(d) of the MSA specifies that such fees may not exceed the administrative costs of issuing the permits. Historically, only some fishery management plans have authorized the collection of permit fees, resulting in a set of inconsistent permit fee policies around the country. NMFS has issued a policy directive (No. 30–120, effective January 3, 2005 and renewed in 2007) to establish a more consistent agency permit program that recovers the expense of permit processing and issuance for all permits issued by NMFS to the extent authorized by law. Policy directive No. 30–120 is available at: *http://www.nmfs.noaa.gov/directives/*.

In this case, the original Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species, as approved by NOAA in 2004, already included authority to collect permit fees. NMFS proposes to exercise this authority through this rulemaking.

### Classification

NMFS has determined that this proposed rule is consistent with the HMS FMP and preliminarily determined that this proposed rule is consistent with the Magnuson-Stevens Fishery Conservation and Management Act and other applicable laws, subject to public review and comment.

Information collection requirements for HMS Permits have been previously approved by OMB under the Southwest Region Family of Forms (OMB Control Number 0648–0204). This approval is valid through April 30, 2010. An amendment to this approved collection of information has been submitted and is undergoing review by OMB. The amendment would incorporate the permit fee collection component of this proposed rule, if finalized. Public reporting burden for the payment of HMS permit fees is estimated to average 5 minutes or less per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection information.

Public comment is sought regarding: whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Send comments on these or any other aspects of the collection of information to NMFS Southwest Region at the **ADDRESSES** above, and by e-mail to *David__Rostker@omb.eop.gov* or fax to (202) 395–7285.

Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number.

This proposed rule has been determined to be significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The factual basis for this certification is as follows:

Approximately 1,772 HMS commercial and recreational charter vessels were permitted under the HMS FMP to operate off the U.S. West Coast in 2007, the most recent year for which annual data are available. These vessels are considered small business entities under NAICS Code 114111 with annual per vessel revenues under $4,000,000. Ex-vessel revenue for HMS landings on the West Coast in 2007 was approximately $21,000,000 which equates to an average of approximately $11,000 per vessel. The anticipated permit fee amount would be a very minor component of these vessels annual operating expenses which are estimated to be in the tens of thousands of dollars.

As a result, an initial regulatory flexibility analysis is not required and none has been prepared.

**List of Subjects in 50 CFR Part 660**

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: December 15, 2008.

**John Oliver,**

*Deputy Assistant Administrator for Operations, National Marine Fisheries Service.*

For the reasons set out in the preamble, 50 CFR part 660 is proposed to be amended as follows:

## PART 660—FISHERIES OFF THE WEST COAST STATES

1. The authority citation for part 660 continues to read as follows:

**Authority:** 16 U.S.C. 1801 *et seq.*

2. A new paragraph (e) is added to § 660.707 to read as follows:

**§ 660.707 Permits.**

* * * * *

(e) *Fees.* An application for a permit, or renewal of an existing permit under paragraph (b)(1) of this section will include a fee for each vessel. The fee amount required will be calculated in accordance with the NOAA Finance Handbook and specified on the application form.

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

**[Docket No. APHIS–2008–0135]**

### Notice of Request for Revision and Extension of Approval of an Information Collection; Animal Welfare

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Revision and extension of approval of an information collection; comment request.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request approval of a revision and extension of an information collection associated with Animal Welfare Act regulations for the humane handling, care, treatment, and transportation of certain animals by dealers, research facilities, exhibitors, carriers, and intermediate handlers.

**DATES:** We will consider all comments that we receive on or before February 17, 2009.

**ADDRESSES:** You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/fdmspublic/component/main?main=DocketDetail&d=APHIS-2008-0135* to submit or view comments and to view supporting and related materials available electronically.
- *Postal Mail/Commercial Delivery:* Please send two copies of your comment to Docket No. APHIS–2008–0135, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2008–0135.

*Reading Room:* You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

*Other Information:* Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov*.

**FOR FURTHER INFORMATION CONTACT:** For information on the Animal Welfare Act regulations, contact Dr. Barbara Kohn, Senior Staff Veterinarian, Animal Care, APHIS, 4700 River Road Unit 84, Riverdale, MD 20737; (301) 734–7833. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851–2908.

**SUPPLEMENTARY INFORMATION:**

*Title:* Animal Welfare.

*OMB Number:* 0579–0036.

*Type of Request:* Revision and extension of approval of an information collection.

*Abstract:* Under the Animal Welfare Act (AWA or Act) (7 U.S.C. 2131 *et seq.*), the Secretary of Agriculture is authorized to promulgate standards and other requirements governing the humane handling, housing, care, treatment, and transportation of certain animals by dealers, research facilities, exhibitors, carriers, and intermediate handlers. The Secretary of Agriculture has delegated the authority for enforcement of the AWA to the Animal and Plant Health Inspection Service (APHIS).

The regulations in 9 CFR parts 1 through 3 were promulgated under the AWA to ensure the humane handling, care, treatment, and transportation of regulated animals under the Act. The regulations in 9 CFR part 2 require documentation of specified information by dealers, research institutions, exhibitors, carriers (including foreign air carriers), and intermediate handlers. The regulations in 9 CFR part 2 also require that facilities that use animals for regulated purposes obtain a license or register with the U.S. Department of Agriculture (USDA). Before being issued a USDA license, individuals are required to undergo prelicense inspections; once licensed, a licensee must periodically renew the license.

To help ensure compliance with the AWA regulations, APHIS performs unannounced inspections of regulated facilities. A significant component of the inspection process is review of records that must be established and maintained by regulated facilities. The information contained in these records is used by APHIS inspectors to ensure that dealers, research facilities, exhibitors, intermediate handlers, and carriers comply with the Act and regulations.

Facilities must make and maintain records that contain official identification for all dogs and cats and certification of those animals received from pounds, shelters, and private individuals. These records are used to ensure that stolen pets are not used for regulated activities. Dealers, exhibitors, and research facilities that acquire animals from nonlicensed persons are required to have the owners of the animals sign a certification statement verifying the owner's exemption from licensing under the Act. Records must also be maintained for animals other than dogs and cats when the animals are used for purposes regulated under the Act.

Research facilities must also make and maintain additional records for animals covered under the Act that are used for teaching, testing, and experimentation. This information is used by APHIS personnel to review the research facility's animal care and use program.

APHIS needs the reporting and recordkeeping requirements contained in 9 CFR part 2 to enforce the Act and regulations. APHIS also uses the collected information to provide a mandatory annual report of animal welfare activities to Congress.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

This notice includes a description of the information collection requirements currently approved by OMB under numbers 0579–0036 (Animal Welfare), 0579–0247 (Transportation of Animals on Foreign Air Carriers [part 2 requirements]), and 0579–0254 (Inspection, Licensing, and Procurement of Animals). After OMB approves and

combines the burden for the three collections under a single collection (number 0579–0036), the Department will retire numbers 0579–0247 and 0579–0254.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 0.9737631 hours per response.

*Respondents:* Dealers, research facilities, exhibitors, carriers, and intermediate handlers; persons exempt from licensing under the AWA.

*Estimated annual number of respondents:* 7,402.

*Estimated annual number of responses per respondent:* 13.145906.

*Estimated annual number of responses:* 97,306.

*Estimated total annual burden on respondents:* 94,753 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 15th day of December 2008.

**Kevin Shea,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

- *Postal Mail/Commercial Delivery:* Please send two copies of your comment to Docket No. APHIS–2008–0130, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2008–0130.

*Reading Room:* You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

*Other Information:* Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov.*

**FOR FURTHER INFORMATION CONTACT:** For information on regulations associated with the National Poultry Improvement Plan, contact Mr. Andrew Rhorer, Senior Coordinator, National Poultry Improvement Plan, VS, APHIS, 1498 Klondike Road, Suite 101, Conyers, GA 30094; (770) 922–3496. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851–2908.

**SUPPLEMENTARY INFORMATION:**

*Title:* National Poultry Improvement Plan.

*OMB Number:* 0579–0007.

*Type of Request:* Revision and extension of approval of an information collection.

*Abstract:* The Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is authorized to, among other things, administer the National Poultry Improvement Plan (NPIP), the primary purpose of which is to protect the health of the U.S. poultry population. NPIP is a voluntary Federal-State-industry cooperative program for the improvement of poultry flocks and products through disease control techniques. Participation in all Plan programs is voluntary, but flocks, hatcheries, and dealers of breeding poultry must first qualify as ''U.S. Pullorum-Typhoid Clean'' as a condition for participation in the other Plan programs. The NPIP regulations are contained in 9 CFR parts 56, 145, 146, and 147.

In administering the Plan, APHIS requires a number of information collection activities and forms, including VS Forms 1–23/1–23A, Appraisal and Indemnity Claim for Animals Destroyed or Materials Destroyed/Continuation Sheet; VS Form 9–3, Report of Sales of Hatching Eggs, Chicks, and Poults; VS Form 9–4, Summary of Breeding Flock, Table-Egg Layer Flocks, Meat-Type Chicken and Turkey Slaughter Plants Participation; VS Form 9–5, Report of Hatcheries, Dealers, and Independent Flocks, Table-Egg Producers, Meat-Type Chicken and Turkey Slaughter Plants Participating in the NPIP; VS Form 9–6, Report of Salmonella Isolations to NPIP Official State Agencies; VS Form 9–7, Investigation of Salmonella Isolations in Poultry; VS Form 9–8, Flock Inspection and Check Testing Report; VS Form 9–9, Hatchery Inspection Form; VS Form 10–3, Request for Salmonella Serotyping; banding of sentinel birds for identification prior to flock vaccination; memorandums of understanding; recordkeeping; and printing and mailing to States, upon request, of computerized printouts of interstate sales by hatchery operators who ship large numbers of small chick orders.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

This notice includes a description of the information collection requirements currently approved by OMB under numbers 0579–0007 (National Poultry Improvement Plan) and 0579–0305 (Low Pathogenic Avian Influenza; Voluntary Control Program and Payment of Indemnity). After OMB approves and combines the burden for both collections under a single collection (number 0579–0007), the Department will retire number 0579–0305.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 0.6159046 hours per response.

*Respondents:* Flock owners, breeders, hatchery operators, commercial table-egg layer producers, meat-type chicken slaughter plants, turkey slaughter plants, and State veterinary medical officers.

*Estimated annual number of respondents:* 12,222.

*Estimated annual number of responses per respondent:* 13.772541.

*Estimated annual number of responses:* 168,328.

*Estimated total annual burden on respondents:* 103,674 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 15th day of December 2008.

**Kevin Shea,**

### Animal and Plant Health Inspection Service

**[Docket No. APHIS–2008–0134]**

### Notice of Request for Extension of Approval of an Information Collection; Revision of Fruits and Vegetables Import Regulations

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Extension of approval of an information collection; comment request.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with regulations to allow importation of new fruits and vegetables into the United States.

**DATES:** We will consider all comments that we receive on or before February 17, 2009.

**ADDRESSES:** You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/fdmspublic/component/main?main=DocketDetail&d=APHIS-2008-0134* to submit or view comments and to view supporting and related materials available electronically.
- *Postal Mail/Commercial Delivery:* Please send two copies of your comment to Docket No. APHIS–2008–0134, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2008–0134.

*Reading Room:* You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

*Other Information:* Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov*.

**FOR FURTHER INFORMATION CONTACT:** For information on the importation of new fruits and vegetables, contact Ms. Donna West, Senior Import Specialist, Commodity Import Analysis and Operations, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1231; (301) 734–8758. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS* Information Collection Coordinator, at (301) 851–2908.

**SUPPLEMENTARY INFORMATION:**

*Title:* Revision of Fruits and Vegetables Import Regulations.

*OMB Number:* 0579–0293.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* As authorized by the Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture may prohibit or restrict the importation, entry, exportation, or movement in interstate commerce of any plant, plant product, biological control organism, noxious weed, means of conveyance, or other article if the Secretary determines that the prohibition or restriction is necessary to prevent a plant pest or noxious weed from being introduced into or disseminated within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service, which administers regulations to implement the PPA.

The regulations in Subpart—Fruits and Vegetables (7 CFR 319.56–1 through 319.56–47) allow a number of fruits and vegetables to be imported into the United States, under specified conditions, from certain parts of the world. The regulations in §§ 319.56–4 and 319.56–5 provide for a notice-based process for recognizing pest-free areas and for approving the importation of certain new commodities that, based on the findings of a pest risk analysis, can be safely imported into the United States subject to designated phytosanitary measures. Importation of new commodities under this process requires the use of information collection activities, including the issuance of permits and phytosanitary certificates.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as

affected agencies) concerning this information collection activity. These comments will help us:

(1) Evaluate whether the information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 0.9615384 hours per response.

*Respondents:* Importers, exporters, and foreign national plant protection organizations.

*Estimated annual number of respondents:* 960.

*Estimated annual number of responses per respondent:* 2.16666.

*Estimated annual number of responses:* 2,080.

*Estimated total annual burden on respondents:* 2,000 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 15th day of December 2008.

**Kevin Shea,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

**[Docket No. APHIS–2008–0084]**

### Notice of Decision to Issue Permits for the Importation of Fresh White Asparagus From Senegal Into the Continental United States

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Notice.

**SUMMARY:** We are advising the public of our decision to begin issuing permits for the importation into the continental United States of fresh white asparagus from Senegal. Based on the findings of a pest risk analysis, which we made available to the public for review and comment through a previous notice, we believe that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh white asparagus from Senegal.

**DATES:** *Effective Date:* December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Dr. Shirley Wager Pagé, Branch Chief, Commodity Import Analysis and Operations Staff, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737–1231; (301) 734–8758.

**SUPPLEMENTARY INFORMATION:** Under the regulations in ''Subpart-Fruits and Vegetables'' (7 CFR 319.56 through 319.56–47, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into and spread within the United States.

Section 319.56–4 of the regulations contains a performance-based process for approving the importation of commodities that, based on the findings of a pest risk analysis, can be safely imported subject to one or more of the designated phytosanitary measures listed in paragraph (b) of that section. Under that process, APHIS publishes a notice in the **Federal Register** announcing the availability of the pest risk analysis that evaluates the risks associated with the importation of a particular fruit or vegetable. Following the close of the 60-day comment period, APHIS may begin issuing permits for importation of the fruit or vegetable subject to the identified designated measures if: (1) No comments were received on the pest risk analysis; (2) the comments on the pest risk analysis revealed that no changes to the pest risk analysis were necessary; or (3) changes to the pest risk analysis were made in response to public comments, but the changes did not affect the overall conclusions of the analysis and the Administrator's determination of risk.

In accordance with that process, we published a notice [1] in the **Federal Register** on August 18, 2008 (73 FR 48189–48190, Docket No. APHIS–2008–0084), in which we announced the availability, for review and comment, of a pest risk analysis that evaluates the risks associated with the importation into the continental United States of fresh white asparagus from Senegal. We solicited comments on the notice for 60 days ending on October 17, 2008. We received one comment by that date, from a State department of agriculture. The commenter agreed that the mitigation measures described in the pest risk analysis would be adequate.

Therefore, in accordance with the regulations in § 319.56–4(c)(2)(ii), we are announcing our decision to begin issuing permits for the importation into the continental United States of fresh white asparagus from Senegal subject to the following phytosanitary measures:

- Each shipment of white asparagus must be accompanied by a phytosanitary certificate bearing the following additional declaration: ''The white asparagus in this consignment has been inspected and found free of *Cochliobolus pallescens* (*Curvulaia pallescens*).'' The phytosanitary certificate with the additional declaration must be issued by the national plant protection organization of Senegal.
- Each shipment is subject to inspection upon arrival in the United States.
- The white asparagus must be a commercial consignment as defined in 7 CFR 319.56–2.

These conditions will be listed in the Fruits and Vegetables Import Requirements database (available at *http://www.aphis.usda.gov/favir*). In addition to those specific measures, the fresh white asparagus will be subject to the general requirements listed in § 319.56–3 that are applicable to the importation of all fruits and vegetables.

**Authority:** 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 15th day of December 2008.

## DEPARTMENT OF AGRICULTURE

### Forest Service

### Klamath National Forest, California, Hi-Grouse Project

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The USDA Forest Service is preparing an Environmental Impact Statement (EIS) for the Hi-Grouse Project to reduce fuel hazard and restore forest health on the Goosenest Ranger District of the Klamath National Forest.

**DATES:** Comments concerning the scope of the analysis postmarked or received by 30 days after the publication of this notice are assured of being considered in the environmental analysis. The Draft Environmental Impact Statement is expected to be published in July 2009 and the Final Environmental Impact Statement is expected December 2009.

**ADDRESSES:** Send written comments to Goosenest District Ranger, Attn: Hi-Grouse Project, Klamath National Forest, 37805 Highway 97, Macdoel, CA 96058. You may also send electronic comments to the project e-mail box: *comments-pacificsouthwest-klamath-goosenest@fs.fed.us*.

**FOR FURTHER INFORMATION CONTACT:** District NEPA Planner, Wendy Dobrowolski at 530–398–5767 or Interdisciplinary Team Leader Lois Pfeffer at 559–359–7023 if you have questions, concerns or suggestions relating to this proposal.

**SUPPLEMENTARY INFORMATION:** The Hi-Grouse project area is located south of the Four Corners snowmobile trailhead and encompasses approximately 7,430 acres in the southeast portion of the Goosenest Ranger District. The legal description for the project area is all or portions of: T44N R2E Sections 23, 25–28, 32–36; T43N R2E, Sections 1–4, 9–13, T44N R3E Section 31, T43N R3E, Sections 6, 7, and 18 Mt. Diablo Meridian, Siskiyou County, California. State agencies, tribal governments, environmental groups, and local elected officials collaborated with the Forest Service early in the process to develop this project.

**Management Direction**

The project area includes a late-successional reserve, a special interest area and portions of the snowmobile trail system. Plans, policies and regulations that provide management direction for this project include (not limited to): Klamath National Forest Land and Resource Management Plan of 1995 (includes Standards and Guidelines from the Northwest Forest Plan); Goosenest Adaptive Management Area Ecosystem Analysis; Section 7(a)(1) of the Endangered Species Act; Healthy Forest Restoration Act; Clean Water Act; Clean Air Act; National Fire Plan; and Final Recovery Plan for the Northern Spotted Owl.

The project is designed to be consistent with all applicable policies and plans. The type of thinning proposed follows recommendations from the Late-Successional Reserve Assessment and Goosenest Adaptive Management Area analysis. The project is within the Fire-Prone Landscape area identified in the Northern Spotted Owl Recovery Plan. The entire project area (7,432 acres) lies within the Goosenest Adaptive Management Area and includes the following Management Areas (MA) as defined in the Klamath National Forest Land and Resource Management Plan of 1995 (Forest Plan): 4,635 acres General Forest MA 17; 2,574 acres Partial Retention Visual Quality Objective MA 15; 152 acres Special Habitat Late Successional Reserve MA 5; 71 acres Special Interest Area MA 7. There are no Riparian Reserves present in the project area.

**Background**

The Goosenest Adaptive Management Area was established under the Northwest Forest Plan (NWFP) with an emphasis on ''Development of ecosystem management approaches, including use of prescribed burning and other silvicultural techniques, for management of pine forests, including objectives related to forest health, production and maintenance of late-successional forest and riparian habitat, and commercial timber production'' (NWFP Standard & Guideline D–14). This area presents challenges typical of east-side forests that have experienced marked departures from historic species composition, density, and disturbance regimes.

The major influences on this area over the last 100 years are railroad logging beginning around 1900, grazing, fire suppression, and selective cutting prescriptions over the last several decades in the true fir dominated stands. Early logging removed the majority of the original pine forest and left white fir. The removal of pine seed sources, combined with livestock grazing and post-logging fires created ideal conditions for germination of true firs, which then became established and grew during the relatively warm and wet early half of the 20th century. Selective logging in the true fir types has lead to the introduction and spread of annosum root disease, which is now a major factor in stand health. Insect- and disease-related mortality is occurring in true firs and ponderosa pine. Mature lodgepole pine stands are continuing to experience heavy stand-replacing mortality due to the mountain pine beetle, and these high beetle populations are now infesting ponderosa pine within the white fir-pine type.

Many of the stands in the project area are overstocked and heavy mortality is expected to continue. Much of the project area is severely departed from the historic fire return intervals having missed several fire cycles. An overview of the existing and desired conditions broken into general stand types is provided below, as well as the need for change.

*White Fir/Pine Community*

*Desired Condition:* Pine-dominated stands that can withstand endemic level of insects and disease and are resilient in the event of a wildfire. White fir is a small component of the stands and generally found in moist pockets and north facing slopes.

*Existing Condition:* White fir has encroached, with the absence of natural fire, turning what was once a ponderosa pine dominated system into a white fir dominated stand too dense for ponderosa pine to withstand. Active bark beetle infestations have killed much of the pine, and what remains is highly susceptible to attack. White fir is not well suited for the site and limited to moist pockets or north facing slopes. The S-type of annosus root disease has been found in several of the stands, further reason that white fir will not be sustainable on these transitions zone sites.

*Need for Change:* White fir needs to be significantly reduced on these sites. Areas with extensive pine mortality may need to be planted with pine to achieve the desired condition. Fuel treatments are needed to reduce heavy fuel loadings.

*Mixed Conifer*

*Desired Condition:* Although not dominating most of these stands, ponderosa pine is a significant and sustainable component in these areas. These stands have a diverse assortment of diameter and age classes, high structural diversity, and old growth characteristics. Spotted owl and goshawk have ample habitat. Small openings provide for understory vegetation. These stands can withstand endemic level of insects and disease. The threat of stand-replacing wildfires has been reduced due to surrounding fuels treatments, and treatments within

these stands have improved localized fuel conditions.

*Existing Condition:* Many of these stands are overstocked, and high white fir densities are having negative impacts on the high elevation ponderosa pine. Many stands are growing in such dense conditions that individual trees are unable to develop large primary limbs and full crowns, and diameter growth is slowed. Important features for future spotted owl and goshawk habitat. Fuel loadings are extremely high in many areas where the white fir is beginning to self-thin.

*Need for Change:* Overall stand density needs to be reduced to sustainable levels. Future spotted owl and goshawk nesting and foraging habitat needs to be brought on-line by culturing trees in younger stands to increase rates of diameter growth and to retain full crowns. White fir encroachment needs to be removed in and around pockets of ponderosa pine.

*Lodgepole*

*Desired Condition:* In the lodgepole stands young, resilient, and overall healthy trees are desired. Species diversity is increased by the presence of white fir, ponderosa pine and aspen in these stands. Increasing aspen is desired to increase species diversity. Initial attack forces will be able to contain wildfires using fuelbreaks along roads as anchors.

*Existing Condition:* In dense, contiguous tracts of lodgepole dominated stands, growth is stagnating and mortality from disease and beetle attacks are increasing. These stands are loaded with fuels, near areas with valuable wildlife habitat. Mixed among some of the lodgepole are individual trees and pockets of ponderosa pine, white fir, and aspen.

*Need for Change:* To prevent the current and eminent tree mortality from adding to the existing fuel loadings these trees need to be removed. Biomass entries may be necessary to reduce the residual densities. To promote the expansion of aspen in areas where aspen stands exist, adjacent competing conifers should be removed.

**Purpose and Need for Action**

The purpose and need for action is to address the major gaps between desired conditions, described in the Forest Plan for the Goosenest Adaptive Management Area (AMA) and the Northern Spotted Owl Recovery Plan, and the current conditions in the project area.

The purpose and need components identified for this project area are listed below:

—Mimic natural processes through management actions to promote healthy ecological conditions and replicate the role of natural disturbances.
—Decrease stand density over most of the project area to reduce disease and insects to endemic levels, and provide for resilient stocking levels of desired species.
—Increase the proportion of ponderosa pine, sugar pine, and white pine on suitable sites to mimic historical stand conditions.
—Release understory in lodgepole pines stands to increase stand diversity and remove dead and soon-to-be dead trees to reduce current and future fuel accumulations.
—Treat heavy fuel loadings to reduce the threat of stand-replacing wildfire and mimic historical fire regimes of low intensity fire behavior, protect older forest habitat components in the project area, and provide for firefighter safety.
—Increase stand diversity to enhance overall vegetative diversity.
—Promote and maintain sustainable owl habitat elements in the Goosenest AMA and the Late Successional Reserve MAs by promoting resiliency to fire, insect and disease on the landscape and by culturing young trees to increase growth and crowns for future suitable habitat.
—Maintain sustainable nesting and foraging habitat in the goshawk territories. In meeting the needs above, the proposed action must also achieve the following purposes:
—Maintain aesthetic values especially along sensitive routes and areas seen from high places.
—Identify appropriate monitoring (learning) objectives related to project activities in line with the Goosenest AMA.

**Proposed Action**

The Goosenest Ranger District of the Klamath National Forest proposes to restore ponderosa pine and mixed conifers, thin and use fuel reduction techniques on approximately 5,085 acres within the Goosenest AMA. The proposed actions were designed to address the purpose and need components and move towards the desired conditions while meeting plan standards and guidelines. This project involves altering stand density, structure, and species compositions, and the abatement of fuels generated from proposed activities as well as treatment of pre-existing fuel accumulations. The following activities are included in the proposed action. Some treatments overlap such as thinning followed with fuels abatement and underburning; and fuel treatment corridors overlapping other treatments.

*Silvicultural Prescriptions and Objectives*

*Thinning from Below (2,682 acres)*—Thinning from below is a thinning method that removes the subordinate trees in the stand, i.e., those trees that are smaller and shorter than the trees forming the upper canopy. Stand density is reduced, allowing the trees with the best crown development and size to utilize the new growing space and increase growth and ability to withstand fire and insects and disease. Species composition can also be altered by favoring some species to be left over others. In this project, the objectives are to improve overall stand vigor, favor the largest fire-resistant trees and species, and reduce the potential for crown fire through removal of trees that act as fire ladders and that could sustain a crown fire. The percentage of ponderosa pine, sugar pine, and white pine will increase in the residual stand. Thinning intensity will vary and areas will be left un-thinned to maintain stand diversity. Treatment of conifer stumps with a fungicide (trade name Sporax) to prevent colonization and spread of the conifer root disease *Heterobasidion annosum*. The prescription will include small openings of ¼ to 1 acre in size in up to 15 percent of a treated stand. Fuels overall abatement treatments include: Yarding tree tops, pile and burning, lop and scatter, and biomass removal options. Overall abatement treatments will be carried out on 2,497 acres of the thinned acres. Additional fuels treatments include mechanical mowing on 309 acres and underburning of 1,742 acres in stands that have larger amounts of fire-resistant species.

*Ponderosa Pine/Mixed Conifer Restoration and Re-establishment (1,375 acres)*—This prescription involves thinning to favor ponderosa, sugar, and white pine as the residual tree species in stands where white fir and red fir are heavily infested with annosum root disease and planting of pines where they are lacking. Post-treatment conditions will vary from thinned patches dominated by the largest pines to thinned patches dominated by white fir to areas of open pine forest. The larger areas of open pine and areas dominated by white fir will be planted to ponderosa pine, as well as rust-resistant sugar pine and white pine on the appropriate sites. The prescription will include un-thinned areas and small openings of ¼ to 1 acre in size in up to 15 percent of a treated stand. Treatment of conifer stumps with a

fungicide (trade name Sporax) to prevent colonization and spread of the conifer root disease *Heterobasidion annosum*. Fuels treatments include overall abatement on all 1,375 acres with mechanical mowing on 107 acres followed with underburning of 939 acres in stands that have larger amounts of fire-resistant species. The objectives of this prescription are to restore historic species composition and stand structure to areas that have lost most of the historic pine species and are now dominated by diseased white fir.

*Lodgepole Pine Thinning/Fuels Reduction (428 acres)*—This prescription will remove remnant diseased lodgepole pines, pile fuels and thin the understory to promote the existing true firs and pine. The objective of this prescription is to move beetle-killed lodgepole stands towards an open stand structure with small trees of mixed species composition (including white fir, ponderosa pine, and lodgepole pine), that will be more resistant to mountain pine beetle mortality in the future. Treatment of stumps, 8 inches in diameter and larger, from live and recently dead conifers with a fungicide (trade name Sporax) would be done after tree cutting to prevent colonization and spread of the conifer root disease *Heterobasidion annosum*. Overall abatement treatments and mechanical mowing are planned on all 428 acres.

*Plantation Thinning (99 acres)*—Existing plantations will be thinned to promote growth, future fire resistance, and a mixed species composition with emphasis on ponderosa pine. Since ponderosa pine is generally the most under-represented species in these plantations due to natural seeding of lodgepole and true firs, it will be favored to be left over other species.

*Fuels Prescriptions and Objectives*

*Overall Abatement (4,442 acres)*—Overall abatement includes yarding tree tops, pile and burning, lop and scatter, and biomass removal treatment options.

*Yarding Tree Tops*—In all silvicultural prescriptions that involve tree removal, tree tops would be moved to the landing for treatment (reoffer as forest by products or burning). This treatment would reduce fuels levels as a result of operations.

*Biomass Removal*—Trees (generally less than 12''diameter breast height) would be removed in thinning operations to reduce potential crown fire behavior, improve species composition and reduce competition. Small diameter tree boles may be processed into bundles and removed.

*Piling and Burning*—Following silviculture treatment, piling and burning will be used in fuels treatment corridors or where post-treatment fuels present a fire hazard or may lead to difficulty carrying out prescribed underburning. It is not anticipated that this method will be used often since whole tree yarding will be done where possible.

*Lopping Scattering*—This method will be used primarily to treat slash generated in thinning of plantations. Objective will be to reduce height and continuity of fuels and promote faster decomposition. It is not anticipated that this method will be used often since mechanical treatment is a standard operating procedure. In areas that are inaccessible or unsafe for mechanized equipment, this treatment is an alternative.

*Mechanical Mowing (844 acres)*—Mowing will occur where shrubs and seedling and saplings are major determinants of fire behavior, as well as in lodgepole stands that are now dominated by small trees. Objectives will be to reduce shrub density and height and density of small trees to modify fire behavior.

*Underburning (2,723 acres)*—In some sites following thinning treatments, controlled underburning will be used to reduce natural fuel loads, past activity slash, shrubs and white fir understory trees, while increasing herbaceous species and encouraging pine regeneration by creating areas of exposed mineral soil. Where underburning is prescribed as a stand-alone treatment, cutting and piling of ladder fuels and mowing of brush could be carried out to reduce potential flame lengths and scorch to residual trees. Underburning will not be prescribed where the residual stand will be dominated by true firs; in these instances, fuels treatments will emphasize mechanical methods.

*Fuels Treatment Corridors (Approximately 13 miles/480 acres)*—This prescription was identified along major road corridors and certain access roads for fire control. Treatments will consist of small tree thinning and/or removal, pruning, mowing of brush, and hand or machine piling and burning of fuels concentrations. Treatments will generally extend 150 feet either side of the road, but may extend farther depending on slope and vegetation type.

*Road Maintenance and Temporary Roads*

*Road Maintenance (as needed)*—Access into the Hi-Grouse project area will be by a series of County and National Forest System (NFS) roads, near the community of Macdoel, California. The main NFS roads that serve the project area are: 15, 77, 44N80, 44N62, and 44N54.

Existing NFS roads within the project area received periodic clearing, blading and drainage structure maintenance in the 2007 and 2008 seasons. Roads needed for the project will be reassessed prior to and during activities to determine if maintenance is needed and may require light maintenance to meet project requirements, generally consisting of spot rocking, grading, and re-establishing drainage structures. There will be no new roads constructed or added to the Forest road system. All aggregate rock and water source requirements for this project can be met from existing sources on National Forest lands. No new sources will be developed.

*Temporary Roads*—Approximately 4.0 miles of temporary road will be needed to access thinning units, of which 3.25 miles will be on non-system roads from previous harvest entries. These roads will be decommissioned upon project completion. Decommissioning could include all or a combination of the following activities: (1) Placing earth or log mound barriers to prevent vehicle traffic; (2) subsoiling and outsloping the road surface; (3) installing water bars and other drainage structures; and (4) mulching with native materials (logging slash) or certified weed free straw.

New temporary roads will be located and constructed to design standards that minimize ground disturbance, protect resources, and provide safe transportation at the least possible cost.

Existing non-system roads are generally old jeep roads or temporary roads constructed for past harvest activities. Road reconstruction, as defined by Forest Service Manual 7700, will not be required.

*Monitoring*—Forest Plan monitoring (including Best Management Practices) will be conducted in conjunction with other Forest projects.

Tractor units will be monitored to ensure soil disturbance is within established guidelines. Northern spotted owl surveys will be conducted through the life of the project. As part of the Forest noxious weed program, inventory noxious weeds for 3 years after the project is completed or as long as it takes the vegetation to recover from project disturbance (as measured by ground duff cover and forb and shrub layer cover).

Upon completion of project activities, monitoring will be conducted to assess the positive or negative effects of fuels treatments. Monitoring will be completed by the Forest and/or interested stakeholders (multi-party

monitoring) and will be subject to available funding and the ability of stakeholders to contribute funds or in-kind services. The immediate (1–3 years post-project) and long-term effects on landscape attributes will be monitored using a fire effects monitoring and inventory system (e.g., FIREMON). Monitoring will be used to (1) Document basic information during different phases of the project, (2) establish changes in attributes and trends through time, (3) analyze short and long-term fire effects, and (4) determine if project objectives related to fuels were met. Monitoring will be conducted according to the Klamath National Forest Fuels and Fire Effects Monitoring Guide (USDA Forest Service 2007). Project data will be collected and input into the monitoring database at intervals established by the project monitoring plan.

**Lead and Cooperating Agencies**

The USDA Forest Services is the lead agency.

**Responsible Official**

The Responsible Official for this project is the Forest Supervisor for the Klamath National Forest, Patricia A. Grantham, 1312 Fairlane Road, Yreka, California 96097.

**Nature of Decision To Be Made**

The responsible official for this proposal is the forest supervisor. Based on the analysis in the final EIS, the responsible official will make the following decisions and document them in a record of decision: (1) Whether to treat stands within the project area as proposed, or in what manner; and (2) What project design features should be applied.

**Scoping Process**

How to Comment: Opinions, values and suggestions for the general management direction for the Klamath National Forest will be noted, but will not be as useful to the ID Team as comments that are specific to the proposal. The ID Team is looking specifically for comments that discuss any impacts the proposed actions might have, especially to landowners, minorities, the local economy, recreational use and wildlife habitat.

How Your Comments Are Used: Once the ID Team has read your comments and identified the significant issues, they will begin to develop alternatives to the proposed actions. After they develop the alternatives, the next step is to analyze the environmental effects of those alternatives, the proposed actions and also the ''No Action'' alternative.

The alternatives, analysis of effects and related discussion will be presented to the public in the draft EIS, which is expected to be available for review in the summer of 2009. Following public review of the draft EIS, the ID Team will use the comments received to revise the document into the final EIS. Based on the results of environmental analysis and public input, the decision maker may issue a decision in a document titled the ''Record of Decision''.

*Contact Information and Schedule*

Scoping comments postmarked or received by 30 days after the publication of the Notice of Intent in the **Federal Register** are assured of being considered in the environmental analysis. Please note that all input received during project planning is a matter of public record; therefore names and addresses of participants cannot be kept confidential. You may also submit an oral comment over the telephone, in person (during normal business hours). Written comments should be addressed to: Goosenest District Ranger, Klamath National Forest, Attn: Hi-Grouse Project, 37805 Hwy 97, Macdoel, California 96058.

You may also send electronic comments (.doc, .pdf, .rtf) to the District project e-mail box: *comments-pacificsouthwest-klamath-goosenest@fs.fed.us*.

A public meeting was held in the fall of 2007 to introduce interested parties to the project. The proposed treatments were field verified during the summer of 2008 and are similar to those discussed during the fall 2007 meeting. Feel free to contact the District office to arrange a meeting, or if you have any questions about submitting a comment, please contact Lois Pfeffer, ID Team leader at 559–359–7023 or Wendy Dobrowolski, District NEPA Planner, at the Goosenest Ranger District 530–398–5767.

**Preliminary Issues**

Effects to Northern Spotted Owl—During the development of the proposed action, the U.S. Fish and Wildlife Service designated approximately 1,751 acres of Critical Habitat for northern spotted owl within the Hi-Grouse project area. This new designation was not considered in the development of the proposed action and approximately 830 acres of the designated Critical Habitat is identified for forest restoration and fuels treatments. The newly designated critical habitat is depicted on the scoping map and will be considered in the development of alternatives and future resource protection measures.

Pine and mixed conifer restoration and re-establishment treatments would remove some current northern spotted owl habitat that is not expected to persist in the long term due to insects and disease. Pine and mixed conifer restoration treatments would maintain and promote largest, healthy remaining trees and re-establish historic species composition. Thinning treatments would increase sustainability of forest cover and northern spotted owl habitat over the long term by increasing the capacity of the stands to resist effects of drought, fire, insects and disease. Thinning and fuel reduction treatments would result in short-term impacts to some important northern spotted owl habitat elements, such as canopy cover and down woody debris. Treatments are designed to promote and maintain key elements of habitat (especially large fire-resistant trees) and restore historic forest conditions.

**Comment Requested**

This notice of intent initiates the scoping process which guides the development of the environmental impact statement. Your participation at this stage of the project is essential for the Interdisciplinary (ID) Team to develop effective, issue-driven alternatives and mitigations, as needed, to the proposed action. For the purposes of this EIS, an issue is defined as a point of discussion, dispute or debate about environmental effects of this proposed action. Issues are often identified by reviewing comments received from: the general public, Tribal governments, within the agency (including ID Team members), other federal agencies, state, county, and local governments and agencies. After the ID Team has reviewed all the comments received and identified the issues, they will begin to develop alternatives to the proposed actions that are based on any significant issues that were identified. You can help the Hi-Grouse ID Team develop effective alternatives by submitting your project-specific comments.

*Early Notice of Importance of Public Participation in Subsequent Environmental Review:* A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact

statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

**Authority:** 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21.

Dated: December 11, 2008.

## DEPARTMENT OF AGRICULTURE

### Forest Service

### Shasta-Trinity National Forest, California; Pettijohn LSR Habitat Improvement and Fuels Reduction Project

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Shasta-Trinity National Forest (STNF) will prepare an environmental impact statement (EIS) to document and publicly disclose the environmental effects of implementing a hazardous fuels reduction project on approximately 3200 acres of National Forest System lands. Located within an area known as the Pettijohn portion of the Clear Creek Late Successional Reserve (LSR) the proposed project would provide the LSR with enhanced protection from catastrophic wildfire, increased fire fighter safety and habitat improvement for wildlife species associated with old-growth ecosystems, including the Threatened northern spotted owl, *Strix occidentalis caurina*. The proposal includes thinning trees from below in overcrowded stands and in proposed Fuel Management Zones (FMZs). Most thinning would be accomplished through commercial timber harvest of sawtimber and biomass (chips). Road decommissioning is proposed on approximately 2.3 miles of road and road reconstruction is proposed on approximately 2 miles of existing roads to improve drainage and reduce erosion. No new system roads would be constructed. The Pettijohn LSR Habitat Improvement and Fuels Reduction Project is located south of Trinity Lake near the communities of Lewiston and Weaverville, California in sections 5–9, 16–21, 28, 32, and 33 in T34N, R8W; sections 48, 17, and 18 in T33N, R8W; and sections 1, 2, 9, 10, 12, 13, and 24 in T34N, R9W (Mt. Diablo Meridian).

**DATES:** Comments concerning the scope of the analysis must be received by no later than 30 days from date of publication of this notice in the **Federal Register**. The draft environmental impact statement is expected in May 2009 and the final environmental impact statement is expected in November 2009.

**ADDRESSES:** Send written comments to: Pettijohn Project c/o Thomas A. Quinn, Shasta-Trinity National Forest, Weaverville Ranger District, P.O. Box 1190, Weaverville, CA 96093, (530) 623–1758. Comments may also be sent via e-mail to: *comments-pacificsouthwest-shasta-trinity@fs.fed.us.*

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, anonymous comments will not provide the respondent with standing to appeal the subsequent decision.

**FOR FURTHER INFORMATION CONTACT:** Thomas A. Quinn, Wildlife Biologist, Shasta-Trinity National Forest, Weaverville Ranger District, P.O. Box 1190, Weaverville, CA 96093, (530) 623–1758, taquinn@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

**SUPPLEMENTARY INFORMATION:**

#### Purpose and Need for Action

The purpose of the proposed action is to enhance and protect habitat for wildlife species associated with old-growth forest ecosystems, particularly the northern spotted owl (NSO) in the Clear Creek LSR.

The Clear Creek LSR is currently dominated by dense, mature (approximately 80 to 110 years old) conifer forest and contains less than the desired amount of old-growth habitat. A combination of historic logging and fire suppression has resulted in dense forests, tree species compositions, age-class structures and fuel conditions that are highly conducive to crown fires and reduced fire suppression effectiveness. The growth of potential and existing large tree components has been slowed and their natural resistance to mortality from pathogens, insects and fire has been endangered as a result of dense forest conditions. Because of existing ladder fuels, there is a high probability that a fire start within or adjacent to the project area would result in the loss of existing and developing old-growth habitat in the LSR. Because of fuels conditions, the use of prescribed fire by itself to achieve lower fuel loading is currently not safe or feasible.

Coordinated analyses conducted by the Forest Service and the U.S. Fish and Wildlife Service concluded that current habitat conditions in the Clear Creek LSR are insufficient to maintain the 20 pairs of breeding owls established in the northern spotted owl conservation strategy. The Clear Creek LSR Assessment identifies thinning overstocked young to mature conifer stands as a high priority treatment for managing forests within the LSR. Thinning stands and implementing fuel treatments would reduce fire hazard and risk, accelerate growth, and help to enhance and protect developing and existing large tree components within LSR forest stands.

The project is authorized under the Healthy Forest Restoration Act of 2003

(HFRA) for projects with a defined purpose of enhancing the protection of NSO and NSO critical habitat from catastrophic wildland fire. The proposed project is also being developed within the over-arching recommendations of the Trinity County Community Wildfire Protection Plan.

**Proposed Action**

The proposed action would meet the purpose and need by thinning from below in mature forests and thinning from below to create fuel management zones (FMZs) at strategic locations where they will tie in with existing FMZs. Fuels reduction treatments within the FMZs would help to reduce fire risk and hazard and provide for fire fighter safety. The proposed action also includes prescribed burning on approximately 101 acres and hand fuels treatment on approximately 11 acres to reduce fire risk in high-use areas. Road decommissioning is proposed on 2.3 miles to reduce road densities.

1. *Thinning From Below:* The proposed thinning would be applied on approximately 1,155 acres of overly dense conifer stands to accelerate the development of desired old-growth characteristics. The thinning would also decrease fuel levels to reduce the risk of losing these and adjacent stands to crown fires. The largest and healthiest trees, including trees with large cavities and other types of deformities (decadence) and viable hardwoods, would be retained. A sufficient number of trees would be removed to maintain or increase growth rates of the mature trees, reduce competition for the largest/oldest trees prolonging their persistence in the stands, and remove fuel ladders to a level where ground fires are less likely to climb to the upper canopy. Trees marked for removal will start with the smallest, least healthy conifers progressively including larger trees until the existing 70 to 90+ percent canopy cover is reduced to approximately 40 to 60 percent to make more water, nutrients, sunlight and growing space available to the remaining trees (conifers as well as hardwoods). Approximately 123 acres of Riparian Reserve (RR) are included in proposed thinning units; within RR the canopy would not be reduced below 60 percent. Biological legacies such as large/old green trees and other old-growth structural components (large snags, logs, viable hardwoods, etc.) would be retained within each thinning unit to provide these habitat components as the stand develops. Stands within 150 feet of roads identified as FMZ are included in proposed thinning units. To improve effectiveness of FMZs, the preliminary proposed action includes removing hazard trees within portions of thinning units directly adjacent to FMZ networks (about 149 acres of the total 1,155 acres proposed for thinning).

2. *FMZ Treatments:* A network of FMZs is proposed on approximately 1,995 acres to support the effectiveness and safety of future fire suppression, and/or prescribed fire. They would provide a potential point of control for future fire occurrence. These linear FMZs range from 300 feet wide (roadside) to approximately 600 or 1,200 feet wide (expanded) and are centered along approximately 36 miles of strategically located roads at the perimeter of the fireshed and within the LSR. Within overstocked stands adjacent to the identified roads within FMZ, small diameter understory (fuel ladder) trees (<11″ diameter at breast height (DBH)) would be reduced to roughly a 20 foot spacing and live and dead hazardous trees that could pose a danger to fire fighters would be removed. The perimeter FMZs tie in with roadside fuels projects already completed along State Highway 3 and County Road 204.

3. *Fuel Reduction in High Risk Areas:* The proposed action includes prescribed burning of dense brush surrounding a popular fishing access area at the east edge of the project area (approximately 101 acres), and hand thinning/piling/burning around a public rest area at the west edge of the project area along State Highway 3 (approximately 11 acres). Treatment of these areas would improve the effectiveness of the FMZ.

4. *Road Decommissioning:* The Roads Analysis Process (RAP) completed for the Pettijohn LSR Project area identified approximately 2.3 miles of little-used roads that are having negative effects on fish and water quality, or are disproportionately difficult to maintain. Decommissioning involves removing culverts, ripping and out-sloping road surfaces, and closure. The goal is to control surface runoff, erosion, and mass failure while making the road unavailable for future use.

5. *Landing Construction:* Up to an estimated maximum 39 temporary landings would be constructed, however, existing landings in the project area are preferred and would be reused whenever possible. No trees greater than 24 inches DBH would be cut for landings. New landings will not be constructed within Riparian Reserves (RR). Landings that currently exist in RR will be reused where they would require less ground disturbance than new construction.

**Responsible Official**

J. Sharon Heywood, Forest Supervisor, Shasta-Trinity National Forest.

**Nature of Decision To Be Made**

The Forest Supervisor will decide whether to implement the proposed action, take an alternative action that meets the purpose and need or take no action. The decision may include a non-significant amendment to modify the Shasta-Trinity Land and Resource Management Plan on page 4–37 ''Guidelines to Reduce Risks of Large-Scale Disturbance'' by adding the following statement: ''For the Pettijohn LSR Project, harvest is allowed within stands over 80 years old.''

**Preliminary Issues**

Preliminary issues raised during the collaboration process included snag retention, cutting trees over 80 years old, equipment crossing of RR, and the non-significant plan amendment.

**Scoping Process and Comment Requested**

This notice of intent initiates the scoping process for the Pettijohn LSR Project, which will guide the development of the environmental impact statement. The project is included in the Shasta-Trinity National Forest's quarterly schedule of proposed actions (SOPA). Information on the proposed action will also be posted on the forest website at: *http://www.fs.fed.us/rS/shastatrinity/projects/trmu-projects.shtml.* Comments submitted during this scoping process should be in writing and should be specific to the proposed action. The comments should describe as clearly and completely as possible any issues the conmentor has with the proposal. The scoping process includes:

(a) Identifying potential issues.

(b) Identifying issues to be analyzed in depth.

(c) Eliminating non-significant issues or those previously covered by a relevant previous environmental analysis.

(d) Exploring additional alternatives.

(e) Identifying potential environmental effects of the proposed action and alternatives. It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. The submission of timely and specific comments can affect a

reviewer's ability to participate in subsequent administrative appeal or judicial review.

**HFRA Process**

During October and November, 2008 the STNF sent out letters and notices requesting collaboration and inviting the public, federal, state and local agencies, tribes and non governmental organizations to participate in an HFRA meeting for the Proposed Action. The HFRA meeting was held November 12, 2008 at the Community Center in Lewiston, CA. The notice for the meeting was published in The Trinity Journal, Weaverville's weekly local newspaper and The Record Searchlight, the newspaper of record, located in Redding, CA. The notices were published in both papers on October 21st and November 2008. Comments and suggestions provided by persons at the meeting and submitted by persons who were unable to attend the meeting were used, in part, to design the Proposed Action. The project is consistent with the HFRA 2003, which contains provisions to expedite hazardous fuels reduction and forest restoration projects on federal lands that are at risk to wildland fire or insect and disease epidemics. Projects authorized under HFRA are defined under Section 102(a)(5)(B) of the act and are designed to actively involve the public in reducing the risk of catastrophic fire to communities and protecting threatened and endangered species habitat.

A USDA Forest Service interdisciplinary team designed a preliminary proposed action. Further collaborative efforts in conjunction with National Environmental Policy Act (NEPA) processes may result in further modifications to this proposed action. If significant issues are raised that cannot be addressed by modifying the proposed action, the Forest may develop other action alternatives.

Early Notice of Importance of Public Participation in Subsequent Environmental Review: A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel,* 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21)

Dated: December 11, 2008.

**BILLING CODE 3410–11–M**

## DEPARTMENT OF AGRICULTURE

### Forest Service

### Six Rivers National Forest, California, Lower Trinity and Mad River Travel Management EIS

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of Intent to prepare an Environmental Impact Statement.

**SUMMARY:** The Six Rivers National Forest (Six Rivers NF) will prepare an Environmental Impact Statement to disclose the impacts associated with the following proposed actions:

1. The prohibition of cross-country motor vehicle travel (with the exception of snowmobiles) off designated National Forest NFTS (NFTS) roads and trails by the public except as allowed by permit or other authorization.

2. Make a non-significant amendment to the Six Rivers NF Land and Resource Management Plan (Six Rivers Forest Plan) to conform with the Travel Management Rule (36 CFR Part 212 Subpart B).

3. Add approximately 58 miles (206 segments) of existing unauthorized routes to the NFTS as motorized trails open to the public for motor vehicle use by vehicle class and season of use.

4. Approximately 7 miles (5 segments) of existing NFTS roads are proposed for dual management as both a Maintenance level 1 (closed) road and as a motorized trail open to vehicles 50″ or less in width.

5. Make the following change to NFTS roads: Allow both highway licensed vehicles and non-highway licensed vehicles to use approximately 25½ miles (17 segments) of existing NFTS roads currently open to highway licensed vehicles only.

6. Make the following changes to NFTS trails:

a. Allow motor vehicles 50 inches or less in width on approximately 4 miles (1 segment) of existing NFTS trail currently open to motorcycles.

b. Convert approximately 6 miles (2 segments) of existing NFTS motorized trails to NFTS non-motorized trails.

**DATES:** The comment period on the proposed action will extend 45 days from the date the Notice of Intent is published in the **Federal Register**. Completion of the Draft Environmental Impact Statement (draft EIS) is expected in spring 2009 and the Final Environmental Impact Statement (final EIS) is expected in summer 2009.

**ADDRESSES:** Send written comments to: Travel Management Team, Six Rivers National Forest, 1330 Bayshore Way, Eureka, CA 95501. Electronic comments, in acceptable plain text (.txt), rich text (.rtf), or Word (.doc) may be submitted to *comments-pacificsouthwest-six-rivers@fs.fed.us.* Please insure that ''Travel Management'' occurs in the subject line.

**FOR FURTHER INFORMATION CONTACT:** Leslie Burkhart, Six Rivers National Forest, 1330 Bayshore Way, Eureka, CA 95501. Phone: 707–441–3520. E-mail: *comments-pacificsouthwest-six-rivers@fs.fed.us* with ''Travel Management'' in the subject line.

**SUPPLEMENTARY INFORMATION:**

**Background**

Over the past few decades, the availability and capability of motor vehicles, particularly off-highway vehicles (OHVs) and sport utility vehicles (SUVs) has increased tremendously. Nationally, the number of OHV users has climbed sevenfold in the past 30 years, from approximately 5 million in 1972 to 36 million in 2000. The ten states with the largest population also have the most OHV users. California has 4.35 million OHV users accounting for almost 11% of the U.S. total (Off-Highway Vehicle Recreation in the United States, Regions and States: A National Report from the National Survey on Recreation and the Environment (NSRE) Cordell, Betz, Green and Owens June 2005). There were 786,914 all terrain vehicles (ATVs) and OHV motorcycles registered in 2004, up 330% since 1980. Annual sales of ATVs and OHV motorcycles in California were the highest in the U.S. for the last 5 years. Four-wheel drive vehicle sales in California also increased by 1500% to 3,046,866 from 1989 to 2002.

Unmanaged OHV use has resulted in unplanned roads and trails, erosion, watershed and habitat degradation, and impacts to cultural resource sites. Compaction and erosion are the primary effects of OHV use on soils. Riparian areas and aquatic dependent species are particularly vulnerable to OHV use. Unmanaged recreation, including impacts from OHVs, is one of ''Four Key Threats Facing the Nation's Forests and Grasslands.'' (USDA Forest Service, June 2004).

On August 11, 2003, the Pacific Southwest Region of the Forest Service entered into a Memorandum of Intent (MOI) with the California Off-Highway Motor Vehicle Recreation Commission, and the Off-Highway Motor Vehicle Recreation Division of the California Department of Parks and Recreation. That MOI set in motion a region-wide effort to ''Designate OHV roads, trails, and any specifically defined open areas for motor vehicles on maps of the 19 National Forests in California by 2007.'' On November 9, 2005, the Forest Service published final travel management regulations in the **Federal Register** (FR Vol. 70, No. 216–Nov. 9, 2005, pp 68264–68291). Subpart B of the final Travel Management Rule requires designation of those roads, trails, and areas that are open to motor vehicle use on National Forests. Route designations will be made by class of vehicle and, if appropriate, by time of year. The final rule allows for motor vehicle use only on designated system routes and in designated areas.

On some National Forest System lands, long managed as open to cross-country motor vehicle travel, repeated use has resulted in unplanned, unauthorized, roads and trails. These routes generally developed without environmental analysis or public involvement, and do not have the same status as National Forest System roads and National Forest System trails included in the NFTS. Nevertheless, some unauthorized routes are well-sited, provide excellent opportunities for outdoor recreation by motorized and non-motorized users, and would enhance the National Forest System of designated roads, trails and areas. Other unauthorized routes are poorly located and cause unacceptable impacts. Only NFTS roads and NFTS trails can be designated for motor vehicle use. In order for an unauthorized route to be designated, it must first be added to the NFTS.

In accordance with the MOI, the Six Rivers NF completed an inventory of unauthorized routes on National Forest System lands and identified over 250 miles of unauthorized routes. The Six Rivers NF then used an interdisciplinary process to evaluate the routes that included working with the public to determine whether any of the unauthorized routes should be proposed for addition to the Six Rivers NFTS in this proposed action. The route evaluation identified a number of routes which could be considered in this or future decisions on the NFTS as a part of travel management on the Lower Trinity and Mad River Ranger Districts of the Six Rivers National Forest. Roads and trails (there are no areas) that are currently part of the Six Rivers NFTS and are open to motor vehicle travel will remain designated for such use except as described below under Proposed Action. This proposal focuses only on the prohibition of motor vehicle travel off designated routes and needed changes to the Six Rivers NFTS, including the addition of some unauthorized routes to the Six Rivers NFTS and minor changes to the existing motor vehicle restrictions. The proposed action is being carried forward in accordance with the Travel Management Rule (36 CFR Part 212, Subpart B).

In accordance with the Travel Management Rule, following a decision on this proposal, a Motor Vehicle Use Map (MVUM) will be published for both the Lower Trinity Ranger District and Mad River Ranger District of the Six Rivers NF. These MVUMs will identify all roads and trails that are designated for motor vehicle use. The MVUMs shall specify the classes of vehicles and, if appropriate, the times of year for which use is designated. Unauthorized routes not included in this proposal are not precluded from future consideration for addition to the NFTS and inclusion in a MVUM. Future decisions associated with changes to the MVUMs may trigger the need for documentation of environmental analysis.

**Purpose and Need for Action**

The following needs have been identified for this proposal:

1. There is a need for regulation of unmanaged cross-country motor vehicle travel by the public. The proliferation of unplanned, unauthorized, non-sustainable roads, trails, and areas created by cross-country travel adversely impacts the environment. The 2005 Travel Management Rule, 36 CFR Section 212, Subpart B, provides for a system of NFS roads, NFS trails, and areas on National Forest System lands that are designated for motor vehicle use. After roads, trails, and areas are designated, motor vehicle use off designated roads and trails and outside designated areas is prohibited by 36 CFR 261.13. Subpart B is intended to prevent resource damage caused by unmanaged motor vehicle use by the public. In accordance with national direction, implementation of Subpart B of the travel management rule for the Six Rivers National Forest is scheduled for completion in 2009.

2. There is a need for the Six Rivers Forest Plan to conform to the Travel Management Rule, 36 CFR 212, Subpart B. A review of the Six Rivers Forest Plan has found that OHV use is restricted to designated routes but there is no general prohibition of motor vehicle travel off of designated roads and trails.

3. There is a need for limited changes to the Six Rivers NFTS to:

a. Provide motor vehicle access to dispersed recreation opportunities (camping, hunting, fishing, hiking, horseback riding, etc.). A substantial portion of known dispersed recreation activities are not typically located directly adjacent to NFTS roads or NFTS motorized trails. Some dispersed recreation activities depend on foot or horseback access, and some depend on motor vehicle access. Those activities accessed by motor vehicles are typically accessed by short spurs that have been created primarily by the passage of motor vehicles. Many such unauthorized ''user-created'' routes are not currently part of the NFTS. Without adding them to the NFTS and designating them on a MVUM, the regulatory changes noted above would make continued use of such routes

illegal and would preclude access by the public to many dispersed recreation activities.

b. Provide a diversity of motorized recreation opportunities (4x4 vehicles, motorcycles, ATVs, SUVs, passenger vehicles, etc.). It is Forest Service policy to provide a diversity of road and trail opportunities for experiencing a variety of environments and modes of travel consistent with the National Forest recreation role and land capability (FSM 2353.03(2)). Implementation of Subpart B of the Travel Management Rule will severely reduce acres and miles of motorized recreation opportunities relative to current levels. As a result, there is a need to consider limited changes to the NFTS.

In making any limited changes to the National Forest Transportation system, the Six Rivers NF will be considering criteria contained in Subpart B of the Travel Management Rule, which include the following:

A. Impacts to natural and cultural resources.

B. Public safety.

C. Access to public and private lands.

D. Availability of resources for maintenance and administration of roads trails and areas that would arise if the uses under consideration are designated.

E. Minimizing damage to soil, watershed, vegetation, and other forest resources.

F. Minimizing harassment of wildlife and significant disruption of wildlife habitat.

G. Minimizing conflicts between motor vehicles and existing or proposed recreational uses of NFS lands or neighboring federal lands.

H. Minimizing conflicts among different classes of motor vehicle uses of NFS lands or neighboring federal lands.

I. Compatibility of motor vehicle use with existing conditions in populated areas, taking into account sound, emissions, and other factors.

When making any limited changes to National Forest System Roads, the Six Rivers NF will also consider the following:

1. Speed, volume, composition and distribution of traffic on roads.

2. Compatibility of vehicle class with road geometry and road surfacing

3. Maintaining valid existing rights of use and access (rights-of-way)

**Proposed Action**

1. The prohibition of cross-country motor vehicle travel (with the exception of snowmobiles) off designated National Forest NFTS (NFTS) roads, trails, and areas by the public except as allowed by permit or other authorization.

2. Make a non-significant amendment to the Six Rivers Forest Plan to conform to the Travel Management Rule, Subpart B. The text of Recreation Standard and Guideline for Motorized Recreation 18–21, Six Rivers Forest Plan, p. IV–124, which currently reads ''OHV use is restricted to designated routes'' shall be replaced in its entirety with the following text ''Prohibit motor vehicle travel (with the exception of snowmobiles) off designated roads, trails and areas except as allowed by permit or other authorization.''

3. Additions to the National Forest NFTS. The Six Rivers NF currently manages and maintains approximately 526 miles of NFTS roads and no NFTS motorized trails on the Lower Trinity Ranger District; and manages and maintains approximately 871 miles of NFTS roads and 36 miles of NFTS motorized trails on the Mad River Ranger District. Based on the stated purpose and need for action and route evaluation, the Six Rivers National Forest proposes to add approximately 19 miles (62 segments) of existing unauthorized routes to its NFTS as motorized trails on the Lower Trinity Ranger District; and to add approximately 39 miles (144 segments) of existing unauthorized routes to its NFTS motorized trails on the Mad River Ranger District open to the public for motor vehicle use by vehicle class and season of use. A summary of the additional NFTS motorized trails are listed below by Ranger District. Note that no additional motorcycle trails are proposed for the NFTS.

NFTS Motorized Trail Additions—Lower Trinity Ranger District

| Trail type | Proposed addition (miles) | Permitted vehicle classes | Year-round (miles) | Seasonal (miles) | Subject to mitigations (miles) |
|---|---|---|---|---|---|
| High Clearance | 5 | Trails open to high clearance wheeled vehicles | 3 | 2 | 1 |
| <=50″ | 14 | Trails open to wheeled vehicles 50 inches or less in width. | <1 | 14 | 12 |
| Motorcycle | none | Trails open to vehicles with two in-line wheels | N/A | N/A | N/A |

NFTS Motorized Trail Additions—Mad River Ranger District

| Trail type | Proposed addition (miles) | Permitted vehicle classes | Year-round (miles) | Seasonal (miles) | Subject to mitigations (miles) |
|---|---|---|---|---|---|
| High Clearance | 30 | Trails open to high clearance wheeled vehicles | 25 | 5 | 14 |
| <=50″ | 9 | Trails open to wheeled vehicles 50 inches or less in width. | 8 | 1 | 2 |
| Motorcycle | none | Trails open to vehicles with two in-line wheels | N/A | N/A | N/A |

The existing unauthorized routes proposed as additions to the Six Rivers NFTS as motorized trails occur across both Districts within many land allocations and resource emphasis areas; this includes proposed motorized trails within Late Successional Reserves, Inventoried Roadless Areas, and Key Watersheds as summarized in the following tables.

TRAIL ADDITIONS WITHIN AREAS OF INTEREST—LOWER TRINITY RANGER DISTRICT

| Trail type | Proposed addition total (miles) | Management areas of interest | | |
|---|---|---|---|---|
| | | Late successional reserve (miles) | Inventoried roadless areas (miles) | Key watershed (miles) |
| High Clearance | 5 | 1.7 | none | 1.9 |

TRAIL ADDITIONS WITHIN AREAS OF INTEREST—MAD RIVER RANGER DISTRICT

| Trail type | Proposed addition total (miles) | Management areas of interest | | |
|---|---|---|---|---|
| | | Late successional reserve (miles) | Inventoried roadless areas (miles) | Key watershed (miles) |
| High Clearance | 30 | 10.3 | 1.9 | 2.4 |
| <=50″ | 9 | 2.5 | 1.3 | 1.3 |
| Motorcycle | none | N/A | N/A | N/A |

4. Co-location of Motorized Trail on NFTS roads closed year-round. Approximately 7 miles (5 segments) of existing NFTS roads are proposed for dual management as both a Maintenance level 1 (closed) road and as a motorized trail open to vehicles 50″ or less in width. Approximately 7 miles (4 segments) would be located on Lower Trinity Ranger District to expand motorized recreation opportunity by linking proposed motorized trails in the Waterman Ridge and Hennessy Ridge networks. Approximately 0.2 mile (1 segment) would be located on the Mad River Ranger District to provide access to a dispersed camp.

5. Limited Changes to the National Forest NFTS Roads. The Six Rivers National Forest proposes the following changes to NFTS roads to expand motorized trail opportunities, including increasing potential loops by using existing NFTS roads as links or connections within proposed networks of motorized trails: Allow both highway licensed vehicle and non-highway licensed vehicle use on approximately 8 miles (5 segments) of existing NFTS roads currently open to highway legal vehicles only on the Lower Trinity Ranger District. Allow both highway licensed vehicle and non-highway licensed vehicle use on approximately 17½ miles (12 segments) of existing NFTS roads currently open to highway legal vehicles only on the Mad River Ranger District. Of these changes, all but approximately 2½ miles (1 segment) on the Mad River Ranger District, are subject to California Vehicle Code regulations that include the requirement of a licensed operator operating the vehicle.

6. Limited Changes to NFTS Trails. The Six Rivers National Forest proposes the following changes to NFTS trails: Allow wheeled vehicles 50 inches or less in width on approximately 4 miles (1 segment) of existing NFTS trail currently open to motorcycles to augment the Pilot Creek motorized trail network on the Mad River Ranger District. Convert approximately 6 miles (2 segments) of existing NFTS motorized trails to NFTS non-motorized trails on the Mad River Ranger District because of safety concerns on a segment of Devil's Backbone and due to lack of use and potential adverse resource effects on the Bradburn Trail.

Maps and tables detailing the proposed action can be found at *http://www.fs.fed.us/r5/sixrivers/projects/ohv/*. In addition, maps will be available for viewing at:

- Six Rivers National Forest Supervisor's Office, 1330 Bayshore Way, Eureka, CA 95501; phone: 707–442–1721.
- Lower Trinity Ranger District, Highway 96 (2 miles North of Willow Creek), Willow Creek, CA 95573; phone: 630–629–2118.
- Mad River Ranger District, Highway 36 (28 miles east of Bridgeville), Bridgeville, CA 95526; phone: 707–574–6233.

**Responsible Official**

Tyrone Kelley, Forest Supervisor, Six Rivers National Forest, 1330 Bayshore Way, Eureka, CA 95501

**Nature of Decision To Be Made**

The responsible official will decide whether to adopt and implement the proposed action, an alternative to the proposed action, or take no action to make changes to existing prohibitions and allowances for public motor vehicle travel within the existing Six Rivers NF NFTS and prohibit cross country motor vehicle travel by the public off the designated system. Once the decision is made, the Six Rivers NF will publish two Motor Vehicle Use Maps (MVUM) identifying the roads and trails that are designated for motor vehicle use. The MVUMs shall specify the classes of vehicles and, if appropriate, the time of year for which use is designated. Future decisions associated with changes to the MVUMs may trigger the need for documentation of environmental analysis.

This proposal does not revisit previous administrative decisions that resulted in the current NFTS. This proposal is focused on implementing Subpart B of the Travel Management Rule. Previous administrative decisions concerning road construction, road reconstruction, trail construction, and land suitability for motorized use on the existing NFTS are outside of the scope of this proposal.

**Scoping Process**

Public participation will be especially important at several points during the analysis. The Forest Service will be seeking information, comments, and assistance from federal, state, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action.

The Six Rivers NF has been meeting with local elected officials, Tribes, and community groups, including service and professional organizations, to discuss the Travel Management Rule and travel management on the Lower Trinity and Mad River Ranger Districts since 2005. In May and June of 2005,

public workshops were held in Eureka, Willow Creek, and Mad River, CA to inform the public about the Travel Management Rule. In October 2007 and April, May, and June 2008, public workshops were held in those same locations to gather information from the public about which routes they use and their concerns. Additionally, maps of inventoried routes were available on the Forest's Web site and Forest Service offices. The public used these maps to provide input into the process.

The comment period on the proposed action will extend 45 days from the date this Notice of Intent is published in the **Federal Register**.

The draft environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by spring 2009. EPA will publish a notice of availability of the draft EIS in the **Federal Register**. The comment period on the draft EIS will extend 45 days from the date the EPA notice appears in the **Federal Register**. At that time, copies of the draft EIS will be distributed to interested and affected agencies, organizations, and members of the public for their review and comment. It is very important that those interested in the management of the Six Rivers NF participate at that time.

The final EIS is scheduled to be completed in summer 2009. In the final EIS, the Forest Service will respond to comments received during the comment period that are: within the scope of the proposed action; specific to the proposed action; have a direct relationship with the proposed action; and include supporting reasons for the responsible official to consider. Submission of comments to the draft EIS is a prerequisite for eligibility to appeal under the 36 CFR part 215 regulations.

**Comment Requested**

This Notice of Intent initiates the scoping process which guides the development of the environmental impact statement.

Early Notice of Importance of Public Participation in Subsequent Environmental Review: A draft EIS will be prepared for comment. The comment period on the draft EIS will be 45 days from the date the EPA publishes the notice of availability in the **Federal Register**.

At this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft EISs must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts. *City of Angoon* v. *Hodel,* 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft EIS. Comments may also address the adequacy of the draft EIS or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21)

Dated: December 12, 2008.

**Tyrone Kelley,**

*Forest Supervisor.*

**BILLING CODE 3410–11–P**

## DEPARTMENT OF AGRICULTURE

### Forest Service

### Superior National Forest Federal Hardrock Mineral Prospecting Permits Project.

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement (EIS).

**SUMMARY:** This analysis would address federal hardrock mineral exploration in terms of 32 current permit applications, future permit applications, current and future operating plans, and future use and occupancy authorizations (Special Use Permits) on the Superior National Forest (SNF) over the next 20 years. The project area covers all SNF managed lands available to mineral exploration. In accordance with the SNF Land and Resource Mangement Plan, the Boundary Waters Canoe Area Wilderness, Mining Protection Area, and Eligible Wild River Segments are not available to mineral exploration. The Forest Service is the lead agency for this EIS and the United States Department of the Interior (USDI), Bureau of Land Management (BLM) is a cooperating agency. As a cooperating agency, the BLM will adopt the EIS to support their own Record of Decision. Federal laws and policies will be outlined in the EIS that will require the SNF, as the agency managing the surface, and the BLM, as the agency responsible for managing sub-surface minerals resources, to consider the Prospecting Permit applications. Based on the Forest Service's recommendations and consent, the BLM will review those recommendations and decide whether to authorize the prospecting permits and operating plans.

**DATES:** Scoping for this project is planned for January 2009. When the scoping package is completed, it will be sent out for public review and comment. At that time, it will also be available for review, along with supplemental large scale maps, on the Internet at the following Web site: *http://www.fs.fed.us/r9/forests/superior/projects/.* The draft environmental impact statement is expected February 2010 and the final environmental impact statement is expected June 2010.

**ADDRESSES:** Send written comments to James W. Sanders, Forest Supervisor, 8901 Grand Avenue Place, Duluth, MN 55808.

**FOR FURTHER INFORMATION CONTACT:** If you would like additional information or have questions regarding this action, contact Patty Beyer, Project Coordinator at 906–226–1499 or Michael Jimenez, Forest Planner at 218–626–4383.

**SUPPLEMENTARY INFORMATION:**

**Purpose and Need for Action**

The purpose and need for this project is three-fold.

*First:* Analyze the effects to the environment from 32 permit applications and any future prospecting permit applications for hardrock mineral prospecting, and, determine: (a) If the lands requested under the 32 permit applications are available for mineral prospecting and what lands are available for future prospecting permit applications; (b) If activities carried out

under such permits are consistent with the purpose for which the land was acquired; and (c) What stipulations will be required for prospecting permits to be issued. The stipulations will include requirements for the protection of surface resources, and for access, construction, or use and protection of existing roads.

*Second:* Analyze the effects to the environment from future prospecting permit exploration operating plan activities associated with the 32 prospecting permit applications and future prospecting permit applications and to define the terms and conditions and best management practices (BMPs) that would be included in the Forest Service's consent to the BLM for approval of the operating plans. The terms and conditions and BMPs will include requirements for the protection of surface resources, and for access, construction, or use of existing roads.

*Third:* Analyze effects of special uses located outside of prospecting permit areas (off-permit areas). These activities will be administered under Forest Service Special Use Permits. This includes the need to evaluate the effects from road construction and road reconstruction on off-permit areas. Although specific proposals have not been made, estimates can be made regarding access needs to sites based on previous experience.

**Proposed Action**

The BLM has received 32 prospecting permit applications from four companies for federal hardrock mineral prospecting on the SNF. The applications cover approximately 43,446 acres and are located within the geologic complex call the Duluth Complex. The main target minerals include copper, nickel, cobalt, lead, zinc, silver, gold, titanium, Platinum Group Elements (PGE) and other associated minerals. In addition, all lands available for mineral exploration within the SNF will be analyzed for future prospecting permit applications and associated operating plans. Prospecting permits, if issued, include various exploration activities under operating plans such as drilling to obtain core samples and air-or-ground based geophysical surveys to determine the location and extent of mineralization, and where ore deposits may be located.

**Responsible Official and Nature of Decision To Be Made**

The Responsible Official for the Forest Service, the Forest Supervisor for the Superior National Forest, will decide the following three items based on the environmental analysis:

1. What consent recommendations and stipulations will be provided to the Regional Forester so that he may advise the BLM whether the Forest Service consents to the issuance of: (a) The 32 federal hardrock mineral prospecting permit applications, and (b) future hardrock mineral prospecting permits.

2. What advice will be provided to the BLM including terms and conditions and best management practices required for the protection of surface resources, and for access, construction, or use and protection of existing roads for: (a) Operating plans associated with the current 32 federal hardrock mineral prospecting permit applications, and (b) future operating plans associated with future hardrock minerals prospecting permits.

3. Whether to issue future special use and occupancy authorizations for off-prospecting permit areas activities associated with mineral exploration operating plans and what terms and conditions will be required for the protection and management of surface resources. The responsible official for the BLM, the Deputy State Director, will decide in a Record of Decision, whether to approve pending and future hardrock prospecting permits and associated operating plans.

**Scoping Process**

Public scoping will include notices in the newspaper of record, mailing of the scoping package (detailed information of the purpose and need for the project, the proposed action, description of the project area, maps, and proposed stipulations, terms and conditions, and best management practices) to interested and affected publics and posting of the project on the agency's project planning Web page and notice in the agency's quarterly Schedule of Proposed Actions.

**Comment Requested**

This notice of intent initiates the scoping proces which guides the development of the environmental impact statement. Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

**Authority:** 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21.

Dated: November 19, 2008.

## COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

### Procurement List; Additions and Deletion

**AGENCY:** Committee for Purchase From People Who Are Blind or Severely Disabled.

**ACTION:** Additions to and Deletion from Procurement List.

**SUMMARY:** This action adds to the Procurement List products to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes from the Procurement List a product previously furnished by such agencies.

**DATES:** *Effective Date:* 1/19/2009.

**ADDRESSES:** Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia, 22202–3259.

**FOR FURTHER INFORMATION CONTACT:** Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or e-mail *CMTEFedReg@AbilityOne.gov*.

**SUPPLEMENTARY INFORMATION:**

**Additions**

On 10/10/2008, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (73 FR 60236) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the product and impact of the additions on the current or most recent contractors, the Committee has determined that the product listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

*Regulatory Flexibility Act Certification*

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products to the Government.

2. The action will result in authorizing small entities to furnish the products to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-

O'Day Act (41 U.S.C. 46–48c) in connection with the products proposed for addition to the Procurement List.

*End of Certification*

Accordingly, the following products are added to the Procurement List:

**Products**

*United States Coast Guard Flags*

*NSNs:* 8345–00–242–0272—Flag, U.S. Coast Guard;
8345–01–087–4595—Flag, U.S. Coast Guard;
8345–01–087–4594—Flag, U.S. Coast Guard;
8345–01–168–1146—Flag, U.S. Coast Guard.
*NPA:* Goodwill Industries of South Florida, Inc., Miami, FL.
*Contracting Activity:* U.S. COAST GUARD, ELC.

C-list for the requirement of the U.S. Coast Guard.

**Deletions**

On 09/05/2008, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (73 FR 51787) of proposed deletion to the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the product listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

*Regulatory Flexibility Act Certification*

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the product to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the product deleted from the Procurement List.

*End of Certification*

Accordingly, the following product is deleted from the Procurement List:

**Product:**

*Hose Assembly, Nonmetallic*

*NSN:* 4210–00–892–5494—Hose Assembly, Nonmetallic.
*NPA:* The Oklahoma League for the Blind, Oklahoma City, OK.
*Contracting Activity:* GSA/FAS southwest supply center (QSDAC), Fort Worth, TX.

**Barry S. Lineback,**

*Sr. Program Analyst.*

**BILLING CODE 6353–01–P**

## COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

### Procurement List; Proposed Additions and Deletions

**AGENCY:** Committee for Purchase From People Who Are Blind or Severely Disabled.

**ACTION:** Proposed additions to and deletions from procurement list.

**SUMMARY:** The Committee is proposing to add to the Procurement List products and/or services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete products previously furnished by such agencies.

*Comments Must Be Received on or Before:* January 18, 2009.

**ADDRESSES:** Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia 22202–3259.

*For Further Information or to Submit Comments Contact:* Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or e-mail *CMTEFedReg@AbilityOne.gov.*

**SUPPLEMENTARY INFORMATION:** This notice is published pursuant to 41 U.S.C 47(a) (2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

**Additions**

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice for each product or service will be required to procure the products and/or service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

*Regulatory Flexibility Act Certification*

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. If approved, the action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and/or service to the Government.

2. If approved, the action will result in authorizing small entities to furnish the products and/or service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the products and/or service proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

*End of Certification*

The following products and/or services are proposed for addition to Procurement List for production by the nonprofit agencies listed:

**Products**

*Flags, United States Coast Guard*

## BROADCASTING BOARD OF GOVERNORS

### Proposed New Collection; Comment Request

**AGENCY:** The Broadcasting Board of Governors.

**ACTION:** Proposed New Collection; Comment Request.

**SUMMARY:** The Broadcasting Board of Governors (BBG), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on an information collection titled, ''Personal Identity Verification (PIV) Request for BBG Credential.'' This request for comment is being made pursuant to the Paperwork Reduction Act of 1995 [Pub. L. 104–13; 44 U.S.C. 3506(c)(2)(A)].

The information collection activity involved with this program is conducted pursuant to Homeland Security Presidential Directive (HSPD) 12, Federal Information Processing Standards (FIPS) 201, and Office of Management and Budget (OMB) Implementation Directive M–05–24, which directs and provides guidance to all Federal agencies to meet the Personal Identity Verification (PIV) requirements.

**DATES:** Comments must be submitted on or before February 17, 2009.

*Copies/For Further Information Contact:* Copies of this information collection proposal that will be submitted to OMB for approval may be obtained by calling or writing Ms. Jeannette Mancus, BBG Clearance Officer, BBG, IBB/A, Room 1274, 330 Independence Avenue, SW., Washington, DC 20237, telephone (202) 203–4664, or via e-mail address *JGMancus@BBG.GOV.*

**SUPPLEMENTARY INFORMATION:** Public reporting burden for this proposed collection of information is estimated to average 15 minutes (.25 of an hour) per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Responses are voluntary and respondents are required to respond only once. Comments are requested on the proposed information collection concerning:

(a) Whether the proposed collection of information is necessary for the proper performance of the agency, including whether the information has practical utility;

(b) The accuracy of the Agency's burden estimates;

(c) Ways to enhance the quality, utility, and clarity of the information collected; and

(d) Ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

*Comments:* Send comments regarding this burden estimate or any other aspect of this collection of information to Mr. Alexander T. Hunt, OMB Desk Officer for the BBG, via fax at 202–395–7285, or e-mail at *Alexander_T._Hunt@omb.eop*; and/or to Ms. Jeannette Mancus, the BBG Clearance Officer, BBG, IBB/A, Room 1657, 330 Independence Avenue, SW., Washington, DC 20237, telephone (202) 203–4664, e-mail address *JGMancus@bbg.gov.*

*Current Actions:* BBG is requesting approval of this new collection of information for a three-year period.

*Title:* Personal Identity Verification (PIV) Request for BBG Credential.

*Abstract:* Data from this information collection are used by BBG's Office of Security (M/SEC) to determine suitability for the issuance of a BBG credential to contractors employed by the BBG, and to identity proof and register applicants as part of the PIV process, in accordance with HSPD 12, FIPS 201, and OMB Implementation Directive M–05–24.

*Proposed Frequency of Responses:*

| | |
|---|---|
| Number of Respondents (Contractors Only) | 2431 |
| Number of Responses per Respondents | 1 |
| Total Responses over Three Year Period | 2431 |
| Hours per Response | .25 |
| Total Hours (Sub-Total) | 608 |

Dated: *December 12, 2008.*

## DEPARTMENT OF COMMERCE

### Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* National Oceanic and Atmospheric Administration (NOAA).

*Title:* Bottlenose Dolphin Conservation Outreach Survey.

*OMB Control Number:* None.

*Form Number(s):* None.

*Type of Request:* Regular submission.

*Burden Hours:* 563.

*Number of Respondents:* 1,125.

*Average Hours per Response:* 30 minutes.

*Needs and Uses:* The objective of this survey is to assess the level of awareness on issues related to regulations preventing feeding/harassment of wild bottlenose dolphins, which are protected under the Marine Mammal Protection Act. In particular, the survey is designed to determine what commercial operators and the general public know about specific regulations prohibiting feeding and harassment of bottlenose dolphins, and how they gained their knowledge and/or perceptions on the topic. This information will be used to help refine outreach and education materials and associated efforts. The initial geographic region for this survey is Panama City, Florida, where numerous incidences of dolphin harassment and feeding have been documented. The intent ultimately is to also use this survey in other areas of the southeast region to gain a similar understanding and ensure outreach messages are appropriate for intended audiences.

*Affected Public:* Individuals or households; business or other for-profit organizations.

*Frequency:* One time only.

*Respondent's Obligation:* Voluntary.

*OMB Desk Officer:* David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482–0266, Department of Commerce, Room 7845, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, FAX number (202) 395–7285, or *David_Rostker@omb.eop.gov*.

Dated: December 15, 2008.

### Ferrovanadium from the People's Republic of China and the Republic of South Africa: Continuation of Antidumping Duty Orders

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**SUMMARY:** As a result of the determinations by the Department of Commerce (''Department'') and the International Trade Commission (''ITC'') that revocation of the existing antidumping duty (''AD'') orders on ferrovanadium from the People's Republic of China (''PRC'') and the Republic of South Africa (''South Africa'') would likely lead to continuation or recurrence of dumping and material injury to an industry in the United States within a reasonably foreseeable time, the Department is publishing this notice of continuation of the AD orders.

**EFFECTIVE DATE:** December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Juanita H. Chen at 202–482–1904; AD/CVD Operations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:**

#### Background

On December 3, 2007, the Department initiated sunset reviews of the AD orders on ferrovanadium from the PRC and South Africa, pursuant to section 751(c) of the Tariff Act of 1930, as amended (''Act''). *See Initiation of Five-year (''Sunset'') Reviews, 72 FR 67890 (December 3, 2007); see also Notice of Amended Final Antidumping Duty Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Ferrovanadium From the People's Republic of China*, 68 FR 4168 (January 28, 2003); *Notice of Antidumping Duty Order: Ferrovanadium from the Republic of South Africa*, 68 FR 4169 (January 28, 2003). As a result of its reviews, the Department found that revocation of these AD orders would likely lead to continuation or recurrence of dumping and notified the ITC of the margins likely to prevail were the orders revoked. *See Ferrovanadium from the People's Republic of China and the Republic of South Africa: Final Results of the Expedited Sunset Reviews of the Antidumping Duty Orders*, 73 FR 19192

(April 9, 2008). On November 13, 2008, the ITC determined, pursuant to section 751(c) of the Act, that revocation of the AD orders on ferrovanadium from the PRC and South Africa would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time. *See Ferrovanadium From China and South Africa*, 73 FR 72837 (December 1, 2008), and ITC Publication 4046, Investigation Nos. 731–TA–986 and 987 (Review) (November 2008).

**Scope of the Orders**

The scope of the orders covers all ferrovanadium regardless of grade, chemistry, form, shape, or size. Ferrovanadium is an alloy of iron and vanadium that is used chiefly as an additive in the manufacture of steel. The merchandise is commercially and scientifically identified as vanadium. The scope specifically excludes vanadium additives other than ferrovanadium, such as nitrided vanadium, vanadium–aluminum master alloys, vanadium chemicals, vanadium oxides, vanadium waste and scrap, and vanadium–bearing raw materials such as slag, boiler residues and fly ash. Merchandise under the Harmonized Tariff Schedule of the United States (''HTSUS'') item numbers 2850.00.2000, 8112.92.0600, 8112.92.7000 and 8112.99.2000 are specifically excluded.[1] Ferrovanadium is classified under HTSUS item number 7202.92.00. Although the HTSUS item number is provided for convenience and customs purposes, the Department's written description of the scope of these orders remains dispositive.

**Continuation of Order**

As a result of the determinations by the Department and the ITC that revocation of the AD orders on ferrovanadium from the PRC and South Africa would likely lead to continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, the Department hereby orders the continuation of the AD orders on ferrovanadium from the PRC and South Africa. U.S. Customs and Border Protection will continue to collect AD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. This review covers imports from all manufacturers and exporters of ferrovanadium from the PRC and South Africa.

The effective date of continuation of these AD orders will be the date of publication in the **Federal Register** of this notice. Pursuant to section 751(c)(2) of the Act, the Department intends to initiate the next five-year review of these orders not later than November 2013.

These five-year (''sunset'') reviews and notice are in accordance with section 751(c) of the Act and published pursuant to section 777(i)(1) of the Act.

Dated: December 12, 2008.

### International Trade Administration

**(A–533–840)**

### Certain Frozen Warmwater Shrimp from India: Partial Rescission of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (the Department) is rescinding the administrative review of the antidumping duty order on certain frozen warmwater shrimp from India for the period February 1, 2007, through January 31, 2008, for 166 companies, based on: 1) timely withdrawals of the review requests; 2) confirmed statements of no shipments during the period of review (POR); 3) a mistaken initiation; and 4) multiple addresses.

**EFFECTIVE DATE:** December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Elizabeth Eastwood, AD/CVD Operations, Office 2, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–3874.

**SUPPLEMENTARY INFORMATION:**

**Background**

On February 4, 2008, the Department published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty order on certain frozen warmwater shrimp from India for the period February 1, 2007, through January 31, 2008. *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review*, 73 FR 6477 (Feb. 4, 2008). Between February 22, 2008, and February 29, 2008, in accordance with 19 CFR 351.213(b)(2), certain Indian producers and exporters requested a review of this antidumping duty order. In addition, on February 29, 2008, the petitioner[1] also requested an administrative review for numerous Indian exporters of subject merchandise, and the Louisiana Shrimp Association requested an administrative review for two Indian producers/exporters of subject merchandise, in accordance with 19 CFR 351.213(b)(1).

In April 2008, the Department initiated an administrative review for 336 companies. These companies are listed in the Department's notice of initiation. *See Certain Frozen Warmwater Shrimp from Brazil, Ecuador, India and Thailand: Notice of Initiation of Administrative Reviews*, 73 FR 18754, 18757–18762 (Apr. 7, 2008) (*Notice of Initiation*).

In April and May 2008, the Department received statements from 18 companies that indicated that they had no shipments of subject merchandise to the United States during the POR. Also, the Department received clarified information regarding mailing addresses for several companies.

On July 7, 2008, in accordance with 19 CFR 351.213(d)(1), the petitioner withdrew its request for review for 144 companies.

On October 16, 2008, the Department issued a memorandum indicating that it intended to rescind the administrative review with respect to 166 respondent companies, and it invited comments on this action from interested parties. *See* the October 16, 2008 memorandum to the file from Elizabeth Eastwood, titled ''Intent to Rescind in Part the 2007–2008 Antidumping Duty Administrative Review on Frozen Warmwater Shrimp from India'' (Intent to Rescind Memorandum). On October 23, 2008, and November 6, 2008, the Department received comments from 32 U.S. producers opposing the rescission with respect to the 144 companies for which the petitioner withdrew its review request. On October 30, 2008, the petitioner responded to the comments filed on October 23, 2008.

**Partial Rescission of Review**

As noted above, the petitioner withdrew its requests for an administrative review for each of the following companies within the time limits set forth in 19 CFR 351.213(d)(1):

[1] The petitioner in this proceeding is the Ad Hoc Shrimp Trade Action Committee.

142) Vijayalaxmi Seafoods
143) Winner Seafoods
144) Z A Food Products

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review if a party that requested a review withdraws the request within 90 days of the date of publication of the notice of initiation. Therefore, because all requests for administrative reviews were timely withdrawn for 143 of the companies listed above, in accordance with 19 CFR 351.213(d)(1), we are rescinding this review with regard to these companies. However, with regard to the 144th company, Kadalkanny Frozen Foods, the review cannot be rescinded because there is an outstanding request for review for this company, which was submitted by the company itself.

In addition, in accordance with 19 CFR 351.213(d)(3), we are rescinding the review with respect to the following 14 companies because these companies reported no shipments of subject merchandise during the POR:

1) Capithan Exporting Co.
2) Cochin Frozen Foods Export Pvt. Ltd.
3) C P Aquaculture (India) Ltd.
4) G. KS Business Associates Pvt. Ltd.
5) K V Marine Exports
6) L.G Seafoods
7) Lewis Natural Foods Ltd.
8) Lourde Exports
9) Meenaxi Fisheries Pvt. Ltd.
10) Naik Seafoods Ltd.
11) Sanchita Marine Products P Ltd.
12) Sterling Foods
13) Triveni Fisheries P Ltd.
14) Varnita Cold Storage

We reviewed U.S. Customs and Border Protection (CBP) data and confirmed that there were no entries of subject merchandise from any of these companies. Consequently, in accordance with 19 CFR 351.213(d)(3) and consistent with our practice, we are rescinding our review for the companies listed above. *See, e.g., Certain Steel Concrete Reinforcing Bars From Turkey; Final Results and Rescission of Antidumping Duty Administrative*

*Review in Part*, 71 FR 65082, 65083 (Nov. 7, 2006) (*Rebar from Turkey*); *see also Certain Frozen Warmwater Shrimp From India; Partial Rescission of Antidumping Duty Administrative Review*, 71 FR 41419 (July 21, 2006).

The Department also initiated separate administrative reviews for the following companies with the same name but different addresses: 1) Apex Exports; 2) Choice Trading Corporation Pvt. Ltd.; 3) IFB Agro Industries Limited; 4) Kings Marine Products; 5) K V Marine Exports; 6) Navayuga Exports Ltd.; 7) Sai Marine Exports Pvt. Ltd.; and 8) Selvam Exports Private Limited. Specifically, these are companies for which we initiated multiple administrative reviews because the petitioner and/or the respondent listed separate addresses for the same companies in their review requests. *See Notice of Initiation*, 73 FR at 18757–18762. The Department sent out letters asking for clarification of the multiple addresses and same company names. We received responses from the companies verifying the correct address and that the company is the same. Therefore, we are rescinding the review with respect to these duplicate company addresses.

Finally, in the *Notice of Initiation*, the Department mistakenly included Royal Cold Storage India P Ltd. in the list of companies for which the review was initiated, in addition to the list of companies for which the review was not initiated. *See Notice of Initiation*, 73 FR at 18760, 18765. We are clarifying that the Department has not initiated an administrative review with respect to Royal Cold Storage India P Ltd. *Id.*, 73 FR at 18765.

On October 23, 2008, the Department received comments from 32 U.S. producers regarding the Department's *Intent to Rescind Memorandum*. In these comments, the U.S. producers objected to the petitioner's July 7, 2008, filing withdrawing its request for administrative reviews for certain Indian producers/exporters because: 1) these domestic producers, three of which were previously part of the Ad Hoc Shrimp Trade Action Committee, have retained their own counsel; and 2) as a result, the Ad Hoc Shrimp Trade Action Committee no longer represents the majority of the U.S. domestic industry. Thus, the U.S. producers requested that the Department not rescind the administrative reviews for the companies for which the petitioner withdrew its request. On October 30, 2008, the petitioner responded to the U.S. producers' comments by stating that all of its actions in the review were taken on behalf of the Ad Hoc Shrimp Trade Action Committee as a corporate entity, not on behalf of the individual members. Thus, it urged the Department to disregard the U.S. producers' request.

After considering the U.S. producers' October 23, 2008 submission, we disagree with the arguments made by these companies. The request for administrative review at issue was made by the Ad Hoc Shrimp Trade Action Committee, which is an interested party to this proceeding under section 771(9)(E) of the Tariff Act of 1930, as amended (the Act) (*i.e.*, the subsection applicable to trade associations). Contrary to the U.S. producers' assertions, this section of the Act does not require a trade association to represent a majority of the industry producing the domestic like product, but rather it merely requires a majority of the association's members to manufacture, produce, or wholesale a domestic like product in the United States. Further, 19 CFR 351.213(b)(1) does not require that a domestic interested party represent the majority of the domestic industry before it may request a review. In this case, both the administrative review requests and the corresponding withdrawal of certain of these requests were made on behalf of the Ad Hoc Shrimp Trade Action Committee, not the individual members of this group. Consequently, because the U.S. producers involved in the October 23, 2008, filing did not request any administrative reviews in this segment of the proceeding, we find that their objection to the petitioner's withdrawal of its request for administrative reviews of certain Indian producers/exporters does not provide a basis for the Department to maintain the review request for these companies.

**Assessment**

The Department intends to issue assessment instructions to CBP 15 days after the date of publication of this partial rescission of administrative review. The Department will direct CBP to assess antidumping duties at the cash deposit rate in effect on the date of entry for POR entries of the subject merchandise produced/exported by the companies for which we are rescinding the review based on the timely withdrawal of review requests.

With respect to POR entries of subject merchandise produced by companies for which we are rescinding the review based on certifications of no shipments, because these companies certified that they made no POR shipments of subject merchandise for which they had knowledge of U.S. destination, we will instruct CBP to liquidate these entries at the all–others rate established in the less–than-fair–value investigation if there is no rate for the intermediary (*e.g.*, a reseller, trading company, or exporter) involved in the transaction. *See Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003).

**Notification to Importers**

This notice serves as a reminder to importers for whom this review is being rescinded, of their responsibility under 19 CFR 351.402(f) to file a certificate regarding reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice is published in accordance with section 777(i) of the Act and 19 CFR 351.213(d)(4).

Dated: December 12, 2008.

## DEPARTMENT OF COMMERCE

### International Trade Administration

**(A–549–822)**

### Certain Frozen Warmwater Shrimp from Thailand: Partial Rescission of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (the Department) is rescinding the administrative review of the antidumping duty order on certain frozen warmwater shrimp from Thailand for the period February 1, 2007, through January 31, 2008, for 29 companies, based on: 1) timely withdrawals of the review requests; and 2) confirmed statements of no shipments during the period of review (POR).

**EFFECTIVE DATE:** December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Kate Johnson, AD/CVD Operations, Office 2, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–4929.

**SUPPLEMENTARY INFORMATION:**

**Background**

On February 4, 2008, the Department published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty order on certain frozen warmwater shrimp from Thailand for the period February 1, 2007, through January 31, 2008. *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review*, 73 FR 6477 (February 4, 2008). The Department received timely requests from the petitioner,[1] the Louisiana Shrimp Association (LSA), and certain individual companies, in accordance with 19 CFR 351.213(b), during the anniversary month of February 2008, for administrative reviews of the antidumping duty order on shrimp from Thailand.

On April 7, 2008, the Department initiated an administrative review for 165 companies. *See Certain Frozen Warmwater Shrimp from Brazil, Ecuador, India, and Thailand: Notice of Initiation of Administrative Reviews*, 73 FR 18754 (April 7, 2008).

Between March and May 2008, the Department received submissions from certain companies that indicated they had no shipments of subject merchandise to the United States during the POR.

On July 7, 2008, in accordance with 19 CFR 351.213(d)(1), the petitioner withdrew its request for review for the following eighteen companies: Anglo–Siam Seafoods Co., Ltd.; Applied DB Ind; Chonburi LC; Gallant Ocean (Thailand) Co., Ltd. (Gallant Ocean)[2]; Haitai Seafood Co., Ltd.; High Way International Co., Ltd.; Li–Thai Frozen Foods Co., Ltd.; Merkur Co., Ltd.; Ming Chao Ind Thailand; Nongmon SMJ Products; Queen Marine Food Co., Ltd.; SCT Co., Ltd.; Search & Serve; Smile Heart Foods Co., Ltd.; Shianlin Bangkok Co., Ltd.; Star Frozen Foods Co., Ltd.; Thai World Imports & Exports; and Wann Fisheries Co., Ltd.

On October 27, 2008, the Department issued a memorandum indicating that it intended to rescind the administrative review with respect to 29 respondent companies, and it invited comments on this action from interested parties. *See* October 27, 2008, Memorandum to The File from Kate Johnson titled ''Intent to Rescind in Part the Antidumping Duty Administrative Review on Certain Frozen Warmwater Shrimp from Thailand'' (Intent to Rescind Memorandum). On November 3, 2008, and November 13, 2008, the Department received comments from 32 U.S. producers opposing the rescission with respect to the companies for which the petitioner withdrew its review request. On November 6, 2008, the petitioner responded to the comments filed on November 3, 2008.

**Partial Rescission of Review**

Pursant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if a party requesting a review withdraws the request within 90 days of the date of publication of the notice of initiation. Therefore, because all requests for administrative reviews were timely withdrawn for the following companies, in accordance with 19 CFR 351.213(d)(1), we are rescinding this review with regard to these companies: 1) Anglo–Siam Seafoods Co., Ltd.; 2) Applied DB Ind; 3) Chonburi LC; 4) Haitai Seafood Co., Ltd.; 5) High Way International Co., Ltd.; 6) Li–Thai Frozen Foods Co., Ltd.; 7) Merkur Co., Ltd.; 8) Ming Chao Ind Thailand; 9) Nongmon SMJ Products; 10) Queen Marine Food Co., Ltd.; 11) SCT Co., Ltd.; 12) Search & Serve; 13) Smile Heart Foods Co., Ltd.; 14) Shianlin Bangkok Co., Ltd.; 15) Star Frozen Foods Co., Ltd.; 16) Thai World Imports & Exports; and 17) Wann Fisheries Co., Ltd. As noted above, the review requested by Gallant Ocean has not been withdrawn. Therefore, we are not rescinding the review with respect to this company.

In addition, in accordance with 19 CFR 351.213(d)(3), we are rescinding the review with respect to the following ten companies which submitted letters indicating that they had no shipments of subject merchandise during the POR: 1) Dynamic Intertransport Co., Ltd.; 2) Lucky Union Foods Co., Ltd.; 3) MKF Interfood (2004) Co., Ltd.; 4) NR. Instant Produce Co., Ltd.; 5) Siam Canadian Foods Co., Ltd.; 6) Sky Fresh Co., Ltd.; 7) Songkla Canning (PCL); 8) Surat Seafoods Co., Ltd.; 9) Tep Kinsho Foods Co., Ltd.; and 10) Thai Excel Foods Co., Ltd. We reviewed U.S. Customs and Border Protection (CBP) data and confirmed that there were no entries of subject merchandise from any of these companies. Consequently, in accordance with 19 CFR 351.213(d)(3) and consistent with our practice, we are rescinding our review for the companies listed above. *See, e.g., Certain Steel Concrete Reinforcing Bars From Turkey; Final Results and Rescission of Antidumping Duty Administrative Review in Part*, 71 FR 65082, 65083 (November 7, 2006).

Finally, the Department received no–shipment responses from the following companies for which there appeared to be U.S. customs entries of subject merchandise: 1) Grobest Frozen Foods Co., Ltd.; and 2) Thai Union Manufacturing Co., Ltd. We requested data on the relevant entries from CBP and determined that the entries made by Grobest Frozen Foods Co., Ltd. and Thai Union Manufacturing Co., Ltd. were not reportable transactions because they were either: 1) free samples; or 2) sales made by another producer/exporter. Therefore, in accordance with 19 CFR 351.213(d)(3), and consistent with the Department's practice, we are rescinding the review with respect to these two companies. *See, e.g., Certain Steel Concrete Reinforcing Bars from Turkey; Final Results, Rescission of Antidumping Duty Administrative Review in Part, and Determination to Revoke in Part*, 70 FR 67665, 67666 (November 8, 2005).

On November 3, 2008, the Department received comments from 32 U.S. producers regarding the Department's Intent to Rescind Memorandum. In these comments, the U.S. producers objected to the petitioner's July 7, 2008, filing withdrawing its request for administrative reviews for certain Thai producers/exporters because: 1) these domestic producers, three of which were previously part of the Ad Hoc Shrimp Trade Action Committee, have retained their own counsel; and 2) as a result, the Ad Hoc Shrimp Trade Action Committee no longer represents the majority of the U.S. domestic industry. Thus, the U.S. producers requested that the Department not rescind the administrative reviews for the companies for which the petitioner withdrew its request. On November 6, 2008, the petitioner responded to the U.S. producers' comments by stating that all actions in the review were taken on behalf of the Ad Hoc Shrimp Trade Action Committee as a corporate entity, not on behalf of the individual members, and thus it urged the Department to disregard the U.S. producers' request.

After considering the U.S. producers' November 3, 2008, submission, we disagree with the arguments made by these companies. The request for administrative review at issue was made by the Ad Hoc Shrimp Trade Action Committee, which is an interested party to this proceeding under section 771(9)(E) of the Tariff Act of 1930, as amended (the Act) (*i.e.*, the subsection applicable to trade associations). Contrary to the U.S. producers' assertions, this section of the Act does not require a trade association to

[2] Gallant Ocean has not withdrawn its February 29, 2008, request for review.

represent a majority of the industry producing the domestic like product, but rather it merely requires a majority of the association's members to manufacture, produce, or wholesale a domestic like product in the United States. Further, 19 CFR 351.213(b)(1) does not require that a domestic interested party represent the majority of the domestic industry before it may request a review. In this case, both the administrative review requests and the corresponding withdrawal of certain of these requests were made on behalf of the Ad Hoc Shrimp Trade Action Committee, not the individual members of this group. Consequently, because the U.S. producers involved in the November 3, 2008, filing did not request any administrative reviews in this segment of the proceeding, we find that their objection to the petitioner's withdrawal of its request for administrative reviews of certain Thai producers/exporters does not provide a basis for the Department to maintain the review request for these companies.

**Assessment**

The Department intends to issue assessment instructions to CBP 15 days after the date of publication of this partial rescission of administrative review. The Department will direct CBP to assess antidumping duties at the cash deposit rate in effect on the date of entry for POR entries of the subject merchandise produced/exported by the companies for which we are rescinding the review based on the timely withdrawal of review requests.

With respect to POR entries of subject merchandise produced by companies for which we are rescinding the review based on certifications of no–shipments, because these companies certified that they made no POR shipments of subject merchandise for which they had knowledge of U.S. destination, we will instruct CBP to liquidate these entries at the all–others rate established in the less–than-fair–value investigation if there is no rate for the intermediary (*e.g.*, a reseller, trading company, or exporter) involved in the transaction. *See Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003).

**Notification to Importers**

This notice serves as a reminder to importers for whom this review is being rescinded, of their responsibility under 19 CFR 351.402(f) to file a certificate regarding reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice is published in accordance with section 777(i) of the Act and 19 CFR 351.213(d)(4).

Dated: December 15, 2008.

**Gary Taverman,**

*Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.*

## DEPARTMENT OF COMMERCE

### International Trade Administration

**A–580–836**

### Certain Cut–to-Length Carbon–Quality Steel Plate Products From the Republic of Korea: Preliminary Results of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**SUMMARY:** In response to requests by interested parties, the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on certain cut–to-length carbon–quality steel plate products from the Republic of Korea (Korea). This review covers one producer/exporter of the subject merchandise, Dongkuk Steel Mill Co., Ltd. (DSM). The period of review (POR) is February 1, 2007, through January 31, 2008.

The Department has preliminarily determined that DSM made U.S. sales at prices less than normal value. If these preliminary results are adopted in our final results of administrative review, we will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries. Interested parties are invited to comment on these preliminary results of review. We intend to issue the final results of review no later than 120 days from the publication date of this notice.

**EFFECTIVE DATE:** December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Lyn Johnson or Minoo Hatten, AD/CVD Operations, Office 5, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230, telephone: (202) 482–5287 and (202) 482–1690, respectively.

**SUPPLEMENTARY INFORMATION:**

**Background**

On February 10, 2000, the Department published in the **Federal Register** an antidumping duty order on certain cut–to-length carbon–quality steel plate products (steel plate) from the Republic of Korea (Korea). See *Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut–To-Length Carbon–Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea*, 65 FR 6585 (February 10, 2000). On February 4, 2008, the Department published in the **Federal Register** a notice of ''Opportunity to Request Administrative Review'' of the order. See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review*, 73 FR 6477 (February 4, 2008).

In accordance with 19 CFR 351.213(b)(2), on February 29, 2008, DSM requested that the Department conduct an administrative review of its sales and entries of subject merchandise into the United State during the POR. Additionally, on February 29, 2008, and in accordance with 19 CFR 351.213(b)(1), domestic producers and interested parties, Nucor Corporation (Nucor) and ArcelorMittal Steel USA Inc. (ArcelorMittal), requested that the Department conduct a review of DSM. On March 31, 2008, the Department initiated an administrative review of DSM. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews, Request for Revocation in Part, and Deferral of Administrative Review*, 73 FR 16837 (March 31, 2008). On October 15, 2008, we extended the due date for the preliminary results of review by 45 days to December 15, 2008. See *Certain Cut–to-Length Carbon–Quality Steel Plate Products From the Republic of Korea: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review*, 73 FR 62477 (October 21, 2008).

The Department is conducting this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

**Scope of the Order**

The products covered by the antidumping duty order are certain hot–rolled carbon–quality steel: (1) Universal mill plates (*i.e.*, flat–rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a nominal or actual thickness of not less than 4 mm, which are cut–to-length (not in coils) and without

patterns in relief), of iron or non–alloy-quality steel; and (2) flat–rolled products, hot–rolled, of a nominal or actual thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are cut–to-length (not in coils). Steel products included in the scope of the order are of rectangular, square, circular, or other shape and of rectangular or non–rectangular cross–section where such non–rectangular cross–section is achieved subsequent to the rolling process (*i.e.*, products which have been ''worked after rolling'') - for example, products which have been beveled or rounded at the edges. Steel products that meet the noted physical characteristics that are painted, varnished, or coated with plastic or other non–metallic substances are included within this scope. Also, specifically included in the scope of the order are high strength, low alloy (HSLA) steels. HSLA steels are recognized as steels with micro–alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. Steel products included in this scope, regardless of Harmonized Tariff Schedule of the United States (HTSUS) definitions, are products in which: (1) Iron predominates, by weight, over each of the other contained elements, (2) the carbon content is two percent or less, by weight, and (3) none of the elements listed below is equal to or exceeds the quantity, by weight, respectively indicated: 1.80 percent of manganese, or 1.50 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.41 percent of titanium, or 0.15 percent of vanadium, or 0.15 percent zirconium. All products that meet the written physical description, and in which the chemistry quantities do not equal or exceed any one of the levels listed above, are within the scope of the order unless otherwise specifically excluded. The following products are specifically excluded from the order: (1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non–metallic substances; (2) SAE grades (formerly AISI grades) of series 2300 and above; (3) products made to ASTM A710 and A736 or their proprietary equivalents; (4) abrasion–resistant steels (*i.e.*, USS AR 400, USS AR 500); (5) products made to ASTM A202, A225, A514 grade S, A517 grade S, or their proprietary equivalents; (6) ball bearing steels; (7) tool steels; and (8) silicon manganese steel or silicon electric steel.

Imports of steel plate are currently classified in the HTSUS under subheadings 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7225.40.3050, 7225.40.7000, 7225.50.6000, 7225.99.0090, 7226.91.5000, 7226.91.7000, 7226.91.8000, and 7226.99.0000. The HTSUS subheadings are provided for convenience and customs purposes. The written description of the merchandise covered by the order is dispositive.

**Fair–Value Comparison**

To determine whether DSM's sales of the subject merchandise from Korea to the United States were at prices below normal value, we compared the constructed export price (CEP) to the normal value as described in the ''Constructed Export Price'' and ''Normal Value'' sections of this notice. Therefore, pursuant to section 777A(d)(2) of the Act, we compared the CEP of individual U.S. transactions to the monthly weighted–average normal value of the foreign like product where there were sales made in the ordinary course of trade.

**Product Comparisons**

In accordance with section 771(16) of the Act, we considered all products covered by the ''scope of the order'' section above produced and sold by DSM in the comparison market during the POR to be foreign like product for the purposes of determining appropriate product comparisons to U.S. sales of subject merchandise. Specifically, in making our comparisons, we used the following methodology. If an identical comparison–market model was reported, we made comparisons to weighted–average comparison–market prices that were based on all sales which passed the cost–of-production (COP) test of the identical product during the relevant or contemporary month. We calculated the weighted–average comparison–market prices on a level of trade–specific basis. If there were no contemporaneous sales of an identical model, we identified the most similar comparison–market model. To determine the most similar model, we matched the foreign like product based on the physical characteristics reported by the respondent in the following order of importance: quality, specification, heat treatments, thickness, and width.

**Constructed Export Price**

The Department based the price of DSM's U.S. sales of subject merchandise on CEP, as defined in section 772(b) of the Act, because the merchandise was sold, before importation, by a U.S.-based seller affiliated with the producer to unaffiliated purchasers in the United States. In accordance with section 772(d)(1) of the Act we calculated the CEP by deducting selling expenses associated with economic activities occurring in the United States, which includes direct selling expenses. In accordance with section 772(d)(1) of the Act, we also deducted those indirect selling expenses associated with economic activities occurring in the United States and the profit allocated to expenses deducted under section 772(d)(1) in accordance with sections 772(d)(3) and 772(f) of the Act. In accordance with section 772(f) of the Act, we computed profit based on the total revenues realized on sales in both the U.S. and comparison markets, less all expenses associated with those sales. We then allocated profit to expenses incurred with respect to U.S. economic activity based on the ratio of total U.S. expenses to total expenses for both the U.S. and comparison markets.

**Normal Value**

*A. Affiliation*

DSM made home–market sales to a wholly owned subsidiary of Dongkuk Industries Co., Ltd. (DKI). The Department has found DKI to be an affiliated party of DSM in prior reviews and has treated sales to DKI's wholly owned subsidiary as affiliated–party sales. See *Certain Cut–to-Length Carbon–Quality Steel Plate Products From the Republic of Korea: Preliminary Results and Rescission in Part of Antidumping Duty Administrative Review*, 70 FR 67428, 67429 (November 7, 2005) (*2004/05 Prelim*), unchanged in *Certain Cut–to-Length Carbon–Quality Steel Plate Products From the Republic of Korea: Final Results of Antidumping Duty Administrative Review*, 71 FR 13080 (March 14, 2006) (*2004/05 Final*). See also *Certain Cut–to-Length Carbon–Quality Steel Plate Products From the Republic of Korea: Preliminary Results and Rescission in Part of Antidumping Duty Administrative Review*, 72 FR 65701, 65703 (November, 2007) (*2006/07 Prelim*), unchanged in *Certain Cut–to-Length Carbon–Quality Steel Plate Products From the Republic of Korea: Final Results and Rescission in Part of*

*Antidumping Duty Administrative Review*, 73 FR 15132 (March 21, 2008) (2006/07 Final).

Section 771(33)(F) of the Act states that two or more persons directly or indirectly controlling, controlled by, or under common control with any person shall be considered affiliates. Accordingly, we have determined in this review that DSM and DKI are under common control of a family grouping and, thus, are affiliated. Our decision is supported by the evidence on the record of this review which indicates that the same familial relationships that formed the basis of our determination in *2004/05 Final*[1] and *2006/07 Final*[2] continue today. Further, although DSM identified DKI as an unaffiliated entity in its original questionnaire response, DSM confirmed in its supplemental response that there have not been any changes in the ownership or control of DSM and DKI during the POR that would affect the Department's 2007–2008 analysis of affiliation between the two companies. See DSM's Supplemental Questionnaire Response dated September 9, 2008, at 6. The detailed analysis of this issue contains business–proprietary information and, therefore, is available in a decision memorandum. See Memorandum to Laurie Parkhill concerning Affiliation Analysis for Dongkuk Steel Mill Co., Ltd., dated December 12, 2008. For the reasons stated above and outlined in the decision memorandum, the Department preliminarily continues to find that DSM and DKI are affiliated under section 771(33) of the Act.

*B. Home–Market Viability*

In accordance with section 773(a)(1)(c) of the Act, in order to determine whether there was a sufficient volume of sales of steel plate in the comparison market to serve as a viable basis for calculating the normal value, we compared the volume of the respondent's home–market sales of the foreign like product to its volume of the U.S. sales of the subject merchandise. DSM's quantity of sales in the home market was greater than five percent of its sales to the U.S. market. Based on this comparison of the aggregate quantities sold in the comparison market (*i.e.*, Korea) and to the United States and absent any information that a particular market situation in the exporting country did not permit a proper comparison, we preliminarily determine that the quantity of the foreign like product sold by the respondent in the exporting country was sufficient to permit a proper comparison with the sales of the subject merchandise to the United States, pursuant to section 773(a)(1) of the Act. Thus, we determine that DSM's home market was viable during the POR. *Id.* Therefore, in accordance with section 773(a)(1)(B)(i) of the Act, we based normal value for the respondent on the prices at which the foreign like product was first sold for consumption in the exporting country in the usual commercial quantities and in the ordinary course of trade and, to the extent practicable, at the same level of trade as the U.S. sales.

*C. Overrun Sales*

Section 773(a)(1)(B) of the Act provides that normal value shall be based on the price at which the foreign like product is first sold, *inter alia*, in the ordinary course of trade. Section 771(15) of the Act defines ''ordinary course of trade'' as the ''conditions and practices which, for a reasonable time prior to the exportation of the subject merchandise, have been normal in the trade under consideration with respect to merchandise of the same class or kind.''

DSM reported home–market sales of ''overrun'' merchandise (*i.e.*, sales of a greater quantity of steel plate than the customer ordered due to overproduction). In the past, the Department has examined various factors to determine whether ''overrun'' sales are in the ordinary course of trade. See *China Steel Corp. v. United States*, 264 F. Supp. 2d. 1339, 1364 (CIT May 14, 2003). See also *2004/05 Prelim*, 70 FR 67428, 67430, unchanged in *2004/05 Final*, 71 FR 13080. The Department has the discretion to choose how best to analyze the many factors involved in determining whether sales are made within the ordinary course of trade. See *Laclede Steel Co. v. United States*, 19 CIT 1076, 1078 (CIT August 11, 1995). These factors include, but are not limited to, the following: (1) whether the merchandise is ''off–quality'' or produced according to unusual specifications; (2) the comparative volume of sales and the number of buyers in the home market; (3) the average quantity of an overrun sale compared to the average quantity of a commercial sale; and (4) price and profit differentials in the home market.

Based on our analysis of these factors and the terms of sale, we preliminarily determine that DSM's overrun sales are outside the ordinary course of trade. Because our analysis makes use of business–proprietary information, the analysis is available in a separate decision memorandum. See Memorandum to Laurie Parkhill concerning Dongkuk Steel Mill Co., Ltd. Sales Outside the Ordinary Course of Trade, dated December 12, 2008.

*D. Cost–of-Production Analysis*

In the most recently completed administrative review, the Department determined that DSM sold the foreign like product at prices below the cost of producing the merchandise and, as a result, excluded such sales from the calculation of normal value. See *2006/07 Prelim*, 72 FR at 65704, unchanged in *2006/07 Final*, 73 FR 15132. Therefore, in this review, we have reasonable grounds to believe or suspect that DSM's sales of the foreign like product under consideration for the determination of normal value may have been made at prices below COP as provided by section 773(b)(2)(A)(ii) of the Act and, pursuant to section 773(b)(1) of the Act, we have conducted a COP investigation of DSM's sales in the comparison market.

In accordance with section 773(b)(3) of the Act, we calculated the COP based on the sum of the costs of materials and labor employed in producing the foreign like product, the selling, general, and administrative (SG&A) expenses, and all costs and expenses incidental to packing the merchandise. In our COP analysis, we used the comparison–market sales and COP information provided by DSM in its questionnaire response.

After calculating the COP, in accordance with section 773(b)(1) of the Act, we tested whether comparison–market sales of the foreign like product were made at prices below the COP within an extended period of time in substantial quantities and whether such prices permitted the recovery of all costs within a reasonable period of time. See section 773(b)(2) of the Act. We compared model–specific COPs to the reported comparison–market prices less any applicable movement charges, discounts, and rebates.

Pursuant to section 773(b)(2)(C) of the Act, when less than 20 percent of DSM's sales of a given product were at prices less than the COP, we did not disregard any below–cost sales of that product because the below–cost sales were not made in substantial quantities within an extended period of time. When 20 percent or more of DSM's sales of a given product during the POR were at prices less than the COP, we disregarded the below–cost sales because they were made in substantial

[1] See Memorandum to Holly Kuga from Malcolm Burke concerning the affiliation analysis for Dongkuk Steel Mill Co., Ltd., dated October 31, 2005.

[2] See Preliminary Analysis Memorandum for Dongkuk Steel Mill Co., Ltd., dated November 15, 2007, at 2.

quantities within an extended period of time pursuant to sections 773(b)(2)(B) and (C) of the Act and because, based on comparisons of prices to weighted-average COPs for the POR, we determined that these sales were at prices which would not permit recovery of all costs within a reasonable period of time in accordance with section 773(b)(2)(D) of the Act. Based on this test, we disregarded below–cost sales.

*E. Arm's–Length Test*

The Department may calculate normal value based on a sale to an affiliated party only if it is satisfied that the price to the affiliated party is comparable to the price at which sales are made to parties not affiliated with the exporter or producer, *i.e.*, sales at arm's–length prices. See 19 CFR 351.403(c). For affiliated–party sales, we excluded from our analysis sales to affiliated customers for consumption in the comparison market that we determined not to have been made at arm's–length prices. To test whether these sales were made at arm's–length prices, the Department compared the prices of sales of comparable merchandise to affiliated and unaffiliated customers, net of all rebates, movement charges, direct selling expenses, and packing. Pursuant to 19 CFR 351.403(c) and in accordance with our practice, when the prices charged to an affiliated party were, on average, between 98 and 102 percent of the prices charged to unaffiliated parties for merchandise comparable to that sold to the affiliated party, we determined that the sales to the affiliated party were at arm's–length prices. See *Antidumping Proceedings: Affiliated Party Sales in the Ordinary Course of Trade*, 67 FR 69186 (November 15, 2002) (explaining the Department's practice). We included in our calculations of normal value those sales to affiliated parties that were made at arm's–length prices.

*F. Price–to-Price Comparisons*

We based normal value on comparison–market sales to unaffiliated purchasers and sales to affiliated customers that passed the arm's–length test. DSM's comparison–market prices were based on the packed, ex–factory, or delivered prices. When applicable, we made adjustments for differences in packing and for movement expenses in accordance with sections 773(a)(6)(A) and (B) of the Act. We also made adjustments for differences in cost attributable to differences in physical characteristics of the merchandise pursuant to section 773(a)(6)(C)(ii) of the Act and 19 CFR 351.411 and for differences in circumstances of sale in accordance with section 773(a)(6)(C)(iii) of the Act and 19 CFR 351.410. For comparisons to CEP, we made circumstance–of-sale adjustments by deducting comparison–market direct selling expenses from normal value.

**Level of Trade**

To the extent practicable, we determine normal value for sales at the same level of trade as CEP sales. See section 773(a)(1)(B)(i) of the Act and 19 CFR 351.412. When there are no sales at the same level of trade, we compare CEP sales to comparison–market sales at a different level of trade. The normal–value level of trade is that of the starting–price sales in the comparison market.

To determine whether comparison–market sales are at a different level of trade than DSM's U.S. sales in this review, we examined stages in the marketing process and selling functions along the chain of distribution between the producer and the unaffiliated customer. Based on our analysis, we have preliminarily determined that there is one level of trade in the United States and one level of trade in the home market and that the U.S. level of trade is at a less advanced stage than the home–market level of trade. Therefore, we have compared U.S. sales to home–market sales at different levels of trade.

Because there is only one level of trade in the home market, we were unable to calculate a level–of-trade adjustment based on DSM's home–market sales of the foreign like product and we have no other information that provides an appropriate basis for determining a level–of-trade adjustment. For DSM's CEP sales, to the extent possible, we determined normal value at the same level of trade as the U.S. sale to the unaffiliated customer and made a CEP–offset adjustment in accordance with section 773(a)(7)(B) of the Act. The CEP–offset adjustment to normal value is subject to the so–called offset cap, which is calculated as the sum of home–market indirect selling expenses up to the amount of U.S. indirect selling expenses deducted from CEP.

For a detailed description of our level–of-trade analysis for DSM in these preliminary results, see Preliminary Analysis Memorandum for Dongkuk Steel Mill Company, Ltd., dated December 12, 2008.

**Currency Conversion**

Pursuant to 19 CFR 351.415, we converted amounts expressed in foreign currencies into U.S. dollar amounts based on the exchange rates in effect on the dates of the relevant U.S. sales, as certified by the Federal Reserve Bank.

**Preliminary Results of Review**

As a result of this review, we preliminarily determine that the following weighted–average dumping margin exists for the period February 1, 2007, through January 31, 2008:

| Manufacturer/Exporter | Margin (percent) |
|---|---|
| Dongkuk Steel Mill Co., Ltd. ..... | 9.27 |

**Disclosure and Public Comment**

We will disclose the calculations used in our analysis to parties in this review within five days of the date of publication of this notice. Any interested party may request a hearing within 30 days of the publication of this notice in the **Federal Register**. If a hearing is requested, the Department will notify interested parties of the hearing schedule.

Interested parties are invited to comment on the preliminary results of this review. The Department will consider case briefs filed by interested parties within 30 days after the date of publication of this notice in the **Federal Register**. Interested parties may file rebuttal briefs, limited to issues raised in the case briefs. The Department will consider rebuttal briefs filed not later than five days after the time limit for filing case briefs. Parties who submit arguments are requested to submit with each argument a statement of the issue, a brief summary of the argument, and a table of authorities cited. Further, we request that parties submitting written comments provide the Department with a diskette containing an electronic copy of the public version of such comments.

We intend to issue the final results of this administrative review, including the results of our analysis of issues raised in the written comments, within 120 days of publication of these preliminary results in the **Federal Register**.

**Assessment Rates**

The Department shall determine, and CBP shall assess, antidumping duties on all appropriate entries. In accordance with 19 CFR 351.212(b)(1), we calculated an importer–specific assessment rate for these preliminary results of review. We divided the total dumping margins for the reviewed sales by the total entered value of those reviewed sales for the importer. We will instruct CBP to assess the importer–specific rate uniformly, as appropriate, on all entries of subject merchandise made by the relevant importer during the POR. See 19 CFR 351.212(b). The Department intends to issue instructions

to CBP 15 days after the publication of the final results of review.

The Department clarified its ''automatic assessment'' regulation on May 6, 2003. See *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003) (*Assessment of Antidumping Duties*). This clarification will apply to entries of subject merchandise during the POR produced by DSM for which DSM did not know its merchandise was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries of DSM–produced merchandise at the all–others rate if there is no rate for the intermediate company(ies) involved in the transaction. For a full discussion of this clarification, see *Assessment of Antidumping Duties*.

**Cash–Deposit Requirements**

The following deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of steel plate from Korea entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(2)(C) of the Act: (1) the cash–deposit rate for DSM will be the rate established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash–deposit rate will continue to be the company–specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the less–than-fair–value investigation but the manufacturer is, the cash–deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; (4) if neither the exporter nor the manufacturer has its own rate, the cash–deposit rate will be 0.98 percent, the all–others rate established in the LTFV investigation,[3] adjusted for the export–subsidy rate in the companion countervailing duty investigation.[4] This deposit requirement, when imposed, shall remain in effect until further notice.

[3] See *Notice of Final Determination of Sales at Less Than Fair Value: Certain Cut-To-Length Carbon-Quality Steel Plate Products from Korea*, 64 FR 73196, 73214 (December 29, 1999). See also Memorandum To The File from Lyn Johnson concerning All-Others Rate, dated December 12, 2008.

[4] See *Final Affirmative Countervailing Duty Determination: Certain Cut-to-Length Carbon-Quality Steel Plate From the Republic of Korea*, 64 FR 73176, 731818-86 (December 29, 1999), as amended in *Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea*, 65 FR 6587, 6588 (February 10, 2000).

**Notification to Importers**

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

These preliminary results of administrative review are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: December 12, 2008.

**Stephen J. Claeys,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.*

## DEPARTMENT OF COMMERCE

### International Trade Administration

**(A–533–820)**

### Certain Hot-Rolled Carbon Steel Flat Products From India: Notice of Preliminary Results of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**SUMMARY:** In response to requests from petitioners,[1] the Department of Commerce (''the Department'') is conducting an administrative review of the antidumping order on certain hot–rolled carbon steel flat products from India (''Indian Hot–Rolled''). This review covers one manufacturer and exporter of the subject merchandise: Essar Steel Limited (''Essar''). The Department has preliminarily determined that during the period of review (''POR''), Essar made sales of subject merchandise at less than normal value (''NV''). If these preliminary results are adopted in the final results of this administrative review, we will instruct U.S. Customs and Border Protection (''CBP'') to assess antidumping duties on all appropriate entries of subject merchandise during the POR.

**EFFECTIVE DATE:** December 19, 2008.

**FOR FURTHER INFORMATION CONTACT:** Joy Zhang or James Terpstra, AD/CVD Operations Office 3, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–1168 and (202) 482–3965, respectively.

**SUPPLEMENTARY INFORMATION:**

**Background**

On December 3, 2001, the Department published in the **Federal Register** the antidumping duty order on Indian Hot–Rolled. *See Notice of Amended Final Antidumping Duty Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Hot–Rolled Carbon Steel Flat Products from India*, 66 FR 60194 (December 3, 2001) (''*Amended Final Determination*''). On December 3, 2007, the Department published in the **Federal Register** a notice of ''Opportunity to Request Administrative Review'' of the antidumping duty order on Indian Hot–Rolled. *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review*, 72 FR 69889 (December 3, 2007). On December 31, 2007, petitioners requested an administrative review in the antidumping duty order on Indian Hot–Rolled, which were produced or exported by Ispat Industries Limited (''Ispat''), JSW Steel Limited (''JSW''), Tata Steel Limited (''Tata''), and Essar. On January 28, 2008, the Department published a notice of initiation of antidumping duty administrative review of Indian Hot–Rolled for the period December 1, 2006, through November 30, 2007. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 73 FR 4829 (January 28, 2008) (''*Initiation Notice*''). On February 25, 2008, the Department issued a memorandum informing the interested parties of the Department's intention to limit the number of companies it would examine in this review pursuant to section 777A(c)(2) of the Tariff Act of 1930, as amended (the ''Act'').[2] On February 26–27, 2008, Ispat, Tata, and JSW each informed the Department that they did not have shipments of the subject merchandise to the United States during the POR. On August 20,

[1] The petitioners are the United States Steel Corporation Steel and Nucor Corporation (collectively ''petitioners'').

[2] *See* Memorandum to File, Re: ''2006-2007 Antidumping Duty Administrative Review of Certain Hot-Rolled Carbon Steel Flat Products from India,'' Subject: ''Customs and Border Protection Data for Selection of Respondents for Individual Review,'' from Cindy Robinson, Senior Financial Analyst, through James Terpstra, Program Manager, and Melissa Skinner, Office Director, Office 3, AD/CVD Operations, dated February 25, 2008 (''Hot-Rolled Memo'').

2008, the Department published a notice extending the deadline for the preliminary results from September 1, 2008, to October 31, 2008. In this notice the Department also published its intent to rescind this administrative review in part with respect to Ispat, JSW and Tata. See Certain Hot–Rolled Carbon Steel Flat Products from India: Notice of Intent to Rescind Antidumping Duty Administrative Review in Part and Notice of Extension of Time Limits for Preliminary Results of Antidumping Administrative Review, 73 FR 49169 (August 20, 2008) (''Notice of Intent to Rescind and Prelim Extension'').

On April 11, 2008, the Department issued an antidumping questionnaire to Essar. The Department received responses to the original questionnaire from Essar. The Department subsequently issued supplemental questionnaires to Essar and received responses to the same.

On September 2, 2008, the Department sent a letter to all interested parties inviting comment on Draft Customs Instructions related to the Department's intent to rescind the administrative review with respect to Ispat, JSW and Tata. *See* Memorandum to File, Re: ''Draft Customs Instructions – Certain Hot–Rolled Carbon Steel Flat Products from India,'' dated September 2, 2008. The Department did not receive comments from any interested party. On November 3, 2008, the Department published a notice of rescission of this administrative review in part with respect to Ispat, JSW and Tata. *See Certain Hot–Rolled Carbon Steel Flat Products from India: Notice of Rescission, In Part, of Antidumping Duty Administrative Review*, 73 FR 65291 (November 3, 2008).

On October 28, 2008, the Department again extended the time period for issuing the preliminary results of the administrative review from October 31, 2008, to December 12, 2008. *See Certain Hot–Rolled Carbon Steel Flat Products from India: Notice of Extension of Time Limits for Preliminary Results of Antidumping Duty Administrative Review*, 73 FR 63945 (October 28, 2008).

**Period of Review**

The POR covered by this review is December 1, 2006, through November 30, 2007.

**Scope of the Order**

The merchandise subject to this order is certain hot–rolled carbon steel flat products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non–metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths, of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat–rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this order.

Specifically included in the scope of this order are vacuum–degassed, fully stabilized (commonly referred to as interstitial–free (''IF'')) steels, high–strength low–alloy (''HSLA'') steels, and the substrate for motor lamination steels. IF steels are recognized as low–carbon steels with micro–alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro–alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro–alloying levels of elements such as silicon and aluminum.

Steel products included in the scope of this order, regardless of definitions in the Harmonized Tariff Schedule of the United States (''HTSUS''), are products in which: i) iron predominates, by weight, over each of the other contained elements; ii) the carbon content is 2 percent or less, by weight; and iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
2.25 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or
0.15 percent of vanadium, or
0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this order unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope of this order:

- Alloy hot–rolled carbon steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, American Society for Testing and Materials (''ASTM'') specifications A543, A387, A514, A517, A506)).
- Society of Automotive Engineers (''SAE'')/American Iron & Steel Institute (''AISI'') grades of series 2300 and higher.
- Ball bearings steels, as defined in the HTSUS.
- Tool steels, as defined in the HTSUS.
- Silico–manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- United States Steel (''USS'') Abrasion–resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non–rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTSUS.

The merchandise subject to this order is currently classifiable in the HTSUS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot–rolled carbon steel covered by this order, including: vacuum–degassed fully stabilized; high–strength low–alloy; and the substrate for motor lamination steel may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00, and

7212.50.00.00. Although the HTSUS subheadings are provided for convenience and customs purposes, the Department's written description of the merchandise subject to this order is dispositive.

**Product Comparisons**

In accordance with section 771(16) of the Act, we considered all Indian Hot–Rolled produced by the respondent, covered by the scope of the order, and sold in the home market during the POR to be foreign like product for the purpose of determining appropriate product comparisons to Indian Hot–Rolled sold in the United States.

Where there were no sales in the ordinary course of trade of identical merchandise in the home market to compare to U.S. sales, we compared U.S. sales to the next most similar foreign like product on the basis of the characteristics listed in Appendix V of the Department's antidumping questionnaire. In making the product comparisons, we matched foreign like products based on the Appendix V physical characteristics reported by each respondent. Where sales were made in the home market on a different weight basis from the U.S. market (theoretical versus actual weight), we converted all quantities to the same weight basis, using the conversion factors supplied by the respondents, before making our fair–value comparisons.

**Fair Value Comparisons**

To determine whether sales of Indian Hot–Rolled by the respondents to the United States were made at less than NV, we compared the export price (''EP'') to the NV, as described in the ''Export Price'' and ''Normal Value'' sections of this notice. In accordance with section 777A(d)(2) of the Act, we calculated monthly weighted–average prices for NV and compared these to individual U.S. transactions, where there were sales made in the ordinary course of trade, as discussed in the ''Cost of Production (''COP'')'' section below. *See* the December 12, 2008, Preliminary Sales Calculation Memorandum for Essar (Calculation Memorandum for Essar); the public version of which is on file in the Central Records Unit (CRU), Room 1117 of the main Department building.

**Export Price**

Section 772(a) of the Act defines EP as ''the price at which the subject merchandise is first sold (or agreed to be sold) before the date of importation by the producer or exporter of the subject merchandise outside of the United States to an unaffiliated purchaser in the United States or to an unaffiliated purchaser for exportation to the United States, as adjusted under subsection (c) of this section.'' During the POR, Essar produced and sold subject merchandise to the first unaffiliated purchaser in the United States prior to importation. Therefore, we have applied the EP methodology.

We based EP on the packed price to unaffiliated purchasers in the United States. We made deductions, as appropriate, for billing adjustments. We also made deductions for movement expenses in accordance with section 772(c)(2)(A) of the Act. Accordingly, we made deductions for foreign inland freight, foreign inland insurance, foreign brokerage and handling, international freight, U.S. brokerage and handling, and U.S. customs duties. In addition, in accordance with section 772(c)(1)(C) of the Act, when appropriate, we increased EP, by an amount equal to the countervailing duty rate attributed to export subsidies in the most recently completed administrative review of the countervailing duty order applicable to the POR for Essar.

**Normal Value**

Based on a comparison of the aggregate quantity of home market and U.S. sales, we determined that the quantity of the foreign like product sold by each respondent in the exporting country was sufficient to permit a proper comparison with the sales of the subject merchandise to the United States, pursuant to section 773(a) of the Act. Therefore, in accordance with section 773(a)(1)(B)(i) of the Act, we based NV on the price at which the foreign like product was first sold for consumption in the home market, in the usual commercial quantities and in the ordinary course of trade.

Where appropriate, in accordance with section 773(a)(6)(B) of the Act, we deducted from the starting price inland freight (offset, where applicable, by freight revenue), inland insurance, and packing. Pursuant to 19 CFR 351.401(c), we deducted rebates and discounts. We also increased NV by U.S. packing costs in accordance with section 773(a)(6)(A) of the Act. For comparisons to EP, pursuant to section 773(a)(6)(C)(iii) of the Act and 19 CFR 351.410(b), we made circumstance–of-sale adjustments for credit expenses, bank charges and commissions. In accordance with section 773(a)(1)(B)(i) of the Act, we based NV on sales at the same level of trade as the EP. *See* the ''Level of Trade'' section below.

For purposes of calculating NV, section 771(16) of the Act defines ''foreign like product'' as merchandise which is either (1) identical or (2) similar to the merchandise sold in the United States. When there are no identical products sold in the home market, the products which are most similar to the product sold in the United States are identified. For the non–identical or most similar products which are identified based on the Department's product matching criteria, an adjustment is made to the home market sales price to account for the actual physical differences between the products sold in the United States and the home market. *See* section 773(a)(6)(C)(ii) of the Act and 19 CFR 351.411.

**Level of Trade**

In accordance with section 773(a)(1)(B) of the Act, we determined NV based on sales in the comparison market at the same level of trade (''LOT'') as the EP sales, to the extent practicable. When there were no sales at the same LOT, we compared U.S. sales to comparison market sales at a different LOT.

Pursuant to 19 CFR 351.412, to determine whether EP sales and NV sales were at different LOTs, we examine stages in the marketing process and selling functions along the chain of distribution between the producer and the customers. If the comparison market sales are at a different LOT and the differences affect price comparability, as manifested in a pattern of consistent price differences between sales at different LOTs in the country in which NV is determined, we will make an LOT adjustment under section 773(a)(7)(A) of the Act.

Essar reported different channels of distribution in the home market; however, based on our analysis of the selling functions performed for each channel, we found one level of trade for Essar. In the U.S. market, Essar reported one channel of distribution and one LOT for EP sales. We evaluated the core selling function categories in the U.S. and home market LOTs and found that each of the core selling functions (*i.e.*, sales promotion, order processing, and warranty and technical support) were performed in both the U.S. and home markets. Although there are differences in the type of sales and marketing services provided for each market, we did not find this to be a material selling function distinction significant enough to warrant a separate LOT. Therefore, after analyzing the selling functions performed in each market, we find that the distinctions in selling functions are not material and thus, that the home market and U.S. LOTs are the same.

Accordingly, there is no basis for making a LOT under section 773(a)(7)(A) of the Act and 19 CFR 351.412(e). For a detailed description of our LOT methodology and a summary of company–specific LOT findings for these preliminary results, *see* Calculation Memorandum for Essar.

**Cost of Production (''COP'')**

*A. Calculation of COP*

In the most recently completed administrative review in which Essar participated, the Department determined that Essar sold foreign like product at prices below the cost of producing the merchandise and excluded such sales from the calculation of NV. *See Certain Hot–Rolled Carbon Steel Flat Products From India: Preliminary Results of Antidumping Duty Administrative Review*, 72 FR 74267 (December 3, 2007) unchanged in the final results, *Certain Hot–Rolled Carbon Steel Flat Products From India: Notice of Final Results of Antidumping Duty Administrative Review*, 73 FR 31961 (June 5, 2008). As a result, the Department determined that there are reasonable grounds to believe or suspect that during the instant POR, Essar sold foreign like product at prices below the cost of producing the merchandise. See section 773(b)(2)(A)(ii) of the Act. Therefore, the Department initiated a sales–below-cost inquiry with respect to Essar.

We calculated a company–specific COP for Essar based on the sum of Essar's cost of materials and fabrication for the foreign like product, plus amounts for home–market selling expenses, selling, general and administrative expenses (''SG&A''), and packing costs in accordance with section 773(b)(3) of the Act. We adjusted Essar's reported costs to reflect the actual cost of iron ore pellets obtained from its Hygrade Pellets division, but have denied the claimed offset to the reported costs for profits allegedly earned by its Steelco Gujarat division on services provided during the cost reporting period.

*B. Test of Home–Market Prices*

In determining whether to disregard home market sales made at prices below the COP, as required under sections 773(b)(1)(A) and (B) of the Act, we compared the weighted–average COP to home market sales of the foreign like product and examined whether (1) within an extended period of time, such sales were made in substantial quantities, and (2) such sales were made at prices which permitted the recovery of all costs within a reasonable period of time. On a product–specific basis, we compared the COP to the home market prices (not including Value Added Tax), less any applicable movement charges, discounts, and rebates.

*C. Results of COP Test*

Pursuant to section 773(b)(1) of the Act, we may disregard below–COP sales in the determination of NV if these sales have been made within an extended period of time in substantial quantities and were not at prices which permit recovery of all costs within a reasonable period of time. Where 20 percent or more of a respondent's sales of a given product during the POR were at prices less than the COP for at least six months of the POR, we determined that sales of that model were made in ''substantial quantities'' within an extended period of time, in accordance with sections 773(b)(2)(B) and (C) of the Act. Where prices of a respondent's sales of a given product were below the per–unit COP at the time of sale and below the weighted–average per–unit costs for the POR, we determined that sales were not at prices which would permit recovery of all costs within a reasonable period of time, in accordance with section 773(b)(2)(D) of the Act. In such cases, we disregarded the below–cost sales in accordance with section 773(b)(1) of the Act.

Pursuant to section 773(b)(2)(C) of the Act, where less than 20 percent of a respondent's sales of a given product were at prices less than the COP, we did not disregard any below–cost sales of that product because we determined that the below–cost sales were not made in ''substantial quantities.''

We tested and identified below–cost home market sales for Essar. We disregarded individual below–cost sales of a given product and used the remaining sales as the basis for determining NV, in accordance with section 773(b)(1) of the Act. *See* Calculation Memorandum for Essar.

**Arm's–Length Sales**

Essar reported that it made sales of the foreign like product in the home market to affiliated parties. The Department calculates NV based on a sale to an affiliated party only if it is satisfied that the price to the affiliated party is comparable to the price at which sales are made to parties not affiliated with the producer or exporter, *i.e.*, sales at arm's length. *See* 19 CFR 351.403(c).

To test whether these sales were made at arm's length, we compared the starting prices of sales to affiliated and unaffiliated customers net of all movement charges, direct selling expenses, discounts and packing. In accordance with the Department's current practice, if the prices charged to an affiliated party were, on average, between 98 and 102 percent of the prices charged to unaffiliated parties for merchandise identical or most similar to that sold to the affiliated party, we considered the sales to be at arm's–length prices. *See Notice of Preliminary Results and Partial Rescission of Antidumping Duty Administrative Review: Ninth Administrative Review of the Antidumping Duty Order on Certain Pasta from Italy*, 71 FR 45017, 45020 (August 8, 2006), and unchanged in the final results; *see also Notice of Final Results of the Ninth Administrative Review of the Antidumping Duty Order on Certain Pasta from Italy*, 72 FR 7011 (February 14, 2007); and 19 CFR 351.403(c). Conversely, where we found sales to the affiliated party that did not pass the arm's–length test, all sales to that affiliated party have been excluded from the NV calculation. *See Antidumping Proceedings: Affiliated Party Sales in the Ordinary Course of Trade*, 67 FR 69186, 69187 (November 15, 2002).

**Currency Conversion**

For purposes of these preliminary results, we made currency conversions in accordance with section 773A(a) of the Act, based on the official exchange rates published by the Federal Reserve Bank.

**Preliminary Results of the Review**

As a result of this review, we preliminarily find that the following weighted–average dumping margin exists:

| Producer/Manufacturer | Weighted–Average Margin |
|---|---|
| Essar | 2.10 % |

The Department will disclose calculations performed within five days of the date of publication of this notice to the parties of this proceeding in accordance with 19 CFR 351.224(b). Interested parties may submit case briefs and/or written comments no later than 30 days after the date of publication of these preliminary results of review. *See* 19 CFR 351.309(c)(ii). Rebuttal briefs are limited to issues raised in such briefs or comments and may be filed no later than five days after the time limit for filing the case briefs or comments. *See* 19 CFR 351.309(d). Parties submitting arguments in this proceeding are requested to submit with the argument: 1) a statement of the issue, 2) a brief summary of the argument, and 3) a table

of authorities. *See* 19 CFR 351.309(c)(2) and (d)(2). Case and rebuttal briefs and comments must be served on interested parties in accordance with 19 CFR 351.303(f). Further, parties submitting written comments are requested to provide the Department with an additional copy of the public version of any such comments on a diskette.

An interested party may request a hearing within 30 days of publication of these preliminary results. *See* 19 CFR 351.310(c). A hearing, if requested, ordinarily will be held two days after the due date of the rebuttal briefs. The Department will issue the final results of this administrative review, which will include the results of its analysis of issues raised in the written comments, or at a hearing, if requested, within 120 days of publication of these preliminary results.

**Assessment Rate**

Pursuant to 19 CFR 351.212(b), the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries. The Department will issue appropriate assessment instructions directly to CBP 15 days after the publication of the final results of this review. For assessment purposes, where possible, we calculated importer–specific assessment rates for certain hot–rolled carbon steel flat products from India via ad valorem duty assessment rates based on the ratio of the total amount of the dumping margins calculated for the examined sales to the total entered value of those same sales. We will instruct CBP to assess antidumping duties on all appropriate entries covered by this review if any assessment rate calculated in the final results of this review is above de minimis. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of these reviews and for future deposits of estimated duties, where applicable.

The Department clarified its ''automatic assessment'' regulation on May 6, 2003. *See Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003) (''*Assessment Policy Notice*''). This clarification will apply to entries of subject merchandise during the POR produced by companies included in these final results of review for which the reviewed companies did not know that the merchandise they sold to the intermediary (*e.g.*, a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all–others rate if there is no rate for the intermediary involved in the transaction. *See* Assessment Policy Notice for a full discussion of this clarification.

**Cash Deposit Requirements**

To calculate the cash deposit rate for the producer and/or exporter included in this administrative review, we divided the total dumping margins for each company by the total net value for that company's sales during the review period.

The following deposit rates will be effective upon publication of the final results of this administrative review for all shipments of hot–rolled carbon steel from India entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rates for the companies listed above will be the rates established in the final results of this review, except if the rate is less than 0.5 percent and, therefore, *de minimis*, the cash deposit will be zero; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company–specific rate published for the most recent final results in which that manufacturer or exporter participated; (3) if the exporter is not a firm covered in these reviews, a prior review, or the original less–than-fair–value (''LTFV'') investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent final results for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review or the LTFV conducted by the Department, the cash deposit rate will be 38.72 percent, the all–others rate established in the LTFV. *See Amended Final Determination*. These cash deposit requirements, when imposed, shall remain in effect until further notice.

**Notification to Importers**

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These preliminary results of review are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: December 10, 2008.

**Stephen J. Claeys,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.*

## DEPARTMENT OF COMMERCE

### National Institute of Standards and Technology

### National Conference on Weights and Measures 94th Interim Meeting

**AGENCY:** National Institute of Standards and Technology, Commerce.

**ACTION:** Notice.

**SUMMARY:** The Interim Meeting of the 94th National Conference on Weights and Measures (NCWM) will be held January 11 to 14, 2009. Publication of this notice on the NCWM's behalf is undertaken as a public service; NIST does not endorse, approve, or recommend any of the proposals contained in this notice or in the publications of the NCWM mentioned below. The meetings are open to the public but registration is required. Registration information is stated in the **FOR FURTHER INFORMATION CONTACT** section below.

**DATES:** The meeting will be held on January 11–14, 2009.

**ADDRESSES:** The meeting will be held at the Hilton Daytona Beach Oceanfront Resort, 100 North Atlantic Avenue, Daytona Beach, Florida 32118.

**FOR FURTHER INFORMATION CONTACT:** Carol Hockert, Chief, NIST, Weights and Measures Division, 100 Bureau Drive, Stop 2600, Gaithersburg, MD 20899–2600 or by telephone (301) 975–5507 or by e-mail at *Carol.Hockert@nist.gov*. Please see the NCWM Publication 15, which contains detailed meeting agendas, registration forms and hotel reservation information, at *http://www.ncwm.net* or *http://www.nist.gov/owm* on the Internet.

**SUPPLEMENTARY INFORMATION:** The NCWM is an organization of weights and measures officials of the states, counties, and cities of the United States, federal agencies, and private sector representatives. These meetings bring together government officials and representatives of business, industry, trade associations, and consumer organizations on subjects related to the field of weights and measures technology, administration and enforcement. NIST participates to

promote uniformity among the states in laws, regulations, methods, and testing equipment that comprise the regulatory control of commercial weighing and measuring devices and other practices used in trade and commerce.

The following are brief descriptions of some of the significant agenda items that will be considered along with other issues at the NCWM Interim Meeting. Comments will be taken on these and other issues during several public comment sessions. At this stage, the items are proposals. This meeting also includes work sessions in which the Committees may also accept comments and where they will finalize recommendations for NCWM consideration and possible adoption at its Annual Meeting to be held July 12 to 16, 2009, in San Antonio, Texas. The Committees may withdraw or carryover items that need additional development.

The Specifications and Tolerances Committee (S&T Committee) will consider proposed amendments to NIST Handbook 44, ''Specifications, Tolerances, and other Technical Requirements for Weighing and Measuring Devices (NIST Handbook 44).'' Those items address weighing and measuring devices used in commercial applications, that is, devices that are normally used to buy from or sell to the public or used for determining the quantity of product sold among businesses.

Issues on the agenda of the NCWM Laws and Regulations Committee (L&R Committee) relate to proposals to amend NIST Handbook 130, ''Uniform Laws and Regulations in the area of legal metrology and engine fuel quality'' and NIST Handbook 133 ''Checking the Net Contents of Packaged Goods.''

This notice contains information about significant items on the NCWM Committee agendas, but does not include all agenda items. As a result, the following items are not consecutively numbered.

**NCWM Specifications and Tolerances Committee**

The following items are proposals to amend NIST Handbook 44:

*General Code*

*Item 310–1.* G–S.8. Provision for Sealing Electronic Adjustable Components, G–S.8.1. Access to Calibration and Configuration Adjustments, and G–S.8.2.—The S&T Committee will consider a proposal to add new requirements to G–S.8. intended to improve the security of access to the calibration and other configuration features on weighing or measuring devices. The purpose of the proposal is to ensure that prohibited features cannot be activated or that the accuracy of the device is altered after an official applies security seals or approved means of providing security.

*Item 310–5.* G–T.1. Acceptance Tolerances—The S&T Committee will consider a proposal to amend regulations that specify when officials are to apply acceptance tolerances to weighing and measuring devices after service personnel or users have made metrological adjustments and resealed the instrument. The proposed amendment would require that officials apply acceptance tolerances if they test the device within 30 days following any adjustment that relates to the accuracy or other performance characteristic of a device.

*Scales Code*

*Item 320–3.* S.1.7. Automatic Zero-Setting Mechanism (AZSM)—The S&T Committee will consider a proposal to define the acceptable operating parameters of the zero-setting functions used on some electronic weighing devices. These functions automatically maintain a scale's indications at zero when no load is on the device. Existing NIST Handbook 44 requirements prohibit some of the zero-setting functions found on weighing devices designed and sold for use in other countries when those devices are used in commercial applications in the U.S. marketplace. The proposal will closely align the U.S. requirements with international recommendations published by the International Organization for Legal Metrology (OIML).

*Liquid-Measuring Devices Code*

*Item 330–1.* Temperature Compensation for Liquid-Measuring Devices Code.—This is a proposal to add provisions to Handbook 44 to allow retail motor-fuel dispensers to be equipped with the automatic means to deliver product with the volume compensated to a reference temperature. (See also Item 232–1 below under the Laws and Regulations Committee)

**NCWM Laws and Regulations Committee**

The following items are proposals to amend NIST Handbook 130:

*Method of Sale of Commodities Regulation*

*Item 232–1.* Automatic Temperature Compensation for Petroleum Products.—The L&R Committee will consider several proposals that would allow temperature compensation to be made on sales of engine fuels at the retail level. Most of the proposals would allow compensation to be performed only if certain information is provided to consumers and other conditions are met by the seller.

*Developing Item 270–7.* Method of Sale and Engine Fuel Quality Requirements for Hydrogen.—The L&R Committee will consider a proposal to establish a uniform method of sale for hydrogen when it is offered for sale at the retail level as a vehicle fuel. A separate proposal to identifying preliminary minimum fuel quality standards will also be reviewed.

*Developing Item 270–8.* Wood Flavoring Chips.—The L&R Committee will consider a proposal to revise the current method of sale regulation on flavoring chips by adding guidance on the appropriate units of measure to be used on small packages.

*Uniform Engine Fuel and Automotive Lubricants Regulation*

*Item 237–1.* Gasoline and Gasoline Oxygenate Blends.—The Fuel and Lubricants Subcommittee of the L&R Committee will present a proposed revision to the requirements that certain blends must meet under NIST Handbook 130.

The following item is a proposal to amend NIST Handbook 133 ''Checking the Net Contents of Packaged Goods'':

*Item 260–1.* Wet Tare Testing.—The L&R Committee will review a proposed editorial revision to the tare procedures in NIST Handbook 133 to advise handbook users that effective October 9, 2008, the USDA regulations no longer permit wet tare procedures to be used in verifying the net quantity of contents of packages of meat and poultry that bear a USDA inspection seal.

Dated: December 15, 2008.

### National Oceanic and Atmospheric Administration

**RIN 0648–XL67**

### Incidental Takes of Marine Mammals During Specified Activities; On-ice Marine Geophysical and Seismic Operations in State/OCS Waters of the U.S. Beaufort Sea off Alaska

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of a proposed marine mammal incidental take authorization; request for comments.

**SUMMARY:** NMFS has received an application from CGGVeritas (Veritas) for an Incidental Harassment Authorization (IHA) to take small numbers of marine mammals, by Level B harassment, incidental to conducting an on-ice marine geophysical research and seismic survey in the U.S. Beaufort Sea from February to May, 2009. Pursuant to the Marine Mammal Protection Act (MMPA), NMFS is requesting comments on its proposed IHA for these activities.

**DATES:** Comments and information must be received no later than January 20, 2009.

**ADDRESSES:** Comments on the application should be addressed to P. Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910–3225. The mailbox address for providing email comments is *PR1.0648–XL67@noaa.gov*. NMFS is not responsible for e-mail comments sent to addresses other than the one provided here. Comments sent via e-mail, including all attachments, must not exceed a 10–megabyte file size.

A copy of the application containing a list of the references used in this document may be obtained by writing to the address specified above, telephoning the contact listed below (see **FOR FURTHER INFORMATION CONTACT**), or visiting the internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm*.

Documents cited in this notice may be viewed, by appointment, during regular business hours, at the aforementioned address.

**FOR FURTHER INFORMATION CONTACT:** Howard Goldstein or Ken Hollingshead, NMFS, (301) 713–2289.

**SUPPLEMENTARY INFORMATION:**

## Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses, and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth to achieve the least practicable adverse impact. NMFS has defined ''negligible impact'' in 50 CFR 216.103 as ''...an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.''

Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the United States can apply for an authorization to incidentally take small numbers of marine mammals by harassment. Except with respect to certain activities not pertinent here, the MMPA defines ''harassment'' in 16 USC 1362(18)(A) as:

> any act of pursuit, torment, or annoyance which (I) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

Section 101(a)(5)(D) establishes a 45–day time limit for NMFS review of an application followed by a 30–day public notice and comment period on any proposed authorizations for the incidental harassment of marine mammals. Within 45 days of the close of the comment period, NMFS must either issue or deny issuance of the authorization.

## Summary of Request

On October 6, 2008, NMFS received a letter from Veritas requesting an IHA. The requested IHA would authorize the take, by Level B harassment, of small numbers of ringed seals (*Phoca hispida*) incidental to conducting on-ice seismic surveys, north and northwest of Thetis Island in State/OCS waters in the Beaufort Sea. The energy source for the proposed activity will be Vibroseis. Data acquisition will begin mid-February and continue until the end of May. During late February and early March, ice checking activities and aerial scouting may take place to determine survey and safe access to locate a temporary field camp location and access to the program area to conduct operations. Additional information on the on-ice seismic project is contained in the application, which is available upon request (see **ADDRESSES**).

## Specified Activities

Veritas plans to conduct a three-dimensional (3D) seismic survey north and northwest of Thetis Island in OCS waters in the Beaufort Sea using Vibroseis. As presently scheduled, the seismic surveys will occur from approximately February 15th to May 31st, 2009, although surveys are likely to end earlier in May. With the Vibroseis technique, activity on the surveyed seismic line begins with the placement of sensors. All sensors are connected to the recording vehicle by multi-pair cable sections. The Vibrators move to the beginning of the line, and recording begins. The Vibrators move along a source line, which will be at some angle to a sensor line. The Vibrators begin vibrating in synchrony via a simultaneous radio signal to all vehicles.

In a typical survey, each vibrator will vibrate up to four times at each location. The entire formation of vibrators subsequently moves forward to the next energy input point (e.g., 220 ft or 67 m in most applications) and repeats the process. In a typical 16–18–hour day, a survey will complete 4 to 10 linear miles (6 to 16 km) in 2D seismic operations and 15 to 40 linear miles (24 to 64 km) in a 3D seismic operation.

The seismic survey activities will require a temporary field camp located near the work site. A Cat Train facility on skis or rubber tracks that is fully contained and self sufficient will be located on grounded ice beside the access route out to the program site. Camp locations will be chosen based on ice conditions and safety of access to ice. Camp will generally consist of 35–40 sled trailers which includes: crew housing, office units, kitchen and dining facilities, laundry and medical facilities, generators, fuel storage and mechanical work spaces.

Camp locations will be chosen based on access trail conditions and grounded ice forecasting near to the prospect. It is highly likely that Veritas' camp locations will be near and south of Thetis Island to support the camp. Re-supply for fuel and provisions to the camp will be supported out of Oliktok Pt. The route between the camp and Oliktok Pt. is on grounded ice or areas with less than 10 ft (3 m) of water below the ice; of which neither condition is expected to support ringed seals.

The seismic survey will consist of either laying recording cables with geophones on the frozen sea ice or placing receivers (hydrophones) below the ice surface through drilled holes in

attempts to provide the best mitigation of seismic noise (i.e., a 'flex wave') in a shallow marine environment; using Vibroseis techniques as the source of energy to acquire the seismic data. If ice depths are greater than 7 ft (2.1 m), receivers will be laid on the frozen sea ice but if ice depths are less, then holes will be drilled and hydrophones will be located in the water.

Seismic operations will be conducted utilizing 5–10 wheeled/tracked vibrators supported by Trucker SnoCats and Veritas' Challenger 95 recording cable transport vehicles. A Challenger 95 or Trucker SnoCat vehicle will travel along a pre-surveyed and groomed route and lay receiver cable lines that extend between 3–10 miles long (4.8–16 km). Receiver (i.e., geophone) lines will be spaced approximately 984–1,312 ft (approximately 300 to 400 m) apart; geophones/hydrophones would be located every 98–180 ft (30–55 m) along each of these lines. Ten to fifteen receiver lines will be placed on the ground at any one time all interconnected to a recording device known as a ''recorder.'' Vibrators will include a 14,400 lb (6,545 kg) GVW wheeled mini-vibrator (capable of 12,000 ft-lbs of force). Mini-Vibe (Vibroseis) vehicles will then move along a pre-determined groomed route most often nearly perpendicular to the recording lines. Positioning of the cables, Vibroseis, and recording vehicles all use Tiger Nav technology; a specialized navigation and positioning software. The Tiger Nav system integrates with GPS and Inertial Technology with Real Time Positioning, Stake-less Source, Receiver Surveying, and Vehicle Tracking. The Vibrators (usually 3 to 4 that travel together) move to a pre-determined GPS point location and begin vibrating in a synchrony via a radio signal. The Vibrators will vibrate the usual 2 to 4 times at each location, move up to the next location about 98–180 ft (30–55 m) and continue the vibrating technique until the end of the line. This activity will occur two lines at a time.

Veritas utilizes satellite imagery, existing bathymetry, drill grids, and ground penetrating radar (GPR) to interpret ice integrity for proper planning. It should be noted that while GPR data are extremely accurate on fresh water it does have limitations on sea ice. To offset any inefficiency of these systems on sea ice, Veritas utilizes a grid system of drilled holes to verify and/or replace GPR data that may be questionable. To support Vibroseis and recording vehicle units, an ice thickness of at least 4–6 ft (1.2–1.8 m) is required. The 3D program area will exist within the boundary map in Figure 1 of Veritas' application.

**Proposed Dates, Duration, and Location of Specified Activity**

Veritas' proposed survey would occur for a period of three months (February 15 through May 31, 2009). On-ice seismic operations are ordinarily confined to this three month period since ice is sufficiently thick (4–6 ft or 1.2–1.8 m) to safely support the equipment. The geographic region of activity on ice encompasses a 141 square mile (366 $km^2$) program area extending across the Beaufort Sea from point of entry from the northwest corner at approximately N 70°44.149, W 150°53.010 to the northeast corner at approximately N 70°46.138, W 150°06.865 to the southeast corner at approximately N 70°33.400, W 149°36.272 to the southwest corner at N 70°31.699, W 150°19.417 (see Figure 1 of Veritas' application). Water depths range from 4–60 ft (1.2–18 m) in the proposed program area. Depths of water extending south of the islands are less than 10 ft (3 m) based on bathymetry charts.

**Description of Marine Mammals and Habitat Affected in the Activity Area**

Several marine mammal species are known to or could occur in the Beaufort Sea off the Alaska coastline (see Table 1 below). The ringed seal is the only species of marine mammal managed by NMFS that may be present in the project area during the on-ice seismic program. Ringed seals are not listed under the Endangered Species Act (ESA) or designated as depleted under the MMPA. Other marine mammal species managed by NMFS that seasonally inhabit the Beaufort Sea, but are not anticipated to occur in the project area during the on-ice seismic program, include the bowhead whale, gray whale, beluga whale, narwhal, bearded seal, and spotted seal. Polar bears and infrequently Pacific walrus also occur in the Beaufort Sea, but they are not addressed further, since they are under the jurisdiction of the U.S. Fish and Wildlife Service (USFWS). Veritas has initiated consultation and requested a Letter of Authorization from USFWS regarding polar bears. The bowhead whale is listed as Endangered and the polar bear is listed as Threatened under the U.S. ESA. The bearded, spotted, and ringed seals are candidates for listing under the ESA and status reviews have been initiated for each species. Bowhead and beluga whales migrate considerably north of the project area in east-west oriented lead systems during spring (Moore and Reeves, 1993). A very small number of bearded seals may inhabit the Beaufort Sea in spring, mainly in the offshore pack ice (Moulton *et al.*, 2001; Moulton and Elliott, 2000; and Moulton *et al.*, 2000; Burns, 1981; Burns and Frost, 1979; Burns and Harbo, 1972). Since bearded seals are normally found over 20–100 nmi (37–185 km) from shore in broken ice (Angliss and Outlaw, 2008) that is unstable for on-ice seismic operations, bearded seals are not expected to be encountered during on-ice seismic operations. Some spotted seals arrive in the Beaufort Sea from the Chukchi Sea from July until September where they haul out on land part of the time, but also spend extended periods at sea (Rugh *et al.*, 1997; Lowry *et al.*, 1998). The marine mammals that occur in the proposed on-ice seismic survey area belong to four taxonomic groups: mysticetes (baleen whales), odontocetes (toothed whales), phocids (seals), and carnivores (polar bears). Table 1 below outlines the marine mammal species and their habitat in the region of the proposed project area.

TABLE 1. THE HABITAT AND CONSERVATION STATUS OF MARINE MAMMALS INHABITING THE PROPOSED STUDY AREA IN THE U.S. BEAUFORT SEA OFF OF ALASKA.

| Species | Habitat | ESA[1] |
|---|---|---|
| **Mysticetes** | | |
| Bowhead whale (*Eubalaena glacialis*) | Pack ice and coastal | EN |
| Gray whale (*Eschrichtius robustus*) | Coastal, lagoons | NL |
| **Odontocetes** | | |

TABLE 1. THE HABITAT AND CONSERVATION STATUS OF MARINE MAMMALS INHABITING THE PROPOSED STUDY AREA IN THE U.S. BEAUFORT SEA OFF OF ALASKA.—Continued

| Species | Habitat | ESA[1] |
|---|---|---|
| Beluga whale (*Delphinapterus leucas*) | Offshore, coastal, and ice edges | NL |
| Narwhal (*Monodon monceros*) | Offshore, ice edge | NL |
| **Pinnipeds** | | |
| Bearded seal (*Erignathus barbatus*) | Pack ice | NL |
| Spotted seal (*Phoca largha*) | Pack ice | NL |
| Ringed seal (*Phoca hispida*) | Landfast and pack ice | NL |
| Pacific Walrus (*Odobenus rosmarus divergens*) | Ice, coastal | NL |
| **Carnivora** | | |
| Polar bear (*Ursus maritimus marinus*) | Ice, coastal | T |

[1] U.S. Endangered Species Act: EN = Endangered, T = Threatened, NL = Not listed

*Ringed Seal*

Ringed seals have a circumpolar distribution, which is closely associated with sea ice. Ringed seals are found throughout the Bering, Chukchi, and Beaufort Seas (Angliss and Outlaw, 2008). They are the most abundant and widely distributed seal in the Beaufort Seas (King, 1983).

Ringed seals occupy fast ice and offshore pack ice during winter and spring (Burns, 1970; Stirling *et al.*, 1982; Finley *et al.*, 1983; Frost *et al.*, 2004). Frost *et al.* (2004) conducted aerial surveys of ringed seals on fast and pack ice during late May and early June 1996–1999 between Pt. Barrow and Kaktovik (156°30' and 143°42' W) in the Beaufort Sea within 25 miles (40 km) of shore. The survey area was divided into four east west sectors (B1–B4) with one sector (B2) encompassing the project area. Seal densities ranged from 0.81 seals/km$^2$ in 1996 to 1.17 seals/km$^2$ in 1999 across all sectors. Densities were generally lower in the fast ice (0.57–1.14 seals/km$^2$) than the pack ice (0.92–1.33 seals/km$^2$). Seal densities in sector B2 ranged from 0.61 to 1.10 seals/km$^2$, indicating seal use in the project area vicinity was below the average; however the sample size (n=3) for the upper end of the range of the estimate was too small to be reliable. Seal use of the fast ice and pack ice were similar (0.69–0.68 seals/km$^2$) in the project vicinity for the one year (1999) both ice types were surveyed and there was sufficient sample size. In addition, the estimates were below the average estimate for the overall area indicating seal density is lower in the region of the project area on average. In all cases, ringed seal densities were much lower than in the eastern Chukchi Sea, where ringed seal densities averaged 1.91 seals/km$^2$ (range 037–16.32) in 1999 and 1.62 seals/km$^2$ (range 0.42–19.4) in 2000 (Bengston *et al.*, 2005). No recent data are available for seal densities during the proposed time of the on-ice seismic program during March or April.

Ringed seals maintain breathing holes in the ice and occupy lairs in accumulated snow (Smith and Stirling, 1975). Pups are born in late March and April in lairs that seals excavate in snowdrifts and pressure ridges. During the breeding and pupping season, adults on fast ice (floating fast-ice zone) usually move less than individuals in other habitats; they depend on a relatively small number of holes and cracks in the ice for breathing and foraging. During nursing (4–6 weeks), pups usually stay in the birth lair. Alternate snow lairs provide physical and thermal protection when the pups are being pursued by their primary predators, polar bears and Arctic foxes (Smith *et al.*, 1991 cited in USDI MMS, 2003). As the day length and temperature increase in spring, increasing numbers of ringed seals haul out on the surface of the ice near breathing holes or lairs (Frost *et al.*, 2004). This hauling out or basking is associated with the annual molt, which occurs in May to July. During summer, ringed seals are found on ice remnants dispersed throughout open water areas of the Beaufort Sea (Burns *et al.*, 1980 cited in USDI MMS, 2003); Smith, 1987). The primary prey of ringed seals is Arctic cod, saffron cod, shrimps, amphipods, and euphausiids (Kelly, 1988; and Reeves *et al.*, 1992 cited in USDI MMS 2003). Ringed seals are a major resource that subsistence hunters harvest in Alaska (USDI MMS, 2003).

A reliable estimate for the entire Alaska stock of ringed seals is currently not available. A minimum estimate for the eastern Chukchi and Beaufort Sea is 249,000 seals, including 18,000 for the Beaufort Sea (Angliss and Outlaw, 2008). The actual numbers of ringed seals are substantially higher, since the estimate did not include much of the geographic range of the stock, and the estimate for the Alaska Beaufort Sea has not been corrected for animals missed during the surveys used to derive the abundance estimate (Angliss and Outlaw, 2008). Estimates could be as high or approach the past estimates of 1–3.6 million ringed seals in the Alaska stock (Frost, 1985; Frost *et al.* 1988).

NMFS anticipates that no ringed seals will be injured or killed during the on-ice seismic surveys with incorporation of the described proposed mitigation and monitoring measures. Seals are expected to avoid the immediate area around the proposed on-ice seismic operations and are not expected to be subject to potential hearing damage from exposure to underwater or in-air sounds. The specific objective of Veritas' monitoring and mitigation plan is to ensure that no seals are in the immediate area during the proposed on-ice seismic activities. Because of the circumstances and the proposed mitigation and monitoring requirements discussed in this document, NMFS believes it highly unlikely that the proposed activities would result in injury (Level A harassment), serious injury or mortality of ringed seals, however, they may temporarily avoid the area where the proposed seismic activities may occur. Veritas has requested the incidental take of 76 ringed seals for the proposed action.

The requested take is approximately 0.42 percent of the estimated Beaufort Sea population, and 0.03 and 0.008 percent of the estimated minimum Chukchi and Beaufort Sea population and Alaska stock, respectively. NMFS has determined that the number of requested incidental takes for the proposed action is small relative to population estimates, of ringed seals.

Further information on the biology and local distribution of these species and others in the region can be found in Veritas' application, which is available upon request (see **ADDRESSES**), and the NMFS Marine Mammal Stock Assessment Reports, which are available online at: *http://www.nmfs.noaa.gov/pr/species/*

**Potential Effects of Activities on Marine Mammals**

All anticipated takes would be ''takes by harassment,'' involving short term, temporary changes in behavior. The mitigation measures to be applied will minimize the possibility of injurious takes. The estimates of take are based on the most recent data obtained during ringed seal surveys conducted within the geographic area of the planned operations by Frost *et al.* (2004). The actual density during the on-ice seismic program may be lower, since surveys conducted by Frost *et al.* (2004) were in May and June when seals may have been more concentrated on fast ice and pack ice remnants than in March or April, when most of the on-ice seismic program will occur.

Several aspects of the on-ice seismic program that were considered to not cause a take are briefly discussed below. Seismic activities in water depths below 10 ft (3 m) (south of Thetis and Flaxman Islands) were excluded from the estimated take since few if any seals inhabit water less than 10 ft during winter-spring. The water typically freezes to or near the bottom at this depth and supports few food resources (Miller *et al.*, 1998; Link *et al.* 1999). In addition, helicopter flights were excluded from the estimated take, since they would occur when seals would be using lairs and not basking on the ice, and altitude (1,000 ft or 304 m) should reduce any disturbance to ringed seals in lairs. The insulating capacity of snow used to build the lair adds another level of protection to seals from helicopter noise even if a helicopter has to fly at a lower altitude due to weather conditions. As has been reported (Amstrup,1993; Blix and Lentifer, 1992) for polar bear dens, snow sufficiently attenuates the sound of helicopter to a level not likely to disturb ringed seals in lairs.

There is a remote chance that pup mortality could occur if any of these animals were nursing and displacement was protracted. However, it is highly unlikely that a nursing female would abandon her pup given the normal levels of disturbance from the proposed activities and the typical movement patterns of ringed seal pups among different holes as reported by Lydersen and Hammill (1993). Similarly, Kelly and Quakenbush (1990) observed that radio-tagged seals used as many as four lairs spaced as far as 11,273 ft (3,437 m) apart, with mean distances for males equaling 6,550 ft (1,997 m) and for females 2,079 ft (634 m). In addition, seals have multiple breathing holes. Pups may use more holes than adults (mean 8.7), but the holes are generally closer together (Lydersen and Hammill, 1993). Holes have been found as far apart as 0.56 miles (0.9 km). The pattern of use indicates that adult seals and pups can move away from seismic activities, particularly since the seismic equipment does not remain in any specific area for a prolonged time. Given these considerations combined with the small proportion (less than 1 percent) of the population potentially disturbed by the proposed activity, impacts are expected to be negligible for the ringed seal population.

The anticipated impact of seismic activities on the species or stock of ringed seals is expected to be negligible for the following reasons:

- The activity area supports a small proportion (less than 1 percent) of the ringed seal population in the Beaufort Sea.
- Seismic operators will avoid moderate and large pressure ridges, where seal and pupping lairs are likely to be most numerous, for reasons of safety and because of normal operational constraints.
- The sounds from energy produced by Vibrators used during on-ice seismic programs typically are at frequencies well below (1,000 Hz) those used by ringed seals to communicate. Thus, ringed seal hearing is not likely to be very good at those frequencies and seismic sounds are not likely to have strong if any masking affects on ringed seal calls. This effect is further moderated by the quiet intervals between seismic energy transmissions.
- There has been no reported major displacement of seals away from on-ice seismic operations (Frost and Lowry, 1988; Frost *et al.*, 2004). Further confirmation of this lack of major response to industrial activity is illustrated by the fact that there has been no major displacement of seals after the 2004 on-ice seismic operations in Harrison Bay or near Northstar development. Studies at Northstar have shown a continued presence of ringed seals through winter and creation of new seal structures (Williams *et al.*, 2001; Moulton *et al.*, 2003). The scale of activities at the Northstar development is magnitudes greater than the proposed on-ice seismic operations.
- Although seals may abandon structures near seismic activity, studies have not demonstrated a cause and effect relationship between abandonment and seismic activity or biologically significant impact on ringed seals. Studies by Williams *et al.* (2001), Kelley *et al.* (1986, 1988) and Kelly and Quackenbush (1990) have shown that abandonment of holes and lairs and establishment or re-occupancy of new ones in an ongoing natural occurrence, with or without human presence. Link *et al.* (1999) compared ringed seal densities between areas with and without Vibroseis activity and found densities were highly variable within each area and inconsistent between areas (densities were lower for 5 days, equal for 1 day, and higher for 1 day in Vibroseis' area), suggesting other factors beyond the seismic activity likely influenced seal use patterns. Consequently, a wide variety of natural factors influence this pattern of seal use including time of day, weather, season, ice deformation, ice thickness, accumulation of snow, food availability, and predators, as well as ring seal behavior and population dynamics.

Consequently, the effects of on-ice seismic are expected to be limited to short-term and localized behavioral changes involving relatively small numbers of seals. NMFS came to a similar finding in an Environmental Assessment of on-ice seismic activity in the Beaufort Sea, where it was concluded that effects of behavioral changes are expected to be negligible (NMFS, 1998). The effects of the proposed on-ice seismic operations fall within the MMPA definition of Level B harassment.

**Possible Effects of Activities on Marine Mammal Habitat**

The proposed seismic operation will not cause any permanent impact on habitats and the prey used by ringed seals. All surface activities will be on the sea ice, which will break-up and drift away following spring break-up and reform in the fall. Any spills on the ice would be small in size and cleaned up before completing the operations. Similarly, all materials from the camp and seismic activities will be removed from the site before completion of operations. Areas containing ice

conditions suitable for lairs will be avoided by the seismic crews to prevent any destruction of the habitat. Seismic survey crews do not place energy sources over observed seal hoes or lairs, nor do they typically operate along pressure ridges or near the edge of the land fast ice where seal structures are often located. The operation should have no effect on the prey of ringed seals, since physical disturbances will be on the sea ice and not the ocean bed. Consequently, there will be no need for restoration of the habitat used by ringed seals.

The only losses of or modifications to ringed seal habitat from on-ice seismic operations are the temporary change of the surface ice associated with removal of ice and snow along survey lines and camps. In all cases, the modification involves a very small proportion of the total area of habitat available to ringed seals. Because seismic operations tend to avoid rough, deformed and broken ice, cracks, and areas near the edge of the landfast ice, they also avoid the preferred habitat of ringed seals. Disturbed habitat is often restored by periodic storms. Furthermore, since the ice and snow are restored annually by the melting and reformation of sea ice, no impact to habitat would last beyond spring breakup. Consequently, on-ice seismic activities will have a negligible impact on the local ringed seal population and their habitat.

**Number of Marine Mammals Expected to be Incidentally Taken by the Proposed Activity**

NMFS estimates the incidental take of ringed seals could be up to 76 animals for (0.42 percent of the estimated population in the Beaufort Sea) the proposed action, including all sex and ages, while in or near lairs or breathing holes. The estimate was derived by multiplying the density estimate (0.69 per $km^2$ in fast ice, which is where the proposed seismic operation will occur) by the size of the project area (141.3 $miles^2$ or 366 $km^2$) and then reducing the estimate by 70 percent to account for the percentage of time ringed seals spend in lairs. Kelly (1988) reported that ringed seals spend 12–30 percent of their time in lairs from March to early June. The estimate reflects the design of the seismic program relative to reported distances seals respond to on-ice seismic activities. Burns and Kelly (1982) and Kelly *et al.* (1988) concluded that localized displacement of ringed seals in close proximity (within 492 ft or 150 m) to seismic lines does occur, but the overall displacement was insignificant. The design of the program is to space the lines 984 ft (300 m) apart which would presumably expose all seals between the lines to on-ice seismic operations. However, localized displacement would likely be temporary and short-term as reported by Burns and Kelly, particularly since on-ice seismic operations are not stationary, but highly mobile and noise levels are below the primary hearing range of seals (Richardson *et al.*, 1995). Moreover, disturbance is not likely to have any effect on the population as a whole because of: (1) limited area of seismic surveys relative to the total ringed seal habitat in the Arctic Ocean; (2) avoidance by seismic operators of optimal seal habitat (areas of extensive pressure ridging and snow accumulation) due to safety and operational constraints; (3) the relatively large size of the ringed seal population in the Beaufort Sea and throughout Alaska; and (4) the lack of scientific evidence of on-ice seismic activity negatively affecting the reproductive viability or distribution of the ringed seal population.

In addition, NMFS expects that the actual take by Level B harassment from the proposed on-ice seismic survey will be much lower than the estimates due to the implementation of the proposed mitigation and monitoring measures discussed below. Therefore, NMFS believes that any potential impacts to ringed seals to the proposed on-ice seismic operations would be insignificant, and would be limited to distant and transient exposure.

**Potential Impact of the Proposed Activity on Subsistence Uses**

Under the MMPA, NMFS must determine that an activity would not have an unmitigable adverse impact on the subsistence needs for marine mammals. While this includes usage of both cetaceans and pinnipeds, the primary impact by seismic activities is expected to be impacts from seismic operations on ringed seals. In 50 CFR 216.103, NMFS has defined unmitigable adverse impact as:

> An impact resulting from the specified activity: (1) That is likely to reduce the availability of the species to a level insufficient for a harvest to meet subsistence needs by: (i) causing the marine mammals to abandon or avoid hunting areas, (ii) directly displacing subsistence users, or (iii) placing physical barriers between the marine mammals and subsistence hunters; and (2) That cannot be sufficiently mitigated by other measures to increase the availability of marine mammals to allow subsistence needs to be met.

The on-ice seismic survey is not expected to cause seals to abandon/avoid hunting areas, directly displace subsistence users, or place physical barriers between the seals and the subsistence hunters. The proposed action should have a negligible impact on the availability of ringed seals since hunting for subsistence purposes occurs primarily south of the planned project area and mainly during the summer open water season. No physical barriers will be placed between the seals and subsistence hunters during Veritas' proposed activities. See below for more information on Veritas' proposed activities and Plan of Cooperation that is anticipated to have a negligible effect on subsistence users and seals. This determination may require that the IHA contain additional mitigation and monitoring measures in order for this decision to be made.

The number of individual ringed seals likely to be exposed to on-ice seismic operations is expected to be relatively low. Effects on most individual seals are expected to be limited to localized and temporary displacement (Level B harassment). No greater than a negligible impact is anticipated on the species or stock or the availability of the species for subsistence uses. Moreover, any effects on ringed seal habitat are expected to be temporary and localized. No rookeries, areas of concentrated feeding or mating, or other areas of special significance to marine mammals occur in or near the planned seismic operation area.

Nevertheless, all activities will continue to be conducted to assure the least practical adverse impact on the species, habitat, and availability for subsistence uses. For example, as required under current regulations, all activities will be conducted as far as practicable from any observed ringed seal or ringed seal lair and no energy source will be placed over an observed ringed seal lair as per 50 CFR 216.113. Similarly, only Vibrator-type energy-source equipment shown to have similar or lesser effects will be used as per 50 CFR 216.113(a)(1). Veritas will also provide training for the seismic crews so they can recognize potential areas of ringed seal lairs and adjust the seismic operations accordingly. There have been no injuries or deaths of seals, and no more than temporary displacement of seals by on-ice seismic operations since NMFS instituted regulations. Consequently, the history of the industry has been one of responsible operations of on-ice seismic activities relative to seals, their habitat, and use by subsistence hunters in Alaska.

To further ensure that on-ice seismic operations have the least practicable impact on the species, habitat and subsistence use, Veritas will continue to work with NMFS, other Federal

agencies, the State of Alaska, Native communities of Barrow and Nuiqsut, and Inupiat Community of the Arctic Slope (ICAS) to assess measures to further minimize any impact from seismic activity. In addition, a Plan of Cooperation will be developed between Veritas and Nuiqsut to assure that seismic activities do not interfere with subsistence harvest of ringed seals. Furthermore a survey using trained dogs will be completed to identify active seal holes/ birthing lairs or hole/lair habitats so they can be avoided by seismic operations to the greatest extent practicable. If trained dogs are not available, potential habitat will be identified by trained marine mammal biologists based on the characteristics of the ice (i.e., deformation, cracks, etc.).

*Plan of Cooperation*

Where the proposed activity would take place in or near a traditional Arctic subsistence hunting area and/or may affect the availability of a species or stock or marine mammal for Arctic subsistence uses, regulations at 50 CFR 216.104(a)(12) require the IHA applicant to submit a plan of cooperation or information that identifies what measures have been taken and/or will be taken to minimize any adverse effects on the availability of marine mammals for subsistence uses.

Veritas will be working with the village of Nuiqsut and the Kuukpik Subsistence Oversight Panel to develop a proposed plan for circulation prior to their community meetins. Veritas will also be working with the Alaska Eskimo Whaling Commission, the North Slope Borough Wildlife Department and Planning Department during this process. The ICAS and the Native Village of Barrow (NVB) will receive a visit to address each board of Veritas' activities. Veritas will conduct a community meeting in Nuiqsut during the month of December to hear comments from the community. Veritas will be using subsistence representatives to help with monitoring prior to operations and during their operations as subsistence observers. Subsistence representatives/observers on the crew will be responsible for communicating directly with the Village of Nuiqsut.

Residents of the Village of Nuiqsut are the primary subsistence users in the activity area. Nuiqsut subsistence hunters may hunt year-round (including the winter and spring); however in more recent years most of the harvest of ringed seals has been in the summer during the open water period instead of the more difficult hunting of seals using holes and lairs during winter and spring (McLaren, 1958; Nelson, 1969). The most important area for Nuiqsut hunters is off the Colville River Delta in Harrison Bay, between Fish Creek and Pingok Island, which is largely south of the project area. Seal hunting occurring in this area before spring break-up is by snow machine, and by boat during summer. Subsistence patterns are reflected in the harvest data collected in 1992 where Nuiqsut hunters harvested 22 of 24 (92 percent) ringed seals during the open water season from July to October (Fuller and George, 1997). Harvest data for 1994 and 1995 show 17 of 23 (74 percent) ringed seals were taken from June to August (Brower and Opie, 1997). Consequently, on-ice seismic operations should have a negligible effect on the availability of ringed seals since hunting occurs primarily south of the project area and mainly during summer.

Crews, and the helicopter pilot will be required by Veritas to avoid hunters and locations of any seals being hunted in the activity area, whenever possible, to further minimize any effect of seismic operations on the availability of seals for subsistence. For the reasons stated above and with the proposed mitigation and monitoring measures described below, the on-ice seismic survey is not expected to cause seals to abandon/ avoid subsistence hunting areas, directly displace subsistence users, and place physical barriers between the marine mammals and the subsistence hunters.

**Proposed Mitigation and Monitoring**

Ringed seal pupping occurs in lairs from late March to mid-to-late April (Smith and Hammill, 1981). The following mitigation and monitoring measures are proposed for the subject on-ice seismic operations. A survey using experienced field personnel and trained seal lair sniffing dogs will be conducted by Veritas in areas where water depths exceed 10 ft (3 m) to locate and map (GPS) potential seal structures along the planned survey routes. Few, if any, seals inhabit ice-covered waters below 10 ft due to water freezing to the bottom or poor prey availability caused by the limited amount of ice-free water. The seal structure survey will be conducted to ensure that seals, particularly pups, are not injured by equipment. If possible, structures will be categorized by size, structure, and odor to ascertain whether structure is a birth lair, resting lair, resting lair of rutting male seals, or a breathing hole. The locations of all seals and seal structures will be plotted and mapped using GPS and will be used to assist seismic survey crews in avoiding seal structures. Surveys will be conducted 492 ft (150 m) to each side of the survey routes so that locations of marked seals and seal structures are protected by a conservative distance (exclusion zone). Actual width of route may vary depending on wind speed and direction, which strongly influence the efficiency and effectiveness of dogs locating seal structures. During active seismic Vibrator source operations, the 492 ft exclusion zone will be monitored for entry by any marine mammals. As mentioned previously, potential seal structures will be identified by trained marine mammal biologists based on the characteristics of the ice (i.e., deformation, cracks, etc.) if trained dogs are not available. Activities will be conducted as far as practicable from any observed ringed seal lair or breathing hole and no energy source will be placed over the seal structure. In addition, NMFS proposes to require applicant's vehicles to avoid any pressure ridges, ice ridges, and ice deformation areas where seal structures are likely to be present.

If additional activities will be ongoing in the Beaufort Sea during the 2009 spring season, Veritas will coordinate its monitoring programs with other industries if applicable. Monitoring and reporting of the on-ice seismic operations will follow the requirements listed under 50 CFR 216.114.

On-ice operations have been conducted in the Beaufort Sea region for over 25 years and, during this time, there have been no noticeable adverse impacts on the ringed seal population or the availability of the species for subsistence uses. Moreover, any effects on seal habitat have been temporary and localized. However, to further ensure that there will be no adverse effects resulting from on-ice operations, Veritas will continue to cooperate with NMFS, MMS, other appropriate federal agencies, the State of Alaska, the North Slope Borough, ICAS, and Nuiqsut community to coordinate research opportunities and assess all measures than can be taken to eliminate or minimize any impacts from these activities.

**Proposed Reporting**

NMFS proposes to require an annual draft report that must be submitted to NMFS within 90 days of completing the year's activities. The monitoring report would contain a summary of information gathered pursuant to the monitoring requirements set forth in the IHA, including detailed descriptions of observations of any marine mammal, by species, number, age class, and sex if possible, that is sighted in the vicinity

of the proposed project area; description of the animal's observed behaviors, and the activities occurring at the time. A final report must be submitted to the Regional Administrator and Chief of the Permits, Conservation, and Education Division within 30 days after receiving comments from NMFS on the draft final report. If no comments are received from NMFS, the draft final report will be considered to be the final report.

**ESA**

For the reasons already described in this **Federal Register** Notice, NMFS has determined that the described proposed on-ice seismic activities and the accompanying IHA are not anticipated to have the potential to adversely affect species under NMFS jurisdiction and protected by the ESA. Since ESA-listed species are not expected to be adversely affected by the proposed activities and the issuance of an IHA by NMFS under section 101(a)(5)(D) of the MMPA to Veritas, NMFS has determined that a section 7 consultation is not necessary. The ringed seal, which is the only species of marine mammal under NMFS jurisdiction likely to occur in the proposed action area, is a candidate species for consideration for listing under the ESA and a status review has been initiated.

**National Environmental Policy Act (NEPA)**

The information provided in the Final Programmatic Environmental Assessment (EA) on the Arctic Ocean Outer Continental Shelf Seismic Surveys 2006 prepared by the Minerals Management Service (MMS) in June 2006 led NMFS to conclude that implementation of either the preferred alternative or other alternatives identified in the Environmental Assessment (EA) would not have a significant impact on the human environment. Therefore, an Environmental Impact Statement was not prepared. The proposed action discussed in this document is different from the previous actions and new NEPA documentation will be prepared by NMFS for the proposed action. A copy of the EA will be available upon request (see **ADDRESSES**).

**Preliminary Determinations**

Based on Veritas' application, as well as the analysis contained herein, NMFS has preliminarily determined that the impact of the described on-ice seismic operations will result, at most, in a temporary modification in behavior by small numbers of ringed seals. The effect of the proposed on-ice seismic surveys is expected to be limited to short-term and localized behavioral changes.

Due to the infrequency, short time-frame, and localized nature of these activities, the number of marine mammals, relative to the population size, potentially taken by harassment is small. In addition, no take by injury or death is anticipated, and take by Level B harassment will be at the lowest level practicable due to incorporation of the proposed monitoring and mitigation measures mentioned previously in this document. NMFS has further preliminarily determined that the anticipated takes will have a negligible impact on the affected species or stock of marine mammals. No injury (Level A harassment), serious injury, and/or mortality will be authorized for marine mammals. Also, the potential effects of the proposed on-ice seismic survey project during 2009 will not have an unmitigable adverse impact on subsistence uses of this species due to the Plan of Cooperation and mitigation and monitoring measures.

**Proposed Authorization**

As a result of these preliminary determinations, NMFS proposes to issue an IHA to Veritas for the harassment of small numbers (based on populations of the species and stock) of ringed seals incidental to conducting on-ice seismic surveys in the U.S. Beaufort Sea, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

**Information Solicited**

NMFS requests interested persons to submit comments and information concerning this proposed project and NMFS' preliminary determination of issuing an IHA (see **ADDRESSES**). Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: December 15, 2007.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

**RIN 0648–XM26**

### Marine Mammals; File No. 14186

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; receipt of application.

**SUMMARY:** Notice is hereby given that Sea World Inc., 9205 South Park Center Loop, Suite 400, Orlando, FL 32819 [Brad Andrews, Responsible Party], has applied in due form for a permit take two non-releasable Guadalupe fur seals (Arctocephalus townsendi) with the option of holding up to six non-releasable furs seals at any given time for purposes of enhancement.

**DATES:** Written, telefaxed, or e-mail comments must be received on or before January 20, 2009.

**ADDRESSES:** The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the Features box on the Applications and Permits for Protected Species (APPS) home page, *https://apps.nmfs.noaa.gov/index.cfm*, and then selecting File No. 14186 from the list of available applications.

These documents are also available upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713–2289; fax (301)427–2521; and

Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213.

Written comments or requests for a public hearing on this application should be mailed to the Chief, Permits, Conservation and Education Division, F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate.

Comments may also be submitted by facsimile at (301)427–2521, provided the facsimile is confirmed by hard copy submitted by mail and postmarked no later than the closing date of the comment period.

Comments may also be submitted by e-mail. The mailbox address for providing e-mail comments is *NMFS.Pr1Comments@noaa.gov*. Include in the subject line of the e-mail comment the following document identifier: File No. 14186.

**FOR FURTHER INFORMATION CONTACT:** Jennifer Skidmore or Amy Sloan, (301)713–2289.

**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended

(MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

The applicant requests authorization to permanently maintain two non-releasable Guadalupe fur seals at Sea World of California (and other Sea World facilities if relocation is necessary) for enhancement purposes. These animals were taken into captivity by the Marine Mammal Health and Stranding Network and were deemed nonreleasable. Thus, release of either of these animals would not be in the best interest of their individual welfare and that of the wild population. Furthermore, the applicant has agreed to provide additional space for future non-releasable Guadalupe fur seals should placement be necessary (up to 6 total animals). These animals would be provided with daily husbandry care and treatment for current medical conditions, routine veterinary care, and would be made available for opportunistic research. The applicant has requested a five-year permit.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: December 12, 2008.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

**RIN 0648–XM25**

### Marine Mammals

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of Availability.

**SUMMARY:** NMFS has developed a policy and guidance document for implementation of the Steller sea lion (*Eumetopias jubatus*) and northern fur seal (*Callorhinus ursinus*) research permits and grants programs. This document establishes policy for implementation of the preferred alternative and recommendations in Chapter 5 of the 2007 Final Programmatic Environmental Impact Statement (EIS) for Steller Sea Lion and Northern Fur Seal Research.

**DATES:** Written, telefaxed, or e-mail comments must be received on or before January 20, 2009.

**ADDRESSES:** The document is available for review on the EIS project webpage at *http://www.nmfs.noaa.gov/pr/permits/eis/steller.htm*. To receive a hard copy, contact:

Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910–3226; phone (301)713–2289.

Written comments should be mailed to: P. Michael Payne, Chief, at the address above. Comments may also be submitted by facsimile at 301–427–2583 or email at ssleis.comments@noaa.gov. For email comments, use ''SSL EIS policy document'' in the subject line.

**FOR FURTHER INFORMATION CONTACT:** Tammy Adams or Kate Swails, (301)713–2289.

**SUPPLEMENTARY INFORMATION:** In 2007 NMFS completed the programmatic EIS and issued a Record of Decision (ROD) which identified the preferred alternative. NMFS limited implementation of the preferred alternative by limiting duration of research permits to span three summer field seasons, through July 2008. Full implementation of the preferred alternative is being phased in, upon completion of action items in the ROD and Chapter 5 of the EIS. The policy and guidance document is one item. Additional information about the EIS, ROD, and research permits issued in 2007 is available on the EIS project webpage (See **ADDRESSES**).

Dated: December 15, 2008.

### National Oceanic and Atmospheric Administration

**RIN 0648–XM07**

### Taking and Importing Marine Mammals; Undersea Warfare Training Range Activities

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; receipt of application for letter of authorization; request for comments and information.

**SUMMARY:** NMFS has received a request from the U.S. Navy (Navy) for authorization for the take of marine mammals incidental to Navy training activities conducted in the Undersea Warfare Training Range (USWTR) off the east coast of the United States. Pursuant to the implementing regulations of the Marine Mammal Protection Act (MMPA), NMFS is announcing our receipt of the Navy's request for the development and implementation of regulations governing the incidental taking of marine mammals and inviting information, suggestions, and comments on the Navy's application and request.

**DATES:** Comments and information must be received no later than January 20, 2009.

**ADDRESSES:** Comments on the application should be addressed to Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3225. The mailbox address for providing email comments is *PR1.0648-XM07@noaa.gov*. NMFS is not responsible for e-mail comments sent to addresses other than the one provided here. Comments sent via e-mail, including all attachments, must not exceed a 10-megabyte file size.

**FOR FURTHER INFORMATION CONTACT:** Jolie Harrison, Office of Protected Resources, NMFS, (301) 713-2289, ext. 166.

**SUPPLEMENTARY INFORMATION:**

### Availability

A copy of the Navy's application may be obtained by writing to the address specified above (See **ADDRESSES**), telephoning the contact listed above (see **FOR FURTHER INFORMATION CONTACT**), or visiting the internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm*. On September 12, 2008, the Navy made available to the public,

the Draft Overseas Environmental Impact Statement (OEIS) / Environmental Impact Statement (EIS) for USWTR. The Draft OEIS/EIS is available at *http://projects.earthtech.com/USWTR/EIS/DOEIS-EIS__2008/DOEIS__2008.htm*. During the 45-day public comment period, the Navy hosted four public hearings on the proposed action and the potential environmental impact of the construction and operation of an USWTR.

**Background**

In the case of military readiness activities, sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (Secretary) to allow, upon request, the incidental, but not intentional taking of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing), during periods of not more than five consecutive years each, if certain findings are made and regulations are issued or, if the taking is limited to harassment of no more than one year, The Secretary shall issue a notice of proposed authorization for public review.

Authorization for incidental takings may be granted if NMFS finds that the taking will have no more than a negligible impact on the affected species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses, and that the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such taking are set forth.

NMFS has defined ''negligible impact'' in 50 CFR 216.103 as:

an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

With respect to military readiness activities, the MMPA defines ''harassment'' as:

(i) any act that injures or has the significant potential to injure a marine mammal or marine mammal stock in the wild [Level A Harassment]; or (ii) any act that disturbs or is likely to disturb a marine mammal or marine mammal stock in the wild by causing disruption of natural behavioral patterns, including, but not limited to, migration, surfacing, nursing, breeding, feeding, or sheltering, to a point where such behavioral patterns are abandoned or significantly altered [Level B Harassment].

**Summary of Request**

In February 2008, NMFS received an application from the Navy requesting authorization for the take of 20 species of marine mammals incidental to upcoming Navy training activities to be conducted in the USWTR located in an area offshore of northeast Florida. These training activities will occur over the course of 5 years and are classified as military readiness activities. The Navy states that USWTR training activities may expose some of the marine mammals present in the area to sound from various mid-frequency and high-frequency active tactical sonar sources. The Navy requests authorization to take individuals of 20 species of marine mammals by Level B behavioral harassment.

**Specified Activities**

In the application submitted to NMFS, the Navy requests authorization for take of marine mammals incidental to antisubmarine warfare (ASW) training activities conducted in the USWTR, located within a 500-square-nautical mile ($NM^2$) (1,713 square-kilometer ($km^2$)) area offshore of northeast Florida. The edge of the range would be approximately 94 km (51 NM) from shore. The depth of water at the proposed site ranges from 37 to 366 meters (m) (120 to 1,200 feet (ft)).

ASW training would involve up to three vessels and two aircraft using the range for any one training event, although events would typically involve fewer units. The proposed action would require logistical support for ASW training, including the handling (launch and recovery) of exercise torpedoes (non-explosive) and submarine target simulators. Table 1-1 in the Navy's application lists the activity types and the equipment and platforms involved in USWTR activities.

**Information Solicited**

Interested persons may submit information, suggestions, and comments concerning the Navy's request (see **ADDRESSES**). All information, suggestions, and comments related to the Navy's USWTR request and NMFS' potential development and implementation of regulations governing the incidental taking of marine mammals by the Navy's USWTR activities will be considered by NMFS in developing, if appropriate, the most effective regulations governing the issuance of letters of authorization.

Dated: December 16, 2008.

## DEPARTMENT OF EDUCATION

### Notice of Proposed Information Collection Requests

**AGENCY:** Department of Education.

**SUMMARY:** The Leader, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

**DATES:** Interested persons are invited to submit comments on or before February 17, 2009.

**SUPPLEMENTARY INFORMATION:** Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Regulatory Information Management Services, Office of Management, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, *e.g.* new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: December 15, 2008.

**Institute of Education Sciences**

*Type of Review:* New Collection.

*Title:* Evaluation of Secondary Math Teachers from Two Highly Selective Routes to Alternative Certification.

*Frequency:* One time.

*Affected Public:* Individuals or household.

*Reporting and Recordkeeping Hour Burden:*

*Responses:* 1,254.

*Burden Hours:* 1,350.

*Abstract:* The Evaluation of Secondary Math Teachers from Two Highly Selective Routes to Alternative Certification will examine the relative effectiveness of secondary math achievement who obtain certification through the two largest highly selective routes to alternative. The submission is for the recruitment of schools and districts, a teacher background form, the pilot of a teach math content knowledge. This submission includes the justification and plan for the data collection of information and statistical methods for the evaluation. The package also provides an overview of the study, including its design and data collection procedures.

Requests for copies of the proposed information collection request may be accessed from *http://edicsweb.ed.gov,* by selecting the ''Browse Pending Collections'' link and by clicking on link number 3921. When you access the information collection, click on ''Download Attachments'' to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to *ICDocketMgr@ed.gov* or faxed to 202–401–0920. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to *ICDocketMgr@ed.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

## DEPARTMENT OF EDUCATION

### President's Board of Advisors on Historically Black Colleges and Universities

**AGENCY:** U.S. Department of Education, President's Board of Advisors on Historically Black Colleges and Universities.

**ACTION:** Notice of an open meeting.

**SUMMARY:** The notice sets forth the schedule and agenda of the meeting of the President's Board of Advisors on Historically Black Colleges and Universities. The notice also describes the functions of the Board. Notice of the meeting is required by Section 10 (a) (2) of the Federal Advisory Committee Act and intended to notify the public of its opportunity to attend. Due to scheduling difficulties, this notice is appearing in the **Federal Register** less than 15 days prior to the meeting date.

**DATES:** Tuesday, January 13, 2009.

*Time:* 9:00 a.m.–3:30 p.m.

**ADDRESSES:** The Board will meet on the campus of Fisk University, Jubilee Hall, Appleton Room, 1000 17th Avenue, North, Nashville, TN 37208, Phone: 615–329–8500; Fax: 615–329–8576.

**FOR FURTHER INFORMATION, CONTACT:** Leonard L. Haynes III, Ph.D., Executive Director, White House Initiative on Historically Black Colleges and Universities, 1990 K Street, NW., Washington, DC 20006; telephone: (202) 502–7549; fax: 202–502–7852.

**SUPPLEMENTARY INFORMATION:** The President's Board of Advisors on Historically Black Colleges and Universities is established under Executive Order 13256, dated February 12, 2002 and Executive Order 13316 dated September 17, 2003. The Board is established (a) to report to the President annually on the results of the participation of historically black colleges and universities (HBCUs) in federal programs, including recommendations on how to increase the private sector role in strengthening these institutions, with particular emphasis given to enhancing institutional planning and development; strengthening fiscal stability and financial management; and improving institutional infrastructure, including the use of technology, to ensure the long-term viability and enhancement of these institutions; (b) to advise the President and the Secretary of Education (Secretary) on the needs of HBCUs in the areas of infrastructure, academic programs, and faculty and institutional development; (c) to advise the Secretary in the preparation of an annual Federal plan for assistance to HBCUs in increasing their capacity to participate in Federal programs; (d) to provide the President with an annual progress report on enhancing the capacity of HBCUs to serve their students; and (e) to develop, in consultation with the Department of Education and other Federal agencies, a private sector strategy to assist HBCUs.

*Agenda:*

The meeting will provide the Board a forum to receive presentations regarding the status of the 2006 and 2007 annual reports and to discuss other related pertinent issues involving implementation of Presidential Executive Order 13256. The meeting will be open to the public.

*Additional Information:*

Individuals who will need accommodations for a disability in order to attend the meeting (*e.g.*, interpreting services, assistive listening devices, or material in alternative format) should notify ReShone Moore at (202) 502–7893, no later than Wednesday, January 7, 2009. We will attempt to meet requests for accommodations after this date, but cannot guarantee their availability. The meeting site is accessible to individuals with disabilities.

An opportunity for public comment is available on Tuesday, January 13, 2009 between 3:00 p.m.–3:30 p.m. Individuals who wish to provide comments will be allowed three to five minutes to speak. Those members of the public interested in submitting written comments may do so by submitting it to the attention of Leonard L. Haynes, 1990 K Street NW., Washington, DC, by Wednesday, January 7, 2009.

Records are kept of all Board proceedings and are available for public inspection at the office of the White House Initiative on Historically Black Colleges and Universities, U.S. Department of Education, 1990 K Street, NW. Washington, DC 20006, Monday—Friday during the hours of 8:00 a.m. to 5:00 p.m.

*Electronic Access to this Document:* You may view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF), on the internet at the following site: *www.ed.gov/news/fedregister/index.html.*

To use PDF, you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free at 1–888–293–6498; or in the Washington, DC area at 202–512–1530.

**Note:** The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at *www.gpoaccess.gov/nara/index.html.*

## UNITED STATES ELECTION ASSISTANCE COMMISSION

## Notice of Request for Public Comment on Proposed Strategic Plan

**AGENCY:** United States Election Assistance Commission.

**ACTION:** Notice: Request for Public Comment.

**SUMMARY:** The EAC seeks public comment on a ''U.S. Election Assistance Commission Draft Strategic Plan Fiscal Years: 2009 Through 2014.'' The EAC developed a strategic plan that lays out an approach to create a receptive and productive agency fully capable of the unique leadership role it has been given as a national clearinghouse, a manager of Federal financial assistance, a certifier of voting systems, and a resource for election officials throughout the country regarding the administration of Federal elections. EAC issues this notice according to a policy adopted on September 18, 2008 that requires EAC to provide notice and an opportunity for public comment on, among other things, advisories being considered for adoption by the U.S. Election Assistance Commission.

**DATES:** Comments must be received by 5 p.m. EST on January 20, 2009.

**ADDRESSES:** Comments may be submitted: Via e-mail at *havainfo@eac.gov*, via mail addressed to the U.S. Election Assistance Commission, 1225 New York Ave, NW., Suite 1100, Washington, DC 20005, or by fax at 202/566–3127. Commenters are encouraged to submit comments electronically and include ''Strategic Plan'' in the subject line, to ensure timely receipt and consideration.

*Person To Contact for Information:* Bryan Whitener, Telephone: (202) 566–3100.

**SUPPLEMENTARY INFORMATION:** The following is the complete text of the proposed Strategic Plan the EAC is seeking public comment on. The proposed strategic plan may also be viewed on the EAC Web site at *http://www.eac.gov.*

U.S. ELECTION ASSISTANCE COMMISSION DRAFT STRATEGIC PLAN

[Fiscal Years: 2009 Through 2014]

### Background

In October 2002, Congress, with the leadership and overwhelming bipartisan support of the members of the U.S. House Committee on House Administration, passed the Help America Vote Act (HAVA). HAVA represents an unprecedented effort by Congress to enhance the administration of Federal elections through funding, guidance and policies.

HAVA was not contemplated as a short-term or partial solution to the issues and problems with the administration of Federal elections that came to the forefront during the 2000 elections. The law recognized the need to invest in our election infrastructure and set out a comprehensive program of funding, guidance, and ongoing research that spans the course of many years.

*Funding State Improvements to Elections*

The Congress initially appropriated approximately $3 billion for payments to states during fiscal years 2003 and 2004. These funds were authorized under three separate sections of HAVA. Section 101 funds may be used to improve the administration of elections for Federal office. Section 102 funds may be used to replace punch-card and lever-action voting systems. Section 251 funds may be used to (1) improve voting systems, (2) establish and implement statewide voter registration databases, (3) implement provisional voting, (4) provide information to the voting public in the polling place, and (5) otherwise improve the administration of elections for Federal office. Congress appropriated an additional $115 million of Section 251 funds in fiscal year 2008. Generally, the funds are available to states until expended.

*Standards for Voting Systems*

A major provision of HAVA established minimum requirements for voting systems used in Federal elections. Each voting system must:

- Permit the voter to verify the selections made prior to casting the ballot;
- Permit the voter to change a selection prior to casting the ballot;
- Notify the voter when an overvote (making more than the permissible

number of selections in a single contest) occurs;

- Notify the voter of the ramifications of an overvote;
- Produce a permanent paper record that can be used in a recount or audit of an election;
- Provide accessibility to disabled voters;
- Provide foreign language accessibility in jurisdictions covered by Section 203 of the Voting Rights Act; and
- Meet the error rate standard established in the 2002 Voting System Standards.

*Election Assistance Commission*

To foster those programs and to promote and enhance voting for United States citizens, HAVA established the Election Assistance Commission (EAC). EAC is an independent bipartisan commission. Four full-time commissioners, appointed by the President and confirmed by the U.S. Senate, guide the EAC. Through the agency, the Federal government has assumed a role in the administration of Federal elections. Specifically, EAC is statutorily required to:

- Create a clearinghouse of information for election officials and the public.
- Distribute and monitor HAVA funds to states for election administration improvements.
- Conduct periodic studies of election administration issues.
- Establish best practices and guidelines on election administration for state and local election officials.
- Issue, and periodically review and modify, as necessary, voluntary voting system guidelines.
- Accredit voting system test labs and test and certify voting equipment.
- Develop requirements for voter registration form design for states.
- Provide Congress with a bi-annual report to assess the impact of the National Voter Registration Act (NVRA).

HAVA also set up a Standards Board and the Board of Advisors to counsel EAC. In addition, the law established a Technical Guidelines Development Committee (TGDC) to assist EAC in the preparation of the voluntary voting system guidelines.

EAC has 39 full-time employees and four part-time employees, including the four commissioners and their four special assistants. EAC is located in Washington, D.C., is managed by an Executive Director, and is organized (Appendix 1) to provide responsive service to its stakeholders (Attachment 2). Its budget for internal operations in fiscal year 2008 was $13,280,000.

*Guiding Principles*

EAC is committed to:

- Bipartisan collaboration to serve the best interests of the American voters.
- Transparency in its work.
- Professionalism, excellence, and adherence to the highest level of performance standards for EAC staff and contractors.
- Accountability and integrity in the management and conduct of all EAC activities and programs.
- Careful stewardship of taxpayer dollars and overall fiscal responsibility.
- Timely performance of its duties.
- Performance and public service without regard to race, sex, religion, national origin, age, special needs, sexual orientation, gender identification, or political affiliation in everything it does.
- Thorough and efficient distribution of appropriate election administration information it gathers.

*The Planning Process*

To meet the challenge of supporting the states and local governments in implementing HAVA reforms, EAC developed a strategic plan that provides the framework for how it will use its resources effectively. The plan lays out an approach to create a receptive and productive agency fully capable of the unique leadership role it has been given as a national clearinghouse, a manager of Federal financial assistance, a certifier of voting systems, and a resource for election officials throughout the country regarding the administration of Federal elections.

The plan is a valuable opportunity for EAC to work together as a team to consider a collective strategic outlook. With the help of the Commissioners, a vision and mission were reconfirmed. EAC's senior management team then took on the task of identifying the critical issues facing EAC in the coming years and determined how best to meet them. The plan focuses on these issues and is intended to be the foundation from which to address issues that arise during fiscal years 2009 through 2014. EAC is committed to thinking both critically about its niche and strategically at how to make improvements in crucial areas, and this plan embraces the next steps to further that effort. The senior management team identified five strategic goals which are described in detail in this document and summarized in Appendix 3.

**Vision and Mission**

*Vision*

Lead election reform that reaffirms the right to vote and to have all eligible votes counted accurately.

*Mission*

Assist the effective administration of Federal elections.

**Goals and Objectives**

*Goal 1: Communicate*

*Communicate timely and accurate information on the effective administration of elections for Federal office and on the operations and services offered EAC.*

Increased interest in elections, new Federal funding, the rapid pace of change in election administration, and Congressional direction has led EAC to operate a national clearinghouse of election information. EAC obtains election information through in-house research and chartered studies and from other credible sources. EAC presents this information to the election community, the public, the media, and EAC employees principally through its Web site. Also, EAC must be responsive to valid inquiries about its programs and operations.

Outcome

The Congress, Federal agencies, state and local election officials, and the public receive reliable, accurate, and non-partisan information about administering, conducting, and participating in Federal elections and how, where, and when Americans vote.

*Objective 1:* Operate the EAC clearinghouse effectively.

Means and strategies for accomplishing objective:

(a) Set EAC policy for a Web-based clearinghouse that will (i) establish the physical description of the clearinghouse and (ii) describe the contents to be presented to the public.

(b) Launch a public information initiative about the contents and uses of the EAC Clearinghouse.

(c) Maintain current and relevant information on the EAC Web site.

(d) Conduct regular information audits of all EAC divisions to update the Clearinghouse and Web site with EAC input.

Performance Measure

- Issue clearinghouse policy within 6 months.
- Post applicable information on the Web-based clearinghouse within 24 business hours of receipt.
- Distribute at least one e-mail update per month to stakeholders about the Web-based clearinghouse.

*Objective 2:* Respond to outside requests about the EAC timely and accurately.

Means and strategies for accomplishing objective:

(a) Establish and implement policies and procedures for tracking requests, gathering information from EAC, responding to requests, verifying and documenting responses, and updating information for stakeholders.

(b) Coordinate Commissioner and staff briefings for Members of Congress and Congressional staffers.

(c) Maintain and make available to EAC staff an electronic Freedom of Information Act (FOIA) reading room and a database of media and Congressional inquiries and responses.

(d) Maintain a physical FOIA reading room.

(e) Provide (FOIA) training to EAC staff to improve response rates.

Performance Measure

- Issue policies and procedures concerning request process within 6 months.
- Distribute media and Congressional inquiry and response log to the EAC staff on a daily basis.
- Respond to FOIA requests in accordance with requirements.
- Respond to 75 percent of non-FOIA requests within 72 hours.

*Objective 3:* Convey the results of EAC operations and accomplishments.

Means and strategies for accomplishing objective:

(a) Identify technologies and other communication opportunities that will ensure rapid delivery of information to a wide variety of stakeholders.

(b) Actively promote the EAC electronic newsletter to expand the stakeholder database.

(c) Inform Members of Congress and Congressional staffers about EAC initiatives and programs in general and in their districts.

(d) Edit EAC materials and deliverables to ensure their accuracy and consistency.

(e) Produce speeches and talking points for commissioners and EAC staff that accurately capture EAC activities and output.

(f) Create an atmosphere of creativity and customer service.

Performance Measure

- Provide regular updates about EAC activities and election administration issues to EAC employees.
- Produce an annual report that accurately captures EAC activities during the respective time period.
- Produce an annual FOIA report to chronicle requests and responses.
- Issue quarterly press releases summarizing EAC accomplishments.
- Provide regular briefings regarding EAC activities to Congressional staffers.
- Produce the annual report to the Congress by January 1 of each year for the preceding year ending September 30.
- Issue at least 12 EAC newsletters per year.

Program Evaluation

To evaluate the program:

- Establish feedback mechanism to gain public input on effectiveness and relevance of Web-based clearinghouse.
- Conduct monthly information audits on Web-based clearing house to ensure content is accurate and updated.

*Goal 2: Fund and Oversee*

*Deliver and manage Federal funds effectively.*

For the first time, the Federal government has funded improvements to the voting process. EAC is responsible for the distribution and oversight of approximately $3 billion in payments to states and for other grant programs to improve Federal elections and gather election data. Most of the funding to States was used for purchasing new voting equipment that meets the standards in HAVA; establishing a computerized statewide voter registration list; educating voters about voting procedures, rights, and technology; training election officials, poll workers, and election volunteers; improving the accessibility and quantity of polling places; and otherwise improving the administration of elections for Federal office. EAC is responsible for the administration of these funds.

Outcome

States and other recipients promptly and accurately receive Federal funds administered by EAC and use the funds appropriately to improve the administration of elections for Federal office.

*Objective 1:* Accurately and timely disburse Federal financial assistance administered by EAC.

Means and strategies for accomplishing objective:

(a) Develop program manual, including rules of general applicability, for each Federal financial assistance program administered by the EAC.

(b) Thoroughly review all grant applications to select appropriate recipients.

(c) Thoroughly review requests for payments/state plans under all programs to help assure recipients use funds for appropriate purposes.

(d) Timely publish state plans and amendments to state plans.

(e) Timely disburse funds on the basis of requests for reimbursement, certifications, and/or amendments to state plans.

(f) Recoup and redistribute unspent Section 102 funds.

Performance Measure

- Publish program manual by January 2009.
- Award grants within established timeframes.
- Submit state plans for publication in the **Federal Register** within 30 days of receipt of the plan.
- Submit payment requests to GSA with 10 days of receipt of acceptable requests/certifications.
- Recoup and redistribute unspent Section 102 funds by May 2009

*Objective 2:* Effectively monitor Federal financial assistance administered by the EAC.

Means and strategies for accomplishing objective:

(a) Include in Program Manual reporting requirements and monitoring procedures.

(b) Timely review all financial and narrative reports submitted.

(c) Follow up on anomalies in reports or on non-reporting entities.

(d) Prepare a timely annual report to the Congress on State use of HAVA Section 251 funds (requirements payments).

(e) Review audit reports to identify internal control weaknesses and questionable uses of Federal funds administered by the EAC.

(f) Conduct sight visits of recipients for whom EAC has found significant problems in financial and/or narrative reports and/or in audit reports.

(g) Timely negotiate indirect cost rates with state election agencies..

Performance Measures

- Send follow up letters to recipients regarding reporting anomalies or failure to file within 30 days of knowledge of such conditions.
- Resolve 100 percent of audit findings within established timeframes.
- Conduct site visits to at least three high priority grantees each year.
- Negotiate indirect cost rates within 30 days of receipt of acceptable indirect cost proposals.
- Issue the annual report to Congress on the expenditure of HAVA funds by July 15 of each year.

*Objective 3:* Provide technical assistance and guidance on the management of Federal financial assistance administered by EAC to reduce the risk of inappropriate use of funds and accounting errors.

Means and strategies for accomplishing objective:

(a) Include in Program Manual guidance/references on use of funds, allowable costs, and managing funds.

(b) Offer workshops and training sessions on management, use and reporting of Federal financial assistance administered by EAC.

Performance Measures

- Submit to the Commissioners all recommended policy and guidance concerning the administration of Federal financial assistance administered by the EAC within established timeframes.
- Offer at least one workshop per year.
- Respond to all inquires by recipients about the use and administration of funds in accordance with EAC requirements.

Program Evaluation

Assess the results of (1) audits (EAC Office of Inspector General and State) of recipient expenditure of Federal financial assistance administered by EAC, (2) EAC monitoring visits, and (3) EAC reviews of recipient annual financial reports. Implement additional controls over EAC administration of Federal financial assistance, as appropriate, on the basis of the assessments.

*Goal 3: Study, Guide, and Assist*

*Identify and develop information on areas of pressing concern regarding the administration of elections for Federal office and issue recommended improvements, guidance, translations, and best practices as required by HAVA, and carry out responsibilities under the National Voter Registration Act (NVRA).*

HAVA mandates that the EAC conduct research on current election administration issues with the aim of promoting methods of voting and administering elections which will be the most ''convenient, accessible, and easy to use;'' ''will yield the most accurate, secure, and expeditious system for voting and tabulating election results;'' ''will be nondiscriminatory;'' and ''will be efficient and cost-effective.'' HAVA also requires that EAC produce guidelines and best practices for state use in implementing HAVA. HAVA also transfers from the Federal Election Commission to the EAC the responsibility for updating and maintaining the national mail voter registration application and for reporting on the impact of the NVRA on elections for Federal office.

Outcome

As a result of this goal (1) the election community and other key stakeholders improve the administration of elections for Federal office on the bases of pertinent, impartial, timely, and high-quality information, recommendations, guides and other tools on election and voting issues and (2) eligible citizens use the mail voter registration application to register to vote, register with a political party, or report a change of name, address, or other information.

*Objective 1:* Complete research on relevant issues that improve the administration of elections for Federal office and expeditiously report on critical administration subjects and election data.

Means and strategies for accomplishing objective:

(a) Analyze unfinished research mandated by HAVA, and develop and prioritize an inventory of ideas for potential new projects internally and on the basis of input from stakeholders.

(b) Establish, based on the inventory, annual research plans for completing research projects by EAC and by contractors in order of priority. Present plan to Board of Advisors and Standards Board for information and comments only. Obtain Commissioners approval for the plan and inform the Congress of any mandated research that is no longer useful.

(c) Monitor research projects; tracking progress, checking the accuracy of results, and preparing reports.

(d) Prepare, on the basis of data collected, recommendations for improvements for the election community.

Performance Measures

- Complete inventory of potential projects by July 2009.
- Start 100 percent of annual planned and funded projects.
- Meet the milestones for the completion of contracted research projects in accordance with contract schedules and deliverables.
- Disseminate all completed research project reports to stakeholders.
- Establish, in fiscal year 2009, a baseline for measuring stakeholder use of EAC research products to improve the administration of elections for Federal office. In subsequent years, increase the percentage of stakeholder use of EAC research products.

*Objective 2:* Identify and collect required and useful data on election administration practices and on voting methods and demographics and make recommendations for improving the quality of practices, methods, and data.

Means and strategies for accomplishing objective:

(a) Identify data required to be collected by law and data needed by the Congress, election officials, and other stakeholders.

(b) Interact with state and local election data collection agencies and election associations to exchange information on data collection practices and identify ways to ensure data quality.

(c) Amend EAC's Election Day survey to include the collection of data on new election administration topics and on changes in required and desirable data elements.

(d) Recommend improvements to the data collection process to the Congress and issue reports presenting data required by the Uniformed and Overseas Citizens Absentee Voting Act and EAC's Election Day Survey.

Performance Measure

- Establish a baseline in fiscal year 2009 on the accuracy and completeness of data reported by states in response to EAC surveys. Increase the accuracy and completeness of reported data in each of the succeeding years.
- Include recommendations to improve election administration and data to the Congress in the annual report on the Election Day survey.
- Issue required reports to the Congress by the dates required by law.

*Objective 3:* Issue guides, translations and other tools that are timely and useful.

Means and strategies for accomplishing objective:

(a) Provide guidance to states concerning the proper implementation of the HAVA Title III requirements.

(b) Develop and administer the EAC Language Accessibility Program to assist election officials in meeting the needs of limited English proficiency voters.

(c) Develop guidelines in Native American Languages.

(d) Develop and maintain *A Voter's Guide to Federal Elections* in Spanish, Chinese, Japanese, Korean, Vietnamese, and Tagalog.

(e) Create interactive versions of the various Glossaries of Key Election Terminology on the EAC Web site.

(f) Coordinate with the Department of Justice Voting Section to provide EAC language resources to jurisdictions required to meet the language minority requirements in Sections 203 and 404 of the Voting Rights Act.

(g) Develop election management guidelines that can be easily adapted to suit an election jurisdiction's needs.

Performance Measures

- Complete guidance on HAVA Title III requirements by October 2010.
- Complete the *Voters Guide to Federal Elections* in Spanish, Chinese, Japanese, Korean, Vietnamese, and Tagalog by September 2009.

• Complete guidance for Native Americans by October 2010.

• Complete interactive glossaries and management guidelines by October 2011.

*Objective 4:* Update and maintain a national mail voter registration application and report to the Congress as required by NVRA

Means and strategies for accomplishing objective:

(a) Implement procedures to improve and maintain the national mail voter registration application and to govern state requests for changes to the application.

(b) Provide guidance to states concerning the proper implementation of the NVRA.

(c) Translate the form into Spanish, Chinese, Japanese, Korean, Vietnamese, and Tagalog.

Performance Measures

• Publish regulations governing the administration of the application by December 2009.

• Process all accepted requests to change the mail voter registration form within prescribed timeframes.

• Issue the bi-annual report on the impact of NVRA by June 30 of each odd-numbered year.

Program Evaluation

Develop an assessment tool to monitor election community acceptance of EAC recommendations and guides.

*Goal 4: Test and Certify*

*Build public confidence in elections by testing and certifying voting systems to improve system security, operation, and accessibility.*

Before the passage of HAVA, the Federal government was not involved in the testing of voting systems used in Federal elections. EAC's first step in instituting a Testing and Certification Program was to work with its advisory committees and the National Institute of Standards and Technology (NIST) to develop voluntary voting system guidelines against which voting systems will be evaluated. EAC completed the first iteration of the VVSG in 2005, and will regularly update the VVSG. In addition, EAC works with NIST to accredit laboratories to test voting equipment. Based on the tests of equipment and software conducted by laboratories, EAC will certify, decertify, or recertify voting systems, as appropriate.

Outcome

Voting equipment operates more reliably and securely and is more accessible to the disabled. States use the EAC testing and certification program to ensure voting systems meet standards.

*Objective 1:* Develop and update the voluntary voting system guidelines.

Means and strategies for accomplishing objective:

(a) Develop updated voluntary voting system guidelines in plain English that adequately address accuracy and reliability of voting systems and that are cost effective.

(b) Develop and maintain testable, objective, and repeatable voluntary voting system test suites and (or) test methods.

(c) Submit an updated draft of VVSG, prepared by the TGDC, to the **Federal Register** for public comment and hold public meetings with stakeholders on the proposed guidelines.

(d) Consider comments on the draft TGDC version of the VVSG and prepare an EAC draft VVSG. Publish the EAC draft in the **Federal Register** for public comment.

(e) Prepare, after consideration of comments, a final version of guidelines and present them at a public meeting for a vote of the Commissioners.

Performance Measure

• Produce updates to the VVSG no later than 2009 and 2012.

*Objective 2:* Provide for the accreditation and revocation of accreditation of independent, non-federal laboratories qualified to test voting systems to Federal standards.

Means and strategies for accomplishing objective:

(a) Develop, implement, and maintain policies and procedures for the accreditation and revocation of accreditation of voting system test laboratories (VSTLs).

(b) Collaborate with NIST's National Voluntary Laboratory Accreditation Program (NVLAP) to accredit laboratories and ensure compliance with accreditation requirements.

(c) Implement a monitoring program to ensure the integrity of laboratories which test voting systems for Federal certification.

Performance Measure

• Complete accreditation reviews for all laboratories recommended to EAC by NIST and for all emergency actions within 90 days.

• Test and document the results of the review of compliance with procedures by at least 100 percent of accredited laboratories every 2 years.

*Objective 3:* Administer the testing, certification, decertification, and recertification of voting system hardware and software by accredited laboratories.

Means and strategies for accomplishing objective:

(a) Develop, implement, and maintain policies and procedures for the testing, certification, decertification, and recertification of voting system hardware and software by accredited VSTLs.

(b) Implement the most recent voluntary voting system guidelines into the EAC's testing and certification program and all of its components.

(c) Monitor, in accordance with Chapter 8 of the *Voting System Testing and Certification Program Manual*, EAC-certified voting systems to ensure that the systems continue to meet the requirements of the Federal standards to which they were certified.

(d) Conduct field reviews in state and local jurisdictions of EAC certified voting systems to ensure the systems fielded (i) match the system certified by the EAC and (ii) meet the requirements of the Federal standards to which they were certified.

Performance Measure

• Test 100 percent of systems qualifying for testing.

• Conduct at least one review of a manufacturing facility of a registered manufacturer a least once every 4 years.

• Conduct field reviews for at least 50 percent of jurisdictions that volunteer for reviews. (Measures may be modified after EAC determines average number of volunteers.)

• Respond to requests for interpretations of voting system standards with 45 days. (Measures may be modified after EAC determines average number of requests.)

Program Evaluation

Assess comments to **Federal Register** publications and results of EAC oversight reviews of laboratory testing and election system compliance with standards.

*Goal 5: Manage*

*Achieve organizational and management excellence.*

HAVA established the EAC to help implement mandated improvements to Federal elections. To that end, EAC will employ a variety of plans, resources, skills, processes, and technologies to ensure effective and efficient agency management.

Outcome

EAC Commissioners and staff of the testing and certification, payments and grants, election administration improvement, research, administration, and legal programs proficiently carry out EAC's strategic objectives.

*Objective*—Implement a high performance organization

Means and strategies for accomplishing goal:

(a) Foster a leadership environment that inspires, motivates and guides employees toward the strategic goals; coaches, mentors, and challenges staff; provides needed training and sharing of knowledge; and, models high standards of honesty, integrity, trust, and respect for all individuals.

(b) Establish an organization structure, management systems, and decision-making processes that improve coordination and cooperation across the EAC and that support the efficient accomplishment of goals and priorities.

(c) Clarify roles and responsibilities of commissioners and staff.

(d) Attract and maintain a high-performing workforce that is diverse and that includes those with disabilities through outreach, competitive compensation, meaningful training, pleasant work space, flexible work schedules, telework, and state-of-the-art equipment.

(e) Obtain sufficient funds, plan activities, and budget resources to accomplish the goals and objectives of EAC.

(f) Provide effective financial management to programs.

(g) Provide effective legal support to program operations.

(h) Monitor EAC division progress in meeting goals and objectives.

Performance Measure

- Meet annual performance measures.
- Obtain a clean audit opinion on agency financial statements within 2 years of the initial statement preparation.
- Institute an internal integrated budget and financial management system within 6 months.
- Implement 90 percent of OIG audit recommendations within agreed upon timeframes.

Program Evaluation

Implement an effective internal control assessment process that meets the requirements of Office of Management and Budget Circular A–123, Management's Responsibility for Internal Controls. Promptly implement agreed upon recommendations contained in EAC's annual audit of its Performance and Accountability Report.

**External Factors That Impact Accomplishment of the Goals and Objectives**

EAC has an opportunity to remain a leader in the election community and have positive name recognition outside of the Federal government. However, the agency's ability to accomplish such an end is dependent upon a number of external factors that are not all within the agency's control.

*Acceptance by the Election Community*

HAVA strictly limits EAC's regulatory authority to that held by the Federal Election Commission (FEC) over the NVRA. As such, a significant number of EAC's research and guidance is voluntary. It is critical to have state and local election officials adopt and apply these voluntary principles if EAC's efforts are to succeed.

*Budget*

Adequate funding for the maintenance of staff and support functions is essential for attainment of EAC goals and strategic objectives.

*Legislative Changes*

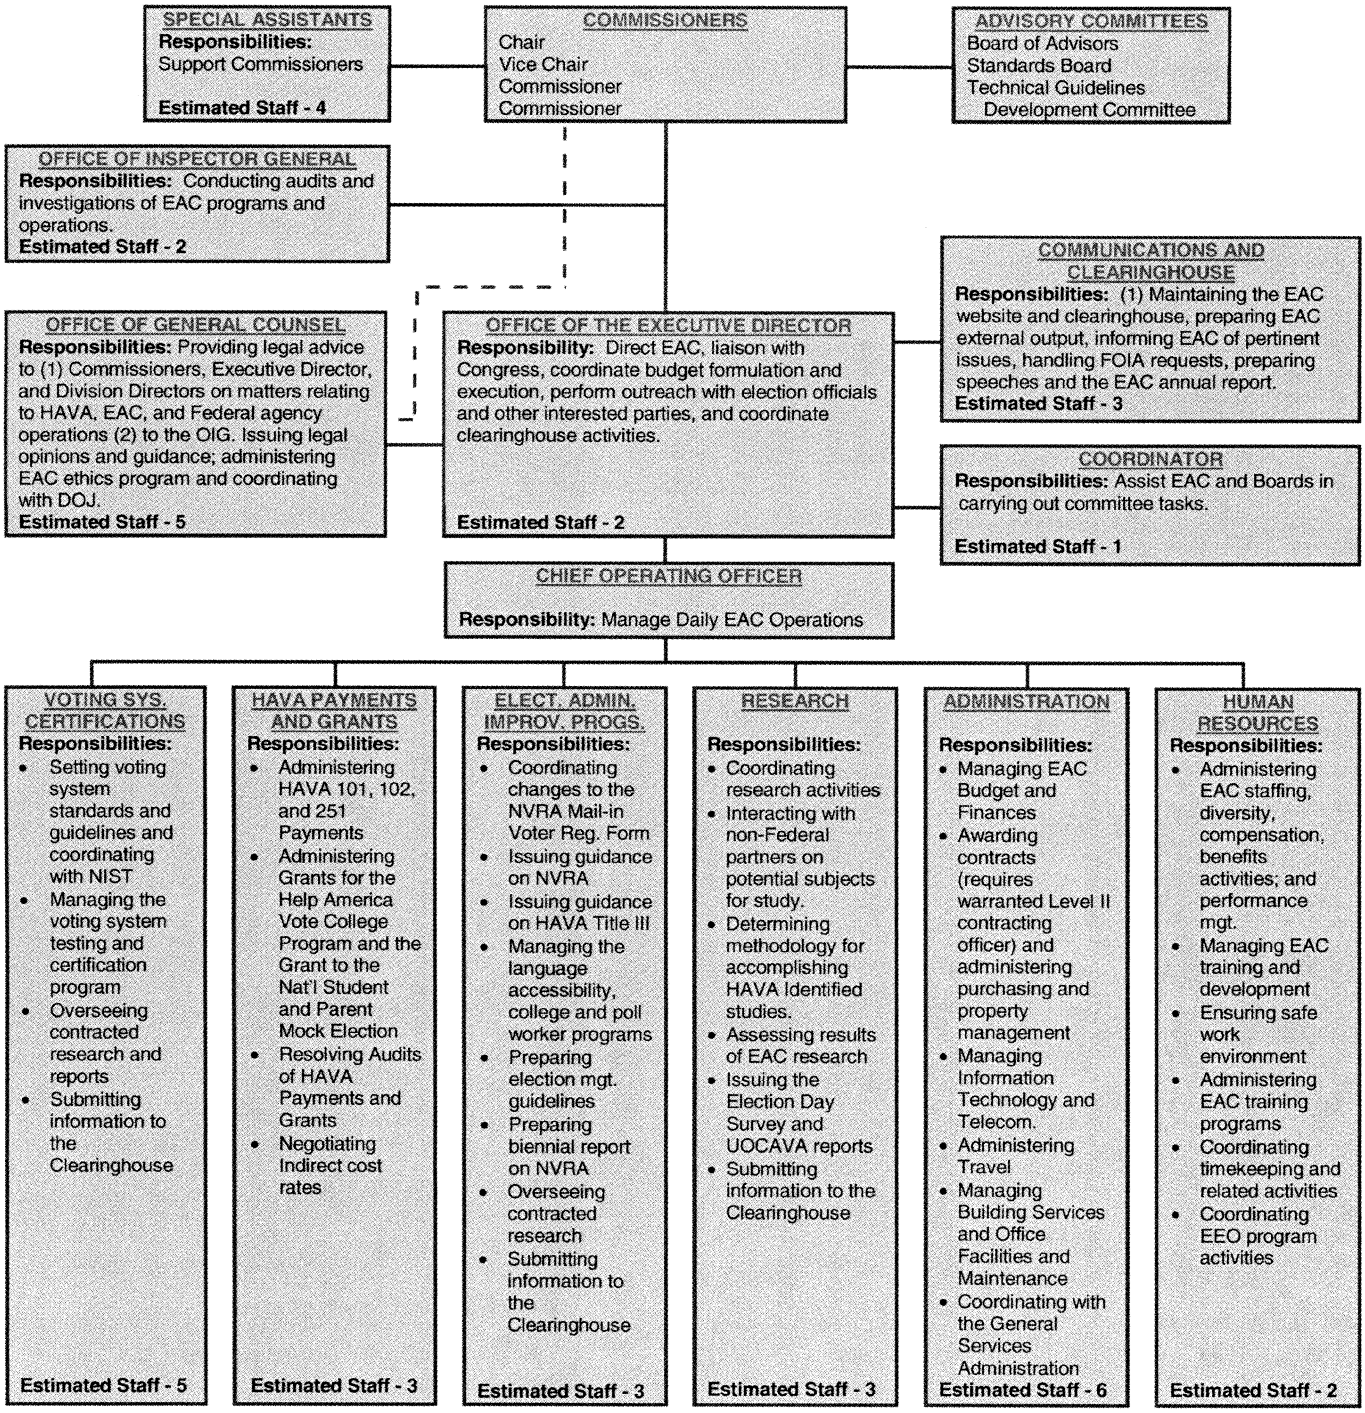
Statutory changes to either the agency's enabling legislation or to other statutes that directly impact the agency could affect the EAC's ability to meet its goals and strategic objectives.

*Technology*

Developments in technology that are rapidly changing our world could provide both new opportunities and new risks for EAC.

BILLING CODE 6820–KF–P

# APPENDIX 1
# ORGANIZATION CHART



**Appendix 2 Stakeholders**

**Government Entities With Oversight & Decision-Making Authority Regarding EAC**

White House Staff
Members of Congress
Office of Management & Budget

**Groups Directly Affected by EAC Activities That Also Impact EAC Decision-Making**

Chief Election Authorities in Each State
Local Election Officials
EAC Standards Board
EAC Board of Advisors
EAC Technical Guidelines Development Committee

**Other Government Entities With HAVA Implementation Responsibilities or Interest in HAVA**

Federal Agencies
Governors (Mayor in Washington, DC)
State Legislatures (City Council in Washington, DC)

**Non-Government Groups Affected by HAVA Implementation**

Professional Groups for Election Officials
Professional Groups Representing State & Local Government
Election Equipment & Services Vendors
National Political Parties

**Other Groups Interested in EAC Activities & HAVA Implementation**

U.S. Citizens here and abroad
Voter Advocacy Groups
Universities and Academics
Think Tanks
International Organizations/Interests
State and Local Election Officials

# APPENDIX 3
# GOALS, OBJECTIVES, & MEASURES

| GOAL 1: COMMUNICATE - Communicate timely and useful information on the effective administration of elections for Federal office and on the operations of EAC | |
|---|---|
| **Objectives** | **Measures** |
| 1. Operate the EAC clearinghouse effectively. | ▪ Issue clearinghouse policy within 6 months.<br>▪ Post applicable information on the Web-based clearinghouse within 24 business hours of receipt.<br>▪ Distribute at least one email update per month to stakeholder about the Web-based clearinghouse. |
| 2. Respond to outside requests about the EAC timely and accurately. | ▪ Issue procedures concerning request responses within 6 months.<br>▪ Distribute media and Congressional inquiry and response log to EAC staff on a daily basis.<br>▪ Respond to FOIA requests in accordance with requirements.<br>▪ Respond to 75 percent of non-FOIA requests within 72 hours |
| 3. Convey the results of EAC operations and accomplishments. | ▪ Provide regular updates about EAC activities and election administration issues to EAC employees.<br>▪ Issue quarterly press releases summarizing EA accomplishments.<br>▪ Produce the annual report of EAC activities by January 1 of each year for the preceding year ending September 30.<br>▪ Produce an annual FOIA report to chronicle requests and responses.<br>▪ Provide regular briefings regarding EAC activities to Congressional staffers<br>▪ Issue at least 12 EAC newsletters per year. |
| **GOAL 2: FUND AND OVERSEE - Deliver and manage Federal funds effectively** | |
| **Objectives** | **Measures** |
| 1. Accurately and timely disburse Federal financial assistance administered by EAC. | ▪ Publish program manual by January 2009.<br>▪ Award grants within established timeframes.<br>▪ Submit state plans for publication in the Federal Register within 30 days of receipt.<br>▪ Submit payment requests to GSA within 10 days of receipt of acceptable request/certification.<br>▪ Recoup and distribute unspent Section 102 funds by May 2009. |
| 2. Effectively monitor Federal financial assistance administered by EAC. | ▪ Send follow up letters to recipients regarding reporting anomalies or failure to file within 30 days of knowledge of such conditions.<br>▪ Resolve 100 percent of audit findings within established timeframes.<br>▪ Conduct site visits to at least three high priority grantees each year.<br>▪ Negotiate indirect cost rates within 30 days of receipt of acceptable indirect cost proposals.<br>▪ Issue the annual report to Congress on the expenditure of HAVA funds by July 15 of each year. |
| 3. Provide technical assistance and guidance on the management of Federal financial assistance administered by EAC | ▪ Offer at least on workshop per year.<br>▪ Respond to all inquiries in accordance with EAC requirements. |

| | |
|---|---|
| | ▪ Submit to the Commissioners all recommended policy and |

# GOALS, OBJECTIVES, & MEASURES

| | |
|---|---|
| to reduce the risk of inappropriate use of funds and accounting errors. | guidance concerning the administration of Federal financial assistance administered by EAC within established timeframes. |
| **GOAL 3: STUDY, GUIDE, AND ASSIST - Identify and develop information on areas of pressing concern regarding the administration of elections for Federal office and issue recommended improvements, guidance, translations, and best practices as required by HAVA and carry out responsibilities under the National Voter Registration Act.** | |
| **Objectives** | **Measures** |
| 1. Complete research on relevant issues that improve the administration of elections for Federal office and expeditiously report on critical election administration subjects and election data. | ▪ Complete inventory of potential research projects by July 2009.<br>▪ Start 100 percent of planned and funded projects.<br>▪ Meet the milestones for the completion of contracted research projects in accordance with contract schedules and deliverables.<br>▪ Disseminate all completed research project reports to stakeholders.<br>▪ Establish, in fiscal year 2009, a baseline for measuring stakeholder use of EAC research products to improve the administration of elections for Federal office. In subsequent years, increase the percentage of stakeholder use of EAC research products. |
| 2. Identify and collect required and useful data on election administration practices and on voting methods and demographics make recommendations for improving the quality of practices, methods, and data. | ▪ Establish a baseline in fiscal year 2009 on the accuracy and completeness of data reported by states in response to EAC surveys. Increase the accuracy and completeness of reported data in each of the succeeding years.<br>▪ Include recommendations to improve election administration and data to the Congress in the annual report on the Election Day survey.<br>▪ Issue required reports to the Congress by the dates required by law |
| 3. Issue guides, translations and other tools that are timely and useful. | ▪ Complete guidance on HAVA Title III requirements by October 2010.<br>▪ Complete the Voters Guide to Federal elections in Spanish, Chinese, Japanese, Korean, Vietnamese, and Tagalog by September 2009.<br>▪ Complete guidance for Native Americans by October 2011. |
| 4. Update and maintain a national mail voter registration application and report to the Congress as required by NVRA. | ▪ Publish regulations governing the administration of the application by September 2009.<br>▪ Process all accepted requests to change the mail in voter registration application within prescribed timeframes.<br>▪ Issue the bi-annual report on the impact of NVRA by June 30 of each odd-numbered year. |
| **GOAL 4: TEST AND CERTIFY - Build public confidence in elections by testing and certifying voting systems to improve system security, operation, and accessibility.** | |
| 1. Develop and update the voluntary voting system guidelines. | ▪ Produce updates to the VVSG in 2009 and 2012. |
| 2. Provide for the accreditation and revocation of accreditation of independent, non-federal laboratories | ▪ Complete accreditation reviews for all laboratories recommended to EAC by NIST and for all emergency actions within 90 days.<br>▪ Test and document the results of the review of compliance with |

## DEPARTMENT OF ENERGY

### Record of Decision for the Complex Transformation Supplemental Programmatic Environmental Impact Statement—Operations Involving Plutonium, Uranium, and the Assembly and Disassembly of Nuclear Weapons

**AGENCY:** National Nuclear Security Administration, U.S. Department of Energy.

**ACTION:** Record of decision.

**SUMMARY:** The National Nuclear Security Administration (NNSA), a separately organized agency within the U.S. Department of Energy (DOE), is issuing this Record of Decision (ROD) for the continued transformation of the nuclear weapons complex (Complex). This ROD is based on information and analyses contained in the *Complex Transformation Supplemental Programmatic Environmental Impact Statement* (SPEIS) (DOE/EIS–0236–S4) issued on October 24, 2008 (73 FR 63460); comments received on the SPEIS; other NEPA analyses as noted; and other factors, including cost, technical and security considerations, and the missions of NNSA. The SPEIS analyzes the potential environmental impacts of alternatives for transforming the nuclear weapons complex into a smaller, more efficient enterprise that can respond to changing national security challenges and ensure the long-term safety, security, and reliability of the nuclear weapons stockpile.

The alternatives analyzed in the SPEIS are divided into two categories: programmatic and project-specific. Programmatic alternatives involve the restructuring of facilities that use or store significant (i.e., Category I/II) quantities of special nuclear material (SNM).[1] These facilities produce plutonium components (commonly called pits[2]), produce highly enriched uranium (HEU) components (including secondaries[3]), fabricate high explosives (HE) components, and assemble and disassemble nuclear weapons. The decisions announced in this ROD relate to the programmatic alternatives analyzed in the SPEIS. NNSA is issuing a separate ROD relating to the project-specific alternatives.

NNSA has decided to implement its preferred programmatic alternative as described in the SPEIS and summarized in this ROD. This decision will transform the plutonium and uranium manufacturing aspects of the complex into smaller and more efficient operations while maintaining the capabilities NNSA needs to perform its national security missions. The three major elements of the decisions announced in this ROD are:

(1) Manufacturing and research and development (R&D) involving plutonium will remain at the Los Alamos National Laboratory (LANL) in New Mexico. To support these activities, NNSA will construct and operate the Chemistry and Metallurgy Research Replacement–Nuclear Facility (CMRR–NF) at LANL as a replacement for portions of the Chemistry and Metallurgy Research (CMR) facility, a structure that is more than 50 years old

[1] As defined in section 11 of the *Atomic Energy Act of 1954,* special nuclear material is: (1) Plutonium, uranium enriched in the isotope 233 or in the isotope 235 and any other material which the U.S. Nuclear Regulatory Commission determines to be special nuclear material; or (2) any material artificially enriched by any of the foregoing. Special nuclear material is separated into Security Categories I, II, III, and IV based on the type, attractiveness level, and quantity of the material. Categories I and II require the highest level of security.

[2] A pit is the central core of a nuclear weapon, principally made of plutonium or enriched uranium.

[3] A secondary is the component of a nuclear weapon that contains elements needed to initiate the fusion reaction in a thermonuclear explosion.

and faces significant safety and seismic challenges to its continued operation.

(2) Manufacturing and R&D involving uranium will remain at the Y–12 National Security Complex in Tennessee. NNSA will construct and operate a Uranium Processing Facility (UPF) at Y–12 as a replacement for existing facilities that are more than 50 years old and face significant safety and maintenance challenges to their continued operation.

(3) Assembly and disassembly of nuclear weapons and high explosives production and manufacturing will remain at the Pantex Plant in Texas.

These decisions will best enable NNSA to meet its statutory mission while minimizing technical risks, risks to mission objectives, costs, and environmental impacts. These decisions continue the transformation begun following the end of the Cold War and the cessation of nuclear weapons testing, particularly decisions announced in the 1996 ROD for the *Programmatic Environmental Impact Statement for Stockpile Stewardship and Management* (SSM PEIS) (DOE/EIS–0236) (61 FR 68014; Dec. 26, 1996). This ROD explains why NNSA is making these programmatic decisions, why it is appropriate to make them at this time, and the flexibility NNSA has to adapt these decisions as needed in response to any changes in national security requirements that may occur in the near term.

**FOR FURTHER INFORMATION CONTACT:** For further information on the Complex Transformation SPEIS or this ROD, or to receive copies of these, contact: Ms. Mary E. Martin, NNSA NEPA Compliance Officer, Office of Environmental Projects and Operations, NA–56, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, toll free 1–800–832–0885 ext. 69438. A request for a copy of the SPEIS or this ROD may be sent by facsimile to 1–703–931–9222, or by e-mail to *complextransformation@nnsa.doe.gov*. The SPEIS, this ROD, the project-specific ROD, and additional information regarding complex transformation are available at *http://www.ComplexTransformationSPEIS.com* and *http://www.nnsa.doe.gov*.

For information on DOE's NEPA process, contact: Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance (GC–20), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, 202–586–4600, or leave a message at 800–472–2756. Additional information regarding DOE NEPA activities and access to many DOE NEPA documents are available through the DOE NEPA Web site at: *http://www.gc.energy.gov/NEPA*.

**SUPPLEMENTARY INFORMATION:**

## Background

NNSA prepared this ROD pursuant to the regulations of the Council on Environmental Quality (CEQ) for implementing the *National Environmental Policy Act* (NEPA) (40 CFR Parts 1500–1508) and DOE's NEPA Implementing Procedures (10 CFR Part 1021). This ROD is based on information and analyses contained in the *Complex Transformation Supplemental Programmatic Environmental Impact Statement* (SPEIS) (DOE/EIS–0236-S4) issued on October 24, 2008 (73 FR 63460); comments received on the SPEIS; other NEPA analyses as noted; other factors, including cost, technical and security considerations, and the missions of NNSA. NNSA received approximately 100,000 comment documents on the Draft SPEIS from Federal agencies; state, local, and tribal governments; public and private organizations; and individuals. In addition, during the 20 public hearings that NNSA held, more than 600 speakers made oral comments.

National security policies require DOE, through NNSA, to maintain the United States' nuclear weapons stockpile, as well as the nation's core competencies in nuclear weapons. Since completing the SSM PEIS and associated ROD in 1996, DOE has pursued these objectives through the Stockpile Stewardship Program. This program emphasizes development and application of greatly improved scientific and technical capabilities to assess the safety, security, and reliability of existing nuclear warheads without nuclear testing. Throughout the 1990s, DOE also took steps to consolidate the Complex to its current configuration of three national laboratories (and a flight test range operated by Sandia National Laboratories), four industrial plants, and a nuclear test site. This Complex enables NNSA to design, develop, manufacture, maintain, and repair nuclear weapons; certify their safety, security, and reliability; conduct surveillance on weapons in the stockpile; store Category I/II SNM; and dismantle and disposition retired weapons. Sites within the Complex and their current weapons program missions are described in the following paragraphs.

*Lawrence Livermore National Laboratory (LLNL), Livermore, California*—LLNL conducts research, design, and development of nuclear weapons; designs and tests advanced technology concepts; provides safety, security, and reliability assessments and certification of stockpile weapons; conducts plutonium and tritium R&D, hydrotesting, HE R&D and environmental testing; and stores Category I/II quantities of SNM. LLNL also conducts destructive and nondestructive surveillance evaluations on pits to evaluate their reliability. NNSA is currently removing Category I/II SNM from the site and by 2012 LLNL will not maintain these categories of SNM. NNSA is constructing the National Ignition Facility (NIF) at LLNL, which will allow a wide variety of high-energy-density investigations. NIF is scheduled to begin operations in 2009.

*Los Alamos National Laboratory (LANL), Los Alamos, New Mexico*—LANL conducts research, design, and development of nuclear weapons; designs and tests advanced technology concepts; provides safety, security, and reliability assessments and certification of stockpile weapons; maintains production capabilities for limited quantities of plutonium components (i.e., pits) for delivery to the stockpile; manufactures nuclear weapon detonators for the stockpile; conducts plutonium and tritium R&D, hydrotesting, HE R&D and environmental testing; and stores Category I/II quantities of SNM. LANL also conducts destructive and nondestructive surveillance evaluations on pits to assess their reliability.

*Nevada Test Site (NTS), 65 miles northwest of Las Vegas, Nevada*—NTS maintains the capability to conduct underground nuclear testing; conducts high hazard experiments involving nuclear material and high explosives; provides the capability to process and dispose of a damaged nuclear weapon or improvised nuclear device; conducts non-nuclear experiments; conducts hydrodynamic testing and HE testing; conducts research and training on nuclear safeguards, criticality safety, and emergency response; and stores Category I/II quantities of SNM.

*Pantex Plant (Pantex), Amarillo, Texas*—Pantex dismantles retired weapons; fabricates HE components, and performs HE R&D; assembles HE, nuclear, and non-nuclear components into nuclear weapons; repairs and modifies weapons; performs nonintrusive pit modification;[4] and evaluates and performs surveillance of weapons. Pantex stores Category I/II

[4] Nonintrusive pit modification involves changes to the external surfaces and features of a pit.

quantities of SNM for the weapons program and stores other SNM in the form of surplus plutonium pits pending transfer to SRS for disposition.

*Savannah River Site (SRS), Aiken, South Carolina*—SRS extracts tritium and performs loading, unloading, and surveillance of tritium reservoirs, and conducts tritium R&D. SRS does not store Category I/II quantities of SNM for NNSA's weapons activities, but does store Category I/II quantities for other DOE activities. SRS is currently receiving Category I/II surplus, non-pit plutonium from LLNL for storage pending its disposition.

*Y–12 National Security Complex (Y–12), Oak Ridge, Tennessee*—Y–12 manufactures uranium components for nuclear weapons, cases, and other nuclear weapons components; evaluates and tests these components; stores Category I/II quantities of HEU; conducts dismantlement, storage, and disposition of HEU; and supplies HEU for use in naval reactors.

The following two sites are part of the Complex but would not be affected by decisions announced in this ROD.

*Kansas City Plant (KCP), Kansas City, Missouri*—KCP manufactures and procures non-nuclear components for nuclear weapons and evaluates and tests these components. KCP has no SNM. The General Services Administration, as the lead agency, and NNSA, as a cooperating agency, prepared an Environmental Assessment (DOE/EA–1592, Apr. 2008) regarding the potential environmental impacts of modernizing the facilities and infrastructure for the non-nuclear production activities conducted by the KCP as well as moving these activities to other locations. The agencies issued a Finding of No Significant Impact (73 FR 23244; Apr. 29, 2008) regarding an alternative site in the Kansas City area. The SPEIS does not assess alternatives for the activities conducted at the KCP.

*Sandia National Laboratories (SNL), Albuquerque, New Mexico; Livermore, California; and other locations*—SNL conducts systems engineering of nuclear weapons; conducts research, design, and development of non-nuclear components; manufactures non-nuclear components, including neutron generators, for the stockpile; provides safety, security, and reliability assessments of stockpile weapons; and conducts HE R&D, tritium R&D, and environmental testing. The principal laboratory is located in Albuquerque, New Mexico (SNL/NM); a division of the laboratory (SNL/CA) is located in Livermore, California. SNL also operates the Tonopah Test Range (TTR) near Tonopah, Nevada, for flight testing of gravity weapons (including R&D and testing of nuclear weapons components and delivery systems). In 2008, NNSA completed the removal of SNL/NM's Category I/II SNM. SNL/NM no longer stores or uses these categories of SNM on an ongoing basis, although it may use Category I/II SNM for limited periods in the future. No SNM is stored at TTR, although some test operations have involved SNM.

**Alternatives Considered**

NNSA has been considering how to continue the transformation of the Complex since the Nuclear Posture Review [5] was transmitted to Congress by the Department of Defense in early 2002. NNSA considered the Stockpile Stewardship Conference in 2003, the Department of Defense Strategic Capabilities Assessment in 2004, the recommendations of the Secretary of Energy Advisory Board Task Force on the Nuclear Weapons Complex Infrastructure in 2005, and the Defense Science Board Task Force on Nuclear Capabilities in 2006 as to how transformation should continue. Based on these studies and other information, NNSA developed the range of reasonable alternatives for the Complex that could reduce its size, reduce the number of sites with Category I/II SNM (and storage locations for these categories of SNM within sites), eliminate redundant activities, and improve the responsiveness of the Complex. The following programmatic capabilities involving SNM are evaluated in the SPEIS:

- Plutonium operations, including pit manufacturing; Category I/II SNM storage; and related R&D;
- Enriched uranium operations, including canned subassembly manufacturing, assembly, and disassembly; Category I/II SNM storage; and related R&D; and
- Weapons assembly and disassembly and HE production (collectively, A/D/HE).

The programmatic alternatives analyzed in the SPEIS are discussed in the following paragraphs.

*No Action Alternative.* NNSA evaluated a No Action Alternative, which represents continuation of the status quo including implementation of past decisions. Under the No Action Alternative, NNSA would not make additional major changes to the SNM missions now assigned to its sites.

*Programmatic Alternative 1: Distributed Centers of Excellence*. This alternative would locate the three major SNM functional capabilities (plutonium, uranium, and weapons assembly and disassembly) involving Category I/II quantities of SNM at two or three separate sites. This alternative would create a consolidated plutonium center (CPC) for R&D, storage, processing, and manufacture of pits. Production rates of up to 125 pits per year for single shift operations and up to 200 pits annually for multiple shifts and extended work weeks are assessed for a CPC in this alternative. A CPC could consist of new facilities, or modifications to existing facilities at LANL, NTS, Pantex, SRS, or Y–12. The SPEIS also evaluated an option under this alternative that would upgrade facilities at LANL to produce up to 80 pits per year. This option would involve the construction and operation of the CMRR-NF. Highly-enriched uranium storage and uranium operations would continue at Y–12. Under this alternative, NNSA analyzed two options—construction of a new UPF and an upgrade of existing facilities at Y–12. The weapons A/D/HE mission would remain at Pantex under this programmatic alternative.

*Programmatic Alternative 2: Consolidated Centers of Excellence*. NNSA would consolidate the three major SNM functions (plutonium, uranium, and weapons assembly and disassembly) involving Category I/II quantities of SNM at one or two sites under this alternative. Two options were assessed: (1) The single site option (referred to as the consolidated nuclear production center [CNPC] option); and (2) the two-site option (referred to as the consolidated nuclear centers [CNC] option). Under the CNPC option, a new CNPC could be established at LANL, NTS, Pantex, SRS, or Y–12. Under the CNC option, the plutonium and uranium component manufacturing missions would be separate from the A/D/HE mission. The Consolidated Centers of Excellence Alternative assumed production rates of up to 125 weapons per year for single shift operations and up to 200 weapons annually for multiple shifts and extended work weeks.

*Programmatic Alternative 3: Capability-Based Alternative*. Under this alternative, NNSA would maintain a basic capability for manufacturing components for all stockpile weapons, as well as laboratory and experimental capabilities to support stockpile stewardship, but would reduce production facilities in-place such that NNSA would produce only a nominal level of replacement components (approximately 50 components per year). Within this alternative, NNSA

[5] The Nuclear Posture Review is a comprehensive analysis that lays out the direction for the United States' nuclear forces.

also evaluated a No Net Production/Capability-Based Alternative, in which NNSA would maintain capabilities to continue surveillance of the weapons stockpile, produce limited life components, and dismantle weapons, but would not add new types or increased numbers of weapons to the stockpile. This alternative involves minimum production (i.e., production of 10 sets of components or assembly of 10 weapons per year) within facilities with a larger manufacturing capability. Both options of this alternative would involve the construction and operation of a CMRR–NF.

**Preferred Alternative**

The Final SPEIS identified the following preferred alternatives for restructuring facilities that use significant quantities of SNM:

• Plutonium R&D and manufacturing: LANL would provide a consolidated plutonium research, development, and manufacturing capability within TA–55 (the Technical Area at LANL containing plutonium processing facilities) enabled by construction and operation of the CMRR-NF. The CMRR-NF would replace the existing CMR facility (a 50-year-old facility that has significant safety issues that cannot be addressed in the existing structure), to support transfer of plutonium R&D and Category I/II quantities of SNM from LLNL, and consolidation of weapons-related plutonium operations, including plutonium R&D and storage of Category I/II quantities of SNM, at LANL. Until completion of a new Nuclear Posture Review in 2009 or later, the net production at LANL would be limited to a maximum of 20 pits per year. Other national security actinide missions (e.g., emergency response, material disposition, nuclear energy) would continue at TA–55.

• Uranium manufacturing and R&D: Y–12 would continue as the uranium center, producing components and canned subassemblies, and conducting surveillance and dismantlement. NNSA completed construction of the Highly Enriched Uranium Materials Facility (HEUMF) in 2008 and will consolidate HEU storage in that facility.[6] NNSA would build a UPF at Y–12 to provide a smaller and modern highly-enriched uranium production capability, replacing 50-year-old facilities.

• Assembly/disassembly/high explosives production and manufacturing: Pantex would remain the assembly/disassembly/high explosives production and manufacturing center. NNSA would consolidate non-destructive weapons surveillance operations at Pantex.

• Consolidation of Category I/II SNM: NNSA would continue ongoing actions to transfer Category I/II SNM from LLNL under the No Action Alternative and phase out Category I/II operations at LLNL by the end of 2012.

**Environmentally Preferable Alternative**

Section 101 of NEPA (42 U.S.C. 4331) establishes a policy of federal agencies having a continuing responsibility to improve and coordinate their plans, functions, programs, and resources so that, among other goals, the nation may fulfill its responsibilities as a trustee of the environment for succeeding generations. The CEQ, in its ''Forty Most Asked Questions Concerning CEQ's NEPA Regulations'' (46 FR 18026; Mar. 23, 1981), defines the ''environmentally preferable alternative'' as the alternative ''that will promote the national environmental policy expressed in NEPA's Section 101.''

The analyses in the SPEIS of the environmental impacts associated with the programmatic alternatives indicated that the No Net Production/Capability-Based Alternative is environmentally preferable. This alternative would result in the minimum infrastructure demands (e.g., electricity and water use would be reduced by almost 50 percent at some sites); produce the least amount of wastes (radioactive wastes would be reduced by approximately 33–50 percent compared to the No Action Alternative); reduce worker radiation doses (by approximately 33–50 percent compared to the No Action Alternative); and require the fewest employees (up to 40 percent fewer at some sites). Almost all of these reductions in potential impacts result from the reduced production levels assumed for this alternative.

**Alternatives Considered but Eliminated From Detailed Study**

NNSA considered programmatic alternatives other than those described above, but concluded that these alternatives were not reasonable and eliminated them from detailed analysis. As discussed in the SPEIS, the following alternatives were considered but eliminated from detailed study: (1) Consolidate the Three Nuclear Weapons Laboratories (LLNL, LANL and SNL); (2) Curatorship Alternative; (3) Smaller CNPC Alternative; (4) New CPC with a Smaller Capacity; (5) Purchase Pits; (6) Upgrade Building 332 at LLNL to enable pit production; (7) Consider Other Sites for the CPC; (8) Redesign Weapons to Require Less or No Plutonium; and (9) Do Not Produce New Pits (see Section 3.15, Volume I of the SPEIS).

**Decisions**

With respect to the three major SNM functional capabilities (plutonium, uranium, and weapons assembly and disassembly) involving Category I/II quantities of SNM, NNSA has decided to keep these functional capabilities at three separate sites:

• Plutonium manufacturing and R&D will remain at LANL, and NNSA will construct and operate the CMRR-NF there to support these activities;

• Uranium manufacturing and R&D will remain at Y–12 and NNSA will construct and operate a UPF there to support these activities;

• Assembly/disassembly/high explosives production and manufacturing will remain at Pantex.

With respect to SNM consolidation, NNSA will continue ongoing activities[7] to transfer Category I/II SNM from LLNL under the No Action Alternative and phase out Category I/II operations at LLNL by the end of 2012.

**Bases for Decisions**

*Overview*

NNSA's decision locates the three major functional capabilities involving Category I/II quantities of SNM at three separate sites where these missions are currently performed. The selected alternative, which is a combination of the Distributed Centers of Excellence and Capability-Based Alternatives, has the least cost and lowest risk. Consolidation or transfer of uranium and plutonium operations to other sites (as analyzed in several options under the Distributed and Consolidated Centers of Excellence Alternatives) could result in lower operational costs and other benefits if and when such an alternative were fully implemented. However, movement of any of these three major capabilities to another site poses unacceptable programmatic risks and would cost far more than the selected alternative for an extended period of time. Moving one or more of these capabilities would take years to achieve and might be unsuccessful; in the interim, NNSA would need to build some new facilities at the sites where these capabilities are currently located

[6] The environmental impacts of HEUMF and its alternatives are analyzed in the *Site-wide Environmental Impact Statement for the Y–12 National Security Complex* (DOE/EIS–0309, 2001); NNSA announced its decision to construct and operate HEUMF on March 13, 2002 (67 FR 11296).

[7] In regard to surplus, non-pit, weapons-usable plutonium currently at LLNL, transfer to SRS for storage pending disposition is being undertaken consistent with decisions announced on September 11, 2007, in an Amended ROD (72 FR 51807) based on the *Storage and Disposition of Weapons-Usable Fissile Materials Programmatic EIS.*

simply to maintain those capabilities during the relocation process.

Similarly, the No Action Alternative is unacceptable because it would require NNSA to continue operations in facilities that are outdated, too costly to operate, and not capable of meeting modern environment, health and safety (ES&H) or security standards. These facilities cannot be relied upon much longer, and must be replaced or closed.

Under NNSA's decision, plutonium operations remain at LANL. It will not construct a new pit manufacturing facility such as a CPC or a CNPC because it appears unlikely there will be a need to produce more than 10–80 pits per year in the future and because constructing these facilities would be very expensive. Instead, NNSA will upgrade the existing plutonium facilities at the laboratory and will construct a CMRR–NF.[8] Construction of this facility is a needed modernization of LANL's plutonium capabilities—continued use of the existing CMR facility is inefficient and poses ES&H and security issues that cannot be addressed by modifying the CMR. Uranium operations remain at Y–12, and NNSA will construct a UPF because the existing uranium production facilities are also beyond their useful lives, inefficient, and present ES&H and security issues similar to those at CMR. CMRR–NF and UPF will be safer, seismically robust, and easier to defend from potential terrorist attacks. Their size will support production rates appropriate for a reasonable range of future stockpile sizes, and would not be much smaller if future production rates were much lower than currently anticipated.[9]

[8] NNSA prepared an *Environmental Impact Statement for the Chemistry and Metallurgy Research Building Replacement Project at Los Alamos National Laboratory, Los Alamos, New Mexico* (CMRR EIS) (DOE/EIS–0350). The CMRR EIS evaluates potential impacts of the proposed relocation of analytical chemistry and materials characterization activities and associated R&D to a new CMRR. The proposed CMRR consists of a nuclear facility—CMRR–NF—and a separate radiological laboratory, administrative office, and support building. See also the 2008 *Site-Wide Environmental Impact Statement for Los Alamos National Laboratory* (2008 LANL SWEIS, DOE/EIS–0380). In deciding to construct the CMRR–NF at LANL, NNSA considered the analyses in the CMRR EIS and the 2008 LANL SWEIS, as well as those in the SPEIS.

[9] NNSA evaluated various sizes for facilities analyzed in the SPEIS to determine if smaller facilities should be considered in detail for the Distributed and Consolidated Centers of Excellence Alternatives. NNSA evaluated the programmatic risk, cost effectiveness, and environmental impacts of smaller facilities and concluded that smaller facilities were not reasonable for some of these alternatives (see Section 3.15 of the SPEIS). Smaller facilities were considered for the Capability-Based Alternative.

*Plutonium Operations*

With respect to plutonium manufacturing, NNSA is not making any new decisions regarding production capacity until completion of a new Nuclear Posture Review in 2009 or later. NNSA does not foresee an imminent need to produce more than 20 pits per year to meet national security requirements. This production level was established almost 10 years ago in the ROD (64 FR 50797, Sept. 20, 1999) based on the *Site-wide Environmental Impact Statement for Continued Operation of the Los Alamos National Laboratory* (1999 LANL SWEIS; DOE/EIS–0238). The ROD based on the 2008 LANL SWEIS (DOE/EIS–0380) continued this limit on production (73 FR 55833; Sept. 26, 2008). NNSA will continue design of a CMRR–NF that would support a potential annual production (in LANL's TA–55 facilities) of 20–80 pits. The design activities are sufficiently flexible to account for changing national security requirements that could result from a new Nuclear Posture Review, further changes to the size of stockpile, or future Federal budgets. Furthermore, because NNSA's sensitivity analyses have shown that there is little difference in the size of a facility needed to support production rates between 1 and 80 components per year, the future production capacity is not anticipated to have a significant impact on the size of the CMRR–NF.[10] With a new CMRR–NF providing support, the existing plutonium facility at LANL will have sufficient capability to produce between 1 and 80 pits per year. A new CMRR–NF will also allow NNSA to better support national security missions involving plutonium and other actinides (including, e.g., the plutonium-238 heat source program undertaken for the National Aeronautics and Space Administration (NASA); non-proliferation programs, including the sealed source recovery program; emergency response; nuclear counter-terrorism; nuclear forensics; render safe program (program to disable improvised nuclear devices); material disposition; and nuclear fuel research and development).

*Uranium Operations*

With respect to uranium manufacturing, NNSA will maintain the current capacity in existing facilities at Y–12 as discussed in Section 3.5 of the SPEIS and within the planning basis discussed in Section 3.1.2 of the 2001 *Site-wide Environmental Impact Statement for the Y–12 National Security Complex* (2001 Y–12 SWEIS; DOE/EIS–0309). NNSA is preparing a new SWEIS for Y–12 (*Site-wide Environmental Impact Statement for the Y–12 National Security Complex, Oak Ridge, Tennessee* (Y–12 SWEIS; DOE/EIS–0387)), which will evaluate site-specific issues associated with continued production operations at Y–12, including issues related to construction and operation of a UPF such as its location and size. The Y–12 SWEIS will consider any new information (such as a new Nuclear Posture Review or further changes to the stockpile) that becomes available during the preparation of that document.

[10] *See* note 9 *supra.*

Assembly and Disassembly of Weapons and High Explosives Production

NNSA will continue to conduct these operations at Pantex as announced in the ROD (62 FR 3880; Jan. 27, 1997) for the *Environmental Impact Statement for the Continued Operation of the Pantex Plant and Associated Storage of Nuclear Weapon Components* (DOE/EIS–0225, 1996).

*Production Rates and New Facilities*

While NNSA is not making any new decisions regarding the production rates of plutonium or uranium components, it has decided that a CMRR–NF and UPF are essential to its ability to meet national security requirements regarding the nation's nuclear deterrent. The existing facilities where these operations are now conducted cannot be used much longer and cannot be renovated in a manner that is either affordable or acceptable (from ES&H, security, and production perspectives). As NNSA continues the design and, in the case of a UPF, NEPA analysis of these facilities, it can modify them to reflect changing requirements such as those resulting from a new Nuclear Posture Review, further changes to stockpile size, and future federal budgets. In short, a CMRR–NF and UPF are needed for NNSA to maintain its basic nuclear weapons capabilities because they would replace outdated and deteriorating facilities. These facilities are needed regardless of how many or what types of weapons may be called for in the future.

*National Security Requirements and Stockpile Size*

In making these decisions, NNSA considered its statutory responsibilities to support the nuclear weapons stockpile as determined by the President and the Congress. President Bush's goal is to achieve a credible nuclear deterrent with the lowest possible number of nuclear warheads consistent with

national security needs. In 2002, he and Russia's President Putin signed the Moscow Treaty, under which the United States and Russia will each reduce the number of operationally deployed strategic nuclear weapons to 1,700–2,200 by 2012. In 2004, President Bush issued a directive to cut the entire U.S. stockpile—both deployed and reserve warheads—in half by 2012. This goal was later accelerated and achieved in 2007, five years ahead of schedule. At the end of 2007, the total stockpile was almost 50 percent below what it was in 2001. On December 18, 2007, the White House announced the President's decision to reduce the entire nuclear weapons stockpile by another 15 percent by 2012. This means the U.S. nuclear stockpile will be less than one-quarter its size at the end of the Cold War—the smallest stockpile since the Eisenhower Administration.

NNSA's analyses in the SPEIS are based on current national policy regarding stockpile size (1,700–2,200 operationally deployed strategic nuclear warheads by 2012) with flexibility to respond to future Presidential direction to make further changes in the numbers of weapons. Maintaining a stockpile requires the ability to detect aging effects and other changes in weapons (a surveillance program), the ability to fix identified problems without nuclear testing (the stockpile stewardship program), and the ability to produce replacement components and reassemble weapons (a fully capable set of production facilities).

NNSA understands that at least two major reviews of the requirements for the future nuclear weapons program are expected during the next year. These reviews may influence the size and composition of the future nuclear weapons stockpile, and the nuclear infrastructure required to support that stockpile. First, the Congress has established the Congressional Commission on the Strategic Posture of the United States. This commission is to conduct a review of the strategic posture of the United States, including a strategic threat assessment and a detailed review of nuclear weapons policy, strategy, and force structure. Its recommendations, currently scheduled for completion in the spring of 2009, are expected to address the size and nature of the future nuclear weapons stockpile, and the capabilities required to support that stockpile. Second, Congress has directed the Administration to conduct another Nuclear Posture Review in 2009 to clarify the United States' nuclear deterrence policy and strategy for the near term (i.e., the next 5–10 years). A report on this Nuclear Posture Review is due on December 1, 2009.

NNSA has structured its programs and plans in a manner that allows it to continue transforming the complex and to replace antiquated facilities while retaining the flexibility to respond to evolving national security requirements, which is essential for a truly responsive infrastructure. The decisions in this ROD allow NNSA to continue to rely on LANL facilities (with a new CMRR–NF) to provide maximum flexibility to respond to future changes in plutonium requirements.

*Costs, Technical Risks, and Other Factors*

NNSA prepared detailed business case studies of the programmatic alternatives. These studies are available at *http://www.ComplexTransformationSPEIS.com*. They provide a cost comparison of the alternatives and include costs associated with construction, transition, operations, maintenance, security, decontamination and decommissioning, and other relevant factors.[11] Based on these studies, NNSA determined that the costs through 2030 for the consolidation alternatives would be approximately 20–40 percent greater than for the alternatives that would maintain the three major capabilities—plutonium operations, uranium operations, and A/D/HE operations—at their current sites. Additionally, NNSA's analysis found that, through 2060, the costs for the consolidation alternatives would be greater than those for the alternatives that maintain the three capabilities where they are currently located.

With respect to technical risk, as part of the business case studies, NNSA evaluated five types of risk: (1) Engineering and construction; (2) implementation; (3) program; (4) safety and regulatory; and (5) security. These analyses balance nearer-term risks incurred while transitioning to an alternative with longer-term operational risks. For example, consolidation alternatives would have higher risks during the transition due to the challenges associated with mission relocations, but could have lower long-term operational risks because of reduced safety, regulatory, or security risks. All risk criteria were rated equally (20 percent each); a sensitivity analysis determined that the conclusions were not significantly affected by adjustments of plus or minus five percent in risk rating criteria.

The risk assessment was performed by a group of NNSA and contractor employees who are subject-matter experts, site experts, or both. The least risky options are those where the sites have previous experience with the mission or the nuclear material used in that mission. Alternatives that would locate the plutonium mission at LANL or SRS, the uranium mission at Y–12, and the weapons assembly and disassembly mission at Pantex, were determined to pose the lowest risk. Overall, the consolidation alternatives were judged to have 25–160 percent more technical risk than alternatives that would not consolidate or relocate missions.

With respect to plutonium R&D and manufacturing, the cost and risk analyses showed that keeping this mission at LANL has the least cost and poses the lowest risk. This results primarily from the fact that plutonium facilities are very expensive to construct and LANL has existing facilities, infrastructure, and trained personnel that can be used for this mission.

The CMRR–NF was analyzed in the *Environmental Impact Statement for the Chemistry and Metallurgy Research Building Replacement Project at Los Alamos National Laboratory, Los Alamos, New Mexico* (DOE/EIS–0350, Nov. 2003). The CMRR EIS evaluated potential environmental impacts of the proposed relocation of analytical chemistry and materials characterization activities and associated R&D to a new CMRR. Following completion of that EIS, NNSA announced its decision to construct and operate a CMRR consisting of two main buildings, one of which was the CMRR–NF (69 FR 6967; Feb. 12, 2004). The second building—providing laboratory, administrative, and support functions—currently is under construction at LANL. However, NNSA decided to defer a decision regarding construction and operation of the CMRR–NF until it completed the Complex Transformation SPEIS (see Section 1.5.2.1, Volume 1 of the SPEIS).

Analyses of the potential impacts of constructing and operating the CMRR–NF were updated in the *Site-Wide Environmental Impact Statement for Continued Operation of Los Alamos National Laboratory, Los Alamos, New Mexico* (2008 LANL SWEIS; DOE/EIS–0380, May 2008) as part of the Expanded Operations and the No Action Alternatives. In a ROD based on the 2008 LANL SWEIS, NNSA announced its decision to continue to implement the No Action Alternative with the

[11] The cost analyses considered both life-cycle costs (i.e., the cumulative costs over an approximately 50-year life) and discounted cash flows (i.e., a net present value in which all future costs are reduced by a common factor (generally the cost of capital)).

addition of some elements of the Expanded Operations Alternative. NNSA did not make any decision related to the CMRR–NF. It explained in the SWEIS ROD that it would not make any decisions regarding proposed actions analyzed in the SPEIS prior to completion of the SPEIS (73 FR 55833; Sept. 26, 2008). NNSA considered the analyses in the CMRR EIS and the 2008 LANL SWEIS, as well as those in the SPEIS in deciding to construct the CMRR–NF.

With respect to uranium manufacturing and R&D, the cost analyses indicated that building a UPF at Y–12, eliminating excess space, and shrinking the security area at the site will significantly reduce annual operational costs. The UPF at Y–12 will replace 50-year-old facilities, providing a smaller and modern production capability. It will enable NNSA to consolidate enriched uranium operations from six facilities at Y–12, and to reduce the size of the protected area at that site by as much as 90 percent. A new UPF will also allow NNSA to better support broader national security missions. These missions include providing fuel for Naval Reactors; processing and down-blending incoming HEU from the Global Threat Reduction Initiative; down-blending HEU for domestic and foreign research reactors in support of nonproliferation objectives; providing material for high-temperature fuels for space reactors (NASA); and supporting nuclear counter-terrorism, nuclear forensics, and the render safe program (program to disable improvised nuclear devices).

The life cycle cost analysis predicts an average annual savings over the 50-year facility life of approximately $200 million in FY 2007 dollars. The risk analysis found that moving the uranium mission to a site other than Y–12 would more than double the technical risks. The site-specific impacts for a UPF, including issues such as its location and size, will be analyzed in a new SWEIS for Y–12 that NNSA is currently preparing.

With respect to weapons assembly and disassembly and high explosives production, NNSA's decision to keep that mission at Pantex will result in the least cost and pose the lowest programmatic risk because the facilities necessary to conduct this work safely and economically already exist. Although no further NEPA analysis is required to continue these missions at Pantex, NNSA will continue to evaluate and update site-specific NEPA documentation as required by DOE regulations (10 CFR Part 1021).

With respect to SNM removal from LLNL, transferring Category I/II SNM to other sites and limiting LLNL operations to Category III/IV SNM will achieve a security savings of approximately $30 million per year at LLNL.

*Potential Environmental Impacts*

As described in greater detail in the following paragraphs, NNSA considered potential environmental impacts in making these decisions. It analyzed the potential impacts of each alternative on land use; visual resources; site infrastructure; air quality; noise; geology and soils; surface and groundwater quality; ecological resources; cultural and paleontological resources; socioeconomics; human health impacts; environmental justice; and waste management. NNSA also evaluated the impacts of each alternative as to irreversible or irretrievable commitments of resources, the relationship between short-term uses of the environment and the maintenance and enhancement of long-term productivity, and cumulative impacts. In addition, it evaluated impacts of potential accidents on workers and surrounding populations. The SPEIS includes a classified appendix that assesses the potential environmental impacts of a representative set of credible terrorist scenarios.

The environmental impacts of the alternatives are analyzed in Chapter 5 of the SPEIS. The impacts of the alternatives NNSA has decided to pursue are summarized as follows:

*Land Use*—Minor land disturbance during construction of new facilities (approximately 6.5 acres at LANL for a CMRR–NF and 35 acres at Y–12 for a UPF); less area would be disturbed after construction is complete. At Y–12, construction of a UPF will allow NNSA to reduce the protected area by as much as 90 percent, which will improve security and reduce costs. At all sites, land uses will remain compatible with surrounding areas and with land use plans. At LANL and Y–12, the land required for operations will be less than 1 percent of the sites' total areas.

*Visual Resources*—Changes consistent with currently developed areas, with no changes in the Visual Resource Management classification. All sites will remain industrialized.

*Infrastructure*—Existing infrastructure is adequate to support construction and operating requirements at all sites. During operations, any changes to power requirements would be less than 10 percent of the electrical capacity at each site.

*Air Quality*—During construction, temporary emissions will result, but National Ambient Air Quality Standards will not be exceeded as a result of this construction. Operations will not introduce any significant new emissions and will not exceed any standards.

*Water Resources*—Water use will not change significantly compared to existing use and will remain within the amounts of water available at the NNSA sites. Annual water use at each site will increase by less than 5 percent.

*Biological Resources*—No adverse effects on biota and endangered species. Consultations with the U.S. Fish and Wildlife Service have been completed for the CMRR–NF. Consultations with the Fish and Wildlife Service will be conducted for a UPF during preparation of the Y–12 SWEIS.

*Socioeconomics*—Short-term employment increases at LANL and Y–12 during construction activities. The selected alternatives will have the least disruptive socioeconomic impacts at all sites. At Y–12, the total workforce will be reduced by approximately 750 workers (approximately 11 percent of the site's workforce) after UPF becomes operational. Employment at all other sites will change by less than 1 percent compared to any changes expected under the No Action Alternative.

*Environmental Justice*—No disproportionately high and adverse effects on minority or low-income populations will occur at any affected site; therefore, no environmental justice impacts will occur.

*Health and Safety*—Radiation doses to workers and the public will remain well below regulatory limits at all facilities and at all sites. Doses to the public and workers will cause less than one latent cancer fatality annually at all sites. Conducting future operations in the CMRR–NF and UPF will reduce the dose to workers compared to the doses they receive in existing facilities.

*Accidents*—The risk of industrial accidents is expected to be low during construction of the new facilities. Radiological accident risks will be low (i.e., probabilities of less than one latent cancer fatality) at all sites. The CMRR–NF and a UPF are expected to reduce the probability and impacts of potential accidents.

*Intentional Destructive Acts*—Construction of a UPF and CMRR–NF will provide better protection to the activities conducted in these facilities, as it is generally easier and more cost-effective to protect new facilities because modern security features can be incorporated into their design. Although the results of the intentional destructive acts analyses cannot be disclosed, the following general conclusion can be drawn: The potential consequences of

intentional destructive acts are highly dependent upon distance to the site boundary and size of the surrounding population—the closer and higher the surrounding population, the higher the potential consequences. Removal of SNM from LLNL will reduce the potential impacts of intentional destructive acts at that site.

*Waste Management*—Waste generation will remain within existing and planned management capabilities at all sites. Existing waste management facilities are sufficient to manage these wastes and maintain compliance with regulatory requirements.

*Cumulative Impacts*—The cumulative environmental impacts of the alternatives are analyzed in Chapter 6 of the SPEIS. The impacts of the alternatives when added to past, present, and reasonably foreseeable future actions will be within all regulatory standards and not result in significant new impacts.

**Mitigation Measures**

As described in the SPEIS, NNSA operates in compliance with environmental laws, regulations, and policies within a framework of contractual requirements; many of these requirements mandate actions to control and mitigate potential adverse environmental effects. Examples include site security and threat protection plans, emergency plans, Integrated Safety Management Systems, pollution prevention and waste minimization programs, cultural resource and protected species programs, and energy and water conservation programs (e.g., the Leadership in Energy and Environmental Design (LEED) Program). Any additional site-specific mitigation actions would be identified in site-specific NEPA documents.

**Comments Received on the Final SPEIS Related to the Programmatic Alternatives**

During the 30-day period following the EPA's notice of availability for the Final SPEIS (73 FR 63460; Oct. 24, 2008), NNSA received written comments from the following groups: Alliance for Nuclear Accountability, Project on Government Oversight, National Radical Women, Physicians for Social Responsibility, Oak Ridge Environmental Peace Alliance, Tri-Valley CAREs, the Union of Concerned Scientists, Nuclear Watch New Mexico, the Arms and Security Initiative of the New America Foundation, Concerned Citizens for Nuclear Safety, Embudo Valley Environmental Group, Ecology Ministry, Loretto Community, Aqua es Vida Action Team, Citizens for Alternatives to Radioactive Dumping, and Tewa Women United. Written comments were also received from approximately 30 individuals. The comments NNSA received related to the programmatic alternatives and NNSA's responses follow.

Some commenters substantively reiterated comments that they had provided earlier on the Draft SPEIS, including comments that suggested:

1. NNSA should make no decisions on Complex Transformation until a new Nuclear Posture Review has been completed by the newly elected administration and the report issued by the Congressional Commission on the Strategic Posture of the United States.

*Response:* NNSA believes the SPEIS analysis is consistent with and supports national security requirements and policies. It is unreasonable to assume that nuclear weapons would not be a part of this nation's security requirements over the time period analyzed in the SPEIS and beyond. The range of alternatives analyzed in the SPEIS covers the range of national security requirements that NNSA believes could reasonably evolve from any changes to national policy with regard to the size and number of nuclear weapons in the foreseeable future. Accordingly, there is no reason to delay the decisions announced in this ROD on complex transformation pending a new Nuclear Posture Review or the recommendations of the Bipartisan Panel reevaluating the United States' Nuclear Strategic Posture (see Comment Response 1.C, Volume III, Chapter III of the SPEIS). This ROD fully explains why NNSA is making these programmatic decisions, why it is appropriate to make these decisions at this time, and the flexibility NNSA has to adapt to any changes in national security requirements that may occur in the near term.

2. The United States does not need nuclear weapons or the infrastructure that produces and maintains them and should pursue disarmament consistent with the Nuclear Non-Proliferation Treaty.

*Response:* Decisions on whether the United States should possess nuclear weapons and the type and number of those weapons are made by the President and the Congress. As long as this nation has nuclear weapons, a Complex must exist to ensure their safety, security and reliability. NNSA believes the SPEIS analysis is consistent with and supports national security requirements and policies (see Comment Responses 1.0, 2.K.12, and 3.0, Volume III, Chapter III of the SPEIS).

3. There is no need to produce new pits (or no need for certain production rates).

*Response:* While pits may have extremely long lifetimes and there may ultimately be no need to produce many additional ones, prudence requires that the nation have the capability to produce pits should the need arise. NNSA is not proposing to manufacture any pits unless they are needed to meet national security requirements. A need to produce pits could arise due to the effects of aging on existing pits or changes to our national security policies that could require more pits than the few NNSA is currently manufacturing for stockpile surveillance (see Comment Responses 2.K.16, 2.K.22, and 5.C.1, Volume III, Chapter III of the SPEIS). Until completion of a new Nuclear Posture Review in 2009 or later, the net production at LANL will be limited to a maximum of 20 pits per year.

4. NNSA should undertake further efforts at compliance with Article VI of the Nuclear Non-proliferation Treaty (NPT) (or, Complex Transformation violates this treaty).

*Response:* The United States has made significant progress toward achieving the nuclear disarmament goals set forth in the NPT, and is in compliance with its Article VI obligations. The NPT does not mandate disarmament or specific stockpile reductions by nuclear states, and it does not address actions they take to maintain their stockpiles. NNSA disagrees with the assertion that Complex Transformation violates the NPT (see Comment Response 1.F, Volume III, Chapter III of the SPEIS).

5. NNSA should have included Stockpile Curatorship as a reasonable alternative fully considered in the SPEIS.

*Response:* The Curatorship Alternative as proposed by comments on the Draft SPEIS would have required NNSA to give up the capabilities to design and develop replacement nuclear components and weapons, forcing it to rely solely on the surveillance and non-nuclear testing program to maintain weapons and identify when they need repairs. NNSA believes it is unreasonable to give up these capabilities in light of the uncertainties concerning the aging of weapons and changing national security requirements. As explained in the SPEIS in Section 3.15, this would impair NNSA's ability to assess and, if necessary, address issues regarding the safety, security, and reliability of nuclear weapons (see Comment

Responses 2.H.2, 5.H.2, and 7.O, Volume III, Chapter III of the SPEIS).

6. The transformed complex should not support design or production of new design or modified nuclear weapons.

*Response:* NNSA is required to maintain nuclear weapons capabilities, including the capability to design, develop, produce, and certify new warheads. Maintenance of the capability to certify weapons' safety and reliability requires an inherent capability to design and develop new weapons. NNSA has not been directed to produce newly designed weapons (see Comment Responses 1.B, Volume III, Chapter III of the SPEIS).

7. NNSA should provide additional information on epidemiological studies of radiation health of workers and communities.

*Response:* Many of the workers at DOE's 20 major sites have been studied epidemiologically, some for decades. The National Institute for Occupational Safety and Health continues to update these studies as warranted by public health and scientific considerations. As more powerful epidemiological study designs become available, new studies of these workers may provide better information about health risks associated with radiation exposure (see Comment Responses 14.K.5 and 14.K.6, Volume III, Chapter III of the SPEIS). Many of the epidemiological studies and other related studies are available at *http://cedr.lbl.gov.*

8. NNSA should focus on clean-up of its sites rather than building new facilities to make weapons.

*Response:* DOE has a large remediation program and is aggressively addressing past contamination issues at each of its sites. This program is conducted in accordance with federal and state regulatory requirements and includes administrative and engineered controls to minimize releases, as well as surveillance monitoring of the environment and reporting of exposure assessments. These remediation activities are directed by federal and state regulators, have their own schedule and funding, and are separate from actions proposed in the SPEIS (see Comment Responses 7.J and 9.B, Volume III, Chapter III of the SPEIS). It is inaccurate to suggest that cleanup and transformation are mutually exclusive.

9. NNSA should consolidate special nuclear material from LLNL faster than its current schedule.

*Response:* NNSA has begun the removal of Category I/II SNM from LLNL, and plans to complete it by 2012. NNSA will continue to give this action the high priority requested by the commenter. Safety, security, and logistical issues associated with preparing SNM for shipment; shipping the materials; and storage at the receiving sites determine the schedule for completing this removal (see Comment Response 5.N.4, Volume III, Chapter III of the SPEIS).

10. The modernization of the Kansas City Plant should have been included in the SPEIS.

*Response:* The activities of the Kansas City Plant were not included in the SPEIS because NNSA concluded that decisions regarding the consolidation and modernization of the Kansas City Plant's activities (the production and procurement of electrical and mechanical non-nuclear components) would not affect or limit the programmatic alternatives analyzed in the SPEIS, or the decisions NNSA makes regarding these alternatives (see Comment Response 12.0, Volume III, Chapter III of the SPEIS).

11. The SPEIS is not written in plain language and lacks a clear format.

*Response:* NNSA prepared the SPEIS in accordance with the requirements of NEPA and the DOE and CEQ NEPA regulations. NNSA believes that the SPEIS is clearly written and organized in light of the highly technical subject matter and complex nature of the alternatives (see Comment Response 2.A, Volume III, Chapter III of the SPEIS).

12. NNSA inadequately addressed the environmental impacts of intentional destructive acts. NNSA must disclose the potential impacts of successfully executed credible terrorist attack scenarios at sites in the nuclear weapons complex and make this information available to the public.

*Response:* A classified appendix to the Complex Transformation SPEIS evaluates the potential environmental impacts of credible terrorist attacks that NNSA assumed (for purposes of analysis pursuant to NEPA) were successful at specific existing and proposed facilities. The appendix is classified both because the scenarios evaluated contain classified information and because there is a risk that these scenarios and their potential impacts could be exploited by terrorists or others contemplating harmful acts. Therefore, the SPEIS provides limited information about these acts and their potential consequences (see ''Potential Environmental Impacts'' above and Comment Responses 13.B and 13.D, Volume III, Chapter III of the SPEIS).

13. NNSA failed to consider long-acting consequences of nuclear weapons production, including the impacts that result from every year of operation. NNSA also failed to consider the deployment or potential use of the nation's nuclear arsenal.

*Response:* The SPEIS assesses the direct, indirect, and cumulative environmental impacts of the No Action Alternative and reasonable alternatives for the proposed action. Impacts are assessed for both construction and operations. For operations, the SPEIS focuses on the steady-state impacts of operations. Those annual operational impacts are assumed to occur year-after-year. Now that NNSA has made decisions regarding programmatic alternatives, it may need to prepare additional NEPA documents such as site- or facility-level analyses (e.g., the ongoing Y–12 SWEIS for a UPF now that NNSA has decided to locate it at Y–12) (see Comment Response 11.0, Volume III, Chapter III of the SPEIS). NNSA does not make decisions concerning the size, deployment or potential use of the nation's nuclear arsenal, and therefore the consequences of these decisions are not appropriate for analysis in the SPEIS.

14. NNSA inadequately addressed the cumulative impacts of the alternatives, including a detailed and careful analysis of the cumulative impacts of major nuclear-related facilities in New Mexico. Additionally, Comment Response 14.J.4 incorrectly states that Appendix C and D include information about an analysis of cumulative impacts with an extended region of influence of 100 miles.

*Response:* NNSA addressed potential cumulative impacts resulting from Complex Transformation and ongoing and reasonably anticipated actions of NNSA, other agencies and private developers. In response to public comments, NNSA added a detailed analysis of the cumulative impacts of major nuclear-related facilities in New Mexico. NNSA thinks that analysis is appropriately detailed. The assessment of cumulative impacts is in Chapter 6 of Volume II of the SPEIS (see Comment Responses 2.I and 14.O, Volume III, Chapter III of the SPEIS). With respect to the analysis of cumulative impacts with an extended region of influence of 100 miles, NNSA agrees that the Final SPEIS incorrectly referred the reader to Appendix C and D. NNSA intended to refer the reader to the LANL SWEIS, which shows that extending the region of influence out another 50 miles increases the affected population by 300 percent, while the population dose increases by only 13 percent. NNSA regrets this error.

15. NNSA inadequately addressed Environmental Justice, including a more detailed analysis of transportation impacts and waste disposal.

*Response:* Under Executive Order 12898, NNSA is responsible for identifying and addressing potential disproportionately high and adverse human health and environmental impacts on minority or low-income populations. Based on the SPEIS's analyses, NNSA concluded that there would not be any disproportionately high and adverse human health and environmental impacts on minority or low-income populations. In response to public comments received, NNSA also included information regarding a ''special pathways analysis'' for operations at LANL for the purpose of assessing how impacts would change compared to standard modeling results. The special pathway analysis is identified in Volume II, Chapter 5, Section 5.1.10 of the SPEIS, and the results of that analysis are presented in Comment Response 14.J, Volume III, Chapter III of the SPEIS.

16. NNSA inadequately addressed the impacts associated with design and production of Reliable Replacement Warheads.

*Response:* The continuing transformation of the complex is independent of decisions regarding Reliable Replacement Warheads that the Congress and President may make. At present, the Congress has declined to provide additional funding for development of these warheads (see Comment Responses 2.K.19 and 8.0, Volume III, Chapter III of the SPEIS).

17. NNSA has provided an inadequate basis to decide to locate a UPF at Oak Ridge and there is insufficient information in the SPEIS to select a site for a UPF.

*Response:* Programmatic alternatives regarding a UPF are analyzed in the SPEIS. The SPEIS is the appropriate document to analyze and support programmatic decisions related to major uranium missions and facilities. The Y–12 SWEIS, currently under preparation, will evaluate site-specific issues associated with continued production operations at Y–12, including issues related to construction and operation of a UPF such as its location and size. NNSA will make decisions regarding the specific location and size based on the more detailed analysis that will be in the Y–12 SWEIS (see Comment Response 5.C.2, Volume III, Chapter III of the SPEIS).

18. Commenters said that NNSA should accelerate consolidation of excess SNM and down-blend hundreds of metric tons of excess HEU, which is highly desirable to nuclear terrorists who could use it to quickly and easily create a crude nuclear device.

*Response:* Disposal of excess SNM is addressed by the Material Disposition Program. NNSA has an ongoing program to down-blend HEU for disposition, as described in the ROD (61 FR 40619; August 5, 1996) for the *Disposition of Surplus Highly Enriched Uranium Environmental Impact Statement* (DOE/EIS–0240, 1996). The potential environmental impacts of an intentional destructive act, such as terrorism or sabotage, are addressed in a classified appendix to the SPEIS (see Comment Responses 5.M, 5.N, and 13.0, Volume III, Chapter III of the SPEIS).

19. NNSA should not move forward with the construction of the CMRR–NF at LANL because of problems with NNSA construction projects, the federal government's limited economic resources, and adequate existing space at the LANL PF–4. Another commenter asked why the CMRR–NF is needed.

*Response:* As explained in detail in this ROD, the CMRR–NF is a needed modernization of LANL's plutonium capabilities. Continued use of the existing CMR facility is inefficient and poses ES&H and security concerns that cannot be addressed by modifying the CMR. The CMRR–NF will be safer, seismically robust, and easier to defend from potential terrorist attacks (see Comment Responses 3.0, 5.C.1, 5.C.6, and 9.0, Volume III, Chapter III of the SPEIS).

20. The potential environmental impacts of postulated accidents are not adequately addressed in the SPEIS, including the potential impacts to air, land, and water resulting from postulated accidents.

*Response:* Accidents are addressed in the Health and Safety Sections for each site and include analyses for a full spectrum of accidents with both high and low probabilities (see Comment Response 14.N, Volume III, Chapter III of the SPEIS). The accident analysis focused on human health impacts, which NNSA decided was a reasonable metric for comparing the programmatic alternatives.

21. A new, more thorough, more transparent cost analysis needs to be done before Complex Transformation plans are allowed to proceed.

*Response:* The purpose and need for complex transformation result from NNSA's need for a nuclear weapons complex that can be operated less expensively. NNSA prepared business case analyses to provide cost information on the alternatives considered in the SPEIS. NNSA considered these studies, the analyses in the SPEIS, and other information to make these decisions regarding transforming the complex. The business case analyses are available to the public on the project Web site: *http://www.ComplexTransformationSPEIS.com* (see Comment Response 9.0, Volume III, Chapter III of the SPEIS). NNSA believes these studies are adequate for making programmatic and project-specific decisions.

22. NNSA failed to consider an alternative that truly consolidates the nuclear weapons complex.

*Response:* The SPEIS analyzes alternatives that would make the complex more efficient and responsive than it would be under the No Action Alternative. Consolidation alternatives were formulated with that purpose and need in mind. The SPEIS assesses a range of reasonable alternatives for the future weapons complex that includes alternatives that, if they had been selected, would have eliminated one or more nuclear weapons complex sites (see Comment Responses 7.A.5, 7.A.6, and 7.A.7, Volume III, Chapter III of the SPEIS). As this ROD explains, relocating uranium, plutonium, and A/D/HE capabilities would be too expensive and risky.

23. Complex Transformation endangers human health.

*Response:* New facilities would be designed and operated to minimize risk to both workers and the general public during normal operations and in the event of an accident. Benefiting from decades of experience, NNSA employs modern processes; manufacturing technologies; and safety, environmental, security, and management procedures to protect against adverse health impacts (see Comment Response 14.K, Volume III, Chapter III of the SPEIS).

24. NNSA has not adequately addressed public comments about water usage, radioactive and toxic air emissions, impacts to humans, and impacts to agricultural lands or prime farmlands surrounding LANL resulting from past, current, and future operations of LANL.

*Response:* The environmental impacts of operating LANL are described in Chapter 4, Section 4.1 of Volume 1 of the SPEIS. The analysis examined surrounding land uses, water availability and usage, air quality and airborne emissions, surface and groundwater quality and discharges, human health, waste management, visual resources, noise, and other impacts of operating LANL. Chapter 5, Section 5.1 of Volume II of the SPEIS analyzes the potential environmental impacts of the alternatives evaluated in the SPEIS in the same media areas. See Comment Responses 14.E.11 through 14.E.14, Volume III, Chapter III of the SPEIS. For example, comment response

14.E.11 states that ''due to concern expressed for the quality of agriculture in the LANL region, NMED (New Mexico Environment Department) collects and analyzes foodstuff samples as part of its surveillance program to ensure quality standards are met.'' The 2008 LANL SWEIS (DOE/EIS–0380), and the ROD (73 FR 55833; Sept. 26, 2008) based on the analyses in it, presented NNSA's responses to similar comments in more detail. NNSA based its programmatic decisions affecting LANL on both the SPEIS and the SWEIS.

25. Albuquerque will begin drinking water from the Rio Grande on December 5, 2008. The Albuquerque Water Utility Authority (WUA), which oversees the project, has detected long-lived alpha-emitting radionuclides in the river. Although the levels of these radionuclides are below regulatory concern, the research shows that the current EPA standards for long-lived alpha-emitting radionuclides are not protective of the fetus and the young child. The WUA has asked LANL to reveal the extent of the radiation on the plateau and canyons that contribute to the river to no avail.

*Response:* Water quality and use at LANL are addressed in the SPEIS at Section 4.1.5 of Volume I. Impacts of complex transformation on water resources at LANL are addressed in Section 5.1.5 of Volume II. There is no indication that contamination from LANL is affecting Albuquerque's drinking water supply. According to a 2007 water quality report, gross alpha particle activity, radium-228, radium-226, and uranium were among regulated substances that were monitored but not detected (Albuquerque Bernilillo County Water Utility Authority, 2007 Drinking Water Quality Report). The 2007 water quality report may be accessed at *http://www.abcwua.org/content/view/280/484/* (see Comment Response 14.E, Volume III, Chapter III of the SPEIS).

26. NNSA failed to address comments concerning elevated levels of radionuclides in the Rio Embudo Watershed.

*Response:* The levels of radionuclides from the fallout produced by atmospheric testing of nuclear weapons (e.g., cesium-137, strontium-90, and plutonium-239) are expected to be elevated at Trampas Lake and in the Sangre de Cristo Mountains in which the Embudo Valley lies. The Trampas Lake data agree with expectations for global fallout at this location and are not a result of LANL activities (see Comment Response 14.K.8, Volume III, Chapter III of the SPEIS).

27. Seismic fasteners, ties, and other protections should be used in the construction of the Radiological Laboratory, Utility, and Office Building (RLUOB) within the CMRR project.

*Response:* NNSA is building the RLUOB to the highest applicable seismic standards. Even though the structure is a radiological laboratory and would not normally be constructed to the same standards as a high hazard nuclear facility, NNSA is nevertheless constructing it to those higher standards (see Comment Response 14.K.7, Chapter III, Volume III of the SPEIS).

28. NNSA did not respond to the comment that it must expand air monitoring in downwind communities and should no longer hide under the grandfather clause for air emissions from its old facilities at LANL.

*Response:* Operating permits issued pursuant to Title V of the Clean Air Act at NNSA sites include requirements for monitoring emissions from sources and keeping records concerning those sources and their emissions. Monitoring of the environment in and around NNSA sites generally includes air, water, soil, and foodstuffs, and monitoring results are reported in annual environmental surveillance reports. Chapter 10 of Volume II of the SPEIS describes permits issued by regulatory authorities for NNSA facilities and operations. At LANL, NNSA complies with the Clean Air Act and its emissions are regulated by the New Mexico Environment Department (see Comment Response 14.D.2, Chapter III, Volume III of the SPEIS).

29. Will LANL become the second Waste Isolation Pilot Plant (WIPP) site in New Mexico under the Complex Transformation proposal?

*Response:* This comment concerns the disposal path for newly generated transuranic waste that could result from decisions made on complex transformation. The alternatives analyzed in the SPEIS could generate transuranic waste after WIPP's scheduled closure in 2035. At this time, DOE is not considering any legislative changes to extend WIPP's operation or to develop a second repository for transuranic waste. Any transuranic waste that is generated without a disposal pathway would be safely stored until disposal capacity becomes available (see Comment Response 14.M.4, Chapter III, Volume III of the SPEIS).

30. LANL has failed to install a reliable network of monitoring wells at the laboratory.

*Response:* LANL's groundwater monitoring program was discussed in the 2008 LANL SWEIS. Groundwater monitoring at LANL is conducted in compliance with the ''Order on Consent for Los Alamos National Laboratory'' (Consent Order), and consistent with the Interim Facility-wide Groundwater Monitoring Plan that was approved by the New Mexico Environment Department in June 2006. Some of the groundwater data at LANL are being reassessed due to potential residual drilling fluid effects. Drilling fluid effects are quantitatively assessed in LANL's Well-Screen Analysis Report, Rev. 2 (LA–UR–07–2852; May 2007). Fifty-two percent of the well screens evaluated in this report produce samples that are not significantly impacted by drilling fluids. LANL has initiated a program to better evaluate the wells and to rehabilitate wells that may be producing suspect results. LANL is using the results of a pilot study to develop a proposed course of action for approval by the New Mexico Environment Department. The process is established by and in compliance with the Consent Order (see Comment Responses 14.E.2 and 14.E.1, Chapter III, Volume III of the SPEIS).

31. The existing CMR facility is not safe and the seismic hazards at LANL are uncertain. The commenters assert that many of their specific comments concerning seismic issues at LANL were not properly addressed. The commenters also state that due to seismic risks, all plutonium operations at LANL should immediately cease.

*Response:* Section 4.1.6 of Volume I of the SPEIS addresses seismic issues at LANL and Comment Responses 7.0, 14.F.1, 14.K.12, 14.N.8 and 19.E provide additional information on the seismic issues at LANL and the Justification for Continued Operation under which the laboratory's facilities operate. NNSA decided to construct the CMRR–NF largely because the CMR facility cannot be modified to safely operate for many more years (see the basis for decision for plutonium research and development and operations above).

In addition to the comments that were essentially identical to ones submitted on the Draft SPEIS and to which NNSA responded to in the Final SPEIS, NNSA received the following new comments.

1. Some commenters stated they were unable to identify responses in the Final SPEIS to some of their comments.

*Response:* NNSA reviewed the comments it received to ensure that responses had been included in the Final SPEIS. Based on this review, NNSA concluded that it had provided appropriate responses for all comments and that responses to these commenters' submissions were included in the Final SPEIS.

2. The April 9, 2008, comments of the New Mexico Conference of Catholic Bishops, in a letter signed by Most Rev. Michael J. Sheehan, Archbishop of Santa Fe, and Most Rev. Ricardo Ramirez, CSB, Bishop of Las Cruces, were omitted from the SPEIS's text and compact disc (CD).

*Response:* NNSA does not have any record of receiving the letter identified above prior to issuing the Final SPEIS. However, NNSA contacted the commenter and requested a copy of the letter. That letter raised questions and issues related to: Potential violations of treaties; an international arms race; whether transformation of LANL will result in a more responsive infrastructure; whether the proposed transformation of the complex is based on a Nuclear Posture Review conducted before or after September 11, 2001; the type of Congressional support that has been received; and the costs and funding source for decontamination and decommissioning. NNSA reviewed these comments and concluded that the Final SPEIS addresses each of them.

3. A commenter asserted that the Scarboro community, within 5 miles of the Y–12 facility, is disproportionately impacted, historically and currently, by the pollutants released on the Oak Ridge Reservation. This commenter also urged NNSA to refrain from issuing a ROD for the SPEIS until it commissions and receives an independent study of canned subassembly/secondary reliability, indicating whether a UPF is actually necessary; and until NNSA prepares a supplemental EIS considering the nonproliferation impacts of the proposed action.

*Response:* NNSA conducted its Environmental Justice analysis consistent with the requirements of the applicable Executive Order and related guidance. Section 14.J of Volume III, Chapter III, addresses the Environmental Justice comments received during the comment period. The Scarboro community is identified as the closest developed area to Y–12 (see Volume II, Chapter 4, Section 4.9.2 of the SPEIS). The analysis in the SPEIS did not result in any disproportionately high and adverse impacts on any minority or low-income populations at Y–12 (see Volume II, Chapter 5, Sections 5.9.10, 5.9.11, and 5.9.12 of the SPEIS). The reasons for NNSA's decision to proceed with a UPF are set forth above in the discussion of uranium manufacturing and research and development. Comment Response 1.F, Volume III, Chapter III, addresses the nonproliferation impacts of Complex Transformation.

4. The Comment Response Document does not include several public petitions, including one from members of Santa Clara Pueblo supporting the comments made by the Tribal Council of Santa Clara Pueblo. Another petition circulated by youth in the Espanola Valley by the Community Service Organization del Norte (CSO del Norte) is also omitted. Many of the individual comment letters from people living in the Rio Embudo Watershed are missing as well. There is no listing of the names of these commenters in Tables 1.3–3, 1.3–4, 1.3–5 or 1.3–6. The listing of the ''Campaign Comment Documents'' fails to give any indication of the leaders of the campaigns or any geographic reference, unless one flips through that section of the document.

*Response:* NNSA received approximately 100,000 comment documents on the Draft SPEIS from federal agencies; state, local, and tribal governments; public and private organizations; and individuals. In addition, during the 20 public hearings that NNSA held, more than 600 speakers made oral comments. NNSA made every effort to include all comment documents in the SPEIS and to identify and to address every comment. Because it would be impractical to list the names of all commenters who submitted campaign e-mails, letters, and postcards, those names are provided electronically in the CD version of the SPEIS and on the project Web site (*http://www.ComplexTransformationSPEIS.com*). In addition, the CD contains additional information on the public comment period and includes meeting transcripts and signatories for campaign documents and petitions. With regard to the petition from members of the Santa Clara Pueblo, NNSA believes this petition was submitted as a comment on the 2008 LANL SWEIS and not as a comment on the SPEIS. NNSA responded to the petition in the ROD it issued in September that was based on the SWEIS. If any comment documents or petitions were omitted from the SPEIS, NNSA regrets that.

5. In Comment Response 14.K.11, Chapter III, Volume III of the SPEIS, NNSA, in response to a comment related to under-reported historic radiation emissions, stated that it was ''unaware of any published CDC [Centers for Disease Control and Prevention] study with findings as described by the commenter.'' The commenter had provided a reference to a Los Alamos Historical Document Retrieval and Assessment Project report for documentation of their claim that ''DOE has grossly under-reported historic radiation emissions by nearly 60-fold.''

*Response:* NNSA reviewed the Los Alamos Historical Document Retrieval and Assessment Project report, and NNSA stands by Comment Response 14.K.11, Chapter III, Volume III of the SPEIS, which states that, ''Chapter 4, Section 4.6.1, of the LANL SWEIS (LANL 2008) shows the radiation doses received over the past 10 years from LANL operations by the surrounding population and hypothetical maximally exposed individual (MEI). The annual dose to the hypothetical MEI has consistently been smaller than the annual 10-millirem radiation dose limit established for airborne emissions by the U.S. Environmental Protection Agency. The final LANL Public Health Assessment, by the Agency for Toxic Substances and Disease Registry, reports that ''there is no evidence of contamination from LANL that might be expected to result in ill health to the community,'' and that ''overall, cancer rates in the Los Alamos area are similar to cancer rates found in other communities'' (Agency for Toxic Substances and Disease Registry, *Public Health Assessment, Final, Los Alamos National Laboratory,* 2006).

6. A commenter noted that Comment Response 14.J.4, Chapter III, Volume III, of the SPEIS incorrectly refers the reader to Appendix D for a description of the accident analysis.

*Response:* The reference to Appendix D is incorrect. The correct reference should have been to Appendix C. NNSA regrets the confusion caused by this error.

7. A commenter stated that NNSA made a commitment to refrain from making a siting decision on the UPF until the Y–12 SWEIS is completed.

*Response:* NNSA did not make such a commitment. This ROD explains NNSA's decision to construct a UPF at Y–12 based on the analysis contained in the SPEIS and other factors. This decision is not a decision as to where at Y–12 the new facility would be located or its size. Those decisions will be made based on the more detailed analysis in the Y–12 SWEIS. Additionally, the Y–12 SWEIS will include one or more alternatives that do not include a UPF. The public will have the opportunity to review and comment on the Draft SWEIS when it is prepared.

8. With respect to the new section (Section 6.4) that NNSA added to the Final SPEIS to provide more information on the potential cumulative impacts of nuclear activities in New Mexico, one commenter stated that Pantex should be added to that cumulative assessment because it is just

as close to WIPP and to LANL as WIPP and LANL are to each other. Another commenter stated that the impacts of the WSMR should be included in that assessment.

*Response:* NNSA added Section 6.4 in response to public comments on the Draft SPEIS that requested an analysis of cumulative impacts for the three DOE nuclear Facilities in New Mexico, as well as other major planned or proposed nuclear facilities in the state. In part, these comments stated that the regions of influence for LANL and SNL/NM overlap and that all three DOE sites are along the Rio Grande corridor in New Mexico. NNSA believes that Section 6.4 is adequate and responsive to public comments received regarding the cumulative impact assessment of nuclear activities in New Mexico. As Pantex is not located in New Mexico, and its region of influence does not extend into New Mexico, it was not included in Section 6.4. Also, because the WSMR does not conduct nuclear activities, it was not included in Section 6.4.

9. A commenter stated that the socioeconomic impacts described in the SPEIS are ''incomplete and vague,'' and asked for an explanation regarding the economic multiplier used in the analysis.

*Response:* NNSA reviewed this comment and believes that the socioeconomic analyses contained in the SPEIS are appropriate and comply with NEPA's requirements. The economic multipliers used in the SPEIS vary by location and are consistent with the multipliers estimated by the U.S. Bureau of Labor Statistics and multipliers used in other NEPA documents.

10. The SPEIS failed to address impacts on global warming.

*Response:* The SPEIS assesses the direct, indirect, and cumulative environmental impacts of the No Action Alternative and reasonable alternatives for the proposed action. The assessment of impacts includes, where appropriate, the direct and indirect contributions to the emission of greenhouse gases resulting from operation and transformation of the nuclear weapons complex. As to the programmatic alternatives analyzed in the SPEIS, the direct impacts would result from the construction and operation of major facilities involved in operations using SNM (e.g., a CPC, CNPC, CMRR–NF, UPF), and from the transportation of components, materials and waste. The emissions of carbon dioxide ($CO_2$) from construction and operation of proposed major facilities are estimated in Chapter 5 (see Tables 5.1.4–1 and 5.1.4–3 in Section 5.1.4 of Chapter 5, Volume II of the SPEIS). The potential emissions from transportation are a direct function of numbers of trips and their distances. The significant differences among the various programmatic alternatives as to transportation also appear in Chapter 5 (see Section 5.10 of Chapter 5, Volume II of the SPEIS).

The indirect impacts of the programmatic alternatives would result primarily from the use of electricity that is generated from the mix of generating capacities (gas, coal, nuclear, wind, geothermal, etc.) operated by the utilities NNSA purchases power from; these utilities may alter that mix in the future regardless of the decisions NNSA makes regarding transformation of the complex. The use of electricity under the programmatic alternatives is shown in Chapter 5 (see Tables 5.1.3–1 and 5.1.3–2 in Section 5.1.3 of Chapter 5, Volume II of the SPEIS).

Overall, the release of greenhouse gases from the nuclear weapons complex constitutes a miniscule contribution to the release of these gases in the United States and the world. Overall U.S. greenhouse gas emissions in 2007 totaled about 7,282 million metric tons of $CO_2$ equivalents, including about 6,022 million metric tons of $CO_2$. These emissions resulted primarily from fossil fuel combustion and industrial processes. About 40 percent of $CO_2$ emissions come from the generation of electrical power (Energy Information Administration, ''Emissions of Greenhouse Gases in the United States 2007,'' DOE/EIA–0573 [2007]).

As the impacts of greenhouse gas releases on climate change are inherently cumulative, NNSA, and the DOE as a whole, strive to reduce their contributions to this cumulatively significant impact in making decisions regarding their ongoing and proposed actions. DOE's efforts to reduce emissions of greenhouse gases extend from research on carbon sequestration and new energy efficient technologies to making its own operations more efficient in order to reduce energy consumption and thereby decrease its contributions to greenhouse gases.

NNSA considers the potential cumulative impact of climate change in making decisions regarding its activities, including decisions regarding continuing the transformation of the nuclear weapons complex. Many of these decisions are applicable to the broad array of NNSA's activities, and therefore are independent of decisions regarding complex transformation. For example, NNSA (and other elements of the Department) are entering into energy savings performance contracts at its sites, under which a contractor examines all aspects of a site's operation for ways to improve energy use and efficiency. Also, NNSA seeks to reduce its contribution to climate change through decisions regarding individual actions, such as pursuing LEED certification for its new construction and refurbishment of its aging infrastructure. Examples of these decisions include projects that replace aging boilers and chillers with equipment that is more energy efficient. Such projects are underway at Y–12, SNL/NM, and LANL (''DOE Announces Contracts to Achieve $140 Million in Energy Efficiency Improvements to DOE Facilities,'' August 4, 2008, available at: *http://www.energy.gov/6449.htm*).

NNSA considered its contributions to the cumulative impacts that may lead to climate change in making the programmatic decisions announced in this ROD. These decisions will allow NNSA to reduce its greenhouse gas emissions by consolidating operations, modernizing its heating, cooling and production equipment, and replacing old facilities with ones that are more energy efficient. Many of these actions would not be feasible if NNSA had selected the No Action Alternative, which would have required it to maintain the Complex's outdated infrastructure. Federal regulations and DOE Orders require the Department of Energy to follow energy-efficient and sustainable principles in its siting, design, construction, and operation of new facilities, and in major renovations of existing facilities. These principles, which will apply to construction and operation of a UPF at Y–12 and the CMRR–NF at LANL, as well as to other facilities, include features that conserve energy and reduce greenhouse gas emissions.

Issued at Washington, DC, this 15th day of December 2008.

## DEPARTMENT OF ENERGY

### Record of Decision for the Complex Transformation Supplemental Programmatic Environmental Impact Statement—Tritium Research and Development, Flight Test Operations, and Major Environmental Test Facilities

**AGENCY:** National Nuclear Security Administration, U.S. Department of Energy.

**ACTION:** Record of Decision.

**SUMMARY:** The National Nuclear Security Administration (NNSA), a separately organized agency within the U.S. Department of Energy (DOE), is issuing this Record of Decision (ROD) for the continued transformation of the nuclear weapons complex (Complex). This ROD is based on information and analyses contained in the Complex Transformation Supplemental Programmatic Environmental Impact Statement (SPEIS) (DOE/EIS–0236–S4) issued on October 24, 2008 (73 FR 63460); comments received on the SPEIS; and other factors, including costs, technical and security considerations, and the missions of NNSA. The SPEIS analyzes the potential environmental impacts of alternatives for transforming the nuclear weapons complex into a smaller, more efficient enterprise that can respond to changing national security challenges and ensure the long-term safety, security, and reliability of the nuclear weapons stockpile.

The alternatives analyzed in the SPEIS are divided into two categories: programmatic and project-specific. Programmatic alternatives involve the restructuring of facilities that use or store significant (*i.e.*, Category I/II) quantities of special nuclear material (SNM).[1] These facilities produce plutonium components (commonly called pits [2]), produce highly enriched uranium (HEU) components including secondaries,[3] fabricate high explosives (HE) components and assemble and disassemble nuclear weapons. The decisions announced in this ROD relate to the project-specific alternatives. NNSA is issuing a separate ROD related to the programmatic alternatives.

The project-specific alternatives analyzed in the SPEIS involve the possible restructuring of the following missions involving research and development (R&D) and testing: (1) Tritium R&D; (2) flight test operations; (3) major environmental test facilities (ETFs); (4) high explosives R&D; (5) hydrodynamic testing; and (6) weapons support functions at Sandia National Laboratories/California (SNL/CA). In this ROD, NNSA announces decisions regarding the first three missions.

NNSA has decided to implement the preferred alternatives for these three missions described in the SPEIS and summarized in this ROD. The major elements of the decisions announced in this ROD are:

(1) Consolidate tritium R&D at the Savannah River Site (SRS) in South Carolina;

(2) Conduct flight testing in a campaign mode at Tonopah Test Range (TTR) in Nevada under a reduced footprint permit; and

(3) Consolidate major environmental test facilities at Sandia National Laboratories/New Mexico (SNL/NM).

These decisions will best enable NNSA to meet its statutory missions while minimizing technical risks, risks to mission objectives, costs, and environmental impacts. These decisions continue the transformation begun following the end of the Cold War and the cessation of nuclear weapons testing, particularly decisions announced in the 1996 ROD for the Programmatic Environmental Impact Statement for Stockpile Stewardship and Management (SSM PEIS) (DOE/EIS–0236) (61 FR 68014; Dec. 26, 1996).

NNSA will continue its missions involving high explosives R&D, hydrodynamic testing, and weapons support functions at SNL/CA as described in the No Action Alternative and pursuant to previous NNSA decisions. In other words, NNSA is not making any new decisions regarding these missions at this time.

**FOR FURTHER INFORMATION CONTACT:** For further information on the Complex Transformation SPEIS or this ROD, or to receive copies of these, contact: Ms. Mary E. Martin, NNSA NEPA Compliance Officer, Office of Environmental Projects and Operations, NA–56, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, toll free 1–800–832–0885, ext. 69438. A request for a copy of the document may also be sent by facsimile to 1–703–931–9222, or by e-mail to *complextransformation@nnsa.doe.gov*. The Complex Transformation SPEIS, this ROD, and additional information regarding complex transformation are available on the Internet at *http://www.ComplexTransformationSPEIS.com* and *http://www.nnsa.doe.gov.*

For information on the DOE NEPA process, contact: Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance (GC–20), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, 202–586–4600, or leave a message at 1–800–472–2756. Additional information regarding DOE NEPA activities and access to many DOE NEPA documents are available on the Internet through the DOE NEPA Web site at: *http://www.gc.energy.gov/NEPA.*

**SUPPLEMENTARY INFORMATION:**

## Background

NNSA prepared this ROD pursuant to the regulations of the Council on Environmental Quality (CEQ) for implementing the *National Environmental Policy Act* (NEPA) (40 CFR Parts 1500–1508) and DOE's NEPA Implementing Procedures (10 CFR Part 1021). This ROD is based on information and analyses contained in the *Complex Transformation Supplemental Programmatic Environmental Impact Statement* (DOE/EIS–0236–S4) issued on October 24, 2008 (73 FR 63460); comments received on the SPEIS; other NEPA analyses as noted; and other factors, including cost, technical and security considerations, and the missions of NNSA. NNSA received approximately 100,000 comment documents on the Draft SPEIS from Federal agencies; state, local, and tribal governments; public and private organizations; and individuals. In addition, during the 20 public hearings that NNSA held, more than 600 speakers made oral comments.

National security policies require DOE, through NNSA, to maintain the United States' nuclear weapons stockpile, as well as the nation's core competencies in nuclear weapons. Since completion in 1996 of the SSM PEIS and associated ROD, DOE has pursued these objectives through the Stockpile Stewardship Program. This program emphasizes development and application of greatly improved scientific and technical capabilities to assess the safety, security, and reliability of existing nuclear warheads without nuclear testing. Throughout the 1990s, DOE also took steps to consolidate the Complex to its current configuration of three national laboratories (plus a flight test range operated by Sandia National Laboratories), four industrial plants, and a nuclear test site. This Complex enables NNSA to conduct research on weapons physics, materials science and engineering to design, develop, manufacture, maintain, and repair nuclear weapons; certify their safety,

[1] As defined in section 11 of the *Atomic Energy Act of 1954,* special nuclear material is: (1) plutonium, uranium enriched in the isotope 233 or in the isotope 235 and any other material which the U.S. Nuclear Regulatory Commission determines to be special nuclear material; or (2) any material artificially enriched by any of the foregoing. Special nuclear material is separated into Security Categories I, II, III, and IV based on the type, attractiveness level, and quantity of the material. Categories I and II require the highest level of security.

[2] A pit is the central core of a nuclear weapon, principally made of plutonium or enriched uranium.

[3] A secondary is the component of a nuclear weapon that contains elements needed to initiate the fusion reaction in a thermonuclear explosion.

security, and reliability; conduct surveillance on weapons in the stockpile; store Category I/II SNM; and dismantle and disposition retired weapons. Sites within the Complex and their current missions are described in the following paragraphs.

*Lawrence Livermore National Laboratory (LLNL), Livermore, California*—LLNL conducts research, design, and development of nuclear weapons; designs and tests advanced technology concepts; provides safety, security, and reliability assessments and certification of stockpile weapons; conducts plutonium and tritium R&D, hydrotesting, high explosives (HE) R&D and environmental testing; and stores Category I/II quantities of SNM. LLNL also conducts destructive and nondestructive surveillance evaluations on pits to evaluate their reliability. NNSA is currently removing Category I/II SNM from the site and by 2012 LLNL will not maintain Category I/II SNM. NNSA is constructing the National Ignition Facility (NIF) at LLNL, which will allow a wide variety of high-energy-density investigations. NIF is scheduled to begin operations in 2009.

*Los Alamos National Laboratory (LANL), Los Alamos, New Mexico*—LANL conducts research, design, and development of nuclear weapons; designs and tests advanced technology concepts; provides safety, security, and reliability assessments and certification of stockpile weapons; maintains production capabilities for limited quantities of plutonium components (*i.e.,* pits) for delivery to the stockpile; manufactures nuclear weapon detonators for the stockpile; conducts plutonium and tritium R&D, hydrotesting, HE R&D, and environmental testing; and stores Category I/II quantities of SNM. LANL also conducts destructive and nondestructive surveillance evaluations on pits to assess their reliability.

*Nevada Test Site (NTS), 65 miles northwest of Las Vegas, Nevada*—NTS maintains the capability to conduct underground nuclear testing; conducts high hazard experiments involving nuclear material and high explosives; provides the capability to process and dispose of a damaged nuclear weapon or improvised nuclear device; conducts non-nuclear experiments; conducts hydrodynamic testing and HE testing; conducts research and training on nuclear safeguards, criticality safety, and emergency response; and stores Category I/II quantities of SNM.

*Pantex Plant (Pantex), Amarillo, Texas*—Pantex dismantles retired weapons; fabricates HE components, and performs HE R&D; assembles HE, nuclear, and non-nuclear components into nuclear weapons; repairs and modifies weapons; performs nonintrusive pit modification; [4] and evaluates and performs surveillance of weapons. Pantex stores Category I/II quantities of SNM for the weapons program and stores other SNM in the form of surplus plutonium pits pending transfer to SRS for disposition.

*Sandia National Laboratories (SNL), Albuquerque, New Mexico; Livermore, California; and other locations*—SNL conducts systems engineering of nuclear weapons; conducts research, design, and development of non-nuclear components; manufactures non-nuclear components including neutron generators for the stockpile; provides safety, security, and reliability assessments of stockpile weapons; and conducts HE R&D, tritium R&D, and environmental testing. The principal laboratory is located in Albuquerque, New Mexico (SNL/NM); a division of the laboratory (SNL/CA) is located in Livermore, California. SNL also operates TTR near Tonopah, Nevada, for flight testing of gravity weapons (including R&D and testing of nuclear weapons components and delivery systems). In 2008, SNL/NM completed removal of its Category I/II SNM. SNL/NM no longer stores or uses Category I/II SNM on a permanent basis, although it may use Category I/II SNM for limited activities in the future. No SNM is stored at TTR, although some test operations have involved SNM.

*Savannah River Site (SRS), Aiken, South Carolina*—SRS extracts tritium and performs loading, unloading, and surveillance of tritium reservoirs, and conducts tritium R&D. SRS does not store Category I/II quantities of SNM for NNSA's weapons activities, but does store Category I/II quantities for other DOE activities. SRS is currently receiving Category I/II surplus, non-pit plutonium from LLNL for storage pending its disposition.

The following two sites are part of the Complex but will not be affected by decisions announced in this ROD.

*Kansas City Plant (KCP), Kansas City, Missouri*—KCP manufactures and procures non-nuclear components for nuclear weapons and evaluates and tests these components. KCP has no SNM. The General Services Administration, as the lead agency and NNSA, as a cooperating agency, prepared an Environmental Assessment (DOE/EA–1592, Apr. 2008) regarding the potential environmental impacts of modernizing the facilities and infrastructure for the non-nuclear production activities conducted by the KCP as well as moving these activities to other locations. The agencies issued a Finding of No Significant Impact (73 FR 23244; Apr. 29, 2008) regarding an alternative in the Kansas City area. The SPEIS does not assess alternatives for the activities conducted at the KCP.

*Y–12 National Security Complex (Y–12), Oak Ridge, Tennessee*—Y–12 manufactures uranium components for nuclear weapons, cases, and other nuclear weapons components; evaluates and tests these components; stores Category I/II quantities of HEU; conducts dismantlement, storage, and disposition of HEU; and supplies HEU for use in naval reactors.

**Alternatives Considered and Decisions**

In order to develop the project-specific alternatives to restructure R&D and testing facilities, NNSA identified reasonable actions that would reduce or consolidate activities, eliminate excess facilities, or otherwise make a mission more efficient and cost effective. NNSA assessed the requirements of each mission and methods to meet those requirements while making the weapons complex more secure and efficient. NNSA also developed alternatives that would restructure the facilities where R&D and testing are conducted. In addition to the environmental analyses of the impacts of these alternatives, NNSA completed detailed business case studies of the alternatives, which are available to the public at *http://www.ComplexTransformationSPEIS.com*. NNSA will continue activities in accordance with the No Action Alternative for three of the six project-specific missions: High explosives R&D, hydrodynamic testing, and weapons support functions at SNL/CA. For example, there is a continued need to conduct experiments involving weapons quantities of high explosives combined with plutonium. These experiments will continue in existing facilities at the NTS. For the three other project-specific missions—Tritium R&D, Flight Test Operations, and Major Environmental Test Facilities—NNSA has decided to make changes in them. NNSA's decisions and its bases for these decisions are described in the following paragraphs.

NNSA prepared a classified appendix to the SPEIS that evaluates the potential impacts of intentional destructive acts. Substantive details of terrorist attack scenarios, security countermeasures, and potential impacts are not released to the public because disclosure of this information could be used to plan attacks. Although the results of the

[4] Nonintrusive pit modification is modification to the external surfaces and features of a pit.

analyses were not disclosed in the unclassified SPEIS, the following general conclusion can be disclosed: the potential consequences of intentional destructive acts are highly dependent upon distance to the site boundary and size of the surrounding population—the closer and higher the surrounding population, the greater the potential consequences. In addition, it is generally easier and more cost-effective to protect new facilities, as modern security features can be incorporated into their design. The project-specific activities that are the subject of this ROD are not likely targets for intentional destructive acts, and therefore the decisions NNSA is making regarding these activities would not have significant potential impacts in this regard.

*A. Tritium R&D*

Alternatives Considered

In addition to analyzing the impacts associated with the No Action Alternative that would continue Tritium R&D activities at LLNL, LANL, SRS, and SNL/NM,[5] three other alternatives were evaluated: (1) Consolidate at SRS by moving gas transfer system R&D from LLNL[6] and LANL to SRS; (2) consolidate at LANL by moving gas transfer system R&D from LLNL to LANL; and (3) reduce activities in-place, which would reduce tritium operations at LLNL, LANL and SRS.

Alternatives Considered But Eliminated from Detailed Study

NNSA considered alternatives for tritium R&D other than those described above, but concluded that these alternatives were not reasonable and eliminated them from detailed analysis. As explained in the SPEIS, the following alternatives were considered but eliminated from detailed study: (1) Increasing or decreasing the tritium missions at SNL/NM; (2) consolidating tritium R&D at LLNL; and (3) removing the tritium target loading for NIF from LLNL.

Preferred Alternative

The Final SPEIS identified the preferred alternative for tritium as consolidating R&D at SRS. SRS would remain the site for tritium supply management and provide R&D support to production operations and gas transfer system development. Tritium R&D to support gas transfer system development currently conducted at LLNL and LANL would be consolidated at SRS into the following existing facilities: (1) H-Area New Manufacturing Building; (2) H-Area Old Manufacturing Building; and (3) Building 773–A. No new construction would be necessary to consolidate these missions, although minor upgrades to existing laboratories may be required. NNSA would move bulk quantities of tritium from LANL to SRS by 2009, and remove tritium materials greater than 30 grams from the Weapons Engineering Tritium Facility (WETF) at LANL by 2014. NNSA would then limit the amount of tritium in the WETF to 30 or fewer grams at any one time. This alternative would not affect neutron generator target loading at SNL/NM or R&D for NIF targets, or filling these targets, at LLNL.

Environmental Impacts of Alternatives

The environmental impacts of the alternatives are presented in Section 5.14 of the SPEIS. Under the No Action Alternative there would be no changes to impacts currently experienced. The environmental impacts of consolidating tritium R&D at SRS would be minor: Tritium emissions at SRS would increase by 2.4 percent over current emissions and impacts would remain below regulatory limits; tritium emissions at LANL would decrease by 42 percent compared to current emissions; about 25 jobs would be restructured at LANL and about 25 new jobs would be created at SRS; doses to workers and the public at SRS would remain small and within regulatory limits; and wastes would be managed in existing facilities. Transferring the LLNL's tritium R&D (not NIF tritium work) to SRS or LANL could be accommodated in existing SRS or LANL facilities without any significant changes. Phasing out tritium R&D operations at LLNL would have no significant effects.

Environmentally Preferable Alternative

NEPA's Section 101 (42 U.S.C. 4331) establishes a policy that Federal agencies have a continuing responsibility to improve and coordinate their plans, functions, programs and resources so that, among other goals, the nation may fulfill its responsibilities as a trustee of the environment for succeeding generations. The Council on Environmental Quality, in its ''Forty Most Asked Questions Concerning CEQ's NEPA Regulations'' (46 FR 18026; Mar. 23, 1981), defines the ''environmentally preferable alternative'' as the alternative ''that will promote the national environmental policy expressed in NEPA's Section 101.''

The analyses in the SPEIS of the environmental impacts associated with the tritium R&D alternatives indicated that the preferred alternative—to consolidate tritium R&D at SRS—is environmentally preferable. This alternative would result in minor increases in tritium emissions at SRS and corresponding reductions in emissions at LANL. At SRS, however, the tritium activities would be farther from the site boundary than at LANL, resulting in a smaller radiation dose to the maximally exposed individual (MEI). The reduction in dose to the population around LANL would be about equal to the increase in population dose at SRS. For accidents under the preferred alternative, there would be a lower potential dose to the maximally exposed individual at SRS than at LANL (again, because of the greater distance to the MEI at SRS), but, because of conservative assumptions about distribution of tritium releases among a larger total population, there would be a potentially larger population dose (see Section 5.14.1, Volume II of the SPEIS).

Decision on Tritium Research and Development Facilities

NNSA has decided to implement the preferred alternative to transfer tritium R&D in support of gas transfer system development from LLNL and LANL to SRS. SRS will continue tritium supply management and R&D support for production and gas transfer system filling and handling operations. Neutron generator target loading at SNL/NM and production of NIF targets at LLNL, which involve small quantities of tritium, will continue at those sites. NNSA will remove tritium materials greater than 30 grams from the WETF at LANL by 2014. NNSA would then limit the amount of tritium in this facility to 30 or fewer grams at any one time.

Basis for Decision on Tritium

NNSA decided to consolidate tritium R&D in support of gas transfer system development at SRS and remove tritium materials greater than 30 grams from the WETF at LANL by 2014 because this consolidation is environmentally preferable and furthers NNSA's objective of a smaller, more efficient enterprise that can respond to changing national security requirements. Transferring tritium R&D from LLNL and LANL to SRS allows consolidation of all handling operations involving significant quantities of tritium at one

[5] Tritium Operations at SNL/NM are primarily associated with the Neutron Generator Production Facility, which would be unaffected under all alternatives.

[6] This consolidation does not include R&D for NIF targets and filling these targets. Those operations would remain at LLNL under all alternatives.

site. SRS currently has tritium processing, storage, reservoir loading/unloading, and tritium production R&D missions. SRS also has available facility space to accommodate consolidation of R&D for gas transfer system development, which will allow NNSA to pursue elimination of duplicate capabilities at other sites. Benefits will also result from more integrated operations and attention by SRS personnel to this primary weapons program mission, which will enable NNSA to improve its use of personnel and facilities and to better meet requirements for tritium R&D in the future. This consolidation is possible because of reductions in the stockpile. Much of the tritium facility infrastructure at SRS was built for the much larger stockpile, and it can now be modified and used for capabilities that are currently located at other sites. Eliminating redundant tritium capabilities also enhances a more interdependent enterprise in which personnel from the nuclear weapons complex sites must work more effectively together while sharing facility capabilities at a single site.

NNSA has concluded that the benefits of reduced environmental impacts and of a smaller, more interdependent enterprise outweigh the cost and technical risks of consolidating tritium R&D in support of gas transfer system development at SRS. Although the business case study for tritium R&D (*Tritium R&D Business Case Report*, Oct. 17, 2008) estimated that the cost for consolidating these activities at SRS will be greater than the cost of other alternatives, NNSA believes it can minimize the costs and risks of consolidation through effective transition planning.

There would be increased programmatic risk in making this change if LANL's WETF operations were discontinued prior to establishing the necessary capabilities at SRS. However, the transfer of tritium R&D from LANL to SRS is currently estimated to take up to 5 years and, during this time, NNSA will maintain the WETF in a functional status for experimental purposes to address any unanticipated stockpile issues and to support Life Extension Programs for weapons.[7] NNSA's intention is then to close WETF after its functional status is no longer needed to support transfer of tritium R&D to SRS.

*B. Flight Test Operations for Gravity Weapons*

Alternatives Considered

In addition to analyzing the No Action Alternative, NNSA evaluated four alternatives for conducting flight test operations: (1) High-tech mobile upgrade; (2) operate at TTR in a campaign mode; (3) transfer flight test operations to White Sands Missile Range (WSMR) in New Mexico; and (4) transfer flight test operations to the NTS. The Campaign Mode Alternative has three options: campaign from the NTS, campaign from TTR under the existing land use permit with the U.S. Air Force, and campaign from TTR under a new reduced footprint permit (see Section 3.10.3 of the Final SPEIS for more information).

Under the No Action Alternative, High-Tech Mobile Upgrade Alternative, and Campaign Mode Alternative (all three options), NNSA would continue to conduct flight testing at TTR. There are minor differences in most aspects of these alternatives; however, the major difference would be staffing levels at TTR and the amount of land under NNSA's control.

NNSA also considered two alternatives that would discontinue flight testing at TTR and move the operations to either WSMR or NTS. Both of these alternatives would require construction of a concrete target 500 feet in diameter and 12 inches thick. Under both of these alternatives, NNSA and contractor personnel at TTR would either be transferred or laid off.

NNSA has conducted flight tests at test ranges other than TTR when specific test requirements could not be met at TTR. Under any of the alternatives considered in the SPEIS, NNSA might conduct occasional flight tests at different test ranges consistent with the environmental reviews for those sites.

Alternatives Considered But Eliminated From Detailed Study

NNSA considered flight test ranges operated by the Department of Defense, including Eglin Air Force Base in Florida, the China Lake testing and training range in California, and the Utah Test and Training Range. Each of these sites was determined to be unsuitable, primarily because the soils, underlying geologic formations, or both would make the recovery of deeply buried penetrators infeasible.

Preferred Alternative

The Final SPEIS identified the preferred alternative for flight test operations for gravity weapons as the Campaign Mode Operation of Tonopah Test Range (Option 3—Campaign under Reduced Footprint Permit). Under this alternative, NNSA would reduce the footprint of its activities at TTR, upgrade equipment with mobile capability, and operate in campaign mode. NNSA expects it would not use Category I/II SNM in future flight tests.

Environmental Impacts of Alternatives

The environmental impacts of the alternatives are presented in Section 5.15 of the SPEIS. Under the No Action Alternative there would be no changes to impacts currently experienced and no change to the permitted area at TTR (280 square miles). There would be no significant change in the workforce at TTR and no impacts to regional employment, income, or labor force.

The environmental impacts of the High-Tech Mobile Upgrade Alternative would not differ significantly from the No Action Alternative. This alternative would allow for a reduction in the operational costs of TTR through the introduction of newer, more efficient and technologically advanced equipment. There would be no construction required for this alternative. Annual operating requirements would be the same as for the No Action Alternative and there would be negligible effects to region of influence employment, income, and labor force.

All of the options under the Campaign Mode Alternative would retain flight testing operations at TTR, but would have socioeconomic impacts of varying levels. The reductions in employment would have secondary impacts on the service sector and commercial establishments in the region of influence. Because the flight testing operations would be the same under this alternative as both No Action and High-Tech Mobile Upgrade Alternatives, other environmental impacts would remain about the same. Option 1, Campaign from NTS, would result in the loss of approximately 92 full-time jobs at TTR, reducing the permanent workforce from 135 to 43. Option 2, Campaign under the Existing Land Use Permit, would result in the loss of approximately 57 jobs at TTR. Option 3, Campaign under a Reduced Footprint Permit, would result in the loss of about 70 jobs at TTR. However, for Options 2 and 3, the job loss would be partially offset by the addition of about 20 security guards as the Air Force assumes

[7] The Life Extension Program is an NNSA program that ensures the Nation's aging nuclear weapons are capable of safely and reliably meeting national defense requirements without producing new warheads or conducting nuclear tests. The purpose of this program is to refurbish existing nuclear weapons to extend their life and provide structural enhancements.

responsibility for continued contract site security, reducing the net job loss to approximately 37 and 50 jobs, respectively. In addition to socioeconomic impacts, Option 3 could reduce the area NNSA controls at TTR from 280 square miles to potentially less than 1 square mile. The reduction in footprint would be coordinated with the Air Force, and would not affect ongoing DOE and NNSA environmental restoration activities and responsibilities at TTR resulting from past testing by the Atomic Energy Commission, a predecessor of DOE. This reduction in footprint would not affect land use because the Air Force would continue to use TTR as a test and training range.

Transferring NNSA's flight testing operations from TTR to either WSMR or NTS would result in adverse socioeconomic impacts to the TTR region of influence, particularly the city of Tonopah. About 135 jobs would be lost at TTR and indirect effects on employment would include an additional loss of approximately 108 jobs. The annual impact to the income of the region of influence from both of these employment losses would be approximately $15.9 million ($10.2 million direct and $5.7 million indirect). The adverse socioeconomic impacts would extend to the housing market, schools, and community services.

Environmentally Preferable Alternative

The analyses in the SPEIS of the environmental impacts of the flight testing alternatives revealed that the No Action Alternative is environmentally preferable. This alternative would result in no increase in impacts to resources over the existing condition and would not have the adverse socioeconomic impacts of either the Campaign Mode options or of transferring flight test operations to WSMR or NTS.

Decision on Flight Testing

NNSA has decided to implement a campaign mode of operation at TTR as described in Option 3, Campaign under a Reduced Footprint Permit. NNSA would reduce the footprint of TTR, upgrade equipment with mobile capability, and operate in campaign mode. NNSA expects it would not use Category I/II SNM in future flight tests. Prior to making a decision to use these categories of SNM in future tests, NNSA would evaluate existing NEPA documents to determine if additional analysis would be required.

Basis for Decision on Flight Testing

NNSA decided to implement the preferred alternative, Option 3 of Campaign Mode Operation, because it poses the lowest risk to the mission, which was NNSA's most important consideration in making this decision. As explained in the next paragraph, although the alternative of transferring the program to WSMR would potentially result in lower costs, the significant risks to the execution of this mission do not justify pursuing these possible savings.

The risks to the mission are a result of the high demand for WSMR. WSMR is a national range with many different customers with diverse testing needs, and significant schedule coordination is required each year to meet these needs. An NNSA flight test program at WSMR would be assigned to priority category 4, behind programs such as Global War on Terrorism, major and minor research and development, test and evaluation programs, foreign military sales activities, and those programs that have been designated as documented Force/Activity Designator-1 programs. As a lower priority mission, NNSA's flight test program would not receive scheduling priority, which would pose risks to NNSA's mission it cannot accept. For example, because of the limited availability of nuclear certified aircraft, NNSA must generally accommodate its testing to times when Air Force aircraft are available. The low priority that would be assigned to NNSA flight testing at WSMR could limit NNSA's ability to conduct testing when aircraft become available. A secondary risk at WSMR is the uncertainty regarding the geology of the northern portion of the range and the associated uncertainty concerning NNSA's ability to use vertical recovery tools and techniques.

With respect to costs, NNSA conducted a detailed business case study of the flight testing alternatives (*Independent Business Case Analysis of Complex Transformation Flight Test Facilities Phase II,* Sept. 2008). This study provides a life-cycle cost comparison of the alternatives and includes costs associated with construction, transition, maintenance, operations, security, decontamination and decommissioning, and other activities. Based on this study, NNSA determined that conducting flight testing at TTR in a campaign mode with a reduced footprint would be the least expensive of the alternatives considered except for discontinuing operations at TTR and moving to WSMR.

Although the cost advantage of moving the program to WSMR could be as much as several million dollars annually, this is a small percentage of the total surveillance program budget. It also appears that the savings to the taxpayer might be lost due to the Air Force having to pick up new costs (now paid by NNSA) in order to conduct its programs at TTR. Additionally, potential scheduling delays and conflicts could further reduce or negate these savings.

Implementation of the campaign mode of operation and reduction of NNSA's footprint at TTR will have approximately the same environmental impacts as the No Action Alternative for all resources other than socioeconomics. The loss of about 70 jobs at TTR will have an adverse impact on the economy of the city of Tonopah; however, the impact will be less severe than from discontinuing flight testing at TTR and moving it to WSMR. In addition, as the Air Force would assume overall responsibility for site security, NNSA estimates that the approximately 20 current contractor security guard jobs would be retained.

NNSA recognizes that further planning and NEPA analysis may be required to implement some aspects of this option. The scope of these analyses could include security, facility operations and maintenance, environmental restoration, impact mitigation activities, or other topics, as appropriate. This could result in additional facility closures and demolitions or transfer of specified facilities from the NNSA to another user, such as the Air Force.

*C. Major Environmental Test Facilities*

Alternatives Considered

In addition to the No Action Alternative, NNSA evaluated two other alternatives for major Environmental Test Facilities: (1) Downsize-in-Place and (2) Consolidation of ETF Capabilities at One Site (either NTS or SNL/NM).

Under the No Action Alternative, NNSA would continue to operate redundant and aging ETF facilities at LLNL, LANL, SNL/NM, SNL/CA, and NTS. Only normal maintenance to meet safety and security standards would take place.

Under the Downsize-in-Place Alternative, facilities that are redundant, in need of major repair to enable continued operations, or no longer used, would be closed. This alternative would enable the closure of two facilities at LANL, two at LLNL, four at SNL/NM, and one at SNL/CA.

Under the Consolidation of Major ETF Capabilities at One Site, there are two options. One option would consolidate major ETF capabilities at NTS. This option would close four facilities at LANL, three at LLNL, twenty-one at SNL/NM, and one at SNL/CA. It would also require construction of five new facilities at NTS (an Annular Core Research Reactor-like facility, an Engineering Test Bay, an Aerial Cable Test Facility, a Building 834 Complex, and a sled track) to replace several of the capabilities lost through these closures. The two environmental test facilities at NTS, the Device Assembly Facility (DAF) and the U1a Complex, would remain in operation. The Engineered Test Bay (Building 334) at LLNL and three of the facilities at SNL/NM (considered to be capabilities critical to the continuance of the ETF Program) would remain open until the replacement facilities at NTS were operational.

The second consolidation option would locate major ETF capabilities at SNL/NM. This alternative would close four facilities at LANL, three at LLNL, four at SNL/NM, and one at SNL/CA. Under this option, NNSA would continue operations at DAF and the U1a Complex and at some of the facilities at SNL/NM. For this option, the major ETF activities presently conducted in Building 334 at LLNL and at the Building 834 Complex at LLNL's Site 300 would be transferred to either NTS or Pantex, or new facilities like these buildings would be constructed at SNL/NM.

Alternatives Considered But Eliminated from Detailed Study

No other alternatives were considered for major ETFs.

Preferred Alternative

The Final SPEIS identified the preferred alternative for major environmental testing as consolidating major environmental testing at SNL/NM and, infrequently, conducting operations requiring Category I/II SNM in security campaign mode there. NNSA would close LANL's and LLNL's major environmental testing facilities by 2010 (except those in LLNL Building 334 and the Building 834 Complex). NNSA would move environmental testing of nuclear explosive packages and other functions currently performed in LLNL Buildings 334 and 834 to Pantex by 2012.

Environmental Impacts of Alternatives

The environmental impacts of the alternatives are presented in Section 5.17 of the SPEIS. Under the No Action Alternative there would be no significant changes to impacts currently experienced. There would be no change in the workforce conducting major ETF activities at LANL, LLNL, NTS, SNL/NM, or SNL/CA. Therefore, there would be no impacts to employment, income, or the labor force in the regions of influence.

The Downsize-in-Place Alternative would close two facilities at LANL, two at LLNL, four at SNL/NM, and one at SNL/CA, reducing the existing floor space (about 558,000 square feet) by approximately 10 percent. Closing buildings could result in a reduction in the use of electricity and other energy sources, and would eliminate any emissions from operations. Although closing these facilities would generate wastes, sufficient management capacity exists for these wastes, and no major impacts are expected. There would be fewer than 20 jobs lost at any site.

The alternative of consolidating major ETF capabilities at NTS would result in closing four facilities at LANL, three at LLNL, 21 at SNL/NM, and one at SNL/CA, reducing the existing floor space by nearly 95 percent (a reduction of approximately 537,000 square feet). Although closing these facilities would generate wastes, sufficient management capacity exists for these wastes, and no major impacts are expected. Approximately 30 jobs at LANL, six at LLNL (including SNL/CA), and 224 at SNL/NM would be lost. This option would also require construction of new facilities at NTS to replace some capabilities lost through closures at other sites. Although this would disturb approximately 25 acres of land, less than 1 percent of available land at NTS would be affected. In addition, closing major test facilities at other sites would reduce energy demands and emissions associated with operation of those facilities.

The alternative of consolidating major ETF capabilities at SNL/NM would result in closing four facilities at LANL, three at LLNL, four at SNL/NM, and one at SNL/CA, reducing the existing floor space by nearly 25 percent (a reduction of approximately 133,000 square feet). Although closing these facilities would generate wastes, sufficient management capacity exists for these wastes, and no major impacts are expected. Approximately 30 jobs at LANL, 6 at LLNL (including SNL/CA) and 16 at SNL/NM would be lost. This option would also require the construction of new facilities at SNL/NM to replace some capabilities lost through closures at other sites. Although this would disturb approximately 2.5 acres of land, less than 1 percent of available land at SNL/NM would be affected.

The major ETF functions currently performed in Building 334 at LLNL and the Building 834 Complex at LLNL's Site 300 would be moved to Pantex and located in an existing building or the proposed Weapons Surveillance Facility. This would require removal of equipment from Building 334 and from the Building 834 Complex and the installation at Pantex of a measurement tower, a sealed source storage pit, and a five-ton bridge crane. This installation would require modification to only one building at Pantex; no new construction would be required. These changes would result in the addition of two jobs at Pantex. Operations would not be expected to generate additional waste other than normal office refuse, and waste associated with occasional use of solvents and cleaning fluids, and would not use additional water other than the sanitary and personal usage of the two additional employees.

Environmentally Preferable Alternative

The analyses in the SPEIS of the environmental impacts associated with the alternatives revealed that the No Action Alternative is environmentally preferable. This alternative would result in no increase in impacts to resources and would not produce any adverse socioeconomic impacts at LANL, LLNL, NTS, SNL/NM, or SNL/CA.

Decisions on Major Environmental Test Facilities

NNSA has decided to implement the preferred alternative to consolidate major ETF capabilities at SNL/NM and conduct infrequent operations requiring Category I/II SNM in a security campaign mode. NNSA will close four facilities at LANL (K Site Environmental Test Facility, Weapons Component Test Facility, Pulse Intense X-Ray (PIXY) with Sled Track, and Thermo-Conditioning Facility), three at LLNL (Engineered Building 834 Complex, Dynamic Testing Facility (836 Complex), and Building 334), four at SNL/NM (Sandia Pulsed Reactor Facility,[8] Low Dose Rate Gamma Irradiation Facility, Auxiliary Hot Cell Facility, and Centrifuge Complex), and one at SNL/CA (Environmental Test Complex). In addition, activities presently conducted in Building 334 at LLNL and at Building 834 Complex at LLNL's Site 300 will be transferred to Pantex and placed either in existing buildings or in the proposed Weapons Surveillance Facility. Any new

[8] The reactor itself has already been moved to NTS.

construction would be subject to appropriate NEPA review.

Basis for Decision on Major Environmental Test Facilities

NNSA's decision to consolidate major ETF capabilities at SNL/NM is the least costly alternative and poses no greater technical risk than other alternatives; cost and technical risk were the most important considerations in making this decision. Because the majority of the ETF capabilities currently exist at SNL/NM, consolidating these capabilities there will require the least construction and will have the lowest cost of the consolidation alternatives. Considering life-cycle costs through the year 2060, this alternative is also the least costly, although the business case study showed only minor cost differences among the alternatives. All alternatives analyzed were found to pose some technical risk; however, no significant differences were found among the alternatives. For the alternatives involving consolidation at SNL/NM or NTS, the major risk was the potential delay in constructing a new facility to house the Building 334 and Building 834 missions. For these missions, consolidation into an existing building at Pantex has the lowest cost, poses the smallest risk, and produces the least environmental impacts.

Considering potential environmental impacts, cost, technical risk and schedule, the alternative of consolidating major ETF capabilities at SNL/NM, and moving the activities conducted at Building 334 and Building 834 to Pantex, is the best alternative.

Mitigation Measures

As described in the SPEIS, NNSA conducts its missions in compliance with environmental laws, regulations, and policies within a framework of contractual requirements; many of these requirements mandate actions to control and mitigate potential adverse environmental effects. Examples include the site environment, safety, and health manuals, site security and threat protection plans, emergency plans, Integrated Safety Management Systems, pollution prevention and waste minimization programs, cultural resource and protected species programs, and energy and water conservation programs.

**Comments Received on Final SPEIS Related to the Project-Specific Alternatives**

During the 30-day period following the EPA's notice of availability for the Final SPEIS (73 FR 63460, Oct. 24, 2008), NNSA received written comments from the following groups: Alliance for Nuclear Accountability, Project on Government Oversight, National Radical Women, Physicians for Social Responsibility, Oak Ridge Environmental Peace Alliance, Tri-Valley CAREs, the Union of Concerned Scientists, Nuclear Watch New Mexico, the Arms and Security Initiative of the New America Foundation, Concerned Citizens for Nuclear Safety, Embudo Valley Environmental Group, Ecology Ministry, Loretto Community, Aqua es Vida Action Team, Citizens for Alternatives to Radioactive Dumping, and Tewa Women United. Written comments were also received from approximately 30 individuals. The majority of these comments, which focused primarily on policy and programmatic issues, are considered by NNSA in the ROD for the programmatic decisions. NNSA did receive comments related to two issues regarding the project-specific alternatives, though neither has bearing on any of the three missions that this ROD concerns. These project-specific comments and NNSA's responses follow.

1. Referring to the Preferred Alternative for Major Hydrodynamic Testing as described in the Final SPEIS (Section 3.17.2, Volume I), one commenter stated that containing hydrodynamic testing at LLNL in the Contained Firing Facility by the end of fiscal year (FY) 2008 implies that open-air detonation experiments would cease at LLNL's Site 300 by the end of FY 2008. The commenter points out that the Preferred Alternative also states that hydrodynamic testing at Site 300 would be consolidated to a smaller footprint by 2015. The commenter then states that since many of the hydrodynamic testing facilities at Site 300 are open-air firing tables, it is not clear whether open-air detonations would continue at LLNL Site 300 facilities until 2015, or potentially a later date. If NNSA plans to cease open-air detonation experiments at Site 300, either by the end of FY 2008 or in 2015, it should express this determination in unequivocal language. Another commenter stated that all open air tests must be contained and questioned the meaning of the following sentence in the Final SPEIS: ''Open-air hydrotests at LANL's DARHT [Dual-Axis Radiographic Hydrodynamic Test facility], excluding SNM, would only occur if needed to meet national security requirements.'' (See Section S.3.17.2, Summary.) The commenter specifically asked what the phrase ''if needed'' means and asked who would make this decision.

*Response:* As stated in this ROD, NNSA is not making any new decisions regarding hydrodynamic testing activities at this time. These activities will continue as described in the No Action Alternative and pursuant to previous decisions. If NNSA decides to make significant changes to hydrodynamic testing, it would issue a ROD to announce and explain the new decision.

2. In reference to the Preferred Alternative for HE R&D as described in the Final SPEIS (Section S.3.17.2 of the Summary), one commenter stated that a schedule that defines when LANL would arrive at contained HE R&D experimentation must be given. Just stating that LANL will ''move towards'' contained HE R&D experimentation is meaningless and will continue to impose environmental impacts on the public.

*Response:* As stated in this ROD, NNSA is not making any new decisions regarding HE R&D activities at this time. These activities will continue as described in the No Action Alternative and pursuant to previous decisions. If NNSA decides to make significant changes to HE R&D activities, it would issue a ROD to announce and explain the new decision.

Issued at Washington, DC, this 15th day of December 2008.

b. *Project No.:* 1256–029.

c. *Dated Filed:* October 16, 2008.

d. *Submitted By:* Loup River Public Power District (Loup Power District).

e. *Name of Project:* Loup River Hydroelectric Project No. 1256.

f. *Location:* The Loup River Hydroelectric Project is located on the Loup River in Nance and Platte Counties, Nebraska.

g. *Filed Pursuant to:* 18 CFR Part 5 of the Commission's Regulations.

h. *Potential Applicant Contact:* Neal Suess, President/CEO, Loup Power District, P.O. Box 988, 2404 15th Street, Columbus, Nebraska 68602 (866) 869–2087.

i. *FERC Contact:* Kim Nguyen (202) 502–6015 or via e-mail at *kim.nguyen@ferc.gov*.

j. Loup Power District filed Pre-Application Document (PAD) for the Loup River Project, including proposed process plan and schedule, with the Commission pursuant to 18 CFR 5.6 of the Commission's regulations.

k. Copies of the PAD and Scoping Document 1 (SD1) are available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCONlineSupport@ferc.gov* or toll free at 1–866–208–3676, or for TTY, (202) 502–8659. A copy is also available for inspection and reproduction at the address in paragraph h.

Register online at *http://ferc.gov/esubscribenow.htm* to be notified via e-mail of new filings and issuances related to these or other pending projects. For assistance, contact FERC Online Support.

l. With this notice, we are soliciting comments on SD1. All comments on SD1 should be sent to the address above in paragraph h. In addition, all comments on the PAD and SD1, study requests, requests for cooperating agency status, and all communications to Commission staff related to the merits of the potential applications (original and eight copies) must be filed with the Commission at the following address: Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. All filings with the Commission relevant to the Loup River Hydroelectric Project must include on the first page, the project name (Loup River Project), and number (P–1256–029), and bear the heading, as appropriate, ''Comments on Scoping Document 1.'' Any individual or entity interested in commenting on SD1 must do so by February 10, 2009.

Comments on SD1 and other permissible forms of communications with the Commission may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (*http://www.ferc.gov*) under the ''e-filing'' link.

m. At this time, Commission staff intends to prepare a single Environmental Assessment for the project, in accordance with the National Environmental Policy Act.

**Scoping Meetings**

We will hold two scoping meetings for each project at the times and places noted below. The daytime meetings will focus on resource agency, Indian tribes, and non-governmental organization concerns, while the evening meetings are primarily for receiving input from the public. We invite all interested individuals, organizations, Indian tribes, and agencies to attend one or all of the meetings, and to assist staff in identifying particular study needs, as well as the scope of environmental issues to be addressed in the environmental document. The times and locations of these meetings are as follows:

*Daytime Scoping Meeting*

*Date:* Tuesday, January 13, 2009.
*Time:* 9 a.m.
*Location:* Holiday Inn Express, 524 E. 23rd Street, Columbus, Nebraska 68601, (402) 564–2566.

*Evening Scoping Meeting*

*Date:* Monday, January 12, 2009.
*Time:* 7 p.m.
*Location:* same as daytime meeting.

SD1, which outlines the subject areas to be addressed in the environmental document, has been mailed to the individuals and entities on the Commission's mailing list. Copies of SD1 will be available at the scoping meetings, or may be viewed on the Web at *http://www.ferc.gov*, using the ''eLibrary'' link. Follow the directions for accessing information in paragraph k. Depending on the extent of comments received, a Scoping Document 2 (SD2) may or may not be issued.

**Site Visits**

The Loup Power District and Commission staff will conduct a site visit of the key project facilities on Monday, January 12, 2009, starting at 9 a.m. Those wishing to participate should meet at 8:45 a.m. at: Loup Power District Main Office, 2404 15th Street, Columbus, Nebraska 68602.

To appropriately accommodate persons interested in attending the site visit, participants should contact Ron Ziola at (402) 564–3171 or e-mail *rziola@loup.com* by January 5, 2009. The Loup Power District will provide transportation from their Main Office to the project site and lunch for the site visit. Participants should dress appropriately for outdoor, winter elements. In the event of inclement weather, participants can check the Loup Power District's Relicensing Hotline at (866) 869–2087 for updates on the site visit.

**Scoping Meeting Objectives**

At the scoping meetings, staff will: (1) Present the proposed list of issues to be addressed in the EA; (2) review and discuss existing conditions and resource agency management objectives; (3) review and discuss existing information and identify preliminary information and study needs;

(4) review and discuss the process plan and schedule for pre-filing activity that incorporates the time frames provided for in Part 5 of the Commission's regulations and, to the extent possible, maximizes coordination of federal, state, and tribal permitting and certification processes; and (5) discuss requests by any federal or state agency or Indian tribe acting as a cooperating agency for development of an environmental document.

Meeting participants should come prepared to discuss their issues and/or concerns. Please review the Pre-Application Document in preparation for the scoping meetings. Directions on how to obtain a copy of the PAD and SD1 are included in item k of this notice.

**Scoping Meeting Procedures**

The scoping meetings will be recorded by a stenographer and will become part of the formal Commission records for the projects.

n. A notice of intent to file license application, filing PAD, solicitation of comments on the PAD and SD1, solicitation of study requests, and commencement of proceedings will be issued by December 19, 2008, setting the date for filing comments on the PAD and study requests in accordance with Commission regulations and the proposed process plan.

**[Docket Nos. PA08–6–000; EL05–102–000; EL05–104–000; ER03–713–000]**

## Southern Company Services Inc., Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, Southern Power Company; Notice of Audit Report Issuance and Invitation To Comment

December 12, 2008.

On October 5, 2006, the Commission issued an Order on Settlement (Settlement Order) accepting in part and rejecting in part an Offer of Settlement (Settlement Offer) submitted by the settling parties [1] in Docket No. EL05–102–000, *et al.*[2] The Settlement Order required numerous modifications to the Settlement Offer intended to provide immediate benefits to consumers and competitors that operate in the Southern region.

The Settlement Order also directed the Office of Enforcement to conduct an audit of the Southern Operating Companies (Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Southern Power Company (Southern Power)) to: (1) ensure that the Southern Operating Companies are fully complying with all the conditions set forth in the Settlement Order, and (2) determine whether the conditions imposed there were sufficient to address any remaining opportunities for affiliate abuse under the Intercompany Interchange Contract (IIC) related to Southern Power.[3]

In the Settlement Order, the Commission advised that it will notice the audit report for comment and, after considering the comments on it, determine what, if any, further action is appropriate.[4] The Commission added that if affiliate abuse concerns remain, it would either set such concerns for hearing or require further changes immediately.[5] The Office of Enforcement has recently completed its audit report. A copy of the report is attached to this Notice.

All interested persons desiring to comment on what, if any, further action is appropriate on the matters addressed by the audit report, including the IIC and remaining opportunities for affiliate abuse, may file written comments on or before January 12, 2009. After reviewing these comments, the Commission will determine whether further action is appropriate.

The Commission encourages electronic submission of comments in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the comments to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

*Comment Date:* 5 pm Eastern Time on January 12, 2009.

**Table of Contents**

### I. Executive Summary

#### *A. Overview*

On October 5, 2006, the Commission issued an Order on Settlement (Settlement Order) accepting in part and rejecting in part an Offer of Settlement (Settlement Offer) submitted by the settling parties [6] in Docket No. EL05–102–000, *et al.*[7] The Settlement Order required numerous modifications intended to provide immediate benefits to consumers and competitors that operate in the Southern region. The Settlement Order also directed the Division of Audits (DA) within the Office of Enforcement (OE) to conduct an audit of the Southern Operating Companies (Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Southern Power Company (Southern Power)) to: (1) Ensure that the Southern Operating Companies are fully complying with all the conditions set forth in the order, and (2) determine whether the conditions imposed therein were sufficient to address any remaining opportunities for affiliate abuse under the Intercompany Interchange Contract (IIC) related to Southern Power.

The Southern Operating Companies made a compliance filing on November 6, 2006, notifying the Commission that they had implemented the modifications required by the Settlement Order. The Southern Operating Companies also provided a projected implementation schedule reflecting the compliance efforts to date and a seven-month timeline to complete the remaining compliance milestones. The Commission accepted the compliance filing on April 19, 2007 (Acceptance Order), subject to further modifications to the IIC, Separation of Functions and Communications Protocol (Separation Protocol), and Generator Support Service Tariff (GSS Tariff).[8] The Commission required the Southern Operating Companies to fully implement all the compliance efforts included in its implementation schedule within seven months from the issuance of the Acceptance Order. The Commission also directed OE to monitor the Southern Operating Companies' implementation progress and, once the implementation is complete, to commence its audit and finish the audit within 12 months. The Southern Operating Companies completed the implementation on November 16, 2007, and filed a Notice of Completion with

[1] Southern Company Services, Inc. (acting for itself and as agent for Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, Savannah Electric and Power Company, and Southern Power Company, collectively Southern Company), Calpine Corporation, Coral Power, LLC, and the Board of Water, Light and Sinking Fund Commissioners of the City of Dalton (collectively the settling parties).

[2] *Southern Company Services, Inc.,* 117 FERC ¶ 61,021 (2006).

[3] Settlement Order at P 60.

[4] *Id.*

[5] *Id.*

[6] Southern Company Services, Inc. (acting for itself and as agent for Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, Savannah Electric and Power Company, and Southern Power Company, collectively Southern Company), Calpine Corporation, Coral Power, LLC, and the Board of Water, Light and Sinking Fund Commissioners of the City of Dalton (collectively the settling parties).

[7] Southern Company Services, Inc., 117 FERC ¶ 61,021 (2006).

[8] Southern Company Services, Inc., 119 FERC ¶ 61,065 (2007).

the Commission. The Commission accepted the Southern Operating Companies' Notice of Completion on January 11, 2008.[9] OE commenced the audit of the Southern Operating Companies on November 19, 2007.

OE has completed its audit of the Southern Operating Companies. The audit examined whether the Southern Operating Companies are fully complying with the modifications the Commission set forth in the Settlement and Acceptance Orders and whether the conditions imposed therein are sufficient to address any remaining opportunities for affiliate abuse under the IIC related to Southern Power. The audit covered the period from November 19, 2007 through August 29, 2008.

Audit staff concluded that the Southern Operating Companies properly implemented the modifications and generally complied with the conditions imposed by the Commission in the Settlement and Acceptance Orders. However, audit staff determined that Southern Company should implement additional corrective actions to prevent the potential for Southern Power employees to access non-public market information. Moreover, Southern Company should follow the Commission's and its company's policies for posting non-public market information on its Open Access Same-Time Information System (OASIS). OE's audit findings and recommendations are summarized below in sections D and E of this audit report (report), and discussed comprehensively in section IV of this report.

Audit staff's conclusions are based on evidence obtained through 85 employee interviews, four face-to-face meetings, weekly phone conferences, four site visits, facility inspections, extensive data inquiries and examinations, and review of approximately 7,000 e-mails and 2,800 voice recordings.

*B. Southern Company*

Southern Company is an electric utility holding company and the parent company of the Southern Operating Companies, Southern Company Services, Inc., and other direct and indirect subsidiaries. The primary business of Southern Company is the supply and sale of electricity in the Southeast region of the United States. Southern Power, a wholesale energy provider, constructs, acquires, and manages generation assets in the wholesale market, where it sells electricity at market-based rates. Southern Power is the large wholesale energy provider in the Southeast, owning and operating more than 6,500 megawatts of generating assets. The other Southern Operating Companies are vertically integrated utilities that provide electric service in the states of Alabama, Georgia, Florida, and Mississippi.

Southern Company Services, Inc. is a centralized service company which provides various services, at cost, to the Southern Operating Companies and its subsidiaries. For example, Southern Company Services, Inc. acts as agent to the Southern Operating Companies for administering and carrying out the operational activities under the IIC and for the sale of wholesale power at market-based rates. Southern Company Services, Inc. also acts as agent to the Southern Operating Companies for providing transmission service under Southern Company's OATT. Further, Southern Company Services, Inc. enters into gas purchase and sales agreements, and transportation and storage contracts, as agent on behalf of the Southern Operating Companies.

The Southern Operating Companies function as an integrated public utility system through the joint commitment and economic dispatch of their generating resources to meet their collective load obligations. The integrated operation of their respective electric generating facilities and system operations (generally referred to as the pool) is governed by the IIC, which is a rate schedule on file with the Commission pursuant to the Federal Power Act.[10] The IIC provides for the coordinated and integrated operation of the generating facilities and resources owned, contractually controlled, and operated by the Southern Operating Companies, as well as the pooling of surplus energy for short-term wholesale energy sale opportunities. In essence, the IIC: (1) Specifies the types of transactions involved in system operations; (2) provides for the sharing of the benefits and burdens associated with the operation of facilities that are used for the mutual benefit of the Southern Operating Companies; and (3) provides guidance for pool operations. Southern Company Services, Inc. operates the pool in accordance with the IIC using a centralized economic dispatch model to serve the obligations of the Southern Operating Companies with the lowest cost resources while at the same time reliably operating the interconnected system. Any energy generated in excess of these obligations becomes available to the pool for making short-term wholesale energy sales to third parties on behalf of the Southern Operating Companies. Southern Company Services, Inc. is responsible for billing the Southern Operating Companies for transactions and services under the IIC on a monthly basis.

The Southern Operating Companies also make wholesale sales at market-based rates, pursuant to market-based rate tariffs, which include a code of conduct and a Separation Protocol. The code of conduct provides important protections concerning the business relationship amongst the Southern Operating Companies and marketing affiliates with market-based rate authority. The Separation Protocol places protections between Southern Power and the other Southern Operating Companies in the codes of conduct. Specifically, the Separation Protocol requires the functional separation of the wholesale activities that Southern Power carries out for the sole benefit of its shareholders from the activities of the other Southern Operating Companies. Further, the Separation Protocol allows Southern Power to use employees of Southern Company Services, Inc. or any other affiliate as long as those employees are dedicated exclusively to Southern Power. Southern Power is also permitted to use shared support employees as long as it does so consistent with the independent functioning requirements of the Standards of Conduct.[11] In addition, the Separation Protocol contains other restrictions designed to protect against Southern Power's physical and electronic access to non-public market information, receiving preferential treatment with regard to the purchase or sale of transmission service or electric energy, and abuses related to the purchase or the sale of non-power goods and services.

*C. Summary of Commission Proceedings in Docket No. EL05–102 et al.*

Southern Power is a wholly-owned subsidiary of Southern Company and affiliate of the other Southern Operating Companies. Southern Power is a competitive generation provider that does not have a franchised obligation to serve at retail. In this capacity, it raises several regulatory concerns, which were described by the Commission in the Settlement Order. As the Commission explained therein, when a competitive affiliate is a member of a power pool with its regulated operating company

[9] *Southern Company Services, Inc.,* Docket Nos. EL05–102–005 and EL05–102–006 (January 11, 2008) (unpublished letter order).

[10] Second Revised Rate Schedule FERC Number 138.

[11] 18 CFR 358.4(a)(5)(2008).

affiliates, an incentive exists for the regulated affiliates to subsidize the sales of the competitive affiliate to benefit their mutual shareholders.[12] Second, when Southern Power sells power to other Southern Operating Companies, there is a concern that the competitive affiliate not be granted an undue preference.[13] When the competitive affiliate sells to a regulated affiliate, the Commission's concern is that the price not be set too high.[14] Conversely, when the regulated affiliate sells to a competitive affiliate, the Commission's principal concern is that the price not be set too low.[15] When sales are made to third parties, the Commission's principal concern is that the regulated Southern Operating Companies continue to compete for such sales rather than favoring sales by Southern Power.[16] Finally, the Commission expressed concerns that the integration of the companies created by the pool could lead to potential violations of the Standards of Conduct and hence the obligation to provide transmission service on a nondiscriminatory basis.[17] Together, these concerns form the basis for the conditions and modifications the Commission imposed on Southern Company that is the subject of this audit.

The proceeding in Docket No. EL05–102–000 began on May 5, 2005, when the Commission instituted an investigation to determine whether the role of Southern Power in Southern Company's pool continued to be appropriate and consistent with the Commission's regulations and precedents regarding affiliate abuse.[18] Specifically, the Commission set for hearing the following issues: (1) The justness and reasonableness of the IIC, including the justness and reasonableness of Southern Power's inclusion in the pool and whether such inclusion involves undue preference and undue discrimination that adversely affected wholesale competition and wholesale customers in the Southeast; (2) whether any of the Southern Operating Companies had violated or were violating the Commission's Standards of Conduct which were in effect at the time; and (3) whether the Southern Operating Companies' Code of Conduct was just and reasonable and whether the Code of Conduct should continue to define Southern Power as a ''system company.''

On April 11, 2006, Southern Company Services, Inc., on behalf of the Southern Operating Companies, filed the Settlement Offer to resolve the regulatory proceedings in Docket No. EL05–102 and other related proceedings. The purpose of the Settlement Offer was to resolve all allegations that the IIC and certain other aspects of the Southern Operating Companies' structure and operations provided Southern Power with an undue preference over non-affiliated power suppliers. The Settlement Offer also encompassed other measures that the Southern Operating Companies were planning to implement in response to allegations that their operations improperly favored affiliates. On October 5, 2006, the Commission issued its Settlement Order, which accepted in part and rejected in part the Settlement Offer.[19] The Commission explained that the Settlement Offer did not adequately protect customers against affiliate abuse. As a result, the Commission ordered the Southern Operating Companies to make significant changes to the Settlement relating to the IIC, Separation Protocol, and GSS Tariff, to adequately protect customers from affiliate abuse in the sale of wholesale power and the provision of transmission service. In the Settlement Order, the Commission directed the OE to conduct an audit of Southern Power and its regulated Operating Company affiliates. Further, the Commission advised that it will notice the audit report for comment and after considering the comments on it, determine what further action is appropriate.[20] Moreover, the Commission stated that if affiliate abuse concerns remained, it will either set such concerns for hearing or require further changes immediately. Lastly, the Commission advised that it would keep the section 206 investigation open until receiving the audit, any public comments on it, and determine what further action is appropriate in this docket.

On November 6, 2006, Southern Company Services, Inc., acting as agent for the Southern Operating Companies, submitted a modified compliance filing, as directed by the Settlement Order. The compliance filing included the required amendments to the IIC, Separation Protocol, and GSS Tariff, as well as a projected implementation schedule outlining the actions taken to date and the expected timeframe for implementing the Separation Protocol over a seven-month period. On April 19, 2007, the Commission issued an Acceptance Order, which accepted the modified compliance filing and projected implementation schedule, but directed a further compliance filing be made.[21] On May 18, 2007, Southern Company Services, Inc. filed a revised compliance filing in Docket No. EL05–102–003, as directed by the Commission in its Acceptance Order. The Commission accepted, by delegated authority, this revised compliance filing with minor modifications on July 16, 2007.[22] On August 13, 2007, Southern Company Services, Inc. filed these minor modifications in Docket No. EL05–102–004, which the Commission accepted by delegated authority on September 12, 2007.[23]

On November 16, 2007, Southern Company Services, Inc. filed, on behalf of the Southern Operating Companies, a Notice of Completion and Conformed Compliance Filing in connection with the Settlement and Acceptance Orders. The Southern Operating Companies stated that the implementation of the requirements set forth in the Settlement and Acceptance Orders was complete. Moreover, the Southern Operating Companies submitted an effective conformed version of the Separations Protocol. The filing also conformed the definition of ''market information'' used in the Separation Protocol and IIC to the definition of that term established by the Commission in Order No. 697.[24] The Southern Operating Companies requested that the Commission accept the Order No. 697 conformed rates for filing.[25] The Southern Operating Companies later determined that the November 16, 2007 filing should not have included the section 205 request that the definition of ''market information'' established by the Commission in Order No. 697 apply to that same term as used in the Southern Operating Companies' Separation Protocol. Accordingly, on December 4, 2007, the Southern Operating Companies amended its Notice of Completion filing to remove the section

205 aspect of its submission. On January 11, 2008, the Commission, by delegated authority, accepted the Southern Operating Companies' Notice of Completion and the Separation Protocol with an effective date of November 19, 2007.[26]

On November 19, 2007, OE commenced the audit of the Southern Operating Companies in Docket No. PA08–6–000.

*D. Summary of Compliance Findings*

Although audit staff determined that the Southern Operating Companies generally complied with the conditions in the Settlement and Acceptance Orders, audit staff identified three areas where the Southern Operating Companies should strengthen and further its compliance measures related to electronic separation, employee separation, and posting of Separation Protocol violations on OASIS.[27] Below is a summary of audit staff's compliance findings. A more detailed discussion of audit staff's compliance findings is included in section IV.

• *Electronic Separation*—Although Southern Company implemented electronic controls to prevent Southern Power employees from accessing non-public market information, audit staff detected some gaps in the controls that potentially provided Southern Power employees with access to non-public market information. Specifically, a Southern Power employee was able to breach Southern Company's network access restrictions through a non-Southern Power computer workstation and the wireless network. Additionally, Southern Company did not have adequate procedures in place to review for non-public market information available through: (1) Personal network drives of employees who transferred jobs and (2) files transferred to shared network drives by non-Southern Power employees.

• *Employee Separation*—Audit staff observed an employee performing transmission activities that support the long-term wholesale energy transactions of Southern Power, while at the same time performing transmission and energy trading activities that support the short-term wholesale energy transactions made by the pool on behalf of the Southern Operating Companies. Audit staff believes that Southern Company should dedicate separate employees to perform the transmission activities supporting Southern Power's long-term wholesale energy transactions and the transmission activities supporting the short-term wholesale energy transactions made for the pool on behalf of the Southern Operating Companies to prevent the potential for any undue preference.

• *Posting of Separation Protocol Violations on OASIS*—Southern Company did not immediately post, date, and time stamp all the postings it made to OASIS in accordance with the Commission's Standards of Conduct requirements in effect during the audit period.

*E. Summary of Recommendations and Corrective Actions Taken*

Audit staff provides the following recommendations to ensure adequate corrective actions are taken by Southern Company to address the remaining opportunities for potential affiliate abuse under the IIC related to Southern Power.

• Create procedures for reviewing files posted to Southern Power shared drives by non-Southern Power employees for non-public market information. Additionally, create procedures for reviewing the personal network drives of all employees who transfer into Southern Power for non-public market information. For each review, remove all files that contain non-public market information from the personal network drive of the transferred employee.

On November 14, 2008, Southern Company implemented new policies governing the monitoring and review of Southern Power shared drives and the personnel network drives of employees transferring into Southern Power.

• Perform periodic reviews to ensure that Southern Power employees do not have access rights to applications, databases, and shared network drives containing non-public market information. Additionally, these periodic reviews should include testing of the segmented network to determine whether Southern Power employees can bypass the segmented network and potentially access non-public market information.

On November 14, 2008, Southern Company implemented new procedures requiring a periodic review of Southern Power shared drives and periodic testing of the segmented network.

• Add the ''SPC'' designator to Southern Power employee names in Cool Compliance, as is already done in the Global Address List for e-mails, to spotlight a Southern Power employee having access rights granted in Cool Compliance.[28]

On November 10, 2008, Southern Company informed audit staff that it will identify and label all Southern Power employees in Cool Compliance. However, Southern Company did not provide an implementation date.

• Dedicate employees performing transmission activities that support Southern Power's long-term wholesale energy transactions solely to Southern Power.

On November 7, 2008, Southern Company informed audit staff that it transferred the responsibilities associated with the procurement of transmission service for Southern Power's long-term wholesale energy transactions to Southern Power.

• Post all violations of the Separation Protocol immediately, in accordance with the Standards of Conduct at 18 CFR 358.5(b)(3). In addition to the date the violation occurred, include on each document the date and time Southern Company posted the violation in accordance with the OASIS regulations at 18 CFR 37.6(g)(2).

On November 14, 2008, Southern Company revised its Separation Protocol Violations Investigative Procedure to reflect that upon determining an actual violation has occurred, the incident must immediately be posted on OASIS. Further, Southern Company implemented a procedural change to include a date and time stamp for each document posted on OASIS relating to the violation.

• Strengthen procedures and controls for maintaining e-mail distribution lists and providing reports to Southern Power that may contain non-public market information. Incorporate these procedures and other pertinent procedural enhancements in the Separation Protocol compliance training program to achieve a reduction in the number of future violations.

On November 14, 2008, Southern Company implemented new procedures requiring employees to maintain and periodically review their e-mail distribution lists to verify employee memberships. Further, Southern Company revised its Separation Protocol training regarding electronic communications with Southern Power employees and the development and maintenance of e-mail distribution lists.

[26] *Southern Company Services, Inc.*, Docket Nos. EL05–102–005 and EL05–102–006 (January 11, 2008) (unpublished letter orders).

[27] The time frame for the audit covers a period prior to the effective date of Order No. 717. Therefore, the audit measures compliance with then-existing regulations. The Commission recently changed certain posting requirements for Standards of Conduct regulations (see *Standards of Conduct for Transmission Providers, Order No. 717*, 125 FERC ¶ 61,064 (2008).

[28] Cool Compliance is a computer application originally created to maintain Sarbanes-Oxley controls, which Southern Company also adopted as a tool to provide a consistent automated process for evaluating and managing access requests.

**II. Southern Company's Compliance With Commission Orders**

The Southern Operating Companies' efforts to comply with the Settlement and Acceptance Orders included the following activities: (1) Tariff modifications filed with the Commission; (2) functional separation through organizational restructuring, relocation of employees and infrastructure changes; (3) electronic access controls (information technology); (4) training of employees; and (5) a compliance filing to conform to the definition of ''market information'' used in the Separation Protocol and IIC to the definition of that term established by the Commission in Order No. 697. Further, the Southern Operating Companies expended almost $20 million to implement the modifications required by the Commission's Settlement and Acceptance Orders. In addition, the Southern Operating Companies anticipate there will be on-going costs for compliance, including the purchasing of equipment, additional staffing, training, and other costs that are difficult to quantify at this time.

*Tariff Modifications*

Subsequent to the issuance of the Settlement Order, the Southern Operating Companies made several compliance filings, which the Commission has approved, that changed the tariff language of the IIC, Separation Protocol, and GSS Tariff to comply with the Commission's Settlement and Acceptance Orders.[29] The IIC changes pertained to sales between the Southern Operating Companies that were outside the pool operating window, but less than a year in length, opportunity sales made on behalf of the pool members, Southern Power taking transmission service under the OATT, Southern Power as an Energy Affiliate under the Standards of Conduct in effect at the time, and defining ''market information'' consistently with Order No. 697.

The Separation Protocol changes pertained to broadening the separated functions responsibilities to any function undertaken for the benefit of Southern Power's shareholders (except joint economic dispatch and reserve sharing), prohibiting the sharing of any information, protecting against preferential treatment in regard to the purchase or sale of transmission service or electric energy between the Southern Operating Companies, and the pricing of non-power goods and services. The GSS tariff changes pertained to filing the GSS tariff with the Commission to provide all similarly situated merchant generators access to back-up power by the Southern Operating Companies, and requiring the just and reasonable standard, as opposed to the public interest standard, to govern all revisions to the GSS tariff. The Commission accepted all of these modifications to the IIC, Separation Protocol, and GSS tariff.

*Functional Separation*

In addition to the tariff filings, the Southern Operating Companies made several organizational and structural changes to comply with the Settlement and Acceptance Orders. The Southern Operating Companies began to evaluate the measures necessary to comply with the Settlement Order in late 2006 and, after the Commission issued the Acceptance Order in April 2007, initiated the compliance effort. Based on the schedule accepted by the Commission, the Southern Operating Companies were afforded seven months to complete the functional separation of Southern Power, implement the required information sharing restrictions, and provide Separation Protocol training to its employees.

Southern Company evaluated its corporate structure and made various organizational changes. To functionally separate Southern Power's wholesale activities from the other Southern Operating Companies, Southern Company created Southern Wholesale Energy and Southern Power as divisions within Southern Company Services, Inc. Southern Wholesale Energy, a business unit within Southern Company Services, Inc. performs all of the bilateral, long-term wholesale activities of the Southern Operating Companies, with the exception of Southern Power. Southern Power, as subsidiary of Southern Company performs wholesale activities including asset management and trading, market analysis and structure, generation development, and asset acquisition on behalf of its shareholders. Southern Power also created its own finance, accounting, budgeting, and compliance groups separate from the other Southern Operating Companies. In addition, Southern Power established separate officer positions, including President, Chief Commercial Officer, Senior Production Officer, Chief Financial Officer, and Compliance Officer.

Southern Company reviewed its physical facilities and, as a result, relocated employees, made changes to its electronic infrastructure, and implemented physical access controls. Southern Company relocated 65 Southern Power employees and 90 other Southern Operating Companies employees within the Birmingham, Alabama, and Atlanta, Georgia, offices as a result of functionally separating Southern Power from the other Southern Operating Companies. In Birmingham, Southern Company physically separated employees solely dedicated to Southern Power to a separate floor and developed Southern Power's own trading floor. Southern Power's separate floor contains its asset management and trading, market analysis and structure, generation development, and asset acquisition functions. Southern Power installed electronic card key access controls on this separate floor to provide access only to employees solely dedicated to Southern Power. Southern Company also implemented electronic card key access controls to restrict Southern Power employees' access to non-public market information in other areas of the building where the other Southern Operating Companies perform operating and trading activities. Further, Southern Company instituted sign-in procedures for all non-authorized visitors in these areas to provide extra protection. Southern Company included these same protections in its Atlanta facilities and the generating plants owned and operated by Southern Power.

*Electronic Access Controls*

Southern Company conducted an extensive review of its computer and e-mail systems, business software applications and databases, and intranet sites to establish controls that prevent Southern Power employees from having electronic access to or receiving non-public market information from the other Southern Operating Companies. As a result of this review, Southern Company installed a segmented network to comply with the electronic separation requirements ordered by the Commission's Settlement and Acceptance Orders. The segmented network allows Southern Power to coexist on the same information technology infrastructure as the rest of Southern Company, yet at the same time precludes Southern Power from obtaining non-public market information electronically. Southern Company also created separate intranet Web sites for Southern Power and the other Southern Operating Companies to ease the burden of electronic separation

[29] *Southern Company Services, Inc.*, Docket No. EL05–102–003 (July 16, 2007) (unpublished letter order); *Southern Company Services, Inc.*, Docket No. EL05–102–004 (September 12, 2007) (unpublished letter order), *Southern Company Services, Inc.*, Docket Nos. EL05–102–005 and EL05–102–006 (January 11, 2008) (unpublished letter order).

and Southern Power's restriction to non-public market information. Further, all shared drives that contain non-public market information are electronically protected and restrict Southern Power employees' access. In addition to these protective measures, Southern Company added an ''SPC'' notation next to the e-mail addresses of Southern Power employees to clearly distinguish them from non-Southern Power employees and avoid the inadvertent exchange of non-public market information.

*Employee Training*

Southern Company informed audit staff that the Southern Operating Companies provided the Separation Protocol training required by the Commission's Settlement Order to over 15,000 employees. This training educated employees on functional separation requirements, physical separation requirements, ''prohibited information'' definitions, electronic access requirements, no conduit rules, and violation reporting instructions. The type of training provided (instructor-led or on-line) was based on the priority level of employees. Employees in the high priority level included employees of Southern Power, generation employees, transmission employees, shared support service employees and corporate officers of the other Southern Operating Companies responsible for these areas. These high priority level employees received instructor-led training while others participated in an on-line training program. Continued education and training on the Separation Protocol is provided on an annual basis. Additionally, training materials for the Separation Protocol are available on the intranets of both Southern Company and Southern Power.

*Order No. 697 Compliance Filing*

In the Acceptance Order, the Commission directed Southern Company Services, Inc. to revise its Separation Protocol and IIC to prohibit the sharing of any market information, whether or not such information is public.[30] Subsequent to the Acceptance Order, the Commission issued Order No. 697, which, among other things, codified a new definition of ''market information.'' Pursuant to the Commission's regulations, ''market information'' means non-public information related to the electric energy and power business including, but not limited to, information regarding sales, cost of production, generator outages, generator heat rates, unconsummated transactions, and historical generator volumes. Market information includes information from either affiliates or non-affiliates.[31] This new definition not only provides greater specificity regarding the type of information falling within its scope, but also limits its application to non-public information.

On December 4, 2007, Southern Company Services, Inc., on behalf of the Southern Operating Companies, made a section 205 filing in Docket No. ER08–298–000 to conform the definition of ''market information'' as used in the Separation Protocol and the IIC to the definition of that term established in Order No. 697. On January 11, 2008, the Commission accepted the filing.[32]

*Standards of Conduct Compliance*

In the Settlement Order, the Commission directed Southern Operating Companies to revise section 4.4 of the IIC to make clear that the IIC is not to serve as a means whereby transmission information is shared in a manner contrary to the Commission's Standards of Conduct.[33] The Settlement Order also required revision of section 4.4 of the IIC to make clear that Southern Power is treated as an Energy Affiliate under the Standards of Conduct and therefore cannot receive any nonpublic transmission information.[34]

While the Commission recently revised its Standards of Conduct regulations, the fundamental principle prohibiting a transmission provider's transmission function employees from disclosing nonpublic transmission information (which includes customer information) to marketing function employees is retained. The revisions do not affect either Southern Operating Company's compliance with the recommendations regarding shared employees or the information restrictions discussed herein. We also note that the Southern Operating Companies are subject to restrictions similar to those in the Standards of Conduct regulations based on its market-based rate authority.[35] In addition to restricting information sharing between a franchised public utility with captive customers and a market-regulated power sales affiliate, those rules contain separation of function requirements and a no conduit provision.

**Introduction**

*A. Objectives*

The primary objective of the audit was to determine whether the Southern Operating Companies fully complied with the conditions and modifications imposed by the Commission in its Settlement and Acceptance Orders. The audit also evaluated whether the conditions and modifications set forth in both orders are sufficient to address any remaining opportunities for affiliate abuse related to Southern Power under the IIC. The audit covered the period from November 19, 2007 through August 29, 2008.

*B. Scope and Methodology*

Audit staff conducted a series of reviews prior to the commencement of the audit to gain an understanding of Southern Company's corporate environment, and state and federal regulatory affairs. Audit staff also monitored the implementation of the modifications imposed upon the Southern Operating Companies by the Commission in Docket No. EL05–102–000 through a series of phone conferences and compliance filing reviews. The audit activities conducted included:

- *Corporate Review*—Audit staff conducted a corporate review prior to the commencement of the audit to obtain a preliminary understanding of Southern Company's corporate structure, system design and operations, and market and financial activities. Audit staff reviewed publicly available materials and references including Southern Company's: OASIS and corporate Web sites; Federal Energy Regulatory Commission (FERC) Electric Quarterly Reports (EQR); FERC Forms No. 1, 60, and 714; IIC Annual Informational Filing; Securities and Exchange Commission (SEC) Forms 8–K, 10–Q, and 10–K; annual stockholder reports; various industry Web sites; and trade press releases.
- *Internal Auditor and External Accountant Review*—Audit staff reviewed relevant audit reports and workpapers of the Southern Companies' internal audit department and external audit firm, Deloitte & Touche LLP. The audit staff also reviewed the prior SEC audit report relating to service company costs and revenue allocations.
- *Federal Regulatory Review*—Audit staff reviewed numerous company filings and Commission orders to obtain

[30] Acceptance Order at P 26.

[31] 18 CFR 35.36(a)(8).

[32] *See Southern Company Services, Inc.,* Docket No. ER08–298–000 (January 11, 2008) (unpublished letter order).

[33] Settlement Order, at P 55.

[34] The Commission recently eliminated the concept of ''energy affiliate'' from the Standards of Conduct regulations (see *Standards of Conduct for Transmission Providers, Order No. 717,* 125 FERC ¶ 61,064 (2008).

[35] 18 CFR 35.39 (2008).

an understanding of the issues involved in the audit, including: Docket Nos. EL05–102, EL05–104, and ER03–713; market-based rate tariffs and authorizations, including Docket Nos. ER95–1468, ER96–780, ER00–1655, ER03–3240, ER01–1633, and ER03–1383; and various dockets authorizing Southern Power to sell power to Alabama Power and Georgia Power. Additionally, audit staff reviewed company filings and orders relating to Southern Company's OATT and Order No. 697 compliance filings.

• *State Regulatory Review*—Audit staff performed a comprehensive review of each State Commission's (Georgia, Alabama, Mississippi, and Florida) Web site to obtain an understanding of their oversight responsibilities and regulatory involvement with Southern Company. Additionally, audit staff conducted phone conferences with staff at each State Commission to establish points of contact for the audit and to discuss its past regulatory review of Southern Company. In particular, audit staff inquired about each State Commission's compliance audits related to affiliated transactions and cross-subsidization, their understanding and review of the terms and conditions of the IIC and related billing process, and their involvement in solicitation of competitive bids for generation suppliers.

• *Monitoring of Compliance Implementation*—To ensure that Southern Company adhered to the Commission-approved compliance implementation schedule, audit staff monitored Southern Company's progress prior to the audit. Specifically, audit staff reviewed compliance filings made with the Commission by Southern Company Services, Inc. on behalf of the Southern Operating Companies. Further, audit staff held three phone conferences with Southern Company regarding the status and completion of its projected compliance implementation plan before the commencement of the audit on November 19, 2007.

Audit staff also reviewed specific areas related to the objectives of the audit and conducted testing in those areas to evaluate the Southern Operating Companies' compliance with the conditions imposed by the Settlement and Acceptance Orders, and whether those conditions were sufficient to address any remaining opportunities for affiliate abuse by Southern Power under the IIC. Audit staff held regular conference calls and formal meetings with Southern Company, and performed three site visits at Southern Company's facilities in Birmingham, Alabama, and one site visit in Atlanta, Georgia. Further, audit staff issued nearly two hundred data requests to obtain information for review and testing purposes, and to collect evidence to support its conclusions. The specific areas audit staff reviewed and tested include the Separation Protocol, wholesale sales, transmission, and GSS tariff.

• *Separation Protocol*—Audit staff conducted multiple tests to evaluate the Southern Operating Companies' compliance with the conditions imposed by the Commission and remaining opportunities for affiliate abuse relating to the separation of functions and employee workspace, restriction of non-public market information, separation protocol training, and sale of non-power goods and services. Specifically, audit staff:

○ Reviewed Southern Company's organizational structure and conducted interviews with several employees to ensure that Southern Company functionally separated all wholesale activities carried out for the sole benefit of Southern Power shareholders, including its trading activities by the other Southern Operating Companies.

○ Toured and inspected Southern Power and other facilities in Birmingham, Alabama, and Atlanta, Georgia, to ensure that the workspace of all employees conducting separated functions of Southern Power were separated from the workspace of the other Southern Operating Companies.

○ Inspected the physical and electronic information security restrictions in place and tested the information system processes and controls in place at the network, application, and workstation level to ensure non-public market information is protected from employees conducting the separated functions of Southern Power.

○ Reviewed various physical and electronic means by which Southern Power could access or receive non-public market information from the other Southern Operating Companies to ensure they did not violate the Separation Protocol. The various means inspected included: employee e-mails and voice recordings; access to shared drives and databases containing non-public market information; electronic card key access permissions at facilities containing non-public market information; records of joint meetings between Southern Power and other Southern Operating Companies; and visitor sign-in logs at facilities containing non-public market information. Further, audit staff conducted interviews with employees who conduct separated functions for Southern Power and interviews with employees performing pool operations and trading as a secondary level of testing.

○ Reviewed the training program Southern Company developed to educate employees affected by the Separation Protocol to assess its adequacy and completeness. Audit staff also interviewed compliance officers involved with providing training and employees receiving training to assess their knowledge and understanding of the Separation Protocol. As part of this testing, audit staff reviewed the processes in place for detecting and investigating potential violations of the Separation Protocol, and procedures for posting actual violations of the Separation Protocol on OASIS.

○ Reviewed the allocation methodologies and pricing for non-power goods and services provided and purchased amongst Southern Company Services, Inc., Southern Power, and the other Southern Operating Companies, to determine whether such allocation methodologies and pricing were consistent with the Separation Protocol and did not result in subsidization. Audit staff reviewed all service agreements in effect that provide for non-power goods and services to identify the types of non-power goods and services provided and purchased amongst Southern Company Services, Inc. and the Southern Operating Companies, and the pricing for such non-power goods and services. Audit staff also reviewed the methods used to allocate cost amongst the Southern Operating Companies.

○ *Wholesale Sales*—Audit staff conducted several tests to evaluate the Southern Operating Companies' compliance with the conditions imposed by the Commission and remaining opportunities for affiliate abuse relating to wholesale sales, including the IIC provisions for: reserve sharing and generation expansion plans; sales between the Southern Operating Companies; and wholesale sales to third parties. Specifically, audit staff:

○ Conducted group discussions and interviews with operational, trading, and shared employees to obtain an in-depth knowledge and understanding of the provisions of the IIC and the operation of Southern Company's integrated system. Further, audit staff reviewed business practices and procedures, observed operational and trading activities, and reviewed transactional and other business data to determine how to apply these provisions for testing compliance.

○ Reviewed Southern Company's annual IIC informational filing, conducted employee interviews, and analyzed data to determine how the Southern Operating Companies derived recognized capacity for the reserve sharing calculation. As part of the data analysis, audit staff reviewed expansion plans to verify Southern Power did not automatically include new capacity resources in the reserve sharing calculation as recognized capacity that was not part of the coordinated planning process. Further, audit staff analyzed reserve sharing calculations and billings to verify the payments to and receipts from the Southern Operating Companies for reserve sharing were in accordance with the provisions of the IIC.

○ Analyzed transactions, billings, and other documents to validate the payments to and receipts from the pool for interchange energy and opportunity interchange energy were in accordance with the provisions of the IIC. Audit staff reviewed pool interchange energy sale transactions between the Southern Operating Companies to validate the charges were based upon the variable costs of the generating resource supplying the interchange energy. Audit staff also reviewed pool opportunity interchange energy sales transactions to verify the Southern Operating Companies received revenues based upon approved peak period load ratios and paid costs based upon the variable dispatch costs.

○ Reviewed regulatory filings to determine whether the Commission approved any sales between the Southern Operating Companies outside the pool operating window for the periods of less than one year and greater than one year. Audit staff also analyzed transactional data and conducted employee interviews to independently assess whether any sales between the Southern Operating Companies occurred outside the pool operating window without prior Commission approval.

○ Analyzed transactional data and other supporting documents to verify Southern Power made all of its wholesale sales outside the pool operating window using its own generating capacity. Audit staff also interviewed Southern Operating Companies' employees to assess the adequacy of procedures and controls in place for ensuring all of Southern Power's wholesale sales occur outside the pool operating window and that Southern Power has available capacity from its own generating resources to support these wholesale sales.

○ Reviewed the Southern Operating Companies' coordinated planning process to verify Southern Power independently developed its generation expansion plans and did not participate in reviewing and recommending the generation expansion plans of the other Southern Operating Companies. Further, audit staff reviewed e-mails and interviewed the Southern Power Senior Production Officer on the Operating Committee to ensure Southern Power did not receive non-public market information from other Operating Committee members.

○ *Transmission*—Audit staff conducted several tests to evaluate the Southern Operating Companies' compliance with the conditions imposed by the Commission and remaining opportunities for affiliate abuse relating to the Southern Operating Companies' access to non-public transmission information and Southern Power's adherence to the terms and conditions of the OATT and treatment as an Energy Affiliate under the Standards of Conduct. Specifically, audit staff:

○ Conducted interviews with Southern Company transmission function managers and employees to understand the physical aspects and operations of Southern Company's electric transmission system.

○ Reviewed corporate organizational charts and employee job descriptions to assess the functional separation of Southern Power and other marketing functions from the transmission function.

○ Reviewed all transmission services provided to each of the Southern Operating Companies by Southern Company's transmission function and then analyzed transmission service agreements, reservations, schedules, and billing statements to validate that Southern Power adhered to the terms and conditions of the OATT.

○ Reviewed various physical and electronic means for Southern Power and other employees performing marketing activities to access or receive non-public transmission information to ensure that they did not violate the Commission's Standards of Conduct regulations in effect during the audit period. The various means inspected included: employee e-mails and voice recordings; marketing employees' access to shared drives and transmission databases; transmission facilities' electronic card key access permissions; records of joint meetings between transmission and marketing function employees; and records for visitor sign-in logs at the operating control center. Audit staff also conducted interviews with personnel who work in separated functions for Southern Power and interviews with employees performing pool operations and trading as a secondary level of testing.

○ Reviewed OASIS to determine whether the Southern Operating Companies made required postings in accordance with the Standards of Conduct as in effect at the time.

○ *GSS Tariff*—Audit staff conducted testing to evaluate the Southern Operating Companies' compliance with the conditions imposed by the Commission and remaining opportunities for affiliate abuse relating to similarly-situated merchant generators' access to back-up power. Audit staff reviewed all filings made by Southern Company Services, Inc. to validate that Southern Company complied with the Commission's order to file a GSS tariff that offered all similarly-situated merchant generators access to back-up power. Audit staff issued data requests and conducted interviews to assess the internal processes and procedures related to the administration of the GSS tariff. Audit staff also used these data requests and interviews to verify whether any scheduling entity requested service under the GSS tariff, and to determine whether any scheduling entity was improperly denied service under the GSS tariff.

**III. Findings and Recommendations**

*1. Electronic Separation*

Although Southern Company implemented electronic controls to prevent Southern Power employees from accessing non-public market information, audit staff detected gaps that could have potentially provided Southern Power employees with access to non-public market information. Specifically, as part of our audit testing, a Southern Power employee was able to breach Southern Company's network access protections through a non-Southern Power computer workstation and the wireless network.

Additionally, Southern Company did not have adequate procedures in place to review: (1) Personal network drives that may contain non-public market information when employees transferred jobs and (2) files transferred to shared network drives by non-Southern Power employees for non-public market information.

Pertinent Guidance

The Commission's Settlement Order required the Southern Operating Companies to ''adopt a clear separation of functions, including restrictions on

information sharing,'' for transactions benefitting Southern Power's shareholders. The Settlement Order also required Southern to make clear that Southern Power is to be treated as an Energy Affiliate under the Standards of Conduct and therefore cannot receive any nonpublic transmission information.[36] In response to implementing these modifications, Southern Company included language in its Separation Protocol to protect against the electronic sharing of non-public market information. Specifically, the Separation Protocol applicable to Southern Power states in paragraph no. 4:

> Prohibited information will be electronically protected from employees conducting the separated functions of Southern Power through restricted access to any shared drive that includes such information. Access to these shared drives by employees conducting the separated functions of Southern Power will require pre-approval under an authorization process administered by the Southern Company Generation Compliance Officer.

**Background**

Southern Company conducted a comprehensive review of its computer network environment, business software applications and databases, intranet Web sites, and other computer related systems to ensure it had adequate controls in place to restrict Southern Power employees from having electronic access to non-public market information. Southern Company implemented a segmented network as its overarching control to comply with the electronic separation and information sharing requirements set forth in the Commission's Settlement Order. The segmented network allows Southern Power to co-exist on the same information technology infrastructure as the rest of Southern Company, yet at the same time is designed to preclude Southern Power from electronically accessing non-public market information. The implementation of the segmented network and other computer infrastructure related changes required extensive employee hours and cost approximately $1.3 million.

The compliance measures taken by Southern Company required re-engineering of its existing computer infrastructure with the implementation of a segmented network. Audit staff's review of the segmented network determined that it is an effective first line of defense in electronically protecting Southern Power employees' access to non-public market information. However, audit staff's testing of Southern Company's electronic separation control environment for the segmented network detected some minor weaknesses that could have potentially provided Southern Power employee's access to non-public market information through personal employee computers workstations and the wireless network had they been left unresolved.

Further, Southern Company did not have adequate procedures in place to review for non-public market information: (1) personal network drives when employees transferred jobs and (2) files transferred to shared network drives by non-Southern Power employees.

*Segmented Network*

The segmented network was achieved by installing dedicated computer infrastructure, such as dedicated servers, switches and firewalls, and by implementing automated rules with Microsoft's Active Directory and Group Policy within the infrastructure to electronically separate Southern Power from the remainder of Southern Company and to control access to non-public market information. Southern Company's segmented network is an effective first line of defense in electronically protecting non-public market information from Southern Power employees.

The segmented network is ultimately controlled through Microsoft's Active Directory and relies on an internally designed set of scripts to ensure that Southern Power employees cannot access non-public market information. The scripts, known as the Validator program, ensure that three conditions are met before allowing Southern Power employees electronic access: the employee must be a member of the restricted user group, the workstation must be a member of the restricted workstation group, and the location must be a restricted site. If any of these three conditions is not met, the Validator program should shut down the workstation for Southern Power employees.

Audit staff conducted testing at non-Southern Power computer workstations to determine whether the segmented network controls adequately blocked Southern Power employees' access to restricted areas containing non-public market information. One test confirmed that the segmented network successfully blocked a Southern Power employee from gaining access to the protected segmented network using a non-Southern Power computer workstation located in an employee's office. However, the other test detected that the segmented network could be breached by a Southern Power employee through the use of a non-Southern Power computer workstation located in a non-Southern Power conference room. In comparing the two different outcomes, Southern Company explained that the Southern Power employee successfully logged onto the conference room computer workstation because it resided on the SOCOGEN network.

Upon discovery, Southern Company took immediate action to resolve the conference room workstation breach. Southern Company explained that most of the workstations on the SOCOGEN network are in secure areas to which Southern Power employees do not have access privileges. Therefore, Southern Company believed it was not necessary to implement the ''deny access'' log-on controls applied to Southern Power employees on the SOCOGEN network. Rather than applying the ''deny access'' log-on controls to these conference room workstations, Southern Company addressed this breach by applying the log-on restrictions across the entire SOCOGEN network, in case there were additional SOCOGEN workstations in non-secure areas of the building. Had this problem been left uncorrected, this breach could have potentially provided a Southern Power employee access to non-public market information.

*Wireless Network*

Southern Company implemented a separate wireless network for Southern Power in order to restrict access to non-public market information. Southern Power employees should be capable of accessing only the Southern Power wireless network, placing them behind Southern Power's dedicated firewalls and subjecting them to all of the rules applied to a Southern Power workstation connected to the network through wired access. Southern Company's other employees can connect to the ''Office wireless network.'' Southern Power employees should not be able to connect to the Office wireless network.

Audit staff's testing of the wireless network from a Southern Power laptop computer revealed that the employee using a Southern Power restricted workstation was able to connect to the Office wireless network. Essentially, by successfully connecting to Southern Company's Office wireless network, a Southern Power employee was able to bypass the segmented network. This connection potentially allowed the Southern Power employee access to non-public market information. According to Southern Company, some users had Active Directory permission

[36] Settlement Order at P. 3.

inadvertently enabled on their laptop computers for remote access. This permission superseded the Active Directory ''deny access'' configuration applied to all Southern Power users for the Office wireless network. To correct this issue, Southern Company modified the configuration to ignore this Active Directory property for remote access, removing the conflict in permissions. Audit staff's re-testing of the wireless network demonstrated that the system did not allow the Southern Power employee connection.

*Employee Computer Workstations*

Audit staff conducted testing of Southern Power employee computer workstations to determine whether they could access non-public market information through personal network drives, shared network drives, and applications and databases. Audit staff's testing did not detect any evidence that Southern Power employees accessed or received non-public market information through its personal computer workstations. However, audit staff observed that Southern Company had some procedural weaknesses related to personal network drives, shared drives, and computer applications and databases that could potentially provide Southern Power the opportunity to access non-public market information.

During interviews, audit staff learned that each employee has a personal network drive and if an employee transfers from one area of Southern Company to another, such as from the Transmission function into Southern Power, the employee's personal network drive is transferred with the employee. However, Southern Company did not have a policy in place to review the contents of the transferred employees' personal network drive for non-public market information. Audit staff also learned that the network server access restrictions are one-directional (*i.e.* Southern Power to the other Southern Operating Companies). As a result, a non-Southern Power employee with write access to a shared network drive could transfer files containing non-public market information to the network drive it shares with Southern Power. Southern Company also did not have a policy in place to review shared network drives for non-public market information. Currently, the Separation Protocol and Standards of Conduct training programs are the only control mechanisms in place to prevent Southern Power access to non-public market information through personal and shared network drives.

To prevent the type of breaches audit staff detected during its examination of the segmented network and wireless network, Southern Company should implement multiple strategies to electronically restrict Southern Power employees' access to non-public market information. For example, Southern Company should implement procedures to ensure Southern Power employees are electronically restricted from obtaining non-public market information through access rights to shared network drives. Further, Southern Company should develop procedures to review and remove non-public market information from personal network drives for employees who transfer to Southern Power from another area of the company.

**Recommendations**

*We recommend Southern Company:*

1. Create procedures for reviewing files posted to Southern Power shared drives by non-Southern Power employees for non-public market information. Additionally, create procedures for reviewing the personal network drives of all employees who transfer into Southern Power for non-public market information. For each review, remove all files that contain non-public market information from the personal network drive of the transferred employee.

2. Perform periodic reviews to ensure that Southern Power employees do not have access rights to shared network drives containing non-public market information. Additionally, these periodic reviews should include testing of the segmented network to determine whether Southern Power employees can bypass the segmented network and potentially access non-public market information.

3. Add the SPC designator to Southern Power employee names in Cool Compliance, as is already done in the Global Address List for e-mails, to spotlight a Southern Power employee having access rights granted in Cool Compliance.

**Corrective Action Taken**

On November 14, 2008, Southern Company implemented new procedures governing the monitoring and review of shared drives and personnel network drives. For shared drives the new procedures require any non-Southern Power employee who posts material to a Southern Power shared folder to send an e-mail notifying the Southern Power employee of the posting content. For personnel network drives the new procedures requires a Southern Power business manager and transferred employee to review and remove any documents containing non-public market information from the personnel network drive and to a complete and submit a transfer checklist to a compliance officer for review.

Southern Company also implemented new procedures that require a semi-annual review of approved access lists and content of Southern Power shared drives by a generation compliance officer. Further, the new procedures also require periodic testing of the segmented network to verify the integrity of the preventive controls and to confirm that Southern Power employees do not have access to network drives that contain non-public market information.

On November 10, 2008, Southern Company informed audit staff that it will begin identifying and labeling all Southern Power employees in Cool Compliance to help prevent inadvertent disclosure of non-public market information. However, Southern Company did not provide an the implementation date for this new procedure.

*Employee Separation*

Audit staff observed a shared employee performing transmission activities that support the long-term wholesale energy transactions of Southern Power, while at the same time performing transmission and energy trading activities that support the short-term wholesale energy transaction made by the pool on behalf of the Southern Operating Companies. Audit staff believes that Southern Company should dedicate separate employees to perform the transmission activities supporting Southern Power's long-term wholesale energy transactions and the transmission activities supporting the short-term wholesale energy transactions made for the pool on behalf of the Southern Operating Companies to prevent the potential for any undue preference.

**Pertinent Guidance**

The Settlement Order clarified that where a competitive affiliate enters into transactions for its own benefit, it must separate its functions from those of its regulated affiliates.[37] This separation of functions obligation includes, in part, a requirement to maintain separate staffs to perform the sales functions and a restriction on the sharing of any non-public market information. These protections ensure that the parent corporation cannot favor sales by the

[37] Southern Company Services, Inc., 117 FERC ¶ 61,021 (2006).

competitive affiliate over those of the regulated affiliates.

Moreover, the Commission's Acceptance Order further clarified that the Southern Operating Companies must adopt a clear separation of functions, including restrictions on information sharing, and a separation of personnel, for any function that is undertaken for the benefit of Southern Power's shareholders (*i.e.* any function except joint economic dispatch and reserve sharing under the IIC).[38]

To implement these modifications, Southern Company Services, Inc., included specific language in its Separation Protocol regarding the functional separation of Southern Power employees from the other Southern Operating Companies. Specifically, the Southern Company Services, Inc., Separation Protocol approved by the Commission applicable to Southern Power, Items No. 1 and 2, states:

> The wholesale activities of Southern Power carried on for the sole benefit of Southern Power are to be functionally separated from the other Southern Operating Companies. These activities (collectively referred to as separated functions) consist of any function undertaken for the benefit of Southern Power's shareholders.
>
> Personnel who conduct separated functions for Southern Power may be employees of Southern Power or they may be employees of a service company or other affiliated company. To the extent the service company or other affiliated company employees conduct these separated functions, such employees must be dedicated exclusively to Southern Power and all associated costs (direct and indirect) must be borne by Southern Power or its shareholders.

**Background**

The Southern Operating Companies did not solely dedicate a shared employee performing transmission activities that support the long-term wholesale energy transactions of Southern Power and a different employee to support the short-term wholesale energy transactions made by the pool on behalf of the Southern Operating Companies. Southern Power relies on a shared employee to procure transmission service (*e.g.*, negotiate transmission service agreements and reserve transmission service) that supports its long-term wholesale energy transactions made outside the pool operating window. This same shared employee is responsible for performing energy trading and the transmission activities for the pool on behalf of the Southern Operating Companies for short-term wholesale energy transactions made under the IIC.

During the audit period, audit staff did not identify any occurrences where Southern Power received an undue preference. However, absent having an employee solely dedicated to Southern Power for performing transmission activities, there is a potential risk for Southern Power to receive an undue preference due to this shared employee's co-existing duties as a term energy trader for the pool and associated transmission responsibilities performed on behalf of the pool and Southern Power. Audit staff believes that the Commission's Settlement and Acceptance Orders and the Southern Company Services, Inc., Separation Protocol require further separation of the transmission activities performed by this shared employee by solely dedicating this person or another employee to Southern Power.

Audit staff's review of transmission service agreements between Southern Power and Southern Company's transmission function acknowledged the shared employee signed transmission service agreements on behalf of Southern Power. In addition to transmission service agreements, audit staff obtained transactional data from OASIS showing that the same shared employee made transmission service reservations to support Southern Power's wholesale energy transactions and the wholesale energy transactions made by the pool on behalf of the Southern Operating Companies. Further, audit staff reviewed the job description of this shared employee and interviewed the shared employee to confirm his job responsibilities included: (1) Optimizing daily and long-term point-to-point (PTP) transmission positions on behalf of the Southern Operating Companies including purchasing, reselling, and/or redirecting transmission through OASIS; (2) querying OASIS to determine available transfer capability on all Southern Company interfaces; (3) requesting long-term PTP transmission for the Southern Operating Companies (through OASIS); (4) executing transmission service agreements; and (5) conducting term energy trading on behalf of the pool.

Southern Company explained that when Southern Power needs long-term (*i.e.*, one month or greater) transmission service as the result of its entry into a wholesale energy purchase or sale contract, Southern Power notifies this shared employee of that transmission need. The shared employee then pursues available long-term transmission that meets Southern Power's needs through queries on Southern Company's or a non-affiliated Transmission Provider's OASIS and through inquiries to potential counterparties. When such transmission is found, a transmission service agreement is executed on behalf of Southern Power and provided to it. This same shared employee, within the nearer-term operational window as provided by the IIC, procures transmission service for the Southern Operating Companies to support any short-term wholesale energy transactions made on behalf of the pool. This process applies to transmission procured from Southern Company's transmission function as well as from non-affiliated Transmission Providers.

Southern Company stated that it uses this shared employee to perform the transmission activities for Southern Power and the pool on behalf of the Southern Operating Companies because of the integrated operating nature of the pool. Further, Southern Company stated that the pool seeks to optimize all of the Southern Operating Companies' resources related to unit commitment and joint economic dispatch, including generation, purchased power, transmission and fuel arrangements (*e.g.*, natural gas supply, transportation and storage). Audit staff agrees that the pool must operate on an integrated basis and that all reserved transmission capacity should be obtained by the pool in accordance with the terms and conditions of the OATT. However, as required by the Commission's Settlement and Acceptance Orders and the Southern Company Services, Inc. Separation Protocol, the procurement of transmission service supporting Southern Power's long term wholesale energy transactions should not be a pool responsibility performed by a shared employee, but rather a responsibility performed by an employee solely dedicated to Southern Power.

Audit staff is concerned that there is a potential risk for Southern Power to receive an undue preference if this shared employee continues to have co-existing duties as an energy trader for the pool, along with the transmission responsibilities associated to the wholesale energy transactions conducted on behalf of the pool and Southern Power.

**Recommendation**

We recommend Southern Company:

4. Dedicate employees performing transmission activities that support Southern Power's long-term wholesale energy transactions solely to Southern Power.

**Corrective Action Taken**

On November 7, 2008, Southern Company informed audit staff that it

[38] Acceptance Order at P. 16–17.

transferred the responsibilities associated with the procurement of transmission service for Southern Power's long-term wholesale energy transactions to Southern Power.

*Posting of Separation Protocol Violations on OASIS*

Southern Company did not immediately post, date, and time stamp the postings it made to OASIS in accordance with the Commission's Standards of Conduct requirements in effect during the audit period.

**Pertinent Guidance**

Pursuant to the Separation Protocol paragraph 6, the Southern Operating Companies are required to post any violation of the Separation Protocol on OASIS in a manner consistent with the process under the Standards of Conduct.[39] The Standards of Conduct require the Transmission Provider to post immediately information that an employee of the Transmission Provider discloses in a manner contrary to the requirements of § 358.5(b)(1) on its OASIS or Internet Web site.[40] The requirement of 18 CFR 358.5(b)(1) (2008) states:

> An employee of the Transmission Provider may not disclose to its Marketing or Energy Affiliates any information concerning the transmission system of the Transmission Provider or the transmission system of another * * * through non-public communications conducted off the OASIS or Internet Web site, through access to information not posted on the OASIS or Internet Web site that is not contemporaneously available to the public, or though information on the OASIS or Internet Web site that is not at the same time publicly available.

The Commission's Standards of Conduct regulations also require all OASIS database transactions, except other transmission-related communications provided for under 18 CFR 37.6(g)(2)(2008), must be stored, dated, and time stamped.[41] Further, the Commission explained, in 18 CFR 37.6(g)(1)(2008), that other transmission-related communications may include ''want ads'' or ''other communications'' such as using the OASIS as a transmission-related conference space or making transmission-related messaging services between OASIS users.

**Background**

On November 19, 2007, the Separation Protocol applicable to Southern Power became effective and in part required the Southern Operating Companies to post any violation of the Separation Protocol on OASIS in a manner consistent with the Commission's Standards of Conduct requirements. In accordance with this requirement, Southern Company has made fourteen postings covering violations of the Separation Protocol on its OASIS between November 19, 2007 and August 31, 2008. However, Southern Company did not immediately post, date and time stamp the postings it made to OASIS. The fourteen violations included the following:

- Eleven e-mails containing non-public market information that were electronically sent to Southern Power employees from employees of the other Southern Operating Companies. The non-public market information included in these e-mails pertained to non-Southern Power plant outages, unit status, plant damage, plant equipment issues, and plant performance. Some of the non-public market information shared also pertained to system load data and financial information such as mark-to-market accounting and budgets. The Compliance Officer's investigation of these violations determined that Southern Power employees viewed non-public market information in seven of the eleven e-mails received. One of the violations involved the distribution of the same non-public market information sent to Southern Power employees in a previous e-mail. The other three e-mails contained non-public market information which was received, but not viewed by, Southern Power employees. Most of the violations occurred from having outdated e-mail distribution lists that contained Southern Power employees and from reports received by Southern Power employees, where the senders did not realize the contents included non-public market information.
- One involved a Southern Power employee who obtained access to the power pool trading floor, which is a physically restricted access area. The review performed by a compliance official determined that the Southern Power employee did not view or review any non-public market information.
- One violation involved a meeting where employees from Southern Power and the other Southern Operating Companies were present. During this meeting, non-public market information pertaining to a plant outage with a third party that sold the output of the plant to Georgia Power Company was shared with Southern Power. A compliance official informed the Southern Operating employee that they should not do this going forward when meeting with Southern Power employees.
- One involved computer access to an application containing load forecast data of Georgia Power Company. The initial Separation Protocol review did not detect any problems with this application; however, a modification to the application was made subsequent to this review which granted Southern Power employees access to non-public market information. A compliance official interviewed each employee with access to the load forecast data and determined that none of these employees accessed or viewed this information. Southern Company resolved this problem by removing the Southern Power employee's access to non-public information of Georgia Power Company.

Audit staff requested copies of documents related to all potential and actual Separation Protocol violations that were investigated since November 19, 2007. Audit staff's review of these reports determined Southern Company posted many of the Separation Protocol violations days or weeks after the Southern Power employee received access to the non-public market information. For example, Southern Company posted one incident over one full month following the receipt of the non-public market information by a Southern Power employee. Moreover, audit staff determined that Southern Company identified the date of occurrence, but did not date or time stamp any of the Separation Protocol violations it posted on OASIS. As a result, non-affiliated transmission customers could not determine whether Southern Company posted the Separation Protocol violations immediately, as required by the Standards of Conduct.

The Standards of Conduct require Southern Company to immediately post information that an employee of the Transmission Provider discloses in a manner contrary to the requirements of § 358.5(b)(1) on the OASIS.[42] Further, all OASIS database transactions, except other transmission-related communications provided for under 18 CFR 37.6(g)(2)(2008), must be stored, dated, and time stamped.[43] Accordingly, Southern Company should immediately post all non-public market information that a Southern Power employee receives and include a date and time stamp in accordance with the Standards of Conduct.[44]

[39] Southern Company Services, FERC Electric Tariff, Second Revised Volume No. 4, Original Sheet No. 6.

[40] 18 CFR 358.5(b)(3)(2008).

[41] 18 CFR 37.7(a)(2008).

[42] 18 CFR 358.5(b)(3)(2008).

[43] 18 CFR 37.7(a)(2008).

[44] 18 CFR 37.6(g)(2)(2008).

**Recommendations**

*We recommend Southern Company:*

5. Post all violations of the Separation Protocol immediately in accordance with 18 CFR 358.5(b)(3). In addition to the date the violation occurred, Southern Company should include on each document the date and time Southern Company posted the violation to OASIS in accordance with 18 CFR 37.6(g)(2).

6. Strengthen procedures and controls for maintaining e-mail distribution lists and providing reports to Southern Power that may contain non-public market information. Incorporate these procedures and other pertinent procedural enhancements in the Separation Protocol compliance training program to achieve a reduction in the number of future violations.

**Corrective Action Taken**

On November 14, 2008, Southern Company revised its Separation Protocol Violations Investigative Procedure to reflect that upon determining an actual violation has occurred, the incident must immediately be posted on OASIS. Further, Southern Company implemented a procedural change to include a date and time stamp for each document posted on OASIS relating to the violation.

Southern Company also implemented new procedures requiring employees to maintain and periodically review their e-mail distribution lists to verify employee memberships. Further, Southern Company revised its Separation Protocol training to provide additional and more detailed guidance with regard to electronic communications with Southern Power employees and, the development and maintenance of e-mail distribution lists. The revised training will be conducted online, with an anticipated completion deadline of December 31, 2008.

**V. Southern Companies' Comments on the Draft Audit Report**

*FERC Docket No. PA08–6–000*

Southern Company Services, Inc., acting as agent for Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Southern Power Company (collectively, ''Southern Companies''), submits the following comments on the Draft Audit Report provided by the Division of Audits on November 4, 2008.

In this submission, Southern Companies have purposefully sought to focus their comments on more substantive matters, and thus have not undertaken to address each and every aspect with which they disagree. In like manner, Southern Companies saw no need to set forth the substantive reasons for their disagreement with any recommendations that they have nonetheless agreed to implement. Accordingly, the absence of comment directed to a given statement, assertion, representation, or conclusion in the Draft Audit Report should not be interpreted as their agreement or tacit admission as to accuracy or completeness thereof.

1. Electronic Separation

*Recommendation No. 1:* Create procedures for reviewing files posted to Southern Power shared drives by non-Southern Power employees for non-public market information. Additionally, create procedures for reviewing the personal network drives of all employees who transfer into Southern Power for non-public market information. For each review, remove all files that contain non-public market information from the personal network drive of the transferred employee.

Southern Companies' Comments on Recommendation No. 1:

Effective November 14, 2008, Southern Companies have implemented the ''Separation Protocol Policy to Govern Monitoring of the Southern Power Shared Folders,'' which is a new policy regarding information posted to Southern Power Company (''Southern Power'') shared folders by non-Southern Power employees. This new procedure includes periodic reviews of approved access lists and content. The procedure also includes a requirement that any non-Southern Power employee who posts material to a Southern Power shared folder will notify the owner of such folder by e-mail of the posting. Southern Companies have submitted this policy to Audit Staff for review.

Effective November 14, 2008, Southern Companies have implemented the ''Separation Protocol Policy to Govern Employee Transfers to Southern Power Company,'' which is a new policy that addresses the personal network drives of employees who transfer into Southern Power. This policy will insure that these employees do not retain any documents (hard copy or electronic) containing Prohibited Information. Southern Companies have submitted this policy to Audit Staff for review.

*Recommendation No. 2:* Perform periodic reviews to ensure that Southern Power employees do not have access rights to shared network drives containing non-public market information. Additionally, these periodic reviews should include testing of the segmented network to determine whether Southern Power employees can bypass the segmented network and potentially access non-public market information.

Southern Companies' Comments on Recommendation No. 2:

Effective November 14, 2008, Southern Companies have implemented the ''Separation Protocol Policy to Govern Monitoring of the Segmented Network,'' which is a new policy that requires periodic testing of the segmented network to verify the integrity of the preventive controls and to confirm that Southern Power employees do not have access to network drives that contain Prohibited Information. Southern Companies have submitted this policy to Audit Staff for review.

*Recommendation No. 3:* Add the SPC designator to Southern Power employee names in Cool Compliance, as is already done in the Global Address List for e-mails, to spotlight a Southern Power employee having access rights granted in Cool Compliance.

Southern Companies' Comments on Recommendation No. 3:

The designator ''(SPC)'' will be added to Southern Power employee names in Cool Compliance. Southern Companies have submitted evidence of this implementation to Audit Staff.

2. Employee Separation

*Recommendation No. 4:* Dedicate employees performing transmission activities that support Southern Power's long-term wholesale energy transactions solely to Southern Power.

Southern Companies' Comments on Recommendation No. 4:

Southern Companies disagree with the findings in this section of the Draft Audit Report and the related recommendation. However, in order to resolve this issue, the procurement of long-term transmission service associated with the long-term wholesale energy transactions of Southern Power has been moved to Southern. Accordingly, all long-term transmission service requests associated with Southern Power's long-term energy transactions will be made on OASIS by Southern Power employees.

3. Posting of Separation Protocol Violations on OASIS

*Recommendation No. 5:* Post all violations of the Separation Protocol immediately in accordance with 18 CFR

358.5(b)(3). In addition to the date the violation occurred, Southern Company should include on each document the date and time Southern Company posted the violation to OASIS in accordance with 18 CFR 37.6(g)(2).

Southern Companies' Comments on Recommendation No. 5:

Southern Companies have revised their ''Separation Protocol Violations Investigative Procedure'' to state that when ''it is determined that an actual violation has occurred, the incident must be posted on OASIS *immediately.*'' Southern Companies have submitted the revised protocol to Audit Staff for review.

Southern Companies have implemented the changes necessary so that the date and time a violation is posted on OASIS will be included for each posting.

*Recommendation No. 6:* Strengthen procedures and controls for maintaining e-mail distribution lists and providing reports to Southern Power that may contain non-public market information. Incorporate these procedures and other pertinent procedural enhancements in the Separation Protocol compliance training program to achieve a reduction in the number of future violations.

Southern Companies' Comments on Recommendation No. 6:

Effective November 14, 2008, Southern Companies have implemented the revised ''Fleet Operations and Trading Floor Information, Physical Access and Visitor's Policy,'' which revision requires employees to maintain their e-mail distribution lists and to periodically review such lists to verify employee memberships. Southern Companies have also revised the Separation Protocol training to provide additional and more detailed guidance with regard to electronic communications with Southern Power employees and, the development and maintenance of e-mail distribution lists. This revised training will be conducted online, with an anticipated completion deadline of December 31, 2008. In addition, Southern Companies will continue to conduct individual training and counseling for employees that are involved in Separation Protocol investigations. Southern Companies have submitted the revised policy and applicable portions of the revised training materials to Audit Staff for review.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

**[Docket No. EL03–193–006]**

### Modesto Irrigation District; Notice of Filing

December 15, 2008.

Take notice that on December 12, 2008, Modesto Irrigation District filed an amendment to the Agreement and Stipulation jointly filed with the Commission Trial Staff on February 26, 2004 in compliance with the Commission's November 14, 2008, Order Denying Rehearing. *Modesto Irrigation District et al.*, 125 FERC ¶ 61,173 (2008).

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all the parties in this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov*, using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov*, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5 p.m. Eastern Time on January 2, 2009.

### Records Governing Off-the-Record Communications; Public Notice

December 11, 2008.

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC, Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

## ENVIRONMENTAL PROTECTION AGENCY

**[FRL–8755–2]**

### Delaware; Adequacy Status of the 2008 Reasonable Further Progress Plan for the Delaware Portion of the Philadelphia-Wilmington-Atlantic City 8-Hour Ozone Nonattainment Area Motor Vehicle Emission Budgets

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of adequacy.

**SUMMARY:** In this notice, EPA is notifying the public that we have found that the Motor Vehicle Emissions Budgets (MVEBs) in the Reasonable Further Progress Plan (RFP) submitted as a State Implementation Plan (SIP) revision on June 13, 2007 by the Delaware Department of Natural Resources and Environmental Control (DNREC), are adequate for transportation conformity purposes. As a result of EPA's finding, the State of Delaware must use the MVEBs from the June 13, 2007 RFP Plan for future conformity determinations for the 8-hour ozone standard.

**DATES:** These MVEBs are effective January 5, 2009.

**FOR FURTHER INFORMATION CONTACT:** Martin Kotsch, U.S. EPA, Region III, 1650 Arch Street, Philadelphia, PA 19103 at (215) 814–3335 or by e-mail at: *kotsch.martin@EPA.gov.* The finding is available at EPA's conformity Web site: *http://www.epa.gov/otaq/stateresources/transconf/currsips.htm.*

**SUPPLEMENTARY INFORMATION:** Throughout this document ''we,'' ''us,'' or ''our'' refer to EPA. The word ''budgets'' refers to the motor vehicle emission budgets for volatile organic compounds (VOCs) and nitrogen oxides ($NO_X$ ). The word ''SIP'' in this document refers to the RFP Plans for the Delaware portion of the Philadelphia-Wilmington-Atlantic City Ozone Nonattainment Area submitted to EPA as SIP revisions on June 13, 2007.

Today's notice is simply an announcement of a finding that EPA has already made. In this notice, EPA is notifying the public that we have found that the MVEBs in the RFP for 2008, submitted on June 13, 2007 by DNREC, are adequate for transportation conformity purposes. As a result of EPA's finding, the State of Delaware must use the MVEBs from the June 13, 2007 RFP Plan for future conformity determinations for the 8-hour ozone standard. This finding has also been announced on EPA's conformity web site: *http://www.epa.gov/otaq/stateresources/transconf/pastsips.htm.* The adequate MVEBs are provided in the following table:

TABLE 1—DELAWARE MOTOR VEHICLE EMISSIONS BUDGETS

| Nonattainment area | 2008 Reasonable Further Progress | |
|---|---|---|
| | VOC (tpd) | $NO_X$ (tpd) |
| New Castle County | 21.35 | 10.61 |
| Kent County | 9.68 | 4.14 |
| Sussex County | 12.86 | 7.09 |

Transportation conformity is required by section 176(c) of the Clean Air Act, as amended in 1990. EPA's conformity rule requires that transportation plans, programs and projects conform to state air quality implementation plans, and establishes the criteria and procedures for determining whether or not they do. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards. The criteria by which we determine whether a SIP's motor vehicle emission budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4). Please note that an adequacy review is separate from EPA's completeness review, and it also should not be used to prejudge EPA's ultimate approval of the SIP. Even if we find a budget adequate, the SIP could later be disapproved. We have described our process for determining the adequacy of submitted SIP budgets in 40 CFR 93.118(f), and have followed this rule in making our adequacy determination.

Dated: December 5, 2008.

## ENVIRONMENTAL PROTECTION AGENCY

**[FRL–8755–3]**

### Pennsylvania; Adequacy Status of the 2008 Reasonable Further Progress Plan for the Pennsylvania Portion of the Philadelphia-Wilmington-Atlantic City 8-Hour Ozone Nonattainment Area Motor Vehicle Emission Budgets

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of adequacy.

**SUMMARY:** In this notice, EPA is notifying the public that we have found that the Motor Vehicle Emissions Budgets (MVEBs) in the Reasonable Further Progress Plan (RFP) submitted as a State Implementation Plan (SIP) revision on August 29, 2007 by the Pennsylvania Department of Environmental Protection (PADEP), are adequate for transportation conformity purposes. As a result of EPA's finding, the Commonwealth of Pennsylvania must use the MVEBs from the August 29, 2007 RFP Plan for future conformity determinations for the 8-hour ozone standard.

**DATES:** These MVEBs are effective January 5, 2009.

**FOR FURTHER INFORMATION CONTACT:** Martin Kotsch, U.S. EPA, Region III, 1650 Arch Street, Philadelphia, PA

19103 at (215) 814–3335 or by e-mail at: *kotsch.martin@EPA.gov.* The finding is available at EPA's conformity Web site: *http://www.epa.gov/otaq/stateresources/transconf/currsips.htm.*

**SUPPLEMENTARY INFORMATION:** Throughout this document ''we,'' ''us'', or ''our'' refer to EPA. The word ''budgets'' refers to the motor vehicle emission budgets for volatile organic compounds (VOCs) and nitrogen oxides ($NO_X$ ). The word ''SIP'' in this document refers to the RFP Plans for the Pennsylvania portion of the Philadelphia-Wilmington-Atlantic City Ozone Nonattainment Area submitted to EPA as SIP revisions on August 29, 2007.

Today's notice is simply an announcement of a finding that EPA has already made. EPA Region III sent a letter to PADEP on November 20, 2008 stating that the MVEBs in the RFP Plan are adequate for transportation conformity purposes. As a result of EPA's finding, the State of Pennsylvania must use the MVEBs from the August 29, 2007 RFP Plan for future conformity determinations for the 8-hour ozone standard. This finding has also been announced on EPA's conformity Web site: *http://www.epa.gov/otaq/stateresources/transconf/pastsips.htm.* The adequate MVEBs are provided in the following table:

TABLE 1—PENNSYLVANIA MOTOR VEHICLE EMISSIONS BUDGETS

| Nonattainment area | 2008 Reasonable Further Progress | |
|---|---|---|
| | VOC (tpd) | $NO_X$ (tpd) |
| Philadelphia ..... | 61.09 | 108.78 |

Transportation conformity is required by section 176(c) of the Clean Air Act, as amended in 1990. EPA's conformity rule requires that transportation plans, programs and projects conform to state air quality implementation plans and establishes the criteria and procedure for determining whether or not they do. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards. The criteria by which we determine whether a SIP's motor vehicle emission budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4). Please note that an adequacy review is separate from EPA's completeness review, and it also should not be used to prejudge EPA's ultimate approval of the SIP. Even if we find a budget adequate, the SIP could later be disapproved. We have described our process for determining the adequacy of submitted SIP budgets in 40 CFR 93.118(f), and have followed this rule in making our adequacy determination.

Dated: December 5, 2008.

## Asbestos-Containing Materials in Schools; State Request for Waiver From Requirements

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed approval and request for comments.

**SUMMARY:** This action provides notice and an opportunity for public hearing, and solicits written comments on EPA's proposed waiver of the requirements of the Federal asbestos-in-schools program for the State of New Hampshire. A waiver request will be granted if EPA determines that the State of New Hampshire is implementing or intends to implement a state program of asbestos inspection and management that is at least as stringent as the federal program. This action provides notice and an opportunity for a public hearing, and solicits written comments on the waiver request submitted by the State of New Hampshire.

**DATES:** Written comments under Docket ID Number EPA–HQ–OPPT–2008–0790 must be received by February 17, 2009. Each comment must include the name and address of the submitter. Any request for a public hearing must be in writing, and be received on or before February 17, 2009, and detail specific objections to the grant of the waiver. If, during the comment period, EPA receives such a request for a public hearing, EPA will schedule a public hearing in New Hampshire following the comment period. EPA will announce the date of the public hearing in the **Federal Register**.

**ADDRESSES:** Submit your comments, identified by Docket ID Number EPA–HQ–OPPT–2008–0790, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.

2. *E-mail: bryson.jamesm@epa.gov.*

The Regional Office's official hours of business are Monday through Friday, 8:30 to 5, excluding Federal holidays.

*Instructions:* Direct your comments to Docket ID Number EPA–HQ–OPPT–2008–0790. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *http://www.regulations.gov* or e-mail, information that you consider to be CBI or otherwise protected.

The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

*Docket:* All documents in the electronic docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute.

Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy with the Asbestos Coordinator, Region 1—New England, Environmental Protection Agency, One Congress Street, Suite 1100 Mailcode SEP, Boston, MA 02114–2023. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 5 excluding Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** For general information contact: Colby Lintner, Regulatory Coordinator, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (202) 564–8182; e-mail address: *TSCA-Hotline@epa.gov.*

For technical information contact: James M. Bryson, Asbestos Coordinator, Region 1—New England, Environmental Protection Agency, One Congress Street, Suite 1100 Mailcode SEP, Boston, MA 02114–2023; telephone number: (617) 918–1524; e-mail address: *bryson.jamesm@epa.gov.*

**SUPPLEMENTARY INFORMATION:**

## I. Background

### *A. What Action Is the Agency (EPA) Taking?*

EPA is considering granting a waiver of the asbestos-in-schools program to the State of New Hampshire. This notice is issued, and the waiver, if granted, would be issued under Section 203(m) of the Toxic Substances Control Act (TSCA) and 40 CFR 763.98. Section 203 is within Title II of TSCA, the Asbestos Hazard Emergency Response Act (AHERA).

The Agency recognizes that a waiver granted to any State would not encompass schools operated under the defense dependents' education system (the third type of local education agency (LEA) defined at TSCA section 202(7) and 40 CFR 763.83, which serve dependents in overseas areas, and other elementary and secondary schools outside a State's jurisdiction, which generally includes schools in Indian country. Such schools would remain subject to EPA's asbestos-in-schools program.

### *B. What Is the Agency's Authority for Taking This Action?*

In 1987, under TSCA section 203, at 15 U.S.C. 2643, the Agency promulgated regulations that require the identification and management of asbestos-containing material by LEAs in the nation's elementary and secondary school buildings: the ''AHERA Schools Rule'' (40 CFR part 763, subpart E). Under section 203(m) of TSCA and 40 CFR 763.98, upon request by a State Governor and after notice and comment and opportunity for a public hearing in the State, EPA may waive, in whole or in part, the requirements of the asbestos-in-schools program (TSCA section 203 and the AHERA Schools Rule) if EPA determines that the State has established and is implementing or intends to implement a program of asbestos inspection and management that contains requirements that are at least as stringent as those in the Agency's asbestos-in-schools program. A State seeking a waiver must submit its request to the EPA Region in which that State is located.

### *C. When Did New Hampshire Submit Its Request for a Waiver and How Is EPA Proposing To Respond?*

On July 15, 2008, Governor John H. Lynch submitted to the EPA Region 1 Regional Administrator, a letter with supporting documentation requesting a full waiver of the requirements of EPA's asbestos-in-schools program pursuant to the AHERA statute and 40 CFR 763.98. The EPA Region 1 Administrator indicated to New Hampshire, by letter dated July 31, 2008, that the request was received. On September 30, 2008, the Manager of EPA's Toxics and Pesticides Unit submitted comments to the New Hampshire Department of Environmental Service's Air Resources Division regarding the AHERA waiver request. The State provided EPA with a response, dated October 10, 2008, in which each of EPA's comments was addressed.

EPA is hereby issuing this notice in the **Federal Register** announcing receipt of the complete New Hampshire waiver request and an opportunity for public comment and a hearing (if necessary) and, also, making the request and supporting documentation available in the public record for this notice. The Agency is also describing the information submitted by New Hampshire and EPA's preliminary determination as to how the waiver request meets the criteria for granting a waiver.

### *D. What Was EPA's Determination With Regard to the Completeness of New Hampshire's Waiver Request?*

The New Hampshire waiver request was deemed complete 30 days after receipt by EPA with regard to the required contents of a waiver request, as specified at 40 CFR 763.98. In particular, the State's waiver request contains the following information from, and representations by, New Hampshire:

1. A copy of the New Hampshire regulatory provisions relating to its program. These consist of the following, as well as other supporting documentation: (a) A copy of the proposed New Hampshire regulatory provisions related to its program of asbestos inspection and management in Schools RSA 141–E:4, I and II, Chapter Env-A 1800 Asbestos Management And Control Regulations, (b) A comparison of the New Hampshire School Program RSA 141–E:4, I and II, Chapter Env-A 1800 Asbestos Management And Control Regulations, to the EPA program at 40 CFR part 763, Subpart E, (c) an assurance of Legal Authority from New Hampshire Attorney General, and (d) a reference to the New Hampshire Compliance Assurance Response Policy (CARP) at *http://des.nh.gov/organization/commissioner/legal/carp/index.htm* which describes New Hampshire's approach to enforcement, relevant legal authorities, and penalty calculations. New Hampshire intends to use as guidance EPA's January 31, 1989 AHERA Enforcement Response Policy (ERP) to calculate penalties based on determinations of the circumstance level and extent of severity applicable to specific violations.

2. The agency that is responsible for administrating and enforcing the requirements for which a waiver is requested is the New Hampshire Department of Environmental Services (DES), Division of Air Resources, Compliance Bureau. The officials within the Compliance Bureau who are responsible for New Hampshire's asbestos-in-schools program are: Pamela G. Monroe, Compliance Bureau Administrator; Barbara L. Hoffman, Compliance and Enforcement Programs Manager; Stephen G. Cullinane, Asbestos Program Manager; Marjorie Yin, AHERA Specialist; and Elizabeth Nixon, Enforcement Section Supervisor.

3. Detailed reasons, supporting papers, and rationale for concluding that New Hampshire's asbestos inspection and management programs, for which the waiver request is made, are at least as stringent as the

requirements of the AHERA Schools Rule (40 CFR part 763, subpart E).

4. New Hampshire neither highlighted nor discussed any special situations, problems, and needs pertaining to the State's waiver request. Accordingly, no explanation of how the State would handle the issues was provided.

5. A statement of the resources that New Hampshire intends to devote to the administration and enforcement of the provisions relating to the waiver request.

6. Copies of any specific or enabling New Hampshire laws and regulations relating to the request, including provisions for assessing criminal and/or civil penalties.

7. Assurance from the Governor, that DES has the legal authority necessary to carry out the requirements relating to the waiver request, as indicated in the July 15, 2008, letter from Governor Lynch of New Hampshire to the EPA Region *TSCA-Hotline@epa.gov* 1 Regional Administrator.

*E. What Are the Criteria for EPA's Grant of the Waiver?*

EPA may waive some or all of the requirements of the Agency's asbestos-in-schools program if the Agency determines that New Hampshire has met the criteria set forth at 40 CFR 763.98. The specific criteria and EPA's preliminary determination for each relative to the grant of the waiver to New Hampshire are set forth below:

1. The State's lead agency has the legal authority necessary to carry out the provisions of asbestos inspection and management in schools relating to the waiver request.

Preliminary Determination—EPA has determined preliminarily that the statutory and regulatory provisions cited at Section I.D.1 of this notice gives DES' Division of Air Resources the legal authority necessary to carry out the provisions of asbestos inspection and management in schools relating to the waiver request.

2. The State's program of asbestos inspection and management in schools and its implementation of the program are or will be at least as stringent as the requirements of the AHERA Schools Rule.

Preliminary Determination—EPA has determined preliminarily that New Hampshire's program is at least as stringent as EPA's program. On October 10, 2008, New Hampshire addressed the EPA recommended revisions as provided in EPA's September 30, 2008 correspondence. On October 16, 2008 New Hampshire's Joint Legislative Committee on Administrative Rules approved the New Hampshire RSA 141–E:4, I and II, Chapter Env-A 1800 Asbestos Management and Control Regulations.

3. The State has an enforcement mechanism to allow it to implement the program described in the waiver request.

Preliminary Determination—EPA has determined preliminarily that the compliance and enforcement provisions of New Hampshire's asbestos-in-schools program are adequate to run the program. DES is authorized by RSA 141–E to implement a program of asbestos licensing, inspection and management. DES has the authority to enter any public building, facility, school, or rental dwelling to ''cause inspections to be carried out'' if the agency has reason to suspect the presence of regulated asbestos-containing material RSA 141–E:8. DES has authority to enter any asbestos abatement worksite, obtain samples for air testing and monitoring, procure and examine licenses issued under RSA 141–E:10 and certificates issued under RSA 141–E:11, and to request, inspect, and record information or test results relating to school asbestos abatement planning activities. RSA 141–E:13.

DES has the authority to enforce the state's asbestos laws and rules through orders and notices of abatement. RSA 141–E:14. DES has the authority to impose administrative fines up to $2,000 per violation. RSA 141–E:16. Through the NH Attorney General, DES can seek civil penalties up to $25,000 per day as well as injunctive relief for violations of RSA 141–E and any rule adopted thereunder. RSA 141–E:17. Any person who knowingly and willfully violates any provisions of RSA 141–E or any rule adopted thereunder, or who violates any term or condition of a license, certification or order issued under RSA 141–E, or who makes or certifies a material false statement relative to any document or information required under RSA 141–E is guilty of a class B felony and can be fined $25,000 per day per violation. RSA 141–E:15. To help ensure compliance with its asbestos regulations, DES will revise their Neutral Administrative Inspection Scheme (NAIS) for targeting compliance inspections. By focusing on activities where problems are most likely to occur, the NAIS is designed to maximize the effectiveness of DES' inspection/enforcement efforts toward preventing and controlling asbestos-related risks to human health and the environment.

4. The State has or will have qualified personnel to carry out the provisions relating to the waiver request.

Preliminary Determination—EPA has determined preliminarily that New Hampshire has qualified personnel to carry out the provisions of the waiver. The existing program staff includes 2 employees trained to enforce the requirements of 40 CFR part 763, subpart E. The program will be carried out by staff in the DES' Division of Air Resources, Compliance Bureau. New Hampshire commits approximately 2 persons each year to AHERA compliance monitoring and enforcement activities under the EPA TSCA Asbestos Enforcement Grant. Staff is fully trained and certified as Contractor/Supervisor, Inspector, and Management Planner.

5. The State will devote adequate resources to the administration and enforcement of the asbestos inspection and management provisions relating to the waiver request.

Preliminary Determination—EPA has determined preliminarily that the resources developed by DES' Division of Air Resources are adequate to effectively administer and enforce the provisions of the asbestos program in New Hampshire. In particular, New Hampshire is currently expected to receive funding through an EPA grant in the amount of $100,000 annually which, when combined with State matching funds of approximately $33,000, results in a total funding level of $133,000 for this FY 2009.

6. The State has responded to EPA and addressed all of the Agency's concerns in numbers 2 through 4 above.

Preliminary Determination—EPA will grant a full waiver as long as New Hampshire continues its asbestos-in-schools implementation and enforcement strategy utilizing adequate resources. EPA may evaluate periodically the adequacy of New Hampshire's program under 40 CFR 763.98, and under circumstances set forth in the regulation.

*F. What Recordkeeping and Reporting Burden Approvals Apply to the New Hampshire Waiver Request?*

The recordkeeping and reporting burden associated with waiver requests was approved by the Office of Management and Budget (OMB) under OMB control number XXXX–XXX. This document simply announces the Agency's receipt of the New Hampshire waiver request and therefore it imposes no additional burden beyond that covered under existing OMB control number XXXX–XXXX.

**II. Materials in the Official Record**

The official record, under Docket ID Number EPA–HQ–OPPT–2008–0790,

contains the New Hampshire waiver request and other supporting, relevant documents underlying the State's request and EPA's proposed approval in response to the request.

Dated: November 30, 2008.

**Robert W. Varney,**

## ENVIRONMENTAL PROTECTION AGENCY

**[FRL–8754–8; Docket ID No. EPA–HQ–ORD–2007–0517]**

## Draft Integrated Science Assessment for Particulate Matter

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of Public Comment Period.

**SUMMARY:** The U.S. Environmental Protection Agency (EPA) is announcing the availability of its ''First External Review Draft Integrated Science Assessment for Particulate Matter'' (EPA/600/R–08/139 and EPA/600/R–08/139A). The document was prepared by the National Center for Environmental Assessment (NCEA) within EPA(s Office of Research and Development as part of the review of the national ambient air quality standards (NAAQS) for particulate matter.

EPA is releasing this draft document to seek review by the Clean Air Scientific Advisory Committee (CASAC) and the public (meeting date and location to be specified in a separate **Federal Register** notice). The draft document does not represent, and should not be construed to represent, any final EPA policy, viewpoint, or determination. EPA will consider any public comments submitted in response to this notice when revising the document.

**DATES:** The public comment period begins on or about December 19, 2008. Comments must be received on or before March 13, 2009.

**ADDRESSES:** The ''First External Review Draft Integrated Science Assessment for Particulate Matter'' will be available primarily via the Internet on the National Center for Environmental Assessment's home page under the Recent Additions and Publications menus at *http://www.epa.gov/ncea.* A limited number of CD–ROM or paper copies will be available. Contact Ms. Debbie Wales by phone (919–541–4731), fax (919–541–5078), or e-mail (*wales.deborah@epa.gov*) to request either of these, and please provide your name, your mailing address, and the document title, ''First External Review Draft Integrated Science Assessment for Particulate Matter'' (EPA/600/R–08/139 and EPA/600/R–08/139A) to facilitate processing of your request.

**FOR FURTHER INFORMATION CONTACT:** For technical information, contact Dr. Lindsay Wichers Stanek, NCEA; telephone: 919–541–7792; facsimile: 919–541–2985; or e-mail: *stanek.lindsay@epa.gov.*

**SUPPLEMENTARY INFORMATION:**

### I. Information About the Document

Section 108(a) of the Clean Air Act directs the Administrator to identify certain pollutants which, among other things, ''cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare'' and to issue air quality criteria for them. These air quality criteria are to ''accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air * * *'' Under section 109 of the Act, EPA is then to establish national ambient air quality standards (NAAQS) for each pollutant for which EPA has issued criteria. Section 109 (d) of the Act subsequently requires periodic review and, if appropriate, revision of existing air quality criteria to reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. EPA is also to revise the NAAQS, if appropriate, based on the revised air quality criteria.

Particulate matter (PM) is one of six principal (or ''criteria'') pollutants for which EPA has established NAAQS. Periodically, EPA reviews the scientific basis for these standards by preparing an Integrated Science Assessment (ISA) (formerly called an Air Quality Criteria Document). The ISA and supplementary annexes, in conjunction with additional technical and policy assessments, provide the scientific basis for EPA decisions on the adequacy of the current NAAQS and the appropriateness of possible alternative standards. The Clean Air Scientific Advisory Committee (CASAC), an independent science advisory committee whose existence and whose review and advisory functions are mandated by Section 109 (d) (2) of the Clean Air Act, is charged (among other things) with independent scientific review of EPA's air quality criteria.

On June 28, 2007 (72 FR 35462), EPA formally initiated its current review of the air quality criteria for PM, requesting the submission of recent scientific information on specified topics. A draft of EPA's ''Integrated Review Plan for the National Ambient Air Quality Standard for Particulate Matter'' (EPA/452/P–08/006) was made available in October 2007 for public comment and was discussed by the CASAC via a publicly accessible teleconference consultation on November 30, 2007 (72 FR 63177). EPA finalized the plan and made it available in March 2008 (EPA/452/R–08/004; *http://www.epa.gov/ttn/naaqs/standards/pm/s_pm_2007_pd.html*). In June 2008 (73 FR 30391), EPA held a workshop to discuss, with invited scientific experts, initial draft materials prepared in the development of the PM ISA and its supplementary annexes.

The first external review draft ISA for PM will be discussed at a public meeting for review by CASAC, and public comments received will be provided to the CASAC review panel. A future **Federal Register** notice will inform the public of the exact date and time of that CASAC meeting.

### II. How to Submit Technical Comments to the Docket at *http://www.regulations.gov*

Submit your comments, identified by Docket ID No. EPA–HQ–ORD–2007–0517, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *E-mail: ORD.Docket@epa.gov.*
- *Fax:* 202–566–1753.
- *Mail:* Office of Environmental Information (OEI) Docket (Mail Code: 2822T), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. The phone number is 202–566–1752.
- *Hand Delivery:* The OEI Docket is located in the EPA Headquarters Docket Center, Room 3334 EPA West Building, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is 202–566–1744. Such deliveries are only accepted during the docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

If you provide comments by mail or hand delivery, please submit three copies of the comments. For attachments, provide an index, number pages consecutively with the comments, and submit an unbound original and three copies.

*Instructions:* Direct your comments to Docket ID No. EPA–HQ–ORD–2007–0517. Please ensure that your comments are submitted within the specified comment period. Comments received after the closing date will be marked ''late,'' and may only be considered if time permits. It is EPA's policy to include all comments it receives in the public docket without change and to make the comments available online at *http://www.regulations.gov,* including any personal information provided, unless a comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information through *http://www.regulations.gov* or e-mail that you consider to be CBI or otherwise protected. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov,* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

*Docket:* Documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other materials, such as copyrighted material, are publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the OEI Docket in the EPA Headquarters Docket Center.

Dated: December 11, 2008.

### Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at 202–564–7146. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 6, 2008 (73 FR 19833).

**FINAL EISs**

*EIS No. 20080296, ERP No. F–FHW–G40180–TX*, Grand Parkway (State Highway 99) Selected the Preferred Alternative Alignment, Segment F–2 from SH 249 to IH 45, Right-of-Way Permit and U.S. Army COE Section 404 Permit, Harris County, TX.

Summary: EPA does not object to the proposed project.

*EIS No. 20080318, ERP No. F–BLM–J65475–WY*, Pinedale Resource Management Plan, Implementation, of Public Lands Administered, Pinedale Field Office, Sublette and Lincoln Counties, WY.

Summary: No formal comment letter was sent to the preparing agency.

*EIS No. 20080449, ERP No. F–AFS–K65329–CA*, Sugarberry Project, Proposes to Protect Rural Communities from Fire Hazards by Constructing Fuel Breaks Known as Defensible Fuel Profile Zones (DFPZs), Feather River Ranger District, Plumas National Forest, Plumas, Sierra, Yuba Counties, CA.

Summary: EPA commends the decommissioning of 11.5 miles of roads, watershed improvement projects, and aspen and black oak restoration. However, EPA continues to have environmental concerns about the cumulative effects of regional Defensible Fuel Profile Zones and fuel management actions given past extraction and road construction activities and proposed soil-disturbing activities on adjacent private lands. EPA recommended concurrent road decommissioning and restoration actions, and other measures to ensure timely watershed improvements.

*EIS No. 20080450, ERP No. F–NOA–E91023–00*, Amendment 16 to the Fishery Management Plan for the Snapper Grouper Fishery, Address Overfishing, Bycatch, Management Reference Points, and Allocations for Snapper Grouper Species, Implementation, South Atlantic Region.

Summary: EPA does not object to the proposed action.

*EIS No. 20080453, ERP No. F–FTA–C54010–00*, Access to the Region's Core Project, Additional Information on the Build Alternative, To Increase Trans-Hudson Commuter Rail Capacity, Improve System Safety and Reliability between Secaucus Junction Station in NJ and midtown Manhattan, Funding, Hudson County, NJ and New York County NY.

Summary: EPA does not object to the proposed project.

*EIS No. 20080399, ERP No. FS–FTA–K54022–CA*, Central Subway/Third Street Light Rail Phase 2, Funding, San Francisco Municipal Transportation Agency, in the City and County San Francisco, CA.

Summary: EPA does not object to the proposed project.

*EIS No. 20080511, ERP No. FS–USN–K11094–00*, Developing Home Port Facilities for Three NIMITZ-Class Aircraft Carriers in Support of the U.S. Pacific Fleet, New Circumstances and Information to Supplements (the 1999 FEIS) Coronado, CA.

Summary: No formal comment letter was sent to the preparing agency.

Dated: December 16, 2008.

## ENVIRONMENTAL PROTECTION AGENCY

**[FRL–8754–2]**

### National Advisory Council for Environmental Policy and Technology

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Request for Nominations to the National Advisory Council for Environmental Policy and Technology (NACEPT).

**SUMMARY:** The U.S. Environmental Protection Agency (EPA) invites nominations from a diverse range of qualified candidates to be considered for appointment to the National Advisory Council for Environmental Policy and Technology (NACEPT). It is anticipated that vacancies will be filled

by late spring 2009. Additional sources may be utilized in the solicitation of nominees.

*Background:* NACEPT is a federal advisory committee chartered under the Federal Advisory Committee Act (FACA), Public Law 92463. EPA established NACEPT in 1988 to provide independent advice to the EPA Administrator on a broad range of environmental policy, technology and management issues. Members serve as representatives from academia, industry, non-governmental organizations, and state, local, and tribal governments. Members are appointed by the EPA Administrator for two year terms with the possibility of reappointment. The Council usually meets 3 times annually and the average workload for the members is approximately 10 to 15 hours per month. Members serve on the Council in a voluntary capacity. However, EPA provides reimbursement for travel expenses associated with official government business. EPA is seeking nominations from all sectors, including academia, industry, non-governmental organizations, and state, local and tribal governments. Nominees will be considered according to the mandates of FACA, which requires committees to maintain diversity across a broad range of constituencies, sectors, and groups.

The following criteria will be used to evaluate nominees:

—Extensive professional knowledge of environmental policy, management, and technology issues.
—Demonstrated ability to examine and analyze environmental issues with objectivity and integrity.
—Senior-level experience that fills a current need on the Council.
—Excellent interpersonal, oral and written communication, and consensus-building skills.
—Ability to volunteer approximately 10 to 15 hours per month to the Council's activities, including participation on teleconference meetings and preparation of text for Council reports and advice letters.

Nominations must include a resume and a short biography describing the professional and educational qualifications of the nominee, as well as the nominee's current business address, e-mail address, and daytime telephone number. Interested candidates may self-nominate.

**ADDRESSES:** Submit nominations to: Sonia Altieri, Designated Federal Officer, Office of Cooperative Environmental Management, U.S. EPA (1601M), 1200 Pennsylvania Avenue NW., Washington, DC 20460. You may also e-mail nominations to *altieri.sonia@epa.gov.*

**FOR FURTHER INFORMATION CONTACT:** Sonia Altieri, Designated Federal Officer, U.S. EPA; telephone (202) 564–0243; fax: (202) 564–8129; e-mail *altieri.sonia@epa.gov.*

Dated: December 5, 2008.

**Sonia Altieri,**

*Designated Federal Officer.*

## ENVIRONMENTAL PROTECTION AGENCY

**[FRL–8754–3]**

## Brown & Bryant Superfund Site; Notice of Proposed CERCLA Administrative Settlement Agreement and Order on Consent

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice; request for public comment.

**SUMMARY:** In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (''CERCLA''), 42 U.S.C. 9622(i), the EPA is hereby providing notice of a proposed administrative settlement agreement and order on consent (''Settlement Agreement'') with Union Pacific Railroad Company and BNSF Railway Company (''the Respondents'') concerning the Brown & Bryant Superfund Site in Arvin, California (''Site''). Section 122(h) of CERCLA, 42 U.S.C. 9622(h), provides EPA with the authority to enter into administrative settlements for claims for costs incurred by EPA under CERCLA.

The Settlement Agreement resolves certain claims under Sections 106 and 107 of CERCLA, 42 U.S.C. 9606, 9607. Under the Settlement Agreement, each Respondent will pay EPA $492,500, for a total of $985,000 (''Settled Response Costs''). Respondents are jointly and severally liable for the total amount due under the Settlement Agreement.

The Settled Response Costs will be deposited in the Brown & Bryant Superfund Site Special Account within the EPA Hazardous Substance Superfund. EPA will use all Settled Response Costs in the Brown & Bryant Superfund Site Special Account to relocate Arvin City Well 1, as the first phase of the remedy selected in the Record of Decision issued on September 30, 2007. If any portion of the Settled Response Costs remains in the Brown & Bryant Superfund Site Special Account after full implementation of this work, EPA will, after consultation with the Respondents, apply such funds for other response costs at or in connection with the Site. In the event that there are no additional costs at the Site to which the funds can be applied, EPA may transfer the funds to the EPA Hazardous Substance Superfund.

The Settlement Agreement may be examined at the following EPA Web site: *http://www.epa.gov/region09/brown&bryant.* The Settlement Agreement also may be examined at the U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, Office of Regional Counsel, San Francisco, California 94105, and also at the public information repository located at the Kern County Library, Arvin Branch, 201 Campus Drive, Arvin, California 93203. A paper or electronic copy of the Settlement Agreement may also be obtained from Joshua Wirtschafter, who can be contacted by mail at U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street (mail code ORC–3), San Francisco, California 94105–3901, by telephone at (415) 972–3912, by fax at (415) 947–3570, or by e-mail at *Wirtschafter.Joshua@epa.gov.*

**DATES:** EPA must receive comments by January 20, 2009 relating to the Settlement Agreement. EPA will consider all comments it receives during this period, and may not consent to the settlement if any comments disclose facts or considerations indicating that the settlement is inappropriate, improper, or inadequate.

**ADDRESSES:** Written comments may be submitted to Joshua Wirtschafter by mail, fax, or e-mail to the U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street (mail code ORC–3), San Francisco, California 94105–3901, by telephone at (415) 972–3912, by fax at (415) 947–3570, or by e-mail at *Wirtschafter.Joshua@epa.gov.*

**FOR FURTHER INFORMATION CONTACT:** Additional information about the Site and about the proposed Settlement Agreement may be obtained by contacting Joshua Wirtschafter at (415) 972–3912.

Dated: December 8, 2008.

**Nancy Lindsey,**

## Carbofuran; Notice of Receipt of Request to Voluntarily Cancel Carbofuran Pesticide Registrations

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In accordance with section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA is issuing a notice of receipt of a request dated September 29, 2008 by the registrant to voluntarily cancel some registrations and amend other registrations to terminate uses of certain end-use products containing the pesticide carbofuran. The request would terminate flowable carbofuran use in or on alfalfa, cotton, ornamentals, popcorn, small grains (wheat, oats and barley) soybeans, sugarcane, sweet corn, and tobacco. The request would also terminate all carbofuran products registered under FIFRA section 24 Special Local Need Labels for use in or on corn (field), CRP acres, cucumbers, grapes, melons, ornamentals (container and field production), peppers (including Chiles and bell), sorghum, squash, sugar beets, sugarcane (soil applied), tobacco, and small grains (wheat, oats, and barley). The request would also terminate, subject to a two-year phase-out period, the use of flowable carbofuran as a post-plant application to artichokes. The request proposes to cancel the use of granular carbofuran on bananas, coffee, cucumbers, melons, and squash. The request would not terminate the last carbofuran products registered for use in the US.

**DATES:** Comments must be received on or before January 20, 2009.

**ADDRESSES:** Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2005–0162 by one of the following methods:

• *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.

• *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

• *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket Facility's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

*Instructions*: Direct your comments to docket ID number EPA–HQ–OPP–2005–0162. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

*Docket*: All documents in the docket are listed in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

**FOR FURTHER INFORMATION CONTACT:** Jude Andreasen, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–9342; fax number: (703) 308–7070; e-mail address: *andreasen.jude@epa.gov*.

**SUPPLEMENTARY INFORMATION:**

### I. General Information

*A. Does this Action Apply to Me?*

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

*B. What Should I Consider as I Prepare My Comments for EPA?*

1. *Submitting CBI*. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments*. When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

**II. Background on the Receipt of Requests to Cancel Registrations**

This notice announces receipt by EPA of a written request dated September 29, 2008 from FMC Corporation, the sole registrant of carbofuran, to cancel carbofuran product registrations on certain uses. Carbofuran is an N-methyl carbamate insecticide. The affected products and uses are provided in Table 1. This request will result in the termination of the use of flowable and granular carbofuran products on certain crops in the United States. The request would also terminate all carbofuran products registered under FIFRA section 24 Special Local Need Labels for use in or on corn (field), CRP acres, cucumbers, grapes, melons, ornamentals (container and field production), peppers (including Chiles and bell), sorghum, squash, sugar beets, sugarcane (soil applied), tobacco, and small grains (wheat, oats, and barley). The request would also terminate, subject to a two-year phase-out period, the use of flowable carbofuran as a post-plant application to artichokes. The request proposes to cancel the use of granular carbofuran on bananas, coffee, cucumbers, melons, and squash. The request would not terminate the last carbofuran products registered for use in the US. The request does not affect the use of granular carbofuran (products 279–3023 and 279–2712) on pumpkin. This request does not affect the existing volume limitations (2,500 pounds active ingredient per year) for granular product manufacture. EPA intends to grant this request for cancellation at the close of the comment period for this announcement unless the Agency receives a request within the comment period to transfer the registration to a new registrant or unless the registrant withdraws their request within this period. Upon acceptance of this request, any sale, distribution, or use of products listed in this notice will be permitted only if such sale, distribution, or use is consistent with the terms as described in the final order. Any carbofuran uses not affected by this voluntary cancellation request, and any uses for which the requested cancellation do not become final, will remain subject to cancellation through the process that the Agency initiated in a draft Notice of Intent to Cancel (NOIC) carbofuran, January 8, 2008, which can be accessed in the public docket at *www.regulations.gov*, docket number EPA–HQ–OPP–2005–0162. The basis for the draft NOIC was that pesticide products containing carbofuran, when used in accordance with widespread and commonly recognized practice, generally cause unreasonable adverse effects on humans and the environment. EPA further determined that none of the available alternatives to cancellation of all registered uses could reduce the potential risks to acceptable levels.

**III. What Action is the Agency Taking?**

This notice announces receipt by EPA of a request from FMC Corporation to cancel certain uses of flowable and granular carbofuran. The affected products and the registrants making the request are identified in Table 1 and Table 2 of this unit.

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30–day public comment period on the request for voluntary cancellation or use termination. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180–day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or

2. The Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

FMC Corporation, a carbofuran registrant, has requested that EPA waive the 180–day comment period. EPA will provide a 30–day comment period on the proposed requests.

Unless a request is withdrawn by the registrant within 30 days of publication of this notice, or if the Agency determines that there are substantive comments that warrant further review of this request, an order will be issued canceling the affected registrations.

**IV. What is the Agency's Authority for Taking this Action?**

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the Administrator may approve such a request.

**V. Procedures for Withdrawal of Request and Considerations for Reregistration of Carbofuran**

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before January 20, 2009. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the products(s)

have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

**VI. Provisions for Disposition of Existing Stocks**

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action.

In any order issued in response to this request for cancellation of product registrations, EPA proposes to include the following provisions for the treatment of any existing stocks of the products identified or referenced in Table 1. The registrant will be allowed to sell and distribute the subject products through the effective date of this cancellation order. In addition, existing stocks of carbofuran products may be sold or used until they are depleted, or until tolerances are revoked.

The Agency intends to allow use on artichokes through December 31, 2010. The Agency is soliciting comment on whether there are sufficient stocks of product to allow for this use, or whether additional carbofuran production will be needed to address this use.

An existing stocks provision was included in a **Federal Register** notice published December 10, 2008 regarding a number of pesticide products, including several carbofuran products. The existing stocks provision in that notice will be superseded by the existing stocks provision in the cancellation order for today's notice.

**List of Subjects**

Environmental protection, Pesticides and pests.

## ENVIRONMENTAL PROTECTION AGENCY

**[EPA–HQ–OPP–2008–0879; FRL–8394–4]**

## Registration Review; 2-((hydroxymethyl)-amino)ethanol Docket Opened for Review and Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has established a registration review docket for the pesticide, 2-((hydroxymethyl)-amino)ethanol. With this document, EPA is opening the public comment period for this registration review. Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Registration review dockets contain information that will assist the public in understanding the types of information and issues that the Agency may consider during the course of registration reviews. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment.

**DATES:** Comments must be received on or before March 19, 2009.

**ADDRESSES:** Submit your comments identified by the docket identification (ID) number for the pesticide provided in the table in Unit III.A., by one of the following methods:

• *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.

• *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

• *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket Facility's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

*Instructions*: Direct your comments to the docket ID number listed in the table in Unit III.A. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

*Docket*: All documents in the docket are listed in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

**FOR FURTHER INFORMATION CONTACT:** *For pesticide specific information contact*: The Chemical Review Manager identified in the table in Unit III.A.

*For general information contact*: Kevin Costello, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 305–5026; fax number: (703) 308–8090; e-mail address: *costello.kevin @epa.gov*.

**SUPPLEMENTARY INFORMATION:**

**I. General Information**

*A. Does this Action Apply to Me?*

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, farmworker, and agricultural advocates;

the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

*B. What Should I Consider as I Prepare My Comments for EPA?*

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide(s) discussed in this document, compared to the general population.

## II. Authority

EPA is initiating its review of the pesticide identified in this document pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA section 3(a), a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section 3(c)(5). When used in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human dietary risk from residues that result from the use of a pesticide in or on food.

## III. Registration Reviews

*A. What Action is the Agency Taking?*

As directed by FIFRA section 3(g), EPA is reviewing the pesticide registration identified in the table in this unit to assure that it continues to satisfy the FIFRA standard for registration—that is, it can still be used without unreasonable adverse effects on human health or the environment. A pesticide's registration review begins when the Agency establishes a docket for the pesticide's registration review case and opens the docket for public review and comment. At present, EPA is opening a registration review docket for the case identified in the following table.

TABLE—REGISTRATION REVIEW DOCKET OPENING

| Registration Review Case Name and Number | Docket ID Number | Chemical Review Manager, Telephone Number, E-mail Address |
|---|---|---|
| 2-((hydroxymethyl)-amino)ethanol (Case 3070) | EPA–HQ–OPP–2008–0879 | Lance Wormell,<br>703-603-0523,<br>*wormell.lance@epa.gov* |

*B. Docket Content*

1. *Review dockets.* The registration review dockets contain information that the Agency may consider in the course of the registration review. The Agency may include information from its files including, but not limited to, the following information:

- An overview of the registration review case status.
- A list of current product registrations and registrants.
- **Federal Register** notices regarding any pending registration actions.
- **Federal Register** notices regarding current or pending tolerances.
- Risk assessments.
- Bibliographies concerning current registrations.
- Summaries of incident data.
- Any other pertinent data or information.

Each docket contains a document summarizing what the Agency currently knows about the pesticide case and a preliminary work plan for anticipated data and assessment needs. Additional documents provide more detailed information. During this public comment period, the Agency is asking that interested persons identify any additional information they believe the Agency should consider during the registration review of this pesticide. The Agency identifies in each docket the areas where public comment is specifically requested, though comment in any area is welcome.

2. *Other related information.* More information on this case, including the

active ingredients for this case, may be located in the registration review schedule on the Agency's website at *http://www.epa.gov/oppsrrd1/registration_review/schedule.htm*. Information on the Agency's registration review program and its implementing regulation may be seen at *http://www.epa.gov/oppsrrd1/registration_review*.

3. *Information submission requirements.* Anyone may submit data or information in response to this document. To be considered during a pesticide's registration review, the submitted data or information must meet the following requirements:

• To ensure that EPA will consider data or information submitted, interested persons must submit the data or information during the comment period. The Agency may, at its discretion, consider data or information submitted at a later date.

• The data or information submitted must be presented in a legible and useable form. For example, an English translation must accompany any material that is not in English and a written transcript must accompany any information submitted as an audiographic or videographic record. Written material may be submitted in paper or electronic form.

• Submitters must clearly identify the source of any submitted data or information.

• Submitters may request the Agency to reconsider data or information that the Agency rejected in a previous review. However, submitters must explain why they believe the Agency should reconsider the data or information in the pesticide's registration review.

• As provided in 40 CFR 155.58, the registration review docket for each pesticide case will remain publicly accessible through the duration of the registration review process; that is, until all actions required in the final decision on the registration review case have been completed.

**List of Subjects**

Environmental protection, Pesticides and pests, antimicrobials, 2-((hydroxymethyl)-amino)ethanol.

Dated: December 11, 2008.

## ENVIRONMENTAL PROTECTION AGENCY

**[EPA–HQ–OPP–2008–0767 ; FRL–8395–1]**

## Registration Review; 3H-1,2-Dithiol-3-one, 4,5-dichloro Docket Opened for Review and Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has established registration review dockets for the pesticide listed in the table in Unit III.A. With this document, EPA is opening the public comment period for these registration reviews. Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Registration review dockets contain information that will assist the public in understanding the types of information and issues that the Agency may consider during the course of registration reviews. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment.

**DATES:** Comments must be received on or before March 19, 2009.

**ADDRESSES:** Submit your comments identified by the docket identification (ID) number for the specific pesticide of interest provided in the table in Unit III.A., by one of the following methods:

• *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.

• *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

• *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket Facility's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

*Instructions*: Direct your comments to the docket ID numbers listed in the table in Unit III.A. for the pesticide you are commenting on. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

*Docket*: All documents in the docket are listed in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

**FOR FURTHER INFORMATION CONTACT:** *For pesticide specific information contact*: The Chemical Review Manager identified in the table in Unit III.A. for the pesticide of interest.

*For general information contact*: Kevin Costello, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental

Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 305–5026; fax number: (703) 308–8090; e-mail address: *costello.kevin @epa.gov*.

**SUPPLEMENTARY INFORMATION:**

## I. General Information

### *A. Does this Action Apply to Me?*

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, farmworker, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

### *B. What Should I Consider as I Prepare My Comments for EPA?*

1. *Submitting CBI*. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments*. When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

3. *Environmental justice*. EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide discussed in this document, compared to the general population.

## II. Authority

EPA is initiating its reviews of the pesticide identified in this document pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA section 3(a), a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section 3(c)(5). When used in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human dietary risk from residues that result from the use of a pesticide in or on food.

## III. Registration Reviews

### *A. What Action is the Agency Taking?*

As directed by FIFRA section 3(g), EPA is reviewing the pesticide registrations identified in the table in this unit to assure that they continue to satisfy the FIFRA standard for registration—that is, they can still be used without unreasonable adverse effects on human health or the environment. A pesticide's registration review begins when the Agency establishes a docket for the pesticide's registration review case and opens the docket for public review and comment. At present, EPA is opening registration review docket for the case identified in the following table.

TABLE—REGISTRATION REVIEW DOCKETS OPENING

| Registration Review Case Name and Number | Docket ID Number | Chemical Review Manager, Telephone Number, E-mail Address |
|---|---|---|
| 3H-1,2-Dithiol-3-one, 4,5-dichloro | EPA–HQ–OPP–2008–0767 | Eliza Blair, (703) 308-7279, *blair.eliza@epa.gov* |

### *B. Docket Content*

1. *Review dockets*. The registration review dockets contain information that the Agency may consider in the course of the registration review. The Agency may include information from its files including, but not limited to, the following information:

- An overview of the registration review case status.
- A list of current product registrations and registrants.
- **Federal Register** notices regarding any pending registration actions.
- **Federal Register** notices regarding current or pending tolerances.
- Risk assessments.
- Bibliographies concerning current registrations.
- Summaries of incident data.
- Any other pertinent data or information.

Each docket contains a document summarizing what the Agency currently knows about the pesticide case and a preliminary work plan for anticipated data and assessment needs. Additional documents provide more detailed information. During this public comment period, the Agency is asking

that interested persons identify any additional information they believe the Agency should consider during the registration reviews of these pesticides. The Agency identifies in each docket the areas where public comment is specifically requested, though comment in any area is welcome.

2. *Other related information.* More information on these cases, including the active ingredients for each case, may be located in the registration review schedule on the Agency's website at *http://www.epa.gov/oppsrrd1/registration_review/schedule/htm.* Information on the Agency's registration review program and its implementing regulation may be seen at *http://www.epa.gov/oppsrrd1/registration_review.*

3. *Information submission requirements.* Anyone may submit data or information in response to this document. To be considered during a pesticide's registration review, the submitted data or information must meet the following requirements:

• To ensure that EPA will consider data or information submitted, interested persons must submit the data or information during the comment period. The Agency may, at its discretion, consider data or information submitted at a later date.

• The data or information submitted must be presented in a legible and useable form. For example, an English translation must accompany any material that is not in English and a written transcript must accompany any information submitted as an audiographic or videographic record. Written material may be submitted in paper or electronic form.

• Submitters must clearly identify the source of any submitted data or information.

• Submitters may request the Agency to reconsider data or information that the Agency rejected in a previous review. However, submitters must explain why they believe the Agency should reconsider the data or information in the pesticide's registration review.

• As provided in 40 CFR 155.58, the registration review docket for each pesticide case will remain publicly accessible through the duration of the registration review process; that is, until all actions required in the final decision on the registration review case have been completed.

## FEDERAL COMMUNICATIONS COMMISSION

### Notice of Public Information Collection(s) Being Submitted for Review to the Office of Management and Budget

December 15, 2008.

**SUMMARY:** The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501–3520. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

**DATES:** Written Paperwork Reduction Act (PRA) comments should be submitted on or before January 20, 2009. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, (202) 395–5887, or via fax at 202–395–5167 or via Internet at *Nicholas_A._Fraser@omb.eop.gov* and to *Judith-B. Herman@fcc.gov,* Federal Communications Commission, or an e-mail to *PRA@fcc.gov.* To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page *http://reginfo.gov/public/do/PRAMain,* (2) look for the section of the Web page called ''Currently Under Review'', (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, and (6) when the list of FCC ICRs currently under review appears, look for the title of this ICR (or its OMB Control Number, if there is one) and then click on the ICR Reference Number to view detailed information about this ICR.

**FOR FURTHER INFORMATION CONTACT:** For additional information or copies of the information collection(s), contact Judith B. Herman at 202–418–0214 or via the Internet at *Judith-B.Herman@fcc.gov.*

**SUPPLEMENTARY INFORMATION:**

*OMB Control Number:* 3060–0329.

*Title:* Section 2.955, Equipment Authorization—Verification (Retention of Records).

*Form No.:* N/A.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business or other for-profit and not-for-profit institutions.

*Number of Respondents:* 5,655 respondents; 5,655 responses.

*Estimated Time per Response:* 18 hours (average).

*Frequency of Response:* One time and on occasion reporting requirements, recordkeeping requirement, and third party disclosure requirements.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 4(i), 302, 303(g), and 303(r) of the Communications Act of 1934, as amended; 47 U.S.C. sections 154(i), 302 and 303(r).

*Total Annual Burden:* 101,790 hours.

*Total Annual Cost:* $1,131,000.

*Privacy Act Impact Assessment:* N/A.

*Nature and Extent of Confidentiality:* Commission rules require equipment testing to determine performance and compliance with FCC standards. This testing is typically done by independent testing laboratories whose measurement facility has been reviewed by the Commission, or by an accrediting organization recognized by the Commission.

*Needs and Uses:* The Commission will submit this information collection (IC) to the OMB as an extension during this comment period to obtain the full three-year clearance from them. There is

no change in the reporting, recordkeeping and/or third party disclosure requirements. There is no change in the estimated number of respondents/responses, burden hours or annual costs.

Section 2.955 describes for each equipment device subject to verification, the responsible party, as shown in 47 CFR 2.909 shall maintain the records listed as follows:

(1) A record of the original design drawings and specifications and all changes that have been made that may affect compliance with the requirements of § 2.953.

(2) A record of the procedures used for production inspection and testing (if tests were performed) to insure the conformance required by § 2.953. (Statistical production line emission testing is not required.)

(3) A record of the measurements made on an appropriate test site that demonstrates compliance with the applicable regulations in this chapter. The record shall:

(i) Indicate the actual date all testing was performed;

(ii) State the name of the test laboratory, company, or individual performing the verification testing. The Commission may request additional information regarding the test site, the test equipment or the qualifications of the company or individual performing the verification tests;

(iii) Contain a description of how the device was actually tested, identifying the measurement procedure and test equipment that was used;

(iv) Contain a description of the equipment under test (EUT) and support equipment connected to, or installed within, the EUT;

(v) Identify the EUT and support equipment by trade name and model number and, if appropriate, by FCC Identifier and serial number;

(vi) Indicate the types and lengths of connecting cables used and how they were arranged or moved during testing;

(vii) Contain at least two drawings or photographs showing the test set-up for the highest line conducted emission and showing the test set-up for the highest radiated emission. These drawings or photographs must show enough detail to confirm other information contained in the test report. Any photographs used must be focused originals without glare or dark spots and must clearly show the test configuration used;

(viii) List all modifications, if any, made to the EUT by the testing company or individual to achieve compliance with the regulations in this chapter;

(ix) Include all of the data required to show compliance with the appropriate regulations in this chapter; and

(x) Contain, on the test report, the signature of the individual responsible for testing the product along with the name and signature of an official of the responsible party, as designated in § 2.909.

(4) For equipment subject to the provisions in part 15 of this chapter, the records shall indicate if the equipment was verified pursuant to the transition provisions contained in § 15.37 of this chapter.

(b) The records listed in paragraph (a) of this section shall be retained for two years after the manufacture of said equipment item has been permanently discontinued, or until the conclusion of an investigation or a proceeding if the manufacturer or importer is officially notified that an investigation or any other administrative proceeding involving his equipment has been instituted.

The Commission needs and requires the information under FCC Rules at 47 CFR Parts 15 and 18, that RF equipment manufacturers (respondents) ''self determine'' their responsibility for adherence to these rules, as guided by the following criteria:

(a) Whether the RF equipment device that is being marketed complies with the applicable Commission Rules; and

(b) If the operation of the equipment is consistent with the initially documented test results, as reported to the Commission.

The information collection is essential to controlling potential interference to radio communications.

(a) Companies that manufacture RF equipment are the anticipated respondents to this information collection.

(b) This respondent ''public'' generally remains the same, although the types of equipment devices that they manufacture may change in response to changing technologies and to new spectrum allocations made by the Commission.

(c) In addition, the Commission may establish new technical operating standards in response to these changing technologies and in allocating spectrum, which these RF equipment manufacturers must meet to receive their equipment authorization from the FCC.

(d) However, the process that RF equipment manufacturers must follow to verify their compliance, as mandated by 47 CFR Section 2.955 of FCC Rules, will not change despite new technical standards established for specific equipment.

This information collection, therefore, applies to a variety of equipment, which is currently manufactured, may be manufactured in the future, and that operates under varying technical standards.

Federal Communications Commission.

## GENERAL SERVICES ADMINISTRATION

**[OMB Control No. 3090–0280]**

### General Services Administration Acquisition Regulation; Information Collection; Tax Adjustment Clause 552.270–30

**AGENCY:** Office of the Chief Acquisition Officer, General Services Administration (GSA).

**ACTION:** Notice of request for comments regarding a renewal to an existing OMB clearance.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the General Services Administration will be submitting to the Office of Management and Budget (OMB) a request to review and approve a renewal of a currently approved information collection requirement regarding tax adjustments under leasehold acquisitions. This collection requires contractors to submit information to the Government to substantiate an increase or decrease in real estate taxes under a leasehold acquisition so that the Government can make tax adjustments as necessary to the leasehold acquisition. Information collected under this authority is necessary to assess proper tax adjustments against each leasehold acquisition. The clearance currently expires on April 30, 2009.

Public comments are particularly invited on: Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; ways to minimize the burden of the information collection on respondents including through the use of automated collection techniques or other forms of information technology.

**DATES:** Submit comments on or before February 17, 2009.

**FOR FURTHER INFORMATION CONTACT:** Edward Chambers, Procurement Analyst, Contract Policy Division, GSA (202) 501–3221.

**ADDRESSES:** Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the Regulatory Secretariat (VPR), General Services Administration, Room 4041 1800 F Street, NW., Washington, DC 20405. Please cite OMB Control No. 3090–0280, Tax Adjustment Clause 552.270–30, in all correspondence.

**SUPPLEMENTARY INFORMATION:**

**A. Purpose**

The General Services Administration (GSA) has various mission responsibilities related to the acquisition and provision supply, service, and leasehold acquisitions. These mission responsibilities generate requirements that are realized through the solicitation and award of various types of contracts. Individual solicitations and resulting contracts may impose unique information collection and reporting requirements on contractors, not required by regulation, but necessary to evaluate particular program accomplishments, measure success in meeting program objectives, or adjust acquisition requirements. Leasehold acquisitions provide for real estate tax adjustments due to changes in real estate taxes on land and buildings occupied by the Government. In a leasehold acquisition, the lessor shall provide the following information regarding real estate taxes: (1) Any notice which may affect the valuation of land and buildings covered by this lease for real estate tax purposes; (2) Any notice of a tax credit or tax refund related to land and buildings covered by this lease; and (3) Each tax bill related to land and building covered by this lease. The lessor is also required to provide the contracting officer a proper invoice including evidence of payment to receive the tax adjustment. Depending on the leasehold acquisition, the tax adjustment can result in either the lessor receiving a credit or the Government receiving a credit.

**B. Annual Reporting Burden.**

*Respondents*: 7041.
*Responses Per Respondent*: 1.
*Total Responses*: 7041.
*Hours Per Response*: 6.
*Total Burden Hours*: 42,246.
*Obtaining copies of proposals*: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat (VPR), 1800 F Street, NW., Room 4041, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 3090–0280, Tax Adjustment Clause 552.270–30, in all correspondence.

Dated: December 10, 2008.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Notice of the Development of a Web-Based System Used To Request Meetings Regarding Medical Countermeasures to Naturally Occurring or Manmade Threats

**AGENCY:** Department of Health and Human Services, Office of the Secretary.

**ACTION:** Notice.

**SUMMARY:** The Department of Health and Human Services (HHS) is announcing the availability of a new Web-based system, MedicalCountermeasures.gov. MedicalCountermeasures.gov will enable external stakeholders to request meetings with personnel from the organizations that comprise the Public Health Emergency Medical Countermeasures Enterprise (PHEMCE) regarding medical countermeasures to threats to public health, either naturally occurring or manmade. The goal of these meetings is to provide an opportunity for stakeholders to share information regarding medical countermeasures. The system can be accessed from the Web site *https://www.medicalcountermeasures.gov/RequestMeeting.aspx.*

During the BioShield Stakeholders Workshop, HHS Secretary Michael O. Leavitt announced that HHS would develop a Web based system ''through which those in industry and the research and development community can reach the people they need in the federal government, whether they're looking at a basic level of research or are focused on end-stage development.'' In fulfillment of this promise, HHS has developed MedicalCountermeasures.gov.

MedicalCountermeasures.gov enables external stakeholders to request a meeting with federal representatives from participating PHEMCE agencies regarding medical countermeasures they are developing for use in response to a public health emergency. The information will then be routed to personnel within the relevant PHEMCE agencies, which currently include: The National Institutes of Health (NIH), the Office of the Biomedical Advanced Research and Development Authority (BARDA), the Food and Drug Administration (FDA), and the Department of Veterans Affairs (VA). MedicalCountermeasures.gov also provides information on upcoming and past conferences; procurements and grants; regulatory information; and strategic plans from throughout the PHEMCE agencies.

**FOR FURTHER INFORMATION CONTACT:** Elizabeth Jarrett, M.A., Office of the Biomedical Advanced Research and Development, Office of the Assistant Secretary for Preparedness and Response, Department of Health and Human Services, 330 Independence Ave., SW., Room G640, Washington, DC 20201; phone: 202–260–1200; e-mail address: *BARDA@hhs.gov.*

Dated: December 9, 2008.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Opportunity for Cosponsorship of the Integrated Medical, Public Health, Preparedness, and Response Training Summit

**AGENCY:** Department of Health and Human Services, Office of the Secretary.

**ACTION:** Notice.

**SUMMARY:** The Department of Health and Human Services' Office of the Assistant Secretary for Preparedness and Response (ASPR) and Office of the Surgeon General (OSG) announce the opportunity for both private sector and non-profit entities to cosponsor an annual training summit. The focus of this training is medical and public health preparedness and response during disasters and emergencies. Potential cosponsors must have a mutual interest in the subject matter, the capability to provide logistical and educational support, and be willing to participate substantively in the cosponsored activity.

**DATES:** To receive consideration, a request to participate as a cosponsor must be received by the close of business on February 2, 2009. Requests will meet the deadline if they are either (1) received on or before the deadline

date; or (2) postmarked on or before the deadline date. Private metered postmarks will not be acceptable as proof of timely mailing. Hand-delivered requests must be received by 5 p.m. on the deadline date. Requests that are received after the deadline date will be returned to the sender.

**ADDRESSES:** Notification of interest and proposal for cosponsorship should be sent to Leslie Beck, National Disaster Medical System, 330 Independence Ave., SW, Room G–644, Washington, DC 20201 or if mailing by FedEx/UPS please send them to Leslie Beck, 409 Third Street, SW., Suite 330, Washington, DC 20024. Phone number: (202) 205–5929, fax number: (800) 872–5945. Notifications and proposals may also be submitted by electronic mail to *leslie.beck@hhs.gov.*

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information on the training and cosponsorship should be directed to Leslie Beck, National Disaster Medical System, 330 Independence Ave., SW., Room G–644, Washington, DC 20201 or if mailing by FedEx/UPS please send them to Leslie Beck, 409 Third Street, SW., Suite 330, Washington, DC 20024. Phone number: (202) 205–5929, fax number: (800) 872–5945, e-mail: *leslie.beck@hhs.gov.*

**SUPPLEMENTARY INFORMATION:**

**Description**

The Integrated Medical, Public Health, Preparedness, and Response Training Summit brings together several national-level entities within the Department of Health and Human Services (HHS) that have, in the past, held separate organizational meetings, training summits and leadership conferences. These entities collectively organized a joint training summit scheduled to be held in April, 2009. These organizations include the U.S. Public Health Service (PHS), National Disaster Medical System (NDMS), Medical Reserve Corps (MRC) and the Emergency System for Advance Registration of Volunteer Health Professionals (ESAR–VHP). The combination into an integrated Training Summit permits coordination, collaboration and interaction amongst the target audience—the leaders and members of these response partner organizations. The Training Summit will enhance the knowledge, skills, and abilities of participants, which in turn will improve their competency to deliver public health and medical care services during emergencies and disasters of any origin. Networking with these expert faculty members and fellow participants, many of whom are the nation's leaders in the area of public health emergencies, will give access to the latest in emergency response and coordination capabilities.

These organizations are authorized under sections 203, 319I, 2812, and 2813 of the Public Health Service Act, among other HHS authorities.

**Requirements of Cosponsorship**

ASPR and OSG are seeking a cosponsor(s) for the 2010 national training summit for full-time, intermittent, and other potential Federal, State and local responders, as well as the leaders of the various component organizations. The summit will focus on skills development, knowledge enhancement and information sharing regarding the variety of support services necessary during a public health emergency.

Following the training summit, participants will be better trained for their respective missions and will understand how other public health and medical response components contribute to the full spectrum of care available during an emergency.

Cosponsoring organizations must have a substantive interest in the goals of the training summit and are expected to be active participants. Cosponsorship involves joint development, support, implementation, and evaluation of the training summit with the ASPR, OSG and other cosponsors.

The ASPR and OSG are seeking a cosponsor(s) to partner in ways that accord with its particular circumstances. For example, a cosponsor may assist ASPR and OSG by:

(1) Participating in the development of the training curriculum, planning of educational demonstrations, and designation of professional organizations and experts in those specific activities;

(2) Participating in the review, development, and approval of all materials produced for educational purposes and promotion of the event; and all materials, signage, press releases, etc. that mention the cosponsorship;

(3) Participating in the coordination of logistical concerns; e.g., training location, training structure, insurance, etc.

A copy of the Department of Health and Human Services guidelines on cosponsorship is available upon request. HHS will reserve the right to determine both the form and the content of the information provided to the training participants.

**Availability of Funds**

There are no Federal funds available for this cosponsorship. All cosponsors agree to not use the event as a vehicle to sell or promote products or services. Any incidental promotional materials cannot imply that the HHS endorses any products or services.

**Eligibility for Cosponsorship**

To be eligible, an interested party must be: (1) Be a public or a private non-profit or for-profit organization or corporation, (2) be an entity that, by virtue of its nature and purpose, has a legitimate interest in the subject matter, (3) agree to sign a cosponsorship agreement with the HHS which will set forth the details of the cosponsored activity, including the requirements that any fees raised should not be designed to exceed the cosponsor's costs, and fees collected by the cosponsor should be limited to the amount necessary to cover the cosponsor's related operating expenses and (4) participate substantively in the training summit (not just provide funding or logistical support).

**Cosponsorship Proposal**

Each cosponsorship proposal should contain a description of: (1) The entity or organization; (2) its background in training and educational activities; (3) its proposed involvement in the cosponsored activity to include evidence of a substantive interest; and (4) plan for implementation with timeline(s). Selected cosponsors shall furnish the personnel, materials, equipment and funding necessary to carry out their activities in cosponsoring the 2010 training summit.

**Evaluation Criteria**

In exploring potential cosponsors for the training summit, ASPR and OSG will use the following evaluation criteria, as appropriate and relevant, to determine whether HHS will engage in a cosponsorship with particular entities:

(1) Requester's qualifications and capability to fulfill cosponsorship responsibilities;

(2) Requester's experience in administering large national training programs;

(3) Requester's specific work previously performed or currently being performed, with particular emphasis on those national programs/projects dealing with educational activities with the Federal Government, schools, organizations, and individuals;

(4) Requester's personnel: Name, professional qualifications and specific experience of key personnel who would be available to work on these projects;

(5) The ability of the interested party to arrange for the funding of the development and implementation of the training summit. The requester's description of financial management to include the discussion of experience in developing an annual budget and collecting and managing monies from organizations and/or individuals;

(6) Requester's proposed plan for managing the training program, including such financial aspects as cost of venue, materials, promotion, distribution and program management.

**Other Information**

Prior to the selection of the cosponsors, HHS staff will meet separately with those interested parties who best meet the evaluation criteria. Moreover, other federal agencies may be involved in the cosponsorship process. As a general rule, restrictions will apply to the use of any HHS logos, so as to avoid suggestions that HHS, or any other department or agency of the Federal Government, endorses any of the products involved in the training summit. Once details of the program have been mutually agreed upon, cosponsors will be required to enter into a cosponsorship agreement with the Department of Health and Human Services setting forth the rights and responsibilities of the cosponsor(s) and HHS, especially the right of HHS to approve training messages.

Dated: December 8, 2008.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

**[Document Identifier: CMS–339 and CMS–R–144/CMS–368]**

### Agency Information Collection Activities: Proposed Collection; Comment Request

**AGENCY:** Centers for Medicare & Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare & Medicaid Services (CMS) is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicare Provider Cost Report Reimbursement Questionnaire; *Use:* Form CMS–339 must be completed by all providers that submit full cost reports to the Medicare intermediary under Title XVIII of the Social Security Act. It is designed to answer pertinent questions about key reimbursement concepts found in the cost report and to gather information necessary to support certain financial and statistical entries on the cost report. The questionnaire is used by the Medicare intermediaries as a tool to help them arrive at a prompt and equitable settlement of all of the various types of provider cost reports (hospitals, skilled nursing facilities (SNFs), home health agencies (HHAs), etc.) and sometimes preclude the need for a comprehensive on-site audit. *Form Number:* CMS–339 (OMB# 0938–0301); *Frequency:* Annually; *Affected Public:* Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 38,429; *Total Annual Responses:* 38,429; *Total Annual Hours:* 431,148.

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* State Medicaid Drug Rebate; *Use:* Section 1927 of the Social Security Act requires each State Medicaid agency to report quarterly prescription drug utilization information to drug manufacturers and to CMS. As part of this information, the State Medicaid agencies are required to report the total Medicaid rebate amount they claim they are owed by each drug manufacturer for each covered prescription drug product each quarter. *Form Number:* CMS–R–144 and CMS–368 (OMB# 0938–0582); *Frequency:* Quarterly; *Affected Public:* State, Local or Tribal Governments; *Number of Respondents:* 51; *Total Annual Responses:* 204; *Total Annual Hours:* 9,389.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS' Web Site at *http://www.cms.hhs.gov/PaperworkReductionActof1995,* or E-mail your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov,* or call the Reports Clearance Office on (410) 786–1326.

In commenting on the proposed information collections please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in one of the following ways by February 17, 2009:

1. *Electronically.* You may submit your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number_, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: December 12, 2008.

**Michelle Shortt,**

*Director, Regulations Development Group, Office of Strategic Operations and Regulatory Affairs.*

**BILLING CODE 4120–01–P**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

**[Document Identifier: CMS–10175, CMS–10236, and CMS–179]**

### Agency Information Collection Activities: Submission for OMB Review; Comment Request

**AGENCY:** Centers for Medicare & Medicaid Services.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any

of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the Agency's function; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. *Type of Information Collection Request:* Reinstatement without change of a previously approved collection; *Title of Information Collection:* Certification Statement for Electronic File Interchange Organizations (EFIOs); *Use:* Health care providers can currently obtain a National Provider Identifier (NPI) via a paper application or over the Internet through the National Plan and Provider Enumeration System (NPPES). These applications must be submitted individually, on a per-provider basis. The Electronic File Interchange (EFI) process allows provider-designated electronic file interchange organizations (EFIOs) to capture multiple providers' NPI application information on a single electronic file for submission to NPPES. This process is also referred to as ''bulk enumeration.'' To ensure that the EFIO has the authority to act on behalf of each provider and complies with other Federal requirements, an authorized official of the EFIO must sign a certification statement and mail it to the Centers for Medicare and Medicaid Services (CMS). *Form Number:* CMS–10175 (OMB# 0938–0984); *Frequency:* Once; *Affected Public:* Private Sector—Business or other for-profits; *Number of Respondents:* 300; *Total Annual Responses:* 300; *Total Annual Hours:* 300.

2. *Type of Information Collection Request:* New collection; *Title of Information Collection:* Disclosure of Financial Relationships Report (''DFRR''); *Use:* Section 1877(f) of the Social Security Act requires that each entity providing covered items or services for which payment may be made shall provide the Secretary with information concerning the entity's ownership and investment interests, and compensation arrangements, in such form, manner, and at such times as the Secretary shall specify. The DFRR collection instrument will be used by CMS to (1) identify arrangements that potentially may not be in compliance with the physician self-referral statute and implementing regulations; and (2) to identify examples and areas of non-compliance that may assist us in any future rulemaking concerning the reporting requirements and other physician self-referral provisions. *Form Number:* CMS–10236 (OMB# 0938–New); *Frequency:* Once; *Affected Public:* Private Sector—Business or other for-profits and Not-for-profit institutions; *Number of Respondents:* 400; *Total Annual Responses:* 400; *Total Annual Hours:* 40,000.

3. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Transmittal and Notice of Approval of State Plan Material and Medicaid State Plan—Base Plan, Attachments and Supplemental Pages and Supporting Regulations in 42 CFR 430.10–430.20 and 440.167; *Use:* The Medicaid State base plan pages and attachments are documents utilized by State and territorial agencies which have the responsibility for administering the Medicaid program. The Medicaid State plan is comprised of ''pages'' and organized by subject matter which includes Medicaid eligibility services, payment for services, and general, financial and personnel administration. When States seek to change selected pages of their State plans, the page(s) are transmitted to CMS for review and approval by the CMS Central and Regional Offices prior to amending its State plan. *Form Number:* CMS–179 (OMB# 0938–0193); *Frequency:* Once and as needed; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 4,681; *Total Annual Hours:* 9,271.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS Web Site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995*, or E-mail your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov*, or call the Reports Clearance Office on (410) 786–1326.

To be assured consideration, comments and recommendations for the proposed information collections must be received by the OMB desk officer at the address below, no later than 5 p.m. on *January 20, 2009.*

OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, New Executive Office Building, Room 10235, Washington, DC 20503, Fax Number: (202) 395–6974.

Dated: December 12, 2008.

## Deeming Notice for American Society for Histocompatibility and Immunogenetics (ASHI) as an Accrediting Organization Under the Clinical Laboratory Improvement Amendments of 1988

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.

**ACTION:** Notice.

**SUMMARY:** The American Society for Histocompatibility and Immunogenetics (ASHI) was granted deeming authority as an accrediting organization for clinical laboratories under the Clinical Laboratory Improvement Amendments of 1988 (CLIA) program on March 25, 2005. The deeming authority was granted for the CLIA specialty of Histocompatibility and the subspecialty ABO/Rh. In this notice, we approve and grant ASHI deeming authority for the additional CLIA subspecialty of General Immunology.

**DATES:** *Effective Date:* This notice is effective from December 19, 2008 until March 25, 2011.

**FOR FURTHER INFORMATION CONTACT:** Penelope Meyers, (410) 786–3366.

**SUPPLEMENTARY INFORMATION:**

### I. Background

On October 31, 1988, the Congress enacted the Clinical Laboratory Improvement Amendments of 1988 (CLIA), Public Law 100–578. CLIA amended section 353 of the Public Health Service Act. We issued a final rule implementing the accreditation provisions of CLIA on July 31, 1992 (57 FR 33992). Under the CLIA program, CMS may grant deeming authority to an accreditation organization that accredits clinical laboratories if the organization meets certain requirements. Among other requirements, an organization's requirements for laboratories accredited under its program must be equal to or more stringent than the applicable CLIA program requirements in 42 CFR part

493 (Laboratory Requirements). This requirement and others in subpart E of that part (Accreditation by a Private, Nonprofit Accreditation Organization or Exemption Under an approved State Laboratory Program) specify the requirements an accreditation organization must meet to be approved by CMS as an accreditation organization under CLIA.

## II. Notice of Approval of Deeming Authority for ASHI in the Subspecialty of General Immunology

In this notice, we approve ASHI as an organization that may accredit laboratories for purposes of establishing their compliance with CLIA requirements in the subspecialty of General Immunology. We have examined the initial ASHI application and all subsequent submissions to determine their accreditation program's equivalency with the requirements for approval of an accreditation organization under subpart E of part 493. We have determined that ASHI meets or exceeds the applicable CLIA requirements. We have also determined that the ASHI program will ensure that its accredited laboratories will meet or exceed the applicable requirements in subparts H, K and M. Therefore, by this notice we grant ASHI approval as an accreditation organization under subpart E of part 493, for the period stated in the ''*Effective Date*'' section of this notice for the subspecialty area of General Immunology. As a result of this determination, any laboratory that is accredited by ASHI during the time period stated in the ''*Effective Date*'' section of this notice for the approved subspecialty of General Immunology is deemed to meet the CLIA requirements for laboratories found in part 493 of our regulations and, therefore, is generally not subject to routine inspections by a State survey agency to determine its compliance with CLIA requirements. The accredited laboratory, however, is subject to validation and complaint investigation surveys performed by CMS, or its agent(s).

## III. Evaluation of ASHI Request for Approval as an Accreditation Organization Under CLIA in the Subspecialty of General Immunology

The following describes the process used to determine that the ASHI accreditation program for the subspecialty of General Immunology met the necessary requirements to be approved by CMS, and that, as such, CMS may approve ASHI as an accreditation program with deeming authority under the CLIA program.

- ASHI formally applied to CMS for approval as an accreditation organization under CLIA for the subspecialty of General Immunology. In reviewing these materials, CMS found as follows for each applicable subpart of the CLIA regulations:

*Subpart E—Accreditation by a Private, Nonprofit Accreditation Organization or Exemption Under an Approved State Laboratory Program*

ASHI submitted its mechanism for monitoring compliance with all requirements equivalent to condition-level requirements within the scope of the subspecialty area of General Immunology; a list of all its current laboratories and the expiration date of their accreditation; and a detailed comparison of the individual accreditation requirements with the comparable condition-level requirements. ASHI's proposed policies and procedures for oversight of laboratories performing General Immunology testing would be the same as those previously approved by CMS for laboratory oversight in the matters of inspection, monitoring proficiency testing (PT) performance, investigating complaints, and making PT information available. ASHI's proposed requirements for monitoring and inspecting General Immunology laboratories would be the same as those previously approved by CMS for laboratories in the areas of accreditation organization data management, the inspection process, procedures for removal or withdrawal of accreditation, notification requirements, and accreditation organization resources. The requirements of ASHI are equal to the requirements of the CLIA regulations.

ASHI's application and supplemental materials demonstrate that ASHI's accreditation program for General Immunology met the subpart E requirements.

*Subpart H—Participation in Proficiency Testing for Laboratories Performing Nonwaived Testing*

ASHI's application materials demonstrate that the requirements in ASHI's accreditation program for the subspecialty of General Immunology are equal to the CLIA requirements at § 493.837. Both CLIA regulations and ASHI standards require accredited laboratories to participate in a CMS-approved PT program for any of the tests listed in subpart I. Additionally, ASHI's requirements exceed the CLIA requirements in that it requires laboratories to participate in non-regulated PT programs when available.

ASHI's application and supplemental materials demonstrate that ASHI's accreditation program for General Immunology met or exceeds the subpart H requirements.

*Subpart K—Quality System for Nonwaived Testing*

The quality control requirements of ASHI have been evaluated against the requirements of the CLIA regulations. ASHI standards contain additional, specific quality control requirements for General Immunology testing. Therefore, the ASHI requirements are more stringent than the CLIA requirements at § 493.1208.

ASHI's application and supplemental materials demonstrate that ASHI's accreditation program for General Immunology exceeds the subpart K requirements.

*Subpart M—Personnel for Nonwaived Testing*

We have determined that the ASHI requirements are equal to the CLIA requirements at § 493.1441 through § 493.1495 (applicable to laboratories performing testing in the subspecialty of General Immunology).

ASHI's application and supplemental materials demonstrate that ASHI's accreditation program for General Immunology met the subpart M requirements.

## IV. Federal Validation Inspections and Continuing Oversight

The Federal validation inspections of ASHI accredited laboratories may be conducted on a representative sample basis or in response to substantial allegations of noncompliance (that is, complaint inspections). The outcome of those validation inspections, performed by CMS or our agents, the State survey agencies, will be our principal means for verifying that the laboratories accredited by ASHI remain in compliance with CLIA requirements. This Federal monitoring is an ongoing process.

## V. Removal of Approval as an Accrediting Organization

Our regulations provide that we may rescind the approval of an accreditation organization, such as that of ASHI, for cause, before the end of the effective date of approval. If we determine that ASHI has failed to adopt, maintain and enforce requirements that are equal to, or more stringent than, the CLIA requirements, or that systemic problems exist in its monitoring, inspection or enforcement processes, we may impose a probationary period, not to exceed 1 year, in which ASHI would be allowed

to address any identified issues. Should ASHI be unable to address the identified issues within that time frame, CMS may, in accordance with the applicable regulations, revoke ASHI's deeming authority under CLIA.

Should circumstances result in our withdrawal of ASHI's approval, we will publish a notice in the **Federal Register** explaining the basis for removing its approval.

### VI. Collection of Information Requirements

This notice does not impose any information collection and record keeping requirements subject to the Paperwork Reduction Act (PRA). Consequently, it does not need to be reviewed by the Office of Management and Budget (OMB) under the authority of the PRA. The requirements associated with the accreditation process for clinical laboratories under the Clinical Laboratory Improvement Amendments of 1988 (CLIA) program, and the implementing regulations in 42 CFR part 493, subpart E, are currently approved under OMB control number 0938–0686.

**Authority:** Section 353(p) of the Public Health Service Act (42 U.S.C. 263a).

Dated: December 4, 2008.

## Medicaid Program; Fiscal Year Disproportionate Share Hospital Allotments and Disproportionate Share Hospital Institutions for Mental Disease Limits

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS

**ACTION:** Notice.

**SUMMARY:** This notice announces the final Federal share disproportionate share hospital (DSH) allotments for Federal fiscal year (FFY) 2007 and the preliminary Federal share DSH allotments for FFY 2009. This notice also announces the final FFY 2007 and the preliminary FFY 2009 limitations on aggregate DSH payments that States may make to institutions for mental disease and other mental health facilities. In addition, this notice includes background information describing the methodology for determining the amounts of States' FFY DSH allotments.

**DATES:** *Effective Date:* This notice is effective on 60 days after the date of publication in the **Federal Register**. The final allotments and limitations set forth in this notice are effective for the fiscal years specified.

**FOR FURTHER INFORMATION CONTACT:** Richard Strauss, (410) 786–2019.

**SUPPLEMENTARY INFORMATION:**

### I. Background

*A. Disproportionate Share Hospital Allotments for Federal Fiscal Year 2003*

Under section 1923(f)(3) of the Social Security Act (the Act), States' Federal fiscal year (FFY) 2003 disproportionate share hospital (DSH) allotments were calculated by increasing the amounts of the FFY 2002 allotments for each State (as specified in the chart, entitled ''DSH Allotment (in millions of dollars),'' contained in section 1923(f)(2) of the Act) by the percentage change in the Consumer Price Index for all Urban Consumers (CPI–U) for the prior fiscal year. The allotment, determined in this way, is subject to the limitation that an increase to a State's DSH allotment for a fiscal year cannot result in the DSH allotment exceeding the greater of the State's DSH allotment for the previous fiscal year or 12 percent of the State's total medical assistance expenditures for the allotment year (this is referred to as the 12 percent limit).

Most States' *actual* FY 2002 allotments were determined in accordance with the provisions of section 1923(f)(4) of the Act. However, as indicated previously, the calculation of States' FFY 2003 allotments was *not* based on the actual FFY 2002 DSH allotments; rather, section 1923(f)(3) of the Act requires that the States' FY 2003 allotments be determined using the amount of the States' FY 2002 allotments specified in the chart in section 1923(f)(2) of the Act. The exception to this is the calculation of the FFY 2003 DSH allotments for certain ''Low-DSH States'' (defined in section 1923(f)(5) of the Act). Under the Low-DSH State provision, there is a special calculation methodology for the Low-DSH States only. Under this methodology, the FFY 2003 allotments were determined by using (that is, increasing) States' actual FFY 2002 DSH allotments (not their FFY 2002 allotments specified in the chart in section 1923(f)(2) of the Act) by the percentage change in the CPI–U for the previous fiscal year.

*B. DSH Allotments for FFY 2004*

Section 1001(a) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173, enacted on December 8, 2003) amended section 1923(f)(3) of the Act to provide for a ''Special, Temporary Increase in Allotments on a One-Time, Non-Cumulative Basis.'' Under this provision, States' FFY 2004 DSH allotments were determined by increasing their FFY 2003 allotments by 16 percent, and the fiscal year DSH allotment amounts so determined were not subject to the 12 percent limit.

*C. DSH Allotments for Non-Low DSH States for FFY 2005, and Fiscal Years Thereafter*

Under the methodology contained in section 1923(f)(3)(C) of the Act, as amended by section 1001(a)(2) of the MMA, the non-Low-DSH States' DSH allotments for FFY 2005 and subsequent fiscal years continue at the same level as the States' DSH allotments for FFY 2004 until a ''fiscal year specified'' occurs. The ''fiscal year specified'' is the first fiscal year for which the Secretary estimates that a State's DSH allotment equals (or no longer exceeds) the DSH allotment as would have been determined under the statute in effect before the enactment of the MMA. We determine whether the fiscal year specified has occurred under a special parallel process. Specifically, under this parallel process, a ''parallel'' DSH allotment is determined for FFYs after 2003 by increasing the State's DSH allotment for the previous fiscal year by the percentage change in the CPI–U for the prior fiscal year, subject to the 12 percent limit. This is the methodology as would otherwise have been applied under section 1923(f)(3)(A) of the Act notwithstanding the application of the provisions of MMA. The ''fiscal year specified,'' is the fiscal year in which the parallel DSH allotment calculated under this special parallel process finally equals or exceeds the FY 2004 DSH allotment, as determined under the MMA provisions. Once the fiscal year specified occurs for a State, that State's fiscal year DSH allotment will be calculated by increasing the State's previous actual fiscal year DSH allotment (which would be equal to the FY 2004 DSH allotment) by the percentage change in the CPI–U for the previous fiscal year, subject to the 12 percent limit. The following example illustrates how the fiscal year DSH allotment would be calculated for fiscal years after FFY 2004.

Example—In this example, we are determining the parallel FFY 2009 DSH

allotment. A State's actual FFY 2003 DSH allotment is $100 million. Under the MMA, this State's actual FFY 2004 DSH allotment would be $116 million ($100 million increased by 16 percent). The State's DSH allotment for FFY 2005 and subsequent fiscal years would continue at the $116 million FFY 2004 DSH allotment for fiscal years following FFY 2004 until the ''fiscal year specified'' occurs. Under the separate parallel process, we determine whether the fiscal year specified has occurred by calculating the State's DSH allotments in accordance with the statute in effect before the enactment of the MMA. Under this special process, we would continue to determine the State's parallel DSH allotment for each fiscal year by increasing the State's parallel DSH allotment for the previous fiscal year (as also determined under the special parallel process) by the percentage change in the CPI–U for the previous fiscal year, and subject to the 12 percent limit. Assume for purposes of this example that, in accordance with this special parallel process, the State's parallel FFY 2008 DSH allotment was determined to be $115 million and the percentage change in the CPI–U for FFY 2008 (the previous fiscal year) relevant for the calculation of the FFY 2009 DSH allotment was 4.0 percent. That is, the percentage change for the CPI–U for FFY 2008, the year before FFY 2009, was 4.0 percent. Therefore, the State's special parallel process FFY 2009 DSH allotment amount would be calculated by increasing the special parallel process FFY 2008 DSH allotment amount of $115 million by 4.0 percent; this results in a parallel process DSH allotment process amount for FFY 2009 of $119.6 million. Since $119.6 million is greater than $116 million (the actual FFY 2004 DSH allotment calculated under the MMA), we would determine that FFY 2009 is the ''fiscal year specified'' (the first year that the FFY 2004 allotment equals or no longer exceeds the parallel process allotment). Since FY 2009 is the fiscal year specified, we would then determine the State's FFY 2009 allotment by increasing the State's *actual* FFY 2008 DSH allotment ($116 million) by the percentage change in the CPI–U for FFY 2008 (4.0 percent). Therefore, the State's FFY 2009 DSH allotment would be $120.6 million ($116 million increased by 4.0 percent); for purposes of this example, the application of the 12 percent limit has no effect. Furthermore, for FFY 2009 and thereafter, the State's DSH allotment would be calculated under the provisions of section 1923(f)(3)(A) of the Act by increasing the State's previous fiscal year's DSH allotment by the percentage change in the CPI–U for the previous fiscal year, subject to the 12 percent limit.

However, as amended by section 1001(b)(4) of the MMA, section 1923(f)(5)(B) of the Act also contains criteria for determining whether a State is a Low-DSH State, beginning with FFY 2004. This provision is described in section I.D.

*D. DSH Allotments for Low-DSH States for FFY 2004 and Fiscal Years Thereafter*

Section 1001(b)(1) of the MMA amended section 1923(f)(5) of the Act regarding the calculation of the fiscal year DSH allotments for ''Low-DSH'' States for FFY 2004 and subsequent fiscal years. Specifically, under section 1923(f)(5)(B) of the Act, as amended by section 1001(b)(4) of the MMA, a State is considered a Low-DSH State for FFY 2004 if its total DSH payments under its State plan for FFY 2000 (including Federal and State shares) as reported to CMS as of August 31, 2003, are greater than 0 percent and less than 3 percent of the State's total FFY 2000 expenditures under its State plan for medical assistance. For States that meet the new Low-DSH criteria, their FFY 2004 DSH allotments are calculated by increasing their FFY 2003 DSH allotments by 16 percent. Therefore, for FFY 2004, Low-DSH States' fiscal year DSH allotments are calculated in the same way as the DSH allotments for regular States, which under section 1923(f)(3) of the Act, get the special temporary increase for FFY 2004.

Furthermore, for States meeting the MMA's Low-DSH definition, the DSH allotments for FFYs 2005 through 2008 will continue to be determined by increasing the previous fiscal year's DSH allotment by 16 percent. The Low-DSH States' DSH allotments for FFYs 2004 through 2008 are not subject to the 12 percent limit. The Low-DSH States' DSH allotments for FFYs 2009 and subsequent fiscal years are calculated by increasing those States' DSH allotments for the prior fiscal year by the percentage change in the CPI–U for that prior fiscal year. For FFYs 2009 and thereafter, the DSH allotments so determined would be subject to the 12 percent limit.

*E. Institutions for Mental Diseases DSH Limits for FFYs 1998 and Thereafter*

Under section 1923(h) to the Act, Federal financial participation (FFP) is not available for DSH payments to institutions for mental diseases (IMDs) and other mental health facilities that are in excess of State-specific aggregate limits. Under this provision, this aggregate limit for DSH payments to IMDs and other mental health facilities is the lesser of a State's FFY 1995 total computable (State and Federal share) IMD and other mental health facility DSH expenditures applicable to the State's FFY 1995 DSH allotment (as reported on the Form CMS–64 as of January 1, 1997), or the amount equal to the product of the State's current year total computable DSH allotment and the applicable percentage.

Each State's IMD limit on DSH payments to IMDs and other mental health facilities was calculated by first determining the State's total computable DSH expenditures attributable to the FFY 1995 DSH allotment for mental health facilities and inpatient hospitals. This calculation was based on the total computable DSH expenditures reported by the State on the Form CMS–64 as mental health DSH and inpatient hospital as of January 1, 1997. We then calculate an ''applicable percentage.'' The applicable percentage for FFY 1998 through FFY 2000 (1995 IMD DSH percentage) is calculated by dividing the total computable amount of IMD and mental health DSH expenditures applicable to the State's FFY 1995 DSH allotment by the total computable amount of all DSH expenditures (mental health facility plus inpatient hospital) applicable to the FFY 1995 DSH allotment. For FFY 2001 and thereafter, the applicable percentage is defined as the lesser of the applicable percentage as calculated above (for FFYs 1998 through 2001) or 50 percent for FFY 2001; 40 percent for FFY 2002; and 33 percent for each subsequent FFY.

The applicable percentage is then applied to each State's total computable FFY DSH allotment for the current FFY. The State's total computable FFY DSH allotment is calculated by dividing the State's Federal share DSH allotment for the FFY by the State's Federal medical assistance percentage (FMAP) for that FFY.

In the final step of the calculation of the IMD DSH Limit, the State's total computable IMD DSH limit for the FFY is set at the lesser of the product of a State's current fiscal year total computable DSH allotment and the applicable percentage for that fiscal year, or the State's FFY 1995 total computable IMD and other mental health facility DSH expenditures applicable to the State's FFY 1995 DSH allotment as reported on the Form CMS–64.

The MMA legislation did not amend the Medicaid statute with respect to the calculation of the IMD DSH limit.

*F. Publication in the* ***Federal Register*** *of Preliminary and Final Notice for DSH Allotments and IMD DSH Limits*

In general, we initially determine States' DSH allotments and IMD DSH limits for a fiscal year using estimates of medical assistance expenditures, including DSH expenditures in their Medicaid programs. These estimates are provided by States each year on the August quarterly Medicaid budget reports (Form CMS–37) before the Federal fiscal year for which the DSH allotments and IMD DSH limits are being determined. The DSH allotments and IMD DSH limits determined using these estimates are referred to as *''preliminary.''* Only after we receive States' reports of the actual related medical assistance expenditures through the quarterly expenditure report (Form CMS–64), which occurs after the end of the fiscal year, are the ''final'' DSH Allotments and IMD DSH limits determined.

As indicated in section I.F. of this notice, the notice published in the **Federal Register** on October 3, 2006, included the announcement of the *preliminary* FFY 2007 DSH allotments (based on estimates), and the preliminary FFYs 2007 IMD DSH limits (since they were based on the preliminary DSH allotments for FFYs 2007). The notice published in the **Federal Register** on December 28, 2007 announced the final FFY 2006 DSH allotments and the final FFY 2006 IMD DSH limits (since they were based on the actual expenditures related to those years), and the *preliminary* FFY 2008 allotments (based on estimates), and the preliminary FFYs 2008 IMD DSH limits (since they were based on the preliminary DSH allotments for FFYs 2008).

This notice announces the *final* FFY 2007 DSH allotments and the *final* FFY 2007 IMD DSH limits (since these are now based on the actual expenditures for those fiscal years), the *preliminary* FFY 2009 DSH allotments (based on estimates), and the *preliminary* IMD DSH limits for FFY 2009 (since they are based on the preliminary DSH allotments for FFY 2009). This notice does not include the final FFY 2008 DSH allotments or the final FFY 2008 IMD DSH limits, since the associated actual expenditures for FFY 2008 are not available at this time.

*G. DSH Allotment Provisions for Certain States*

1. DSH Allotments for the District of Columbia

The provisions of section 6054 of the Deficit Reduction Act (DRA) of 2005 Public Law 109–171, enacted February 8, 2006) affected the determination of the DSH allotment for the District of Columbia. Under section 6054 of the DRA, for purposes of determining only the FFY 2006 and subsequent fiscal year DSH allotments for the District of Columbia, the table in section 1923(f)(2) of the Act is amended by increasing the FFY DSH allotment amounts indicated in that table for the District of Columbia for FFYs 2000, 2001, and 2002 to $49 million for each of those fiscal years. Before the DRA amendment, the amount in the chart in section 1923(f)(2) of the Act for the District of Columbia for each of those fiscal years was $32 million. This DRA provision increases the fiscal year DSH allotment for the District of Columbia effective with the FFY 2006 DSH allotment. This change is because the DSH allotments for FFY 2003 were based on the amounts of States' DSH allotments for FFY 2002 as contained in the chart in section 1923(f)(2) of the Act. Since (for purposes of ultimately determining the FFY 2006 allotment) the DRA provision increased the FFY 2002 allotment for the District of Columbia, as indicated above, the FFY 2003 allotment was increased. Furthermore, for this purpose, the FFY 2004 allotment for the District of Columbia would then have been determined by increasing the FFY 2003 allotment (as so determined) by 16 percent. For fiscal years subsequent to FFY 2006, the DSH allotments are determined as described above. The final FFY 2007 DSH allotment and the preliminary FFY 2009 DSH allotment for the District of Columbia contained in this notice reflect the provision of section 6054 of the DRA.

As described below, in accordance with section 6054 of the DRA, the final FFY 2007 DSH allotment for the District of Columbia is $57,692,600. As amended by section 6054 of the DRA, the FFY 2002 DSH allotment amount for the District of Columbia contained in the chart in section 1923(f)(2) of the Act was increased to $49,000,000. In accordance with section 1923(f)(3)(A) of the Act, the FFY 2003 DSH allotment is determined by increasing the $49,000,000 DSH Allotment for FFY 2002 (as referenced in section 1923(f)(2) of the Act) by the percentage change in the CPI–U for 2002 (in this case, 1.5 percent) to $49,735,000. In accordance with section 1923(f)(3)(C)(i) of the Act, the FFY 2004 DSH allotment for DC would be determined by increasing the $49,735,000 FFY 2003 DSH allotment amount by 16 percent to $57,692,600. In accordance with the provisions of section 1923(f)(3)(C)(ii) of the Act, as applicable for other Non-Low DSH States under the ''parallel'' process described above, the District of Columbia's DSH allotments for FFYs 2005 and following fiscal years would remain at $57,692,600 until the fiscal year specified occurs. In accordance with section 6054 of the DRA, the District of Columbia's DSH allotment was actually increased as described above, effective beginning with FFY 2006 to the $57,692,600 amount. The final FY 2007 DSH allotment for DC is also $57,692,600.

2. DSH Allotments for the State of Tennessee.

Section 1923(f)(6)(A) of the Act, as amended by section 404 of Public Law 109–432 (enacted on December 20, 2006), section 204 of Public Law 110–173 (enacted on December 29, 2007), and section 202 of Public Law 110–275 (enacted on July 15, 2008) provides for the determination of a DSH allotment for the State of Tennessee for FY 2007, FY 2008, FY 2009, and for a period in FY 2010. In accordance with this provision, Tennessee's DSH allotment for each of these fiscal years is the greater of $280 million and the FY 2007 Federal medical assistance percentage of the DSH payment adjustments reflected in the State's TennCare Demonstration Project for the demonstration year ending in 2006. In accordance with this provision, the State's Federal share DSH allotment for FY 2007, FY 2008, and FY 2009 was determined to be $305,451,928. Furthermore, Tennessee's DSH allotment for the period October 1, 2009, through December 31, 2009, is one-fourth of this amount; that is, $76,362,982. Section 1923(f)(6)(A)(ii) of the Act further limits the amount of Federal funds that are available for DSH payments that Tennessee may make in each fiscal year to 30 percent of the DSH allotment. In this regard, the limit on the DSH payments that the State of Tennessee may make is effectively $91,635,578 (30 percent of $305,451,928) for each FY 2007 through FY 2009, and $22,908,895 (30 percent of $76,362,982) for the period October 1, 2009, through December 31, 2009.

3. DSH Allotments for the State of Hawaii

Section 1923(f)(6)(B) of the Act, as amended by section 404 of Public Law 109–432, section 204 of Public Law 110–173, and section 202 of Public Law 110–275 provides for a DSH allotment for the State of Hawaii for FY 2007, FY 2008, FY 2009, and for a period in FY 2010. In accordance with this provision, Hawaii's DSH allotment for FY 2007, FY 2008, and FY 2009 is $10 million.

Furthermore, Hawaii's DSH allotment for the period October, 1, 2009, through December 31, 2009, is $2.5 million.

## II. Provisions of the Notice

### *A. Calculation of the Final FFY 2007 Federal Share State DSH Allotments and the Preliminary FFY 2009 Federal Share State DSH Allotments*

Chart 1 of the Addendum to this notice provides the States' ''final'' FFY 2007 DSH allotments. The final FFY 2007 DSH allotments for each State were computed in accordance with the provisions of the Medicaid statute as amended by the MMA. As required by the provisions of the MMA, the final FFY 2004 DSH allotments for the ''Low-DSH'' States and all the other States were calculated by increasing the FFY 2003 DSH allotments by 16 percent. In the notice published on March 26, 2004 notice published in the **Federal Register** (69 FR 15850), we explained the definition and determination of the ''Low-DSH'' States under the MMA provisions. However, for following fiscal years, the DSH allotments are determined under a process which incorporates a parallel process described in section I.C. of this notice. Under that parallel process, States final FFY 2007 DSH allotments were determined using the States' expenditure reports (Form CMS–64) for FFY 2007.

### *B. Calculation of the Preliminary FFY 2009 Federal Share State DSH Allotments*

Chart 2 of the Addendum to this notice provides the States' ''preliminary'' FFY 2009 DSH allotments. These preliminary allotments were determined using the States' August 2008 expenditure estimates submitted by the States on the Form CMS–37, and the currently available percentage change in the consumer price index for all urban consumers (all items; U.S. city average), for the previous fiscal year (that is, for FY 2008). The final FFY 2009 DSH allotments for each State will be published following receipt of the States' four quarterly Medicaid expenditure reports (Form CMS–64) for FFY 2009.

As discussed previously, in determining non-Low DSH States' DSH allotments for fiscal years after FY 2004 under section 1923(f)(3)(C) of the Act for DSH allotments, we have been determining States' DSH allotments under a ''parallel'' process. Under the parallel process, for each fiscal year for each State we have been determining whether the ''Fiscal Year Specified'' (as defined in section 1923(f)(3)(D) of the Act) has occurred. Under section 1923(f)(3)(D) of the Act, the Fiscal Year Specified is determined separately for each State and ''is the first fiscal year for which the Secretary estimates that the DSH allotment for that State will equal (or no longer exceed) the DSH allotment for that State under the law as in effect before the date of enactment'' of MMA. The process in effect prior to the enactment in MMA is the process described in section 1923(f)(3)(A) of the Act; under this process each States' DSH allotment since FY 2003 is increased by the CPIU increase for the prior fiscal year and the result is then compared to the State's FY 2004 DSH allotment, as determined under section 1923(f)(3)(C)(i) of the Act (under which the States' FY 2003 DSH allotments were increased by 16 percent). In other words, the Fiscal Year Specified for a State is the fiscal year when the FY 2004 allotment is no longer greater than the parallel process DSH allotment.

We are reiterating the parallel process provision because for all non-Low DSH States (except one), we have determined that FY 2009 is the ''Fiscal Year Specified''. Therefore, as indicated in section 1923(f)(3)(C)(ii) of the Act, the FY 2009 DSH allotment for all non-Low DSH States (except one)is equal to the prior FY 2008 DSH allotment increased by the CPIU increase for FY 2008 (4.0 percent). Chart 2 reflects this. For the non-Low DSH States for which the FY 2009 is the Fiscal Year Specified, the FY 2010 and subsequent fiscal year DSH allotments will be calculated by increasing the prior fiscal year DSH allotment by the CPIU increase for the prior fiscal year.

For Low-DSH States, the FY 2009 DSH allotment is calculated using the same methodology as for the non-Low DSH States for which the Fiscal year specified has occurred. That is, for FY 2009 and following fiscal years, the DSH allotment for Low-DSH States is calculated by increasing the prior fiscal year DSH allotment by the CPIU increase for the prior fiscal year.

### *C. Calculation of the FFYs 2007 and FFY 2009 IMD DSH Limits*

Section 1923(h) of the Act specifies the methodology to be used to establish the limits on the amount of DSH payments that a State can make to IMDs and other mental health facilities. FFP is not available for IMD or DSH payments that exceed the lesser of the State's FFY 1995 total computable mental health DSH expenditures applicable to the State's FFY 1995 DSH allotment as reported to us on the Form CMS–64 as of January 1, 1997; or the amount equal to the product of the State's current FFY total computable DSH allotment and the applicable percentage. We are publishing the final FFY 2007 IMD DSH limit, and the preliminary FFY 2009 IMD DSH limit, along with an explanation of the calculation of these limits.

For FFY 2003 and following fiscal years, the applicable percentage is the lesser of 33 percent or the 1995 DSH IMD percentage of the amount computed for FFY 2000. This percentage was applied to the State's fiscal year total computable DSH allotment. This result was then compared to the State's FFY 1995 total computable mental health DSH expenditures applicable to the State's FFY 1995 DSH allotment as reported on the Form CMS–64 as of January 1, 1997. The lesser of these two amounts was the State's limitation on total computable IMD/DSH expenditures for FFY 2003 and following fiscal years.

Charts 3 and 4 of the Addendum to this notice detail each State's final IMD/DSH limitation for FFY 2007 and the preliminary IMD/DSH limitation for FFY 2009, respectively, in accordance with section 1923(h) of the Act.

## III. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 35).

## IV. Regulatory Impact Statement

We have examined the impact of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), and Executive Order 13132.

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). This notice does reach the economic threshold and thus is considered a major rule. We note that the total preliminary FY 2009 DSH

allotments announced in this notice are about $385 million greater than the total preliminary FY 2008 DSH allotments, which were announced in the **Federal Register** published on December 28, 2008 (72 FR 73831). As described previously, this change in allotment is a result of the application of the explicit provisions of the Medicaid statute, which requires that for the ''fiscal year specified'' the fiscal year DSH allotments for non-Low DSH states be calculated by increasing the previous fiscal year's DSH allotment by the increase in the CPI–U for the prior fiscal year. Except for one State, for all non-Low DSH States FY 2009 is the fiscal year specified, and therefore, the FY 2009 DSH allotment for these states must be calculated by increasing the FY 2008 DSH allotments by the CPI–U for FY 2008 (in this case 4 percent). Additionally, in accordance with the Medicaid statute, the calculation of all Low-DSH states' FY 2009 allotments reflects this CPI–U increase. After application of these statutory provisions, the resulting total FY 2009 DSH allotments are about $385 million more than the total FY 2008 DSH allotments; this notice announces those amounts.

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of $6.5 million to $31.5 million in any 1 year. Individuals and States are not included in the definition of a small entity. We are not preparing an analysis for the RFA because we have determined, and the Secretary certifies, that this notice will not have significant economic impact on a substantial number of small entities. Specifically, the effects of the various controlling statutes on providers are not impacted by a result of any independent regulatory impact and not this notice. The purpose of the notice is to announce the latest distributions as required by the statute.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Core-Based Statistical Area for Medicaid payment regulations and has fewer than 100 beds. We are not preparing analysis for section 1102(b) of the Act because we have determined and the Secretary certifies that this notice will not have a significant impact on the operations of a substantial number of small rural hospitals.

In addition, the MMA set statutorily defined limits on the amount of Federal share DSH expenditures available for FFY 2004 and subsequent fiscal years. Specifically, section 1001 of the MMA increased the DSH allotment for States beginning with fiscal year 2004. While overall the statute mandated some increases in DSH payments, we do not believe that this notice will have a significant economic impact on a substantial number of small entities.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. That threshold level is currently approximately $130 million. This notice will have no consequential effect on State, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. Since this notice does not impose any costs on State or local governments, the requirements of E.O. 13132 are not applicable.

*Accounting Statement*

As required by OMB Circular A–4 (available at), in the table below, we have prepared an accounting statement showing the classification of the estimated expenditures associated with the provisions of this notice. This table provides our best estimate of the increase in the Federal share of States' Medicaid DSH payments resulting from of the application of the provisions of the Medicaid statute relating to the calculation of States' fiscal year DSH allotments and the increase in such fiscal year DSH allotments from FY 2008 to FY 2009.

TABLE—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED EXPENDITURES, FROM THE FY 2008 TO FY 2009

[In millions]

| Category | Transfers |
|---|---|
| Annualized Monetized Transfers. | $385 |
| From Whom To Whom? | Federal Government to States |

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

**Addendum**

This addendum contains the charts 1 through 4 (proceeded by associated keys) that are referred to in the preamble of this notice.

KEY TO CHART 1—FINAL DSH ALLOTMENTS FOR FY 2007

[Key to the chart of the final FFY 2007 DSH allotments. The final FFY 2007 DSH allotments for the regular states are presented in the top section of this chart and the final FFY 2007 DSH allotments for the Low-DSH states are presented in the bottom section of the chart.]

| Column | Description |
|---|---|
| For Non-Low-DSH States: | |
| Column A | State. |
| Column B | Final FY 2004 DSH Allotments—This column contains the final Federal share FFY 2004 DSH Allotments. |
| Column C | FY 2007 DSH Allotment—This column contains the final Federal share FFY 2007 DSH Allotments. |
| Column D | MMA Low-DSH Status—This column indicates the MMA Low-DSH Status of each State. |
| For Low-DSH States: | |
| Column A | State. |
| Column B | Prior FY DSH Allotments—This column contains the final FFY 2006 DSH Allotments. |

## KEY TO CHART 1—FINAL DSH ALLOTMENTS FOR FY 2007—Continued

[Key to the chart of the final FFY 2007 DSH allotments. The final FFY 2007 DSH allotments for the regular states are presented in the top section of this chart and the final FFY 2007 DSH allotments for the Low-DSH states are presented in the bottom section of the chart.]

| Column | Description |
|---|---|
| Column C | FY 2007 DSH Allotments—This column contains the final Federal share FFY 2007 DSH Allotments = Column B multiplied by 1.16. |
| Column D | MMA Low-DSH Status—This column indicates the MMA Low-DSH Status of each State. |

## KEY TO CHART 2—PRELIMINARY DSH ALLOTMENT FOR FISCAL YEAR 2009

[Key to the chart of the preliminary FY 2009 DSH allotments. The preliminary FY 2009 DSH allotments for the Non-Low DSH states are presented in the top section of this chart, and preliminary FY 2009 DSH allotments for the Low-DSH states are presented in the bottom section of this chart.]

| Column | Description |
|---|---|
| Column A | State. |
| Column B | 1923(f)(3)(D) Test Met.<br>This column indicates whether the ''Fiscal Year Specified'' has occurred, determined in accordance with section 1923(f)(3)(D) of the Act. ''YES'' indicates the Fiscal Year Specified has occurred; ''NOT MET'' indicates that the Fiscal Year Specified has not occurred; and ''NA'' indicates that this provision is not applicable. |
| Columns C–K | For Non-Low DSH States entries in Columns C through K are only for States meeting the ''Fiscal Year Specified'' test (''YES'' in Column B). |
| Column C | FY 2009 FMAPS.<br>This column contains the States' FY 2009 Federal Medical Assistance Percentages. |
| Column D | FY 2008 DSH Allotment For States Meeting Test.<br>This column contains the States' FY 2008 DSH Allotments. |
| Column E | FY 2008 Allotments × CPIU Increase: 1.04.<br>This column contains the amount in Column D increased by the increase in the CPIU for the prior fiscal year (4.0 percent). |
| Column F | FY 2009 TC MAP Exp. Incl. DSH.<br>This column contains the amount of the States' projected FY 2009 total computable medical assistance expenditures including DSH expenditures. |
| Column G | FY 2009 TC DSH Expenditures.<br>This column contains the amount of the States' projected FY 2009 total computable DSH expenditures. |
| Column H | FY 2009 TC MAP Exp. Net of DSH.<br>This column contains the amount of the States' projected FY 2009 total computable medical assistance expenditures net of DSH expenditures, calculated as the amount in Column F minus the amount in Column G. |
| Column I | 12% AMOUNT.<br>This column contains the amount of the ''12 percent limit'' in Federal share, determined in accordance with the provisions of section 1923(f)(3) of the Act. |
| Column J | Greater of FY 2008 Allotment or 12% Limit.<br>This column contains the greater of the State's prior fiscal year (FY 2008) DSH allotment or the amount of the 12% Limit, determined as the maximum of the amount in Column D or Column I. |
| Column K | FY 2009 DSH Allotment.<br>This column contains the States' FY 2009 DSH allotments, determined as the minimum of the amount in Column J or Column E. For Non-Low DSH States that have not met the ''Fiscal Year Year Specified'' test (entry in Column B is ''NOT MET''), the amount in Column K is equal to the State's FY 2004 DSH allotment. For States for which the entry in Column B is ''NA'', the amount in Column K is determined in accordance with the provisions of section 1923(f)(6) of the Act. |

## KEY TO CHART 3—FINAL FFY 2007 IMD DSH LIMITS

[Key to the Chart of the FFY 2007 IMD Limitations. The final FFY 2007 IMD DSH Limits for the regular States are presented in the top section of this chart and the final FFY IMD DSH Limits for the Low-DSH States are presented in the bottom section of the chart.]

| Column | Description |
|---|---|
| Column A | State. |
| Column B | Inpatient Hospital Services FY 95 DSH Total Computable. This column contains the States' total computable FFY 1995 inpatient hospital DSH expenditures as reported on the Form CMS–64. |

## KEY TO CHART 3—FINAL FFY 2007 IMD DSH LIMITS—Continued

[Key to the Chart of the FFY 2007 IMD Limitations. The final FFY 2007 IMD DSH Limits for the regular States are presented in the top section of this chart and the final FFY IMD DSH Limits for the Low-DSH States are presented in the bottom section of the chart.]

| Column | Description |
|---|---|
| Column C | IMD and Mental Health Services FY 95 DSH Total Computable. This column contains the total computable FFY 1995 mental health facility DSH expenditures as reported on the Form CMS–64 as of January 1, 1997. |
| Column D | Total Inpatient & IMD & Mental Health FY 95 DSH Total Computable, Col B + C. This column contains the total computation of all inpatient hospital DSH expenditures and mental health facility DSH expenditures for FFY 1995 as reported on the Form CMS–64 as of January 1, 1997 (representing the sum of Column B and Column C). |
| Column E | Applicable Percentage Col C/D. This column contains the ''applicable percentage'' representing the total computable FFY 1995 mental health facility DSH expenditures divided by total computable all inpatient hospital and mental health facility DSH expenditures for FFY 1995 (the amount in Column C divided by the amount in Column D). Per section 1923(h)(2)(A)(ii)(II) of the Act, for FFYs after FY 2002, the applicable percentage can be no greater than 33 percent. |
| Column F | FY 2007 Federal Share DSH Allotment. This column contains the States' final FFY 2007 DSH allotments. |
| Column G | FFY 2007 FMAP. |
| Column H | FY 2007 DSH Allotments in TC. Col. F/G. This column contains the FFY 2007 total computable DSH Allotment (determined as Column F/Column G). |
| Column I | Col E × Col H in TC. This column contains the applicable percent of FFY 2007 total computable DSH allotment (calculated as Column E × Column H). |
| Column J | FY 2007 IMD DSH Limit Total Computable. Lesser of Col. C or I. The column contains the lesser of Column I or C. |
| Column K | FY 2007 IMD DSH Limit Federal Share, Col. G × J. This column contains the total computable IMD DSH Limit from Col. J and converts that amount into a Federal share (calculated as Col. G × Col. J). |
| Column L | LOW DSH Status. This column contains Low DSH status for each State. |

## KEY TO CHART 4—PRELIMINARY FFY 2009 IMD DSH LIMITS

[Key to the Chart of the FFY 2009 IMD Limitations. The preliminary FFY 2009 IMD DSH Limits for the regular States are presented in the top section of this chart and the preliminary FFY 2009 IMD DSH Limits for the Low-DSH States are presented in the bottom section of the chart.]

| Column | Description |
|---|---|
| Column A | State. |
| Column B | Inpatient Hospital Services FY 95 DSH Total Computable. This column contains the States' total computable FFY 1995 inpatient hospital DSH expenditures as reported on the Form CMS–64. |
| Column C | IMD and Mental Health Services FY 95 DSH Total Computable. This column contains the total computable FFY 1995 mental health facility DSH expenditures as reported on the Form CMS–64 as of January 1, 1997. |
| Column D | Total Inpatient & IMD & Mental Health FY 95 DSH Total Computable, Col. B + C. This column contains the total computation of all inpatient hospital DSH expenditures and mental health facility DSH expenditures for FFY 1995 as reported on the Form CMS–64 as of January 1, 1997 (representing the sum of Column B and Column C). |
| Column E | Applicable Percentage Col. C/D. This column contains the ''applicable percentage'' representing the total Computable FFY 1995 mental health facility DSH expenditures divided by total computable all inpatient hospital and mental health facility DSH expenditures for FFY 1995 (the amount in Column C divided by the amount in Column D). Per section 1923(h)(2)(A)(ii)(II) of the Act, for FFYs after FY 2002, the applicable percentage can be no greater than 33 percent. |
| Column F | FY 2009 Federal Share DSH Allotment. This column contains the States' preliminary FFY 2009 DSH allotments. |
| Column G | FFY 2009 FMAP. |
| Column H | FY 2009 DSH Allotment Total Computable Col. F/G. This column contains FFY 2009 total computable DSH allotment (determined as Column F/Column G). |
| Column I | Col E × Col H in TC. This column contains the applicable percent of FFY 2009 total computable DSH allotment (calculated as Column E × Column H). |
| Column J | FY 2009 IMD DSH Limit Total Computable. Lesser of Col. C or I. The column contains the lesser of Column I or C. |
| Column K | FY 2009 IMD DSH Limit Federal Share, Col. G × J. This column contains the total computable IMD DSH Limit from Col. J and converts that amount into a Federal share (calculated as Col. G × Col. J). |
| Column L | Low DSH Status. This column contains Low DSH status for each State. |

FOOTNOTES:

/1 "YES", if FY 2009 or prior fiscal year is the "Fiscal Year Specified", as determined under section 1923(f)(3)(D) of the Social Security Act; "NOT MET", if Fiscal Year Specified has not occurred, and "NA" for States that this provision is not applicable.

/2 For Non-Low DSH States, entries in Columns C through Column K are only for States meeting the "Fiscal Year Specified" test ("YES" in Column B). The entry in Column D is the actual prior year (FY 2008) DSH allotment, and for States that FY 2009 is the Fiscal Year Specified, the prior FY 2008 DSH allotment was equal to the FY 2004 allotment.

/3 The actual FY 2004 D.C DSH allotment was $37,676,000. However, under section 6054 of DRA, for purposes of establishing the actual FY 2006 DSH allotment for D.C., the FY 2004 DSH allotment for D.C. was recalculated as $57,692,600 .

/4 Hawaii and Tennessee DSH allotments determined under section 1923(f)(6) of the Act; under this section, Tennessee's DSH payments are limited to 30% of DSH allotment.

## Medicare Program; First Semi-Annual Meeting of the Advisory Panel on Ambulatory Payment Classification Groups—February 18–20, 2009

**AGENCY:** Centers for Medicare & Medicaid Services, Department of Health and Human Services.

**ACTION:** Notice.

**SUMMARY:** This notice announces the first semi-annual meeting of the Advisory Panel on Ambulatory Payment Classification (APC) Groups (the Panel) for 2009. The purpose of the Panel is to review the APC groups and their associated weights and to advise the Secretary of the Department of Health and Human Services (DHHS) (the Secretary) and the Administrator of the Centers for Medicare & Medicaid Services (CMS) (the Administrator) concerning the clinical integrity of the APC groups and their associated weights. We will consider the Panel's advice as we prepare the proposed and final rules that would update the hospital Outpatient Prospective Payment System (OPPS) for CY 2010.

**DATES:** *Meeting Dates:* We are scheduling the first semi-annual meeting in 2009 for the following dates and times:

- Wednesday, February 18, 2009, 1 p.m. to 5 p.m. (e.s.t.) [1]
- Thursday, February 19, 2009, 8 a.m. to 5 p.m. (e.s.t.) [1]
- Friday, February 20, 2009, 8 a.m. to 12 noon (e.s.t.) [2]

*Deadlines:*

*Deadline for Hardcopy Comments/ Suggested Agenda Topics*—5 p.m. (e.s.t.), Thursday, January 15, 2009

*Deadline for Hardcopy Presentations*—5 p.m. (e.s.t.), Thursday, January 15, 2009

*Deadline for Attendance Registration*—5 p.m. (e.s.t.), Wednesday, February 11, 2009

*Deadline for Special Accommodations*—5 p.m. (e.s.t.), Wednesday, February 11, 2009

*Submission of Materials to the Designated Federal Officer (DFO):*

Because of staffing and resource limitations, we cannot accept written comments and presentations by FAX, nor can we print written comments and presentations received electronically for dissemination at the meeting.

Only hardcopy comments and presentations can be reproduced for public dissemination. All hardcopy presentations *must be accompanied by Form CMS–20017 (revised 01/07).* The form is now available through the CMS Forms Web site. The Uniform Resource Locator (URL) for linking to this form is as follows: *http://www.cms.hhs.gov/cmsforms/downloads/cms20017.pdf.*

Presenters must use the most recent copy of CMS–20017 (updated 01/07) at the above URL. Additionally, presenters must *clearly* explain the action(s) that they are requesting CMS to take in the appropriate section of the form. They must also clarify their relationship to the organization that they represent in the presentation.

**Note:** Issues that are vague, or that are outside the scope of the APC Panel's purpose, will not be considered for presentations and comments. There will be no exceptions to this rule. We appreciate your cooperation on this matter.

We are also requiring electronic versions of the written comments and presentations, in addition to the hardcopies.

In summary, presenters and/or commenters must do the following:

- Send both electronic and hardcopy versions of their presentations and written comments by the prescribed deadlines.
- Send electronic transmissions to the e-mail address below.
- Do not send pictures of patients in any of the documents unless their faces have been blocked out.
- Do not send documents electronically that have been archived.
- Mail (or send by courier) to the DFO all hardcopies, accompanied by Form CMS–20017 (revised 01/07), if they are presenting, as specified in the **FOR FURTHER INFORMATION CONTACT** section of this notice.
- Commenters are not required to send Form CMS–20017 with their written comments.

**ADDRESSES:** The meeting will be held in the Auditorium, CMS Central Office, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

**FOR FURTHER INFORMATION CONTACT:** For further information, contact: Shirl Ackerman-Ross, DFO, CMS, CMM, HAPG, DOC, 7500 Security Boulevard, Mail Stop C4–05–17, Baltimore, MD 21244–1850. Phone: (410) 786–4474.

**Note:** We recommend that you advise couriers of the following information: When delivering hardcopies of presentations to CMS, if no one answers at the above phone number, please call (410) 786–4532 or (410) 786–9316.

E-mail address for comments, presentations, and registration requests is *CMS APCPanel@cms.hhs.gov.*

**Note:** There is NO underscore in this e-mail address; there is a SPACE between CMS and APCPanel.

News media representatives must contact our Public Affairs Office at (202) 690–6145.

*Advisory Committees' Information Lines:*

The phone numbers for the CMS Federal Advisory Committee Hotline are 1–877–449–5659 (toll free) and (410) 786–9379 (local).

WEB SITES:

The following information is available on the CMS Web site at *http://www.cms.hhs.gov/FACA/05_AdvisoryPanelonAmbulatoryPaymentClassificationGroups.asp#TopOfPage* in order to obtain the following information:

**Note:** There is an UNDERSCORE after FACA/05 (like this_); there is no space.

- Additional information on the APC meeting agenda topics
- Updates to the Panel's activities
- Copies of the current Charter
- Membership requirements.

You may also search information about the APC Panel and its membership in the FACA database at the following URL: *https://www.fido.gov/facadatabase/public.asp.*

**SUPPLEMENTARY INFORMATION:**

## I. Background

The Secretary is required by section 1833(t)(9)(A) of the Social Security Act (the Act) to consult with an expert, outside advisory panel on the clinical integrity of the APC groups and weights established under the Medicare hospital OPPS.

The APC Panel meets up to three times annually. The Charter requires that the Panel must be fairly balanced in its membership in terms of the points of view represented and the functions to be performed. The Panel consists of up to 15 members who are representatives of providers and a Chair.

Each Panel member must be employed full-time by a hospital, hospital system, or other Medicare provider subject to payment under the OPPS. The Secretary or Administrator selects the Panel membership based upon either self-nominations or nominations submitted by Medicare providers and other interested organizations.

All members must have technical expertise to enable them to participate fully in the Panel's work. Such expertise encompasses hospital payment systems; hospital medical care delivery systems; provider billing systems; APC groups; Current Procedural Terminology codes; and alpha-numeric Health Care Common Procedure Coding System codes; and the use of, and payment for, drugs, medical devices, and other services in the outpatient setting, as well as other forms of relevant expertise. Details regarding membership requirements for the APC Panel are found on the CMS and FACA Web sites as listed above.

[1] The times listed in this notice are approximate times; consequently, the meetings may last longer than listed in this notice—but will not begin before the posted times.

[2] If the business of the Panel concludes on Thursday, February 19, 2009, there will be no Friday (February 20, 2009) meeting.

The Panel presently consists of the following members:

- E.L. Hambrick, M.D., J.D., Chair, a CMS Medical Officer.
- Gloryanne Bryant, B.S., RHIA, RHIT, CCS.
- Patrick A. Grusenmeyer, Sc.D., FACHE.
- Kathleen Graham, R.N., MSHA, CPHQ, ACM.
- Judith T. Kelly, B.S.H.A., RHIT, RHIA, CCS.
- Michael D. Mills, PhD.
- Thomas M. Munger, M.D., FACC.
- Agatha L. Nolen, D.Ph., M.S.
- Randall A. Oyer, M.D.
- Beverly Khnie Philip, M.D.
- Russ Ranallo, M.S., B.S.
- James V. Rawson, M.D.
- Michael A. Ross, M.D., FACEP.
- Patricia Spencer-Cisek, M.S., APRN–BC, AOCN®.
- Kim Allen Williams, M.D., FACC, FABC.
- Robert M. Zwolak, M.D., PhD., FACS.

**II. Agenda**

The agenda for the February 2009 meeting will provide for discussion and comment on the following topics as designated in the Panel's Charter:

- Addressing whether procedures within an APC group are similar both clinically and in terms of resource use.
- Evaluating APC group weights.
- Reviewing the packaging of OPPS services and costs, including the methodology and the impact on APC groups and payment.
- Removing procedures from the inpatient list for payment under the OPPS.
- Using single and multiple procedure claims data for CMS's determination of APC group weights.
- Addressing other technical issues concerning APC group structure.

**Note:** The subject matter before the Panel will be limited to these and related topics. Issues related to calculation of the OPPS conversion factor, charge compression, pass-through payments, or wage adjustments are not within the scope of the Panel's purpose. Therefore, these issues will not be considered for presentations and/or comments. There will be no exceptions to this rule. We appreciate your cooperation on this matter.

The Panel may use data collected or developed by entities and organizations, other than DHHS and CMS, in conducting its review. We recommend organizations submit data for the Panel's and CMS staff's review.

**III. Written Comments and Suggested Agenda Topics**

Send hardcopy and electronic written comments and suggested agenda topics to the DFO at the address indicated above. The DFO must receive these items by 5 p.m. (e.s.t.), Thursday, January 15, 2009. There will be no exceptions. We appreciate your cooperation on this matter.

The written comments and suggested agenda topics submitted for the February 2009 APC Panel meeting must fall within the subject categories outlined in the Panel's Charter and as listed in the Agenda section of this notice.

**IV. Oral Presentations**

Individuals or organizations wishing to make 5-minute oral presentations must submit hardcopy and electronic versions of their presentations to the DFO by 5 p.m. (e.s.t.), Thursday, January 15, 2009, for consideration.

The number of oral presentations may be limited by the time available. Oral presentations should not exceed 5 minutes in length for an individual or an organization.

The Chair may further limit time allowed for presentations due to the number of oral presentations, if necessary.

**V. Presenter and Presentation Information**

All presenters must submit Form CMS–20017 (revised 01/07). Hardcopies are required for oral presentations; however, electronic submissions of Form CMS–20017 are optional. The DFO must receive the following information from those wishing to make oral presentations:

- Form CMS–20017 completed with all pertinent information identified on the first page of the presentation.
- One hardcopy of presentation.
- Electronic copy of presentation.
- Personal registration information as described in the Meeting Attendance section below.
- Those persons wishing to submit comments only must send hardcopy and electronic versions of their comments, but they are not required to submit Form CMS–20017.

**VI. Oral Comments**

In addition to formal oral presentations, there will be opportunity during the meeting for public oral comments, which will be limited to 1 minute for each individual and a total of 3 minutes per organization.

**VII. Meeting Attendance**

The meeting is open to the public; however, attendance is limited to space available. Attendance will be determined on a first-come, first-served basis.

Persons wishing to attend this meeting, which is located on Federal property, must e-mail the DFO to register in advance no later than 5 p.m. (e.s.t.), Wednesday, February 11, 2009. A confirmation will be sent to the requester(s) via return e-mail.

The following personal information must be e-mailed to the DFO by the date and time above:

- Name(s) of attendee(s);
- Title(s);
- Organization;
- E-mail address(es); and
- Telephone number(s).

**VIII. Security, Building, and Parking Guidelines**

The following are the security, building, and parking guidelines:

- Persons attending the meeting including presenters must be registered and on the attendance list by the prescribed date.
- Individuals who are not registered in advance will not be permitted to enter the building and will be unable to attend the meeting.
- Attendees must present photographic identification to the Federal Protective Service or Guard Service personnel before entering the building.
- Security measures include inspection of vehicles, inside and out, at the entrance to the grounds.
- In addition, all persons entering the building must pass through a metal detector.
- All items brought into CMS including personal items, for example desktops, cell phones, and palm pilots, are subject to physical inspection.
- The public may enter the building 30 to 45 minutes before the meeting convenes each day.
- All visitors must be escorted in areas other than the lower and first-floor levels in the Central Building.
- The main-entrance guards will issue parking permits and instructions upon arrival at the building.

**IX. Special Accommodations**

Individuals requiring sign-language interpretation or other special accommodations must send a request for these services to the DFO by 5 p.m. (e.s.t.), Wednesday, February 11, 2009.

**Authority:** (Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program).

Dated: December 4, 2008.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

**[CMS–3209–N]**

### Medicare Program; Meeting of the Medicare Evidence Development & Coverage Advisory Committee—February 25, 2009

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.

**ACTION:** Notice of meeting.

**SUMMARY:** This notice announces that a public meeting of the Medicare Evidence Development & Coverage Advisory Committee (MEDCAC) (''Committee'') will be held on Wednesday, February 25, 2009. The Committee generally provides advice and recommendations concerning the adequacy of scientific evidence needed to determine whether certain medical items and services can be covered under the Medicare statute. This meeting will focus on the requirements for evidence to determine if diagnostic use of genomic testing in beneficiaries with signs or symptoms of disease improves health outcomes in Medicare beneficiaries. The meeting will also discuss the various kinds of evidence that are useful to support requests for Medicare coverage in this field. This meeting is open to the public in accordance with the Federal Advisory Committee Act (5 U.S.C. App. 2, section 10(a)).

**DATES:** *Meeting Date:* This meeting will be held on Wednesday, February 25, 2009 from 7:30 a.m. until 4:30 p.m., eastern standard time (e.s.t).

*Deadline for Submission of Written Comments:* Written comments must be received at the address specified in the **ADDRESSES** section of this notice by 5 p.m., e.s.t on January 29, 2009. Once submitted all comments are final.

*Deadlines for Speaker Registration and Presentation Materials:* The deadline to register to be a speaker and to submit powerpoint presentation materials and writings that will be used in support of an oral presentation, is 5 p.m., e.s.t. on January 29, 2009. Speakers may register by phone or via e-mail by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Presentation materials must be received at the address specified in the **ADDRESSES** section of this notice.

*Deadline for All Other Attendees Registration:* Individuals may register by phone or via e-mail by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by 5 p.m., e.s.t. on Wednesday, February 18, 2009.

*Deadline for Submitting a Request for Special Accommodations:* Persons attending the meeting who are hearing or visually impaired, or have a condition that requires special assistance or accommodations, are asked to contact the Executive Secretary as specified in the **FOR FURTHER INFORMATION CONTACT** section of this notice no later than 5 p.m., e.s.t. Friday, February 18, 2009.

**ADDRESSES:** *Meeting Location:* The meeting will be held in the main auditorium of the Centers for Medicare & Medicaid Services, 7500 Security Blvd, Baltimore, MD 21244.

*Submission of Presentations and Comments:* Presentation materials and written comments that will be presented at the meeting must be submitted via e-mail to *MedCACpresentations@cms.hhs.gov* or by regular mail to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the date specified in the **DATES** section of this notice.

**FOR FURTHER INFORMATION CONTACT:** Maria Ellis, Executive Secretary for MEDCAC, Centers for Medicare & Medicaid Services, Office of Clinical Standards and Quality, Coverage and Analysis Group, C1–09–06, 7500 Security Boulevard, Baltimore, MD, 21244 or contact Ms. Ellis by phone at 410–786–0309 or via e-mail at *Maria.Ellis@cms.hhs.gov*

**SUPPLEMENTARY INFORMATION:**

#### I. Background

MEDCAC, formerly known as the Medicare Coverage Advisory Committee (MCAC), provides advice and recommendations to CMS regarding clinical issues. (For more information on MCAC, see the December 14, 1998 **Federal Register** (63 FR 68780.)) This notice announces the February 25, 2009, public meeting of the Committee. During this meeting, the Committee will discuss the requirements for evidence to determine if diagnostic uses of genomic testing in beneficiaries with signs or symptoms of disease improves health outcomes in Medicare beneficiaries. Background information about this topic, including panel materials, are available at *http://ww.cms.hhs.gov/coverage.* We encourage the participation of appropriate organizations with expertise in the evidence regarding this use of genomic testing.

#### II. Meeting Format

This meeting is open to the public. The Committee will hear oral presentations from the public for approximately 45 minutes. The Committee may limit the number and duration of oral presentations to the time available. Your comments should focus on issues specific to the list of topics that we have proposed to the Committee. The list of research topics to be discussed at the meeting will be available on the following Web site prior to the meeting: *http://www.cms.hhs.gov/mcd/index_list.asp?list_type=mcac*. We require that you declare at the meeting whether you have any financial involvement with manufacturers (or their competitors) of any items or services being discussed.

The Committee will deliberate openly on the topics under consideration. Interested persons may observe the deliberations, but the Committee will not hear further comments during this time except at the request of the chairperson. The Committee will also allow a 15-minute unscheduled open public session for any attendee to address issues specific to the topics under consideration. At the conclusion of the day, the members will vote and the Committee will make its recommendation(s) to CMS.

#### III. Registration Instructions

CMS' Coverage and Analysis Group is coordinating meeting registration. While there is no registration fee, individuals must register to attend. You may register by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the deadline listed in the **DATES** section of this notice. Please provide your full name (as it appears on your state-issued driver's license), address, organization, telephone, fax number(s), and e-mail address. You will receive a registration confirmation with instructions for your arrival at the CMS complex or you will be notified the seating capacity has been reached.

#### IV. Security, Building, and Parking Guidelines

This meeting will be held in a Federal government building; therefore, Federal security measures are applicable. We recommend that confirmed registrants arrive reasonably early, but no earlier

than 45 minutes prior to the start of the meeting, to allow additional time to clear security. Security measures include the following:

- Presentation of government-issued photographic identification to the Federal Protective Service or Guard Service personnel.
- Inspection of vehicle's interior and exterior (this includes engine and trunk inspection) at the entrance to the grounds. Parking permits and instructions will be issued after the vehicle inspection.
- Inspection, via metal detector or other applicable means of all persons brought entering the building. We note that all items brought into CMS, whether personal or for the purpose of presentation or to support a presentation, are subject to inspection. We cannot assume responsibility for coordinating the receipt, transfer, transport, storage, set-up, safety, or timely arrival of any personal belongings or items used for presentation or to support a presentation.

**Note:** Individuals who are not registered in advance will not be permitted to enter the building and will be unable to attend the meeting. The public may not enter the building earlier than 30 to 45 minutes prior to the convening of the meeting.

All visitors must be escorted in areas other than the lower and first floor levels in the Central Building.

**Authority:** 5 U.S.C. App. 2, section 10(a).

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: December 11, 2008.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

**[Docket No. FDA–2008–N–0635]**

### Agency Information Collection Activities; Proposed Collection; Comment Request; Emergency Shortages Data Collection System (formerly ''Emergency Medical Device Shortages Program Survey'')

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the Emergency Shortages Data Collection System.

**DATES:** Submit written or electronic comments on the collection of information by February 17, 2009.

**ADDRESSES:** Submit electronic comments on the collection of information to *http://www.regulations.gov*. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** Denver Presley, Jr., Office of Information Management (HFA–710), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–796–3793.

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Emergency Shortages Data Collection System (formerly ''Emergency Medical Device Shortages Program Survey'')—Federal Food, Drug, and Cosmetic Act, Section 903(d)(2) (OMB Control Number 0910–0491)—Extension**

Under section 903(d)(2) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 393(d)(2)), the Commissioner of FDA is authorized to implement general powers (including conducting research) to carry out effectively the mission of FDA. Subsequent to the events of September 11, 2001, and as part of broader counter-terrorism and emergency preparedness activities, FDA's Center for Devices and Radiological Health (CDRH) began developing operational plans and interventions that would enable CDRH to anticipate and respond to medical device shortages that might arise in the context of federally-declared disasters/emergencies or regulatory actions. In particular, CDRH identified the need to acquire and maintain detailed data on domestic inventory, manufacturing capabilities, distribution plans, and raw material constraints for medical devices that would be in high demand, and/or would be vulnerable to shortages in specific disaster/emergency situations, or following specific regulatory actions. Such data could support prospective risk assessment, help inform risk mitigation strategies, and support real-time decisionmaking by the Department of Health and Human Services during actual emergencies or emergency preparedness exercises.

''The Emergency Medical Device Shortages Program Survey'' was developed in 2002 to support the acquisition of such data from medical device manufacturers. In 2004, CDRH changed the process for the data collection, and the electronic database in which the data were stored and was formally renamed the ''Emergency Shortages Data Collection System'' (ESDCS). Recognizing that some of the data collected may be commercially confidential, access to the ESDCS is restricted to members of the FDA Emergency Shortage Team (EST) and senior management with a need-to-

know. At this time, the need-to-know senior management personnel are limited to 5 senior managers. Further, the data are used by this defined group only for decisionmaking and planning in the context of a federally-declared disaster/emergency, an official emergency preparedness exercise, or a potential public health risk posed by nondisaster-related device shortage.

The data procurement process consists of an initial scripted telephone call to a regulatory officer at a registered manufacturer of one or more key medical devices being tracked in the emergency shortages data collection system. In this initial call, the intent and goals of the data collection effort are described, and the specific data request is made. After the initial call, one or more additional followup calls and/or electronic mail correspondence may be required to verify/validate data sent from the manufacturer, confirm receipt and/or request additional detail. Although the regulatory officer is the agent who is initially contacted, they may designate an alternate representative within their organization to correspond subsequently with the CDRH EST member who is collecting or verifying/validating the data.

Because of the dynamic nature of the medical device industry, particularly with respect to specific product lines, manufacturing capabilities and raw material/subcomponent sourcing, it is necessary to update the data in the ESDCS at regular intervals. This is done on a weekly basis, but efforts are made to limit the frequency of outreach to a specific manufacturer to no more than every 4 months.

The ESDCS will only include those medical devices for which there will likely be high demand during a specific emergency/disaster, or for which there are sufficiently small numbers of manufacturers such that disruption of manufacture or loss of one or more of these manufacturers would create a shortage.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

| Section of the Act | No. of Respondents | Annual Frequency per Response | Total Annual Responses | Hours per Response | Total Hours |
|---|---|---|---|---|---|
| 903(d)(2) | 125 | 3 | 375 | 0.5 | 188 |

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA based the burden estimates in Table 1 of this document on past experience with direct contact with the medical device manufacturers, and anticipated changes in the medical device manufacturing patterns for the specific devices being monitored. FDA estimates that approximately 125 manufacturers would be contacted by telephone and/or electronic mail 3 times per year to either obtain primary data or to verify/validate data. Because the data being requested represent data elements that are monitored or tracked by manufacturers as part of routine inventory management activities, it is anticipated that for most manufacturers, the estimated time required of manufacturers to complete the data request will not exceed 30 minutes per request cycle.

Please note that on January 15, 2008, the FDA Division of Dockets Management Web site transitioned to the Federal Dockets Management System (FDMS). FDMS is a Government-wide, electronic docket management system. Electronic comments or submissions will be accepted by FDA only through FDMS at *http://www.regulations.gov*.

Dated: December 11, 2008.

### Food and Drug Administration

**[Docket No. FDA–2008–N–0631]**

### Agency Information Collection Activities; Proposed Collection; Comment Request; Medical Device Recall Authority

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on information collection requirements for medical device recall authority.

**DATES:** Submit written or electronic comments on the collection of information by February 17, 2009.

**ADDRESSES:** Submit electronic comments on the collection of information to *http://www.regulations.gov*. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** Denver Presley, Jr., Office of Information Management (HFA–710), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–796–3793.

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether

the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Medical Device Recall Authority—21 CFR Part 810 (OMB Control Number 0910–0432)—Extension**

This collection of information implements section 518(e) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360h) and part 810 (21 CFR part 810) for the medical device recall authority provisions. Section 518(e) of the act provides FDA with the authority to issue an order requiring an appropriate person, including manufacturers, importers, distributors, and retailers of a device, if FDA finds that there is reasonable probability that the device intended for human use would cause serious adverse health consequences or death to: (1) Immediately cease distribution of such device, (2) immediately notify health professionals and device-user facilities of the order, and (3) instruct such professionals and facilities to cease use of such device.

Further, the provisions under section 518(e) of the act sets out a three-step procedure for issuance of a mandatory device recall order which are: (1) If there is a reasonable probability that a device intended for human use would cause serious, adverse health consequences or death, FDA may issue a cease distribution and notification order requiring the appropriate person to immediately: (a) Cease distribution of the device, (b) notify health professionals and device user facilities of the order, and (c) instruct those professionals and facilities to cease use of the device, (2) FDA will provide the person named in the cease distribution and notification order with the opportunity for an informal hearing on whether the order should be modified, vacated, or amended to require a mandatory recall of the device and, (3) after providing the opportunity for an informal hearing, FDA may issue a mandatory recall order if the agency determines that such an order is necessary.

The information collected under the recall authority provisions will be used by FDA to: (1) Ensure that all devices entering the market are safe and effective, (2) accurately and immediately detect serious problems with medical devices, and (3) remove dangerous and defective devices from the market.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

| 21 CFR Section | No. of Respondents | Annual Frequency per Response | Total Annual Responses | Hours per Response | Total Hours |
|---|---|---|---|---|---|
| 810.10(d) | 2 | 1 | 2 | 8 | 16 |
| 810.11(a) | 1 | 1 | 1 | 8 | 8 |
| 810.12(a-b) | 1 | 1 | 1 | 8 | 8 |
| 810.14 | 2 | 1 | 2 | 16 | 32 |
| 810.15(a-c) | 2 | 1 | 2 | 12 | 24 |
| 810.15(d) | 2 | 1 | 2 | 4 | 8 |
| 810.15(e) | 10 | 1 | 10 | 1 | 10 |
| 810.16(a-b) | 2 | 12 | 24 | 40 | 960 |
| 810.17(a) | 2 | 1 | 2 | 8 | 16 |
| Total | | | | | 1,082 |

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

| 21 CFR Section | No. of Recordkeepers | Annual Frequency per Recordkeeping | Total Annual Records | Hours per Record | Total Hours |
|---|---|---|---|---|---|
| 810.15(b) | 2 | 1 | 1 | 8 | 8 |

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Explanation for Burden Estimates:

The burden estimates for Tables I and II are based on FDA's experience with voluntary recalls under part 810 of the regulations. FDA expects no more than two mandatory recalls per year, as most recalls are done voluntarily. Since the last time this collection of information was submitted to OMB for renewal/approval, there have been no mandatory recalls.

Please note that on January 15, 2008, the FDA Division of Dockets Management Web site transitioned to the Federal Dockets Management System (FDMS). FDMS is a Government-wide, electronic docket management system. Electronic comments or submissions will be accepted by FDA only through FDMS at *http://www.regulations.gov*.

Dated: December 15, 2008.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

**[Docket No. FDA–2008–N–0641]**

### Agency Information Collection Activities; Proposed Collection; Comment Request; Voluntary Hazard Analysis and Critical Control Point Manuals for Operators and Regulators of Retail and Food Service Establishments

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information collection provisions of the agency's Voluntary Hazard Analysis and Critical Control Point Manuals for Operators and Regulators of Retail and Food Service Establishments.

**DATES:** Submit written or electronic comments on the collection of information by February 17, 2009.

**ADDRESSES:** Submit electronic comments on the collection of information to *http://www.regulations.gov*. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** Jonna Capezzuto, Office of Information Management (HFA–710), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–796–3794.

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Voluntary Hazard Analysis and Critical Control Point Manuals for Operators and Regulators of Retail and Food Service Establishments (OMB Control Number 0910–0578)—Extension**

The Operator's Manual contains information and recommendations for operators of retail and foodservice establishments who wish to develop and implement a voluntary food safety management system based on Hazard Analysis and Critical Control Point (HACCP) principles. Operators may decide to incorporate some or all of the principles presented in the manual into their existing food safety management systems. The recordkeeping practices discussed in the manual are voluntary and may include documenting certain activities, such as monitoring and verification, which the operator may or may not deem necessary to ensure food safety. The manual includes optional worksheets to assist operators in developing and validating a voluntary food safety management system.

The Regulator's Manual contains recommendations for State, local, and tribal regulators on conducting risk-based inspections of retail and foodservice establishments, including recommendations about recordkeeping practices that can assist operators in preventing foodborne illness. These recommendations may lead to voluntary actions by operators based on consultation with regulators. For example, an operator may develop a risk control plan as an intervention strategy for controlling specific out-of-control foodborne illness risk factors identified during an inspection. Further, the manual contains recommendations to assist regulators when evaluating voluntary food safety management systems in retail and foodservice establishments. Such evaluations typically consist of the following two components: (1) Validation (assessing whether the establishment's voluntary food safety management system is adequate to control food safety hazards) and (2) verification (assessing whether the establishment is following its voluntary food safety management system). The manual includes a sample entitled ''Verification Inspection Checklist'' to assist regulators when conducting verification inspections of establishments with voluntary food safety management systems.

Types of operator records discussed in the manuals and listed in the following burden estimates include: (1) Food safety management systems (plans that delineate the formal procedures to follow to control all food safety hazards in an operation); (2) risk control plans (HACCP-based, goal-oriented plans for achieving active managerial control over specific out-of-control foodborne illness risk factors); (3) hazard analysis (written assessment of the significant food safety hazards associated with foods prepared in the establishment); (4) prerequisite programs (written policies or procedures, including but not limited to, standard operating procedures, training protocols, and buyer specifications that address maintenance of basic operational and sanitation conditions); (5) monitoring (records showing the observations or measurements that are made to help determine if critical limits are being met and maintained); (6) corrective action (records indicating the activities that are completed whenever a critical limit is not met); (7) ongoing verification (records showing the procedures that are followed to ensure that monitoring and other functions of the food safety management system are being implemented properly); and (8)

validation (records indicating that scientific and technical information is collected and evaluated to determine if the food safety management system, when properly implemented, effectively controls the hazards).

All recommendations in both manuals are voluntary. For simplicity and to avoid duplicate estimates for operator recordkeeping practices that are discussed in both manuals, the burden for all collection of information recommendations for retail and foodservice operators are estimated together in table 1 of this document, regardless of the manual in which they appear. Collection of information recommendations for regulators in the Regulator's Manual are listed separately in table 2 of this document.

*Description of Respondents*: The likely respondents to this collection of information are operators and regulators of retail and foodservice establishments.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL RECORDKEEPING BURDEN FOR OPERATORS [1]

| Types of Records | No. of Recordkeepers | Annual Frequency of Recordkeeping | Total Annual Records | Hours per Recordkeeper | Total Hours |
|---|---|---|---|---|---|
| Prerequisite Program Records | [2] 100,000 | 365 | 36,500,000 | 0.1 | 3,650,000 |
| Monitoring Records | [2] 100,000 | 365 | 36,500,000 | 0.3 | 10,950,000 |
| Corrective Action Records | [2] 100,000 | 365 | 36,500,000 | 0.1 | 3,650,000 |
| Ongoing Verification Records (includes calibration records) | [2] 100,000 | 365 | 36,500,000 | 0.1 | 3,650,000 |
| Validation Records | [2] 50,000 | 1 | 50,000 | 4 | 200,000 |
| Annual Burden [3]: | | | | | 22,100,000 |
| Risk Control Plan | 50,000 | 1 | 50,000 | 2 | 100,000 |
| Monitoring Records | 100,000 | 90 | 9,000,000 | 0.3 | 2,700,000 |
| Corrective Action Records | 100,000 | 90 | 9,000,000 | 0.1 | 900,000 |
| Ongoing Verification Records (includes calibration records) | 100,000 | 90 | 9,000,000 | 0.1 | 900,000 |
| Annual Burden [4] | | | | | 4,600,000 |
| Total Annual Burden for Operators | | | | | 26,700,000 |

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.
[2] Annual burden.
[3] Burden for developing and implementing a food safety management system based on the Operator's Manual.
[4] Annual burden for developing and implementing a risk control plan based on the Regulator's Manual.

The burden for these activities may vary among retail and foodservice operators depending on the type and number of products involved, the complexity of an establishment's operation, the nature of the equipment or instruments required to monitor critical control points, and the extent to which an operator uses the Operator's Manual and/or the Regulator's Manual. The estimate does not include collections of information that are a usual and customary part of an operator's normal activities. FDA has established as a goal to have 50,000 (0.05 percent) of the approximately one million U.S. retail and foodservice operators implement the recommendations outlined in the 2 manuals. This target figure is used in calculating the burden in tables 1 and 2 of this document because the agency lacks data on how to base an estimate of how many retail and foodservice establishments are likely to use one or more of the manuals to voluntarily implement a comprehensive food safety management system based on HACCP principles or a risk control plan for out-of-control processes identified during an inspection. FDA's estimate of the total number of retail and foodservice establishments is based on numbers obtained from the two major trade organizations representing these industries, the Food Marketing Institute, and the National Restaurant Association, respectively.

The hour burden estimates in table 1 of this document for operators who follow the HACCP-based recommendations in the Operator's Manual are based on the estimated average annual information collection burden for mandatory HACCP rules, including seafood HACCP (60 FR 65096 at 65178; December 18, 1995) and juice HACCP (66 FR 6138 at 6202; January 19, 2001). FDA estimates that once the system is in place, the annual frequency of records is based on 365 operating days per year. Assuming there is one recordkeeper per shift of operation, the agency estimates that two recordkeepers per day would be needed to conduct monitoring, corrective action, recordkeeping, and verification outlined in the system. The agency further estimates that validation will be conducted once per year, based on menu or food list changes, changes in distributors, or changes in food preparation processes used. The validation will require a total of 4 labor hours.

The second set of estimates in table 1 of this document shows the annual burden for developing and implementing a risk control plan to control specific out-of-control foodborne illness risk factors identified during an inspection by a State, local, or tribal regulatory authority. If an operator decides to use a risk control plan as recommended in the Regulator's Manual, one person from the establishment is needed to work with the regulator to develop the written

plan. FDA estimates that two recordkeepers per day (one recordkeeper for each shift) would be needed to conduct monitoring, corrective action, recordkeeping, and verification outlined in the risk control plan. The estimated duration of implementation for a risk control plan is 90 days, which is the minimum recommended time to achieve long-term behavior change.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN FOR REGULATORS [1]

| Types of Records | No. of Recordkeepers | Annual Frequency of Recordkeeping | Total Annual Records | Hours per Recordkeeper | Total Hours |
|---|---|---|---|---|---|
| Voluntary Food Safety Management System Evaluation (includes validation, verification, and completion of verification inspection checklist) | 50,000 | 1 | 50,000 | 16 | 800,000 |
| Total Annual Burden for Regulators | | | | | 800,000 |

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

It is difficult to predict the number of State, local, and tribal regulatory jurisdictions that will use the Regulator's Manual. But, FDA anticipates that retail and foodservice establishments which voluntarily develop and implement a food safety management system based on the Operator's Manual will request their regulatory authorities to conduct an evaluation of their system. The estimates in table 2 of this document for the annual burden to State, local, and tribal regulators that follow the recommendations in the Regulator's Manual were calculated based on the usual time needed for one person to evaluate a voluntarily-implemented food safety management system and record the findings. The number of times an inspector may be asked by an operator to evaluate a voluntarily-implemented system is not expected to exceed once per year.

Please note that on January 15, 2008, the FDA Division of Dockets Management Web site transitioned to the Federal Dockets Management System (FDMS). FDMS is a Government-wide, electronic docket management system. Electronic comments or submissions will be accepted by FDA only through FDMS at *http://www.regulations.gov*.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

**[Docket No. FDA–2008–N–0617]**

### Determination That RUBRAMIN PC (Cyanocobalamin) Injection and Ten Other Drug Products Were Not Withdrawn From Sale for Reasons of Safety or Effectiveness

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) has determined that the eleven drug products listed in this document were not withdrawn from sale for reasons of safety or effectiveness. This determination means that FDA will not begin procedures to withdraw approval of abbreviated new drug applications (ANDAs) that refer to the drug products, and it will allow FDA to continue to approve ANDAs that refer to the products as long as they meet relevant legal and regulatory requirements.

**FOR FURTHER INFORMATION CONTACT:** Olivia Pritzlaff, Center for Drug Evaluation and Research (HFD–7), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 6308, Silver Spring, MD 20993–0002, 301–796–3601.

**SUPPLEMENTARY INFORMATION:** In 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 (Public Law 98–417) (the 1984 amendments), which authorized the approval of duplicate versions of drug products approved under an ANDA procedure. ANDA sponsors must, with certain exceptions, show that the drug for which they are seeking approval contains the same active ingredient in the same strength andosage form as the ''listed drug,'' which is a version of the drug that was previously approved. Sponsors of ANDAs do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA). The only clinical data required in an ANDA are data to show that the drug that is the subject of the ANDA is bioequivalent to the listed drug.

The 1984 amendments include what is now section 505(j)(7) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 355(j)(7)), which requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the ''Approved Drug Products With Therapeutic Equivalence Evaluations,'' which is generally known as the ''Orange Book.'' Under FDA regulations, a drug is withdrawn from the list if the agency withdraws or suspends approval of the drug's NDA or ANDA for reasons of safety or effectiveness, or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

Under § 314.161(a) (21 CFR 314.161(a)), the agency must determine whether a listed drug was withdrawn from sale for reasons of safety or effectiveness: (1) Before an ANDA that refers to that listed drug may be approved; (2) whenever a listed drug is voluntarily withdrawn from sale and ANDAs that refer to the listed drug have been approved; and (3) when a person petitions for such a determination under 21 CFR 10.25(a) and 10.30. Section 314.161(d) provides that if FDA determines that a listed drug was withdrawn from sale for reasons of safety or effectiveness, the agency will initiate proceedings that could result in the withdrawal of approval of the ANDAs that refer to the listed drug.

FDA has become aware that the drug products listed in the table in this document are no longer being marketed. (As requested by the applicant, FDA withdrew approval of NDA 6–799 for RUBRAMIN PC (cyanocobalamin)

Injection in the **Federal Register** of November 7, 2007 (72 FR 62858).)

| Application No. | Drug | Applicant |
|---|---|---|
| NDA 6–799 | RUBRAMIN PC (cyanocobalamin) Injection, 1 milligram (mg)/milliliter (mL) | Bristol Myers Squibb Co., P.O. Box 4500, Princeton, NJ 08543–4500 |
| NDA 10–060 | FLORINEF (fludrocortisone acetate) Tablets, 0.1 mg | King Pharmaceuticals, Inc., 501 Fifth St., Bristol, TN 37620 |
| NDA 11–613 | IONAMIN (phentermine resin complex) Extended-Release Capsules, equivalent to (EQ) 15 mg and 30 mg base | UCB, Inc., 1950 Lake Park Dr., Smyrna, GA 30080 |
| NDA 17–849 | BRETHINE (terbutaline sulfate) Tablets, 2.5 mg and 5 mg | AAIPharma, LLC, 2320 Scientific Park Dr., Wilmington, NC 28405 |
| NDA 17–970 | NOLVADEX (tamoxifen citrate) Tablets, EQ 10 mg and 20 mg base | AstraZeneca Pharmaceuticals, 1800 Concord Pike, P.O. Box 8355, Wilmington, DE 19803–8355 |
| NDA 19–058 | TENORMIN (atenolol) Injection, 0.5 mg/mL | Do. |
| NDA 19–645 | TORADOL (ketorolac tromethamine) Tablets, 10 mg | Hoffman-La Roche, Inc., 340 Kingsland St., Nutley, NJ 07110–1199 |
| NDA 19–778 | PRINZIDE (hydrochlorothiazide and lisinopril) Tablets, 25mg/20mg | Merck Research Laboratories, P.O. Box 1000, IG2C–50, North Wales, PA19454–1009 |
| NDA 19–816 | ORUVAIL (ketoprofen) Extended-Release Capsules, 100 mg, 150 mg, and 200 mg | Wyeth Pharmaceuticals, P.O. Box 8299, Philadelphia, PA 19101–8299 |
| NDA 19–880 | PARAPLATIN (carboplatin) for Injection, 50 mg/vial, 150 mg/vial, and 450 mg/vial | Bristol Myers Squibb Co. |
| NDA 50–582 | DORYX (doxycycline hyclate) Delayed-Release Capsules, EQ 75 mg and 100 mg base | F.H. Faulding and Co., c/o Warner Chilcott, Inc., Rockaway 80 Corporate Center, 100 Enterprise Dr., suite 280, Rockaway, NJ 07866 |

FDA has reviewed its records and, under § 314.161, has determined that the drug products listed in this document were not withdrawn from sale for reasons of safety or effectiveness. Accordingly, the agency will continue to list the drug products listed in this document in the ''Discontinued Drug Product List'' section of the Orange Book. The ''Discontinued Drug Product List'' identifies, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness.

Approved ANDAs that refer to the NDAs listed in this document are unaffected by the discontinued marketing of the products subject to those NDAs. Additional ANDAs that refer to these products may also be approved by the agency if they comply with relevant legal and regulatory requirements. If FDA determines that labeling for these drug products should be revised to meet current standards, the agency will advise ANDA applicants to submit such labeling.

Dated: December 11, 2008.

### Food and Drug Administration

**[Docket No. FDA–2008–D–0118]**

### Guidance for Industry on Diabetes Mellitus—Evaluating Cardiovascular Risk in New Antidiabetic Therapies to Treat Type 2 Diabetes; Availability

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing the availability of a guidance for industry entitled ''Diabetes Mellitus—Evaluating Cardiovascular Risk in New Antidiabetic Therapies to Treat Type 2 Diabetes.'' This guidance makes recommendations about how to demonstrate that a new antidiabetic therapy to treat type 2 diabetes is not associated with an unacceptable increase in cardiovascular risk. We are issuing this guidance for immediate implementation to ensure that relevant issues related to minimizing cardiovascular risk are considered by all sponsors who have ongoing drug development programs for type 2 diabetes.

**DATES:** Submit written or electronic comments on agency guidances at any time.

**ADDRESSES:** Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 2201, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. Submit written comments on the guidance to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit

electronic comments to *http://www.regulations.gov*. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

**FOR FURTHER INFORMATION CONTACT:** Mary Parks, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, rm. 3362, Silver Spring, MD 20993–0002, 301–796–2290.

**SUPPLEMENTARY INFORMATION:**

## I. Background

FDA is announcing the availability of a guidance for industry entitled ''Diabetes Mellitus—Evaluating Cardiovascular Risk in New Antidiabetic Therapies to Treat Type 2 Diabetes.'' Diabetes mellitus is associated with an increased risk of cardiovascular disease. Reducing long-term cardiovascular complications in patients with diabetes should be an important goal of disease management. There are compelling data in patients with type 2 diabetes supporting a reduced risk of microvascular complications with improved long-term glycemic control. This guidance makes recommendations about how to demonstrate that a new antidiabetic therapy to treat type 2 diabetes is not associated with an unacceptable increase in cardiovascular risk.

On March 3, 2008, FDA issued the draft guidance for industry entitled ''Diabetes Mellitus: Developing Drugs and Therapeutic Biologics for Treatment and Prevention'' (73 FR 11420). On July 1 and 2, 2008, the Endocrinologic and Metabolic Drugs Advisory Committee met to discuss the role of cardiovascular assessment in the premarketing and postmarketing settings for drugs and therapeutic biologics developed for the treatment of type 2 diabetes mellitus. After considering the discussion at this meeting as well as other available data and information, we have determined that concerns about cardiovascular risk should be more thoroughly addressed during drug development. We are issuing this guidance to ensure that our recommendations reach all sponsors who may submit applications for approval of drugs to treat type 2 diabetes mellitus.

We are issuing this level 1 guidance for immediate implementation, consistent with FDA's good guidance practices regulation (21 CFR 10.115). FDA is not seeking comment before implementing this guidance because of the need to immediately notify sponsors with ongoing development programs of the need to address cardiovascular risk in ongoing drug development programs. If FDA receives comments on this guidance, it will consider the comments and incorporate final recommendations into the final version of the March 2008 draft guidance.

This guidance represents the agency's current thinking on evaluating cardiovascular risk in new antidiabetic therapies to treat type 2 diabetes. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

## II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 312 have been approved under 0910–0014, and the collections of information in 21 CFR part 314 have been approved under 0910–0001.

## III. Comments

Interested persons may submit to the Division of Dockets Management (see **ADDRESSES**) written or electronic comments regarding this document. Submit a single copy of electronic comments or two paper copies of any mailed comments, except that individuals may submit one paper copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

Please note that on January 15, 2008, the FDA Division of Dockets Management Web site transitioned to the Federal Dockets Management System (FDMS). FDMS is a Government-wide, electronic docket management system. Electronic comments or submissions will be accepted by FDA only through FDMS at *http://www.regulations.gov*.

## IV. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/cder/guidance/index.htm* or *http://www.regulations.gov*.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institutes of Health

### Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* Center for Scientific Review, Special Emphasis Panel, Prevention, Interventions: Alcohol, Diabetes and Smoking.

*Date:* January 6, 2009.

*Time:* 1 p.m. to 2:30 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892. (Telephone Conference Call)

*Contact Person:* Anna L. Riley, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3114, MSC 7759, Bethesda, MD 20892, 301–435–2889, *rileyann@csr.nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

*Name of Committee:* Center for Scientific Review, Special Emphasis Panel, Member Conflicts in Microbiology.

*Date:* January 8–9, 2009.

*Time:* 8:30 a.m. to 3 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892. (Virtual Meeting)

*Contact Person:* Guangyong Ji, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3211, MSC 7808, Bethesda, MD 20892, 301–435–1146.

This notice is being published less than 15 days prior to the meeting due to the timing

limitations imposed by the review and funding cycle.

*Name of Committee:* Center for Scientific Review, Special Emphasis Panel, EPIC Member Conflicts SEP.

*Date:* January 15, 2009.

*Time:* 10:30 a.m. to 2:30 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892. (Virtual Meeting)

*Contact Person:* Elisabeth Koss, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3152, MSC 7770, Bethesda, MD 20892, (301) 435–1721, *kosse@csr.nih.gov*.

*Name of Committee:* Center for Scientific Review, Special Emphasis Panel, Infectious Diseases and Microbiology Member SEP.

*Date:* January 21–22, 2009.

*Time:* 9 a.m. to 9 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892. (Virtual Meeting)

*Contact Person:* Soheyla Saadi, PhD., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3211, MSC 7808, Bethesda, MD 20892, 301–435–0903, *saadisoh@csr.nih.gov*.

*Name of Committee:* Digestive Sciences Integrated Review Group, Hepatobiliary Pathophysiology Study Section.

*Date:* February 2–3, 2009.

*Time:* 8 a.m. to 6 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* DoubleTree Hotel & Executive Meeting Center, 8120 Wisconsin Avenue, Bethesda, MD 20814.

*Contact Person:* Rass M. Shayiq, PhD., Scientific Review Officer, Center for Scientific Review, National Institute of Health, 6701 Rockledge Drive, Room 2182, MSC 7818, Bethesda, MD 20892, (301) 435–2359, *shayiqr@csr.nih.gov*.

*Name of Committee:* Cardiovascular Sciences Integrated Review Group, Lung Injury, Repair, and Remodeling Study Section.

*Date:* February 2–3, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hyatt Regency Bethesda, One Bethesda Metro Center, 7400 Wisconsin Avenue, Bethesda, MD 20814.

*Contact Person:* Ghenima Dirami, PhD., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4112, MSC 7814, Bethesda, MD 20892, 301–594–1321, *diramig@csr.nih.gov*.

*Name of Committee:* Oncological Sciences Integrated Review Group, Clinical Oncology Study Section.

*Date:* February 2–3, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications

*Place:* Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road, NW., Washington, DC 20015.

*Contact Person:* Malaya Chatterjee, PhD., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 192, MSC 7804, Bethesda, MD 20892, 301–451–0131, *chatterm@csr.nih.gov*.

*Name of Committee:* Brain Disorders and Clinical Neuroscience Integrated Review Group, Anterior Eye Disease Study Section.

*Date:* February 2–3, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* InterContinental Mark Hopkins Hotel, 999 California Street, San Francisco, CA 94108.

*Contact Person:* Jerry L. Taylor, PhD., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5202, MSC 7846, Bethesda, MD 20892, 301–435–1175, *taylorje@csr.nih.gov*.

*Name of Committee:* Molecular, Cellular and Developmental Neuroscience, Integrated Review Group, Molecular Neuropharmacology and Signaling Study Section.

*Date:* February 2–3, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Sir Francis Drake Hotel, 450 Powell Street at Suffer, San Francisco, CA 94102.

*Contact Person:* Deborah L. Lewis, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4118, MSC 7850, Bethesda, MD 20892, 301–435–1224, *lewisdeb@csr.nih.gov*.

*Name of Committee:* Integrative, Functional and Cognitive Neuroscience, Integrated Review Group, Cognitive Neuroscience Study Section.

*Date:* February 2, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Bahia Resort Hotel, 998 W. Mission Bay Drive, San Diego, CA 92109.

*Contact Person:* Judith A. Finkelstein, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5178, MSC 7844, Bethesda, MD 20892, 301–435–1249, *finkelsj@csr.nih.gov*.

*Name of Committee:* Digestive Sciences Integrated Review Group, Gastrointestinal Cell and Molecular Biology Study Section.

*Date:* February 2, 2009.

*Time:* 8 a.m. to 6 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hyatt Regency Bethesda, One Bethesda Metro Center, 7400 Wisconsin Avenue, Bethesda, MD 20814.

*Contact Person:* Najma Begum, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2186, MSC 7818, Bethesda, MD 20892, 301–435–1243, *begumn@csr.nih.gov*.

*Name of Committee:* Cardiovascular Sciences Integrated Review Group, Atherosclerosis and Inflammation of the Cardiovascular System Study Section.

*Date:* February 2–3, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road, NW., Washington, DC 20015.

*Contact Person:* Larry Pinkus, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4132, MSC 7802, Bethesda, MD 20892, (301) 435–1214, *pinkusl@csr.nih.gov*.

*Name of Committee:* Integrative, Functional and Cognitive Neuroscience, Integrated Review Group, Biological Rhythms and Sleep Study Section.

*Date:* February 2, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Bahia Resort Hotel, 998 W. Mission Bay Drive, San Diego, CA 92109.

*Contact Person:* Michael Selmanoff, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 1208, MSC 7844, Bethesda, MD 20892, 301–435–1119, *mselmanoff@csr.nih.gov*.

*Name of Committee:* Integrative, Functional and Cognitive Neuroscience, Integrated Review Group, Neurotoxicology and Alcohol Study Section.

*Date:* February 2–3, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Bahia Resort Hotel, 998 W. Mission Bay Drive, San Diego, CA 92109.

*Contact Person:* Brian Hoshaw, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5181, MSC 7844, Bethesda, MD 20892, 301–435–1033, *hoshawb@csr.nih.gov*.

*Name of Committee:* Risk, Prevention and Health Behavior, Integrated Review Group Behavioral Medicine, Interventions and Outcomes Study Section.

*Date:* February 2–3, 2009.

*Time:* 8:30 a.m. to 4:30 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Mayflower Park Hotel, 405 Olive Way, Seattle, WA 98101.

*Contact Person:* Lee S. Mann, JD, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3186, MSC 7848, Bethesda, MD 20892, 301–435–0677, *mannl@csr.nih.gov*.

*Name of Committee:* Integrative, Functional and Cognitive Neuroscience, Integrated Review Group Somatosensory and Chemosensory Systems Study Section.

*Date:* February 3–4, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Bahia Resort Hotel, 998 W. Mission Bay Drive, San Diego, CA 92109.

*Contact Person:* Daniel R. Kenshalo, PhD, Scientific Review Officer, Center for

Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5182, MSC 7844, Bethesda, MD 20892, 301–435–1255, *kenshalod@csr.nih.gov*.

*Name of Committee:* Integrative, Functional and Cognitive Neuroscience, Integrated Review Group Neuroendocrinology, Neuroimmunology, and Behavior Study Section.

*Date:* February 3–4, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Bahia Resort Hotel, 998 W. Mission Bay Drive, San Diego, CA 92109.

*Contact Person:* Michael Selmanoff, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3134, MSC 7844, Bethesda, MD 20892, 301–435–1119, *mselmanoff@csr.nih.gov*.

*Name of Committee:* Genes, Genomes, and Genetics, Integrated Review Group, Molecular Genetics C Study Section.

*Date:* February 3–4, 2009.

*Time:* 8 a.m to 11 a.m.

*Agenda:* To review and evaluate grant applications

*Place:* One Washington Circle Hotel, One Washington Circle, Washington, DC 20037

*Contact Person:* Barbara Whitmarsh, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2206, MSC 7890, Bethesda, MD 20892, 301–435–4511, *whitmarshb@csr.nih.gov*.

*Name of Committee:* Biological Chemistry and Macromolecular, Biophysics Integrated Review Group, Synthetic and Biological Chemistry A Study Section.

*Date:* February 3–4, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* The Westin St. Francis, 335 Powell Street, San Francisco, CA 94102.

*Contact Person:* Mike Radtke, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4176, MSC 7806, Bethesda, MD 20892, 301–435–1728, *radtkem@csr.nih.gov*.

*Name of Committee:* Cardiovascular Sciences Integrated Review Group, Respiratory Integrative Biology and Translational Research Study Section.

*Date:* February 3–4, 2009.

*Time:* 8:30 a.m. to 1 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Bethesda Marriott Suites, 6711 Democracy Boulevard, Bethesda, MD 20817.

*Contact Person:* Everett E. Sinnett, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2178, MSC 7818, Bethesda, MD 20892, (301) 435–1016, *sinnett@nih.gov*.

*Name of Committee:* Infectious Diseases and Microbiology, Integrated Review Group, Host Interactions with Bacterial Pathogens Study Section.

*Date:* February 4–5, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hotel Palomar, 2121 P Street, NW., Washington, DC 20037.

*Contact Person:* Marian Wachtel, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3208, MSC 7858, Bethesda, MD 20892, 301–435–1148, *wachtelm@csr.nih.gov*.

*Name of Committee:* Genes, Genomes, and Genetics Integrated Review Group, Molecular Genetics B Study Section.

*Date:* February 4–5, 2009.

*Time:* 8 a.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Pier 5 Hotel, 711 Eastern Avenue, Baltimore, MD 21202.

*Contact Person:* Richard A. Currie, PhD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5128, MSC 7840, Bethesda, MD 20892, (301) 435–1219, *currieri@csr.nih.gov*.

### National Institutes of Health

### National Institute of Biomedical Imaging and Bioengineering; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the National Advisory Council for Biomedical Imaging and Bioengineering.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and/or contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* National Advisory Council for Biomedical Imaging and Bioengineering NACBIB January 2009.

*Date:* January 23, 2009.

*Open:* 9 a.m. to 12:30 p.m.

*Agenda:* Report from the Institute Director, other Institute Staff and presentations of working group reports.

*Place:* Bethesda Marriott Suites, Independence Room (2nd level), 6711 Democracy Boulevard, Bethesda, MD 20817.

*Closed:* 1:30 p.m. to 4 p.m.

*Agenda:* To review and evaluate grant applications and/or proposals.

*Place:* Bethesda Marriott Suites, Independence Room (2nd level), 6711 Democracy Boulevard, Bethesda, MD 20817.

*Contact Person:* Anthony Demsey, Ph.D., Director, National Institute of Biomedical Imaging and Bioengineering, 6701 Democracy Blvd., Room 241, Bethesda, MD 20892.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *http://www.nibib1.nih.gov/about/NACBIB/NACBIB.htm*, where an agenda and any additional information for the meeting will be posted when available.

Dated: December 12, 2008.

### National Institutes of Health

### National Institute on Aging; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the National Advisory Council on Aging.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* National Advisory Council on Aging.

*Date:* January 27–28, 2009.

*Closed:* January 27, 2009, 3 p.m. to 5 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Building 31, 31 Center Drive, C Wing, Conference Room 10, Bethesda, MD 20892.

*Open:* January 28, 2009, 8 a.m. to 1:45 p.m.

*Agenda:* Call to order and reports from the Task Force Minority Aging Research Report; Consideration of the Report on Inclusion of Women and Minorities in Clinical Research: 2008 Data; Working Group on Program Report; Council of Councils Report; Division of Behavioral and Social Research Review; and Program Highlights.

*Place:* National Institutes of Health, Building 31, 31 Center Drive, C Wing, Conference Room 10, Bethesda, MD 20892.

*Closed:* January 28, 2009, 1:45 p.m. to 2:15 p.m.

*Agenda:* To review and evaluate the Intramural Research Program.

*Place:* National Institutes of Health, Building 31, 31 Center Drive, C Wing, Conference Room 10, Bethesda, MD 20892.

*Contact Person:* Robin Barr, Ph.D., Director National Institute on Aging, Office of Extramural Activities, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20814, (301) 496–9322, *barrr@nia.nih.gov*.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *http://www.nih.gov/nia/naca/*, where an agenda and any additional information for the meeting will be posted when available.

## DEPARTMENT OF HOMELAND SECURITY

### Identification of Foreign Countries Whose Nationals Are Eligible to Participate in the H–2B Visa Program

**AGENCY:** Office of the Secretary, DHS.

**ACTION:** Notice.

**SUMMARY:** On December 19, 2008, DHS published in the **Federal Register** a final rule ''Changes to Requirements Affecting H–2B Nonimmigrants,'' which provides that the Secretary of Homeland Security will publish a list of designated countries whose nationals can be the beneficiaries of an approved H–2B petition and are eligible for H–2B visas. This initial list will be composed of countries that are important for the operation of the H–2B program and are cooperative in repatriation of its citizens, subjects, nationals or residents who are subject to a final order of removal from the United States. Publication of such notice is made by the Secretary of Homeland Security, with the concurrence of the Secretary of State. Under the final rule, the Department of Homeland Security (DHS) will only approve petitions for H–2B nonimmigrant status for nationals of countries designated by means of this list or by means of the special procedure allowing petitioners to request approval for particular beneficiaries if the Secretary of Homeland Security determines that it is in the U.S. interest. Pursuant to the final rule, this notice designates those countries the Secretary of Homeland Security, with the concurrence of the Secretary of State, has found to be eligible to participate in the H–2B program.

**DATES:** This notice is effective January 18, 2009, and shall be without effect at the end of one year after January 18, 2009.

**SUPPLEMENTARY INFORMATION:**

#### Designation of Countries Whose Nationals Are Eligible to Participate in the H–2B Visa Program

Pursuant to the authority provided to the Secretary of Homeland Security under sections 241, 214(a)(1), and 215(a)(1) of the Immigration and Nationality Act (INA) (8 U.S.C. 1231, 1184(a)(1), and 1185(a)(1)), I have designated, with the concurrence of the Secretary of State, that nationals from the following countries are eligible to participate in the H–2B visa program:

Argentina;
Australia;
Belize;
Brazil;
Bulgaria;
Canada;
Chile;
Costa Rica;
Dominican Republic;
El Salvador;
Guatemala;
Honduras;
Indonesia;
Israel;
Jamaica;
Japan;
Mexico;
Moldova;
New Zealand;
Peru;
Philippines;
Poland;
Romania;
South Africa;
South Korea;
Turkey;
Ukraine;
United Kingdom.

This notice does not affect the status of aliens who currently hold H–2B nonimmigrant status.

Nothing in this notice limits the authority of the Secretary of Homeland Security or his or her designee or any other federal agency to invoke against any foreign country or its nationals any other remedy, penalty or enforcement action available by law.

**Paul A. Schneider,**

*Deputy Secretary.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0163]**

### Privacy Act of 1974; United States Secret Service—001 Criminal Investigation Information System of Records Notice

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of record notices, the Department of Homeland Security proposes to update and reissue USSS.003 Criminal Investigation Information System, August 28, 2001 as DHS/USSS—001 Criminal Investigation Information System of Records. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the Department of Homeland Security United States Secret Service criminal investigation information record system. Additionally, an updated Notice of Proposed Rulemaking will be published elsewhere in the **Federal Register**. Until such time, the exemptions for the legacy system of records notice transfer from the SORN's legacy agency to the Department of Homeland Security. This reissued system will be included in the Department's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0163 by one of the following methods:

• *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.

• *Fax:* 1–866–466–5370.

• *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

• *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

• *Docket:* For access to the docket, to read background documents, or comments received go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Latita Huff (202–406–6370), Privacy Point of Contact, United States Secret Service, 950 H St., NW., Washington, DC 20223. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

## I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, the Department of Homeland Security (DHS) and United States Secret Service (USSS) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern DHS/USSS criminal investigation information system records.

As part of its efforts to streamline and consolidate its Privacy Act record systems, DHS/USSS is updating and reissuing a DHS/USSS system of records under the Privacy Act (5 U.S.C. 552a) for DHS/USSS criminal investigation information system records. This will ensure that all organizational parts of USSS follow the same privacy rules for collecting and handling criminal investigation information system records.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of record notices, DHS/USSS proposes to update USSS.003 Criminal Investigation Information System (66 FR 45362 August 28, 2001). Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the DHS/USSS criminal investigation information record system. Additionally, an updated Notice of Proposed Rulemaking will be published elsewhere in the **Federal Register**. Until such time, the exemptions for the legacy system of records notice transfer from the SORN's legacy agency to the Department of Homeland Security. This reissued system will be included in the Department's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires that each agency publish in the **Federal Register** a description denoting the type and character of each system of records in order to make agency recordkeeping practices transparent, to notify individuals about the use of their records, and to assist the individual to more easily find files within the agency. Below is a description of the Criminal Investigation Information System.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this revised system of records to the Office of Management and Budget and to the Congress.

**System of Records: DHS/USSS–001.**

**SYSTEM NAME:**

United States Secret Service—001 Criminal Investigation Information System of Records.

**SECURITY CLASSIFICATION:**

Unclassified and Classified.

**SYSTEM LOCATION:**

Records are maintained at the United States Secret Service Headquarters, 950 H St., NW., Washington, DC 20223 and field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Individuals who have been or are currently the subject of a criminal investigation by DHS/USSS in connection with the performance by that agency of its authorized criminal investigative functions; individuals who are payees, registered owners, or endorsers of stolen or lost obligations and other securities of the United States; individuals who are witnesses, complainants, informants, suspects, defendants, fugitives, released prisoners, correspondents, organized crime figures, and victims of crimes who have been identified by DHS/USSS in the conduct of criminal investigations or by information supplied by other law enforcement agencies, government units, and the general public.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

• Records containing information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting of identifying data, including, but not limited to, name, date of birth, social security number, telephone number, home address, business address, spouse and family information, physical description, notations of arrest, the nature and position of criminal charges, sentencing, confinement, release, and parole or probations status concerning criminal offenders, defendants and suspects, witnesses, victims, and law enforcement personnel;

• Records containing information compiled for the purpose of a criminal investigation and associated with an identifiable individual, including reports of informants and investigators;

• Records containing reports identifiable with an individual compiled at various stages of the process of enforcement of criminal laws from arrest or indictment through release from supervision;

• Records containing investigatory material compiled for law enforcement purposes, including but not limited to, handwriting exemplars; laboratory analyses of inks and papers; handwriting analyses; petitions for the remission of forfeitures; notice of non-receipt of Treasury drafts; affidavits of forged endorsements; opinions of the examiner of questioned documents; reports or opinions from the

examination of computer evidence; reports or opinions from the examination of altered cellular telephones; certificates by owners of U.S. registered securities concerning forged requests for payments or assignments; applications for relief on account of loss, theft, or destruction of U.S. Savings Bonds or checks; photographic reproductions of obligations and other securities of the United States; contraband items; claims against the United States for the proceeds of government checks and bonds; and reports necessary for the settlement of check and bond claims; polygraph case files; forensic examination information; search warrants and search warrant returns; indictments; certified inventories of property held as evidence; sworn and unsworn witnesses statements; witness statements; state, local and foreign criminal investigative information and reports; names and telephone numbers of persons intercepted by electronic, mechanical, or other device under the provisions of Title 18 U.S.C., Section 2510 *et seq.* compiled during the lawful course of a criminal or civil investigation.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

The Homeland Security Act of 2002, Public Law 107–296; Federal Records Act, 44 U.S.C. 3101; 6 CFR part 5; 5 U.S.C.; 18 U.S.C. 3056; Executive Order 9397.

**PURPOSE(S):**

The purpose of this system is to collect and maintain criminal records of individuals being investigated by DHS/USSS.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside the Department of Homeland Security (DHS) as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To employees and officials of financial and commercial business firms and to private individuals information pertaining to actual or suspected criminal offenders where such disclosure is considered reasonably necessary for the purpose of furthering Secret Service efforts to investigate the activities of and apprehend criminal offenders and suspected criminal offenders.

I. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosure to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal law proceedings or in response to a subpoena from a court of competent jurisdiction.

J. To an appropriate Federal, State, local, tribal, territorial, foreign, or international agency, if the information is relevant and necessary to agency's decision concerning the hiring or retention of an individual, the issuance of a security clearance, license, contract, grant, or other benefit, or if the information is relevant and necessary to a DHS decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit and when disclosure is appropriate to the proper performance of the official duties of the person making the request.

K. To the Integrated Automated Fingerprint Identification System (IAFIS) managed by the Department of Justice, Federal Bureau of Investigations in connection with Secret Service's utilization.

L. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an

unwarranted invasion of personal privacy.

M. To Federal, State, and local government agencies foreign or domestic, having prosecutorial and civil law enforcement functions for use by attorneys, magistrates, and judges, parole or probation authorities and other law enforcement authorities for the purpose of developing a criminal or civil investigation, prosecuting, sentencing, or determining the parole and probation status of criminal offenders or suspected criminal offenders.

N. To personnel of other Federal, State, and local law enforcement agencies, foreign or domestic, for the purpose of developing information on subjects involved in Secret Service criminal investigations and assisting other law enforcement agencies in the investigation and prosecution of violations of the criminal laws which those agencies are responsible for enforcing.

O. To personnel of Federal, State, and local governmental agencies, where such disclosure is considered reasonably necessary for the purpose of furthering Secret Service efforts to investigate the activities of and apprehend criminal offenders and suspected criminal offenders.

P. To personnel of Federal, State, and local governmental agencies, foreign and domestic, where there is a showing of reasonable necessity to obtain such information to accomplish a valid law enforcement purpose.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer and/or behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

This system is indexed by name, address, vehicle license number, and/or telephone number, and is retrieved through computer search of magnetic media indices both at Headquarters and in the field offices. Additionally, subjects are retrievable from the computerized files by physical description. Access to the physical files containing records is by case number.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

All Judicial cases, 30 years after case closure; non-judicial criminal investigative cases (except non-judicial check and bond cases), 10 years; non-judicial check claim and bond forgery cases, 5 years; administrative files of an investigatory nature, 5 years; all other files and records the disposition of which is not otherwise specified, 5 years; investigations for other districts, 2 years; receipts vary with the case file to which they pertain; investigation control forms, varies; arrest history forms, indefinite; headquarters criminal investigative case files, 30 years; indices and microfilm copies are retained for an indefinite period; consensual and non-consensual interception indices, 10 years or when investigative use no longer exists, whichever is longer; fingerprint and photograph files, at varying intervals in accordance with record retention schedules approved by the National Archives and Records Administration.

**SYSTEM MANAGER AND ADDRESS:**

Assistant Director, Office of Investigations, U.S. Secret Service, 950 H St., NW., Suite 8900, Washington, DC 20223.

**NOTIFICATION PROCEDURE:**

Pursuant to 5 U.S.C. 522a(j) and (k), this system of records generally may not be accessed by members of the public for purposes of determining if the system contains a record pertaining to a particular individual. Nonetheless individual requests will be reviewed on a case by case basis. Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the USSS's FOIA Officer, Freedom of Information and Privacy Acts Branch 245 Murray Drive, Building 410, Washington, DC 20223.

When seeking records about yourself from this system of records or any other USSS system of records, your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address, and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

- An explanation of why you believe the Department would have information on you,
- Specify when you believe the records would have been created,
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information USSS may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

The Secretary of Homeland Security has exempted this system from subsections (e)(4)(I) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2) and (k)(2).and (k)(3), therefore records sources shall not be disclosed.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5), and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(1), (k)(2), and (k)(3) this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). In addition, to the extent a record contains information from other exempt systems of records, USSS will rely on the exemptions claimed for those systems.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0166]**

### Privacy Act of 1974; United States Secret Service—004 Protection Information System System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of record notices, the Department of Homeland Security proposes to update and reissue USSS.007 Protection Information System. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed updated to better reflect the Department of Homeland Security United States Secret Service Criminal Investigation Information Record system. Additionally, DHS is issuing a Notice of Proposed Rulemaking (NPRM) concurrent with this SORN elsewhere in the **Federal Register**. The exemptions for the legacy system of records notices will continue to be applicable until the final rule for this SORN has been completed.

**DATES:** Written comments must be submitted on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0166 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket, to read background documents, or comments received go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Latita Huff (202–406–6370), Privacy Point of Contact, United States Secret Service, 950 H St., NW., Washington, DC 20223. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, the Department of Homeland Security (DHS) and United States Secret Service (USSS) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern DHS/USSS protection records.

As part of its efforts to streamline and consolidate its Privacy Act record systems, DHS/USSS is updating and reissuing a DHS/USSS system of records under the Privacy Act (5 U.S.C. 552a) for DHS/USSS Protection Information System records. This will ensure that all organizational parts of USSS follow the same privacy rules for collecting and handling records regarding the protections of USSS protectees pursuant to Title 18 Section 3056 and 3056a.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of record notices, DHS/USSS proposes to update and reissue USSS.007 Protection Information System (66 FR 45362 August 28, 2001). Categories of individuals and categories of records have been reviewed, and the routine uses of this legacy system of records notice have been updated to better reflect the DHS/USSS—004 Protection Information System. Additionally, DHS is issuing a Notice of Proposed Rulemaking (NPRM) concurrent with this SORN elsewhere in the **Federal Register**. The exemptions for the legacy system of records notices will continue to be applicable until the final rule for this SORN has been completed. This reissued system will be included in the Department's inventory of record systems.

#### II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires that each agency publish in the **Federal Register** a description denoting the type and character of each system of records in order to make agency recordkeeping practices transparent, to notify individuals about the use of their records, and to assist the individual to more easily find files within the agency. Below is a description of the Protection Information System.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this revised system of records to the Office of Management and Budget and to the Congress.

**SYSTEM OF RECORDS:**

**DHS/USSS–004.**

**SYSTEM NAME:**

United States Secret Service—004 Protection Information System of Records.

**SECURITY CLASSIFICATION:**

Unclassified and Classified.

**SYSTEM LOCATION:**

Records are maintained at the United States Secret Service Headquarters, 950 H St., NW., Washington, DC 20223, other locations in Washington, DC, and field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Categories of individuals covered by this system include:

- Individuals who have been or are currently the subject of a criminal investigation by the USSS or another law enforcement agency for the violation of certain criminal statutes relating to the protection of persons or the security of properties;
- Individuals who are the subjects of investigative records and reports

supplied to the USSS by Federal, State, and local law enforcement agencies, foreign or domestic, other non-law enforcement governmental agencies, or private institutions and individuals;

• Individuals who are the subjects of non-criminal protective and background investigations by the Secret Service and other law enforcement agencies where the evaluation of such individuals, in accordance with criteria established by the USSS, indicates a need for such investigations;

• Certain individuals who are granted or denied ingress and egress to areas secured by the USSS, or to areas in proximity to persons protected by the USSS, including but not limited to invitees; passholders; tradesmen; and law enforcement, maintenance, or service personnel;

• Individuals who have sought an audience or contact with persons protected by the USSS or who have been involved in incidents or events which relate to the protective functions of the USSS; individuals who are witnesses, protectees, suspects, complainants, informants, defendants, fugitives, released prisoners, and correspondents who have been identified by the USSS or from information supplied by other law enforcement agencies, governmental units, private institutions, and members of the general public in connection with the performance by the USSS of its authorized protective functions; and

• Individuals protected by the USSS.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

• Individual's name;

• Address;

• Date of Birth;

• Case number;

• Arrest record;

• Nature and disposition of criminal charges, sentencing, confinement, release, and parole or probation status;

• Records containing information compiled for the purpose of a criminal investigation, including reports of informants and investigators, which are associated with an identifiable individual;

• Informant's name;

• Informant information;

• Informant's contact information (e.g. address, phone number);

• Records containing reports relative to an individual compiled at various stages of the process of enforcement of certain criminal laws from arrest or indictment through release from supervision;

• Records containing information supplied by other Federal, State, and local law enforcement agencies, foreign or domestic, other non-law enforcement governmental agencies, private institutions and persons concerning individuals who, because of their activities, personality traits, criminal or mental history, or history of social deviancy, may be of interest to the USSS in connection with the performance by that agency of its protective functions;

• Records containing information compiled for the purpose of identifying and evaluating individuals who may constitute a threat to the safety of persons or security of areas protected by the USSS;

• Records containing information compiled for the purpose of background investigations of individuals, including but not limited to, passholders, tradesmen, maintenance or service personnel who have access and/or have been denied access to areas secured by or who may be in proximity to persons protected by the USSS; and

• Records concerning agency activities associated with protectee movements.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; the Federal Records Act, 44 U.S.C. 3101; The protective authority is contained in 18 U.S.C. 3056 and 3056A and Section 1 of Public Law 90–331, (18 U.S.C. 871; 18 U.S.C. 1751).

**PURPOSE(S):**

The purpose of this system is to assist the USSS in protecting its protectees by recording individuals who may come into proximity to a protectee, including individuals who have been involved in incidents or events which relate to the protective functions of the USSS, and individuals who have sought to make contact with a protectee.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside the Department of Homeland Security (DHS) as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or

prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To the Department of Justice and other Federal, State, and local governmental agencies having a prosecution function for the use of attorneys, magistrates, and judges; and the parole and probation authorities for the purpose of prosecuting, sentencing, and determining the parole and probation status of criminal offenders or suspected criminal offenders; and for civil and other proceedings involving the USSS protective functions.

I. To Federal, State, and local law enforcement agencies, foreign and domestic, for the purpose of developing information on subjects involved in USSS protective investigations and evaluation and for the purpose of protective functions.

J. To Federal, State, and local government agencies, foreign and domestic, where such disclosures are considered reasonably necessary for the purpose of furthering USSS efforts to investigate the activities of those persons considered to be of protective interest.

K. To Federal, State, and local law enforcement agencies and other governmental agencies, foreign and domestic, where there is a showing of a reasonable need to accomplish a valid enforcement purpose.

L. To private institutions and private individuals of identifying information pertaining to actual or suspected criminal offenders or other individuals considered to be of protective interest for the purpose of furthering USSS efforts to evaluate the danger such individuals pose to persons protected by that agency.

M. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal law proceedings or in response to a subpoena from a court of competent jurisdiction.

N. To an appropriate Federal, State, local, tribal, foreign, or international agency, if the information is relevant and necessary to a requesting agency's decision concerning the hiring or retention of an individual, or the issuance of a security clearance, license, contract, grant, or other benefit, or if the information is relevant and necessary to a DHS decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, the issuance of a license, grant or other benefit and when disclosure is appropriate to the proper performance of the official duties of the person making the request.

O. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Paper and electronic records in this system are stored in secure facilities behind locked doors. Electronic records media, such as magnetic tape, magnetic disk, digital media, and CD ROM are stored in proper environmental controls.

**RETRIEVABILITY:**

This system is indexed by case number, name, and other identifying data and other case related data, in master and magnetic media indices. Access to the physical files is located at field offices, Headquarters, and other Washington, DC locations.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

All judicial records are retained for a period of 20 years from the date of last action. All other protective intelligence case records including protective surveys and non-judicial protective intelligence cases are routinely retained for a period of up to 10 years from the date of last action or otherwise required to be held permanently for transfer to the National Archives and Records Administration. Case files relating to the issuance of White House Complex passes for employees of the White House, Secret Service Employees, press representatives accredited at the White House, and other authorized individuals are retained for a period of 8 years from the date the file is closed. Records pertaining to the administration and operations of Secret Service protective program, shift reports, survey files, and special event files are retained for a period of 3 to 5 years from the end of the event. Records pertaining to trip files for domestic travel are retained for 5 years, and trip files for foreign travel are retained for 10 years from the end of the event. Campaign related files are retained for a period of 30 years after the end of the campaign and subsequently transferred to the National Archives and Records Administration.

**SYSTEM MANAGER AND ADDRESS:**

Assistant Director, Office of Protective Research and Assistant Director, Office of Protective Operations, U.S. Secret Service, 950 H St., NW., Washington, DC 20223.

**NOTIFICATION PROCEDURE:**

Pursuant to 5 U.S.C. 522a(j) and (k), this system of records generally may not be accessed by members of the public for purposes of determining if the system contains a record pertaining to a particular individual. Nonetheless individual requests will be reviewed on a case by case basis. Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the USSS's FOIA Officer, Freedom of Information and Privacy Acts Branch, 245 Murray Drive, Building 410, Washington, DC 20223.

When seeking records about yourself from this system of records or any other USSS system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28

U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

• An explanation of why you believe the Department would have information on you,

• Specify when you believe the records would have been created,

• If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information USSS may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

In accordance with the provisions of 5 U.S.C. 552a (j) and (k) the Secretary of Homeland Security has exempted this System from compliance with the provisions of 5 U.S.C. 552a(e)(4)(I).

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(1), (k)(2), and (k)(3) this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). In addition, to the extent a record contains information from other exempt systems of records, USSS will rely on the exemptions claimed for those systems.

Dated: December 10, 2008.

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0142]**

### Privacy Act of 1974; United States Coast Guard—018 Exchange System and Morale Well-Being and Recreation System Files System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of records notices, the Department of Homeland Security is giving notice that it proposes to update and reissue the following legacy record system DOT/CG 535 Coast Guard Exchange System (CGES) and Morale, Welfare and Recreation (MWR) System (April 11, 2000) as a Department of Homeland Security/United States Coast Guard system of records notice titled, Coast Guard Exchange System (CGES) and Morale, Well-being and Recreation (MWR) Program. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the Department of Homeland Security and the United States Coast Guard's Coast Guard Exchange System (CGES) and Morale, Well-being and Recreation (MWR) Program record system. This new system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0142 by one of the following methods:

• *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.

• *Fax:* 1–866–466–5370.

• *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

• *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov,* including any personal information provided.

• *Docket:* For access to the docket, to read background documents, or comments received, go to *http://www.regulations.gov.*

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: David Roberts (202–475–3521), United States Coast Guard Privacy Officer, United States Coast Guard. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and its components and offices have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern the Coast Guard Exchange System (CGES), and Morale, Well-being and Recreation (MWR) Program.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a USCG system of records under the Privacy Act (5 U.S.C. 552a) that deals with the CGES and MWR Program. CGES and MWR programs are nonpay compensation programs that provide for the mission readiness and retention of military personnel, their families, and other eligible patron groups. CGES provides high quality goods and services at price savings to its patrons with a return to support MWR programs. MWR offers a wide range of programs, facilities, and services such as fitness centers, picnic areas, child development centers, food and beverage operations, and golf courses to name a few. A complete list of MWR activities may be found in the Coast Guard Morale, Well-Being, and Recreation Manual, COMDTINST M1710.13 (series). This record system will allow DHS/USCG to collect and preserve the records regarding the CGES and MWR Program. The collection and maintenance of this information will assist DHS/USCG in meeting its obligation to administer the CGES and MWR Program.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of records notices, DHS is giving notice that it proposes to update and reissue the following legacy record system DOT/CG 535 Coast Guard Exchange System (CGES) and Morale, Welfare and Recreation (MWR) System (65 FR 19475 April 11, 2000) as a DHS/USCG system of records notice titled, Coast Guard Exchange System (CGES) and Morale, Well-being and Recreation (MWR) Program. Categories of individuals and categories of records have been

reviewed, and the routine uses of this legacy system of records notice have been updated to better reflect the Department of Homeland Security and the United States Coast Guard's CGES and MWR Program record system. This new system will be included in the Department of Homeland Security's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the CGES and MWR Program System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this new system of records to the Office of Management and Budget and to Congress.

**SYSTEM OF RECORDS:**

DHS/USCG–018.

**SYSTEM NAME:**

United States Coast Guard Coast Guard—018 Exchange System (CGES) and Morale, Well-being and Recreation (MWR) Program.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

Records are maintained at the United States Coast Guard Headquarters in Washington, DC and field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Categories of individuals covered by this system Include eligible patrons of CGES and MWR including active duty members and their dependents, members of the reserves and their dependents, military cadets of Services academies and their families, commissioned officers of the Public Health Service, and their dependents, commissioned officers of the National Oceanic and Atmospheric Administration on active duty, armed forces retirees from active duty and their dependents, armed forces retires from the reserves with/without pay and their dependents, honorably discharged veterans with 100 percent service-connected disability and their dependents, Medal of Honor recipients and their dependents, former spouses who have not remarried, but were married to a military member for at least 20 years while the military member was on active duty of the armed forces and their dependents, orphans of a military member when not adopted by new parents under 21 years old or 23 years old if they are in full-time study, DHS and DoD civilian employees and their dependents, other U.S. Federal employees, medical personnel under contract to the Coast Guard or DoD, when residing on an installation, military personnel of foreign nations and their dependents when on orders from the U.S. Armed Forces, paid members of the American Red Cross, Young Men's Christian Association, United Services Organization and other private organizations when assigned to and serving with the U.S. Armed Forces, DHS/DoD contract personnel, Reserve Officers Training Corps cadets, former prisoners of war and spouses of current POWs or service members missing in action and their family members, nonappropriated and appropriated funded foreign nationals, and other civilian members as authorized.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

- Individual's name;
- Payroll and personnel records;
- Accounting records for MWR loans;
- Listing of bad checks;
- Job applications;
- Correspondence regarding use of CGES and MWR programs and facilities;
- Membership applications as applicable for the use of any facilities;
- Investigatory reports involving damage to facilities or abuse of privileges to utilize facilities; and
- Financial accounting documentation supporting sales, accounts payable, accounts receivable as examples for the CGES/MWR program.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; 5 U.S.C. 2105; 10 U.S.C. 1146, 1587; 14 U.S.C. 632; the Federal Records Act, 44 U.S.C. 3101.

**PURPOSE(S):**

The purpose of this system to administer programs that provide for the mission readiness and retention of Coast Guard personnel and other authorized users; to document the approval and conduct of specifics contests, shows, entertainment programs, sports activities/competitions, and other MWR-type activities and events sponsored or sanctioned by the Coast Guard. Information is used for registration; reservations; track participation; pass management; report attendance; record sales transactions; maintain billing for individuals; collect payments; collect and report time and attendance of employees; process credit cards, personal checks, and debt cards; create and manage budgets; order and receive supplies and services; provide child care services reports; track inventory, and issue catered event contracts. Information will be used to market and promote similar MWR-type activities conducted by Services' MWR programs, to provide a means of paying, recording, accounting, reporting, and controlling expenditures and merchandise inventories associated with retail operations, rentals, and activities such as bingo games.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual that rely upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

Records may be retrieved alphabetically by name.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

Letters of authorization for Coast Guard MWR/CGES activities are destroyed 3 years after disestablishment of the activity. Records and supporting documents for administration of Coast Guard MWR/CGES activities including bank statements, check registers, cash books, cancelled checks, property and stock records, expenditure vouchers, purchase orders, vendors' invoices, payroll and personnel records, daily activity records, guest registration cards, food and beverage cost control sheets, petty cash vouchers, reports and related papers are destroyed 6 years and 3 months after the period covered by the account. Credit cards receipts are destroyed in accordance with retention requirements issued by the card processing agency and ranges from 6 months to 2 years. GRS 2, item 1–31.

**SYSTEM MANAGER AND ADDRESS:**

Commandant, CG–1, Assistant Commandant for Human Resources, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

**NOTIFICATION PROCEDURE:**

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to Commandant, CG–1, Assistant Commandant for Human Resources, United States Coast Guard Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

When seeking records about yourself from this system of records or any other USCG system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

- An explanation of why you believe the Department would have information on you,
- Specify when you believe the records would have been created,
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information the USCG will not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

Individual record subject, previous employees, employment agencies, civilian and military investigative reports, and general correspondence.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

Dated: December 10, 2008.

**BILLING CODE 4410–10–P**

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

### Privacy Act of 1974; System of Records

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of removal of one Privacy Act system of records notice.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security is giving notice that it will remove one system of records notice from its inventory of record systems because the United States Secret Service no longer requires the system. The obsolete system is Treasury/IRS 46.016 Secret Service Details, Criminal Investigation Division (66 FR 63783 December 10, 2001).

**DATES:** *Effective Date:* January 20, 2009.

**FOR FURTHER INFORMATION CONTACT:** Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528, by telephone (703) 235–0780 or facsimile 1–866–466–5370.

**SUPPLEMENTARY INFORMATION:** Pursuant to the provisions of the Privacy Act of 1974, 5 U.S.C. 552a, and as part of its ongoing integration and management efforts, the Department of Homeland Security (DHS) is removing one United States Secret Service (USSS) system of records notice from its inventory of record systems.

DHS inherited this record system upon its creation in January of 2003. Upon review of its inventory of records systems, DHS has determined it no longer needs or uses this system of records and is retiring Treasury/IRS 46.016 Secret Service Details, Criminal Investigation Division (66 FR 63783 December 10, 2001).

Treasury/IRS 46.016 Secret Service Details, Criminal Investigation Division was originally established to collect and maintain the USSS's Criminal Investigation Division records, which are now covered but a different system of records.

Eliminating this system of records notice will have no adverse impacts on individuals, but will promote the overall streamlining and management of DHS Privacy Act record systems.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

### Privacy Act of 1974; System of Records Notice

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of removal of one Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security is giving notice that it will remove one system of records from its inventory of record systems because the United States Secret Service is consolidating system of records notices. The obsolete system of records notice is USSS.004 Financial Management Information System (August 28, 2001).

**DATES:** *Effective Date:* January 20, 2009.

**FOR FURTHER INFORMATION CONTACT:** Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528, by telephone (703) 235–0780 or facsimile 1–866–466–5370.

**SUPPLEMENTARY INFORMATION:** Pursuant to the provisions of the Privacy Act of 1974, 5 U.S.C. 552a, and as part of its ongoing integration and management efforts, the Department of Homeland Security (DHS) is removing one United States Secret Service (USSS) system of records from its inventory of record systems.

DHS inherited this record system upon its creation in January of 2003. Upon review of its inventory of records systems, DHS has determined that records within this legacy system are covered by Department system of records DHS/ALL–007 Accounts Payable Records (73 FR 61880 October 17, 2008) covering general accounts payable records, budget preparation and presentation materials, apportionment records, payroll records, pay administration records, expenditure accounting records, tax ID records, and records containing information on current and projected accounts payable; DHS/ALL–008 Accounts Receivable Records (73 FR 61885 October 17, 2008) covering general accounts receivable records, records on individuals involved in payments with DHS, and records containing information on current and projected accounts receivable; DHS/ALL–019 Payroll, Personnel, and Time and Attendance Records (73 FR 63172 October 23, 2008) covering employee and individual records, employer records, records containing information compiled for the purpose of pay, travel, expenses incurred other than travel, and retirement annuities and taxes, and time and attendance records; DHS/ALL–013 Claims Records (73 FR 63987 October 28, 2008) covering records containing information compiled for the purpose of property damage, records containing information on tort claims dealing with USSS property; DHS/ALL–021 Contractors and Consultants Records (73 FR 63179 October 23, 2008) covering contractor and vendor records; DHS/ALL–011 Biographies and Awards Records (73 FR 66654 November 10, 2008) covering individuals who are recipients of awards and are retiring USSS.004 Financial Management Information System (66 FR 45362 August 28, 2001).

USSS.004 Financial Management Information System (66 FR 45362 August 28, 2001) was originally established to record, track, and maintain USSS financial accounting information, which are now covered by different systems of records. Eliminating this system of records notice will have no adverse impacts on individuals, but will promote the overall streamlining and management of DHS Privacy Act system of record notices.

Dated: December 10, 2008.

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0154]**

### Privacy Act of 1974; U.S. Customs and Border Protection—009 Nonimmigrant Information System

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of record notices, the Department of Homeland Security proposes to update and reissue the following legacy record system, Justice/INS–036 Nonimmigrant Information System, January 31, 2003, as a Department of Homeland Security system of records notice titled, U.S. Customs and Border Protection Nonimmigrant Information System. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have

been reviewed updated to better reflect the Department of Homeland Security U.S. Customs and Border Protection Nonimmigrant Information System. Concurrent with this System of Records Notice, DHS is issuing a notice of proposed rulemaking to exempt this system for certain aspects of the Privacy Act. This reissued system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0154 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket to read background documents or comments received go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 799 Ninth Street, NW., Washington, DC 20001–4501. For privacy issues contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

## I. Background

Pursuant to 6 U.S.C. 552(a)(1), the Department of Homeland Security (DHS) and Customs and Border Protection (CBP) have maintained the Nonimmigrant Information System (NIIS) in conformance with the terms of the previous NIIS SORN, 68 FR 5048.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a DHS/CBP system of records under the Privacy Act (5 U.S.C. 552a) to reflect CBP's current and future practices regarding the processing of foreign nationals entering the U.S. CBP inspects all persons applying for admission to the U.S. As part of this inspection process, CBP establishes the identity, nationality, and admissibility of persons crossing the border and may create a border crossing record, which would be covered by DHS/CBP–007 Border Crossing Information System of Records Notice (73 FR 43457 published on July 25, 2008), or additional CBP records, which would be covered by the TECS System of Records Notice (re-published concurrently with this notice) during this process. Similarly, CBP has authority to keep records of departures from the U.S.

In addition to information collected from the alien during the inspection process, CBP primarily uses two immigration forms to collect information from nonimmigrant aliens as they arrive in the U.S.: The I–94, Arrival/Departure Record and, for aliens applying for admission under the visa waiver program, the I–94W Nonimmigrant Visa Waiver Arrival/Departure Form. Separately, Canadian nationals, who travel to the U.S. as tourists or for business, and Mexican nationals, who possess a nonresident alien Mexican Border Crossing Card, are not required to complete an I–94 upon arrival, but their information will also be maintained in NIIS. Additionally, DHS/CBP has been implementing an Electronic System for Travel Authorization (ESTA) to permit nationals of VWP countries to submit their biographic and admissibility information online in advance of their travel to the U.S. Applicants under this program will have access to their accounts so that they may check the status of their ESTA and make limited amendments. ESTA is covered by privacy documentation including a SORN published on June 10, 2008, 73 FR 32720.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of record notices, DHS/CBP proposes to update and reissue the following legacy record system, Justice/INS–036 Nonimmigrant Information System (68 FR 5048 January 31, 2003), as a DHS/CBP system of records notice titled, U.S. Customs and Border Protection Nonimmigrant Information System. Categories of individuals and categories of records have been reviewed, and the routine uses of this legacy system of records notice have been updated to better reflect the DHS/CBP Nonimmigrant Information System. Additionally, the exemptions for this legacy system of records notice transfer from the system's legacy agency to DHS. This reissued system will be included in the DHS's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the U.S. Government collects, maintains, uses and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system to make agency recordkeeping practices transparent, to notify individuals regarding the uses of their records, and to assist the individual to more easily find such files within the agency. Below is a description of the NIIS System of Records.

In accordance with 5 U.S.C. 552a(r), a report concerning this record system has been sent to the Office of Management and Budget and to the Congress.

**SYSTEM OF RECORDS:**

DHS/CBP–009.

**SYSTEM NAME:**

U.S. Customs and Border Protection—009 Nonimmigrant Information System.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

This computer database is located at the U.S. Customs and Border Protection (CBP) National Data Center. Computer terminals are located at customhouses, border ports of entry, airport inspection facilities under the jurisdiction of the Department of Homeland Security and other locations at which DHS authorized personnel may be posted to

facilitate DHS's mission. Terminals may also be located at appropriate facilities for other participating government agencies that have obtained system access pursuant to a Memorandum of Understanding.

**CATEGORIES OF INDIVIDUALS COVERED BY THIS SYSTEM:**

Categories of individuals covered by this system are nonimmigrant aliens entering and departing the U.S.

**CATEGORIES OF RECORDS IN THIS SYSTEM:**

NIIS is a dataset residing on the CBP Information Technology (IT) platform and in paper form. It contains arrival and departure information collected from foreign nationals entering and departing the U.S. on such forms as the I–94, I–94W, or through interviews with CBP officers. This information consists of the following data elements, where applicable:

- Full Name (first, middle, and last);
- Date of birth;
- E-mail address, as required;
- Travel document type (e.g., passport information, permanent resident card, etc.), number, issuance date, expiration date and issuing country;
- Country of citizenship;
- Date of crossing both into and out of the U.S.;
- Scanned images linked through the platform;
- Airline and flight number;
- City of embarkation;
- Address while visiting the U.S.;
- Admission number received during entry into the U.S.;
- Whether the individual has a communicable disease, physical or mental disorder, or is a drug abuser or addict;
- Whether the individual has been arrested or convicted for a moral turpitude crime, drugs, or has been sentenced for a period longer than five years;
- Whether the individual has engaged in espionage, sabotage, terrorism, or Nazi activity between 1933 and 1945;
- Whether the individual is seeking work in the U.S.;
- Whether the individual has been excluded or deported, or attempted to obtain a visa or enter the U.S. by fraud or misrepresentation;
- Whether the individual has ever detained, retained, or withheld custody of a child from a U.S. citizen granted custody of the child;
- Whether the individual has ever been denied a U.S. visa or entry into the U.S., or had a visa cancelled (if yes, when and where);
- Whether the individual has ever asserted immunity from prosecution; and
- Any change of address while in the U.S.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; the Federal Records Act, 44 U.S.C. 3101; The legal authority for NIIS comes from 8 U.S.C. 1103, 8 U.S.C. 1184, Intelligence Reform and Terrorism Prevention Act of 2004, Public Law 108–458, The Immigration and Nationality Act, 8 U.S.C. 1354, and the Homeland Security Act of 2002, Public Law 107–296.

**PURPOSE(S):**

NIIS is a repository of records for persons arriving in or departing from the U.S. as nonimmigrant visitors and is used for entry screening, admissibility, and benefits purposes. The system provides a central repository of contact information for such aliens while in the U.S. and also captures arrival and departure information for determination of future admissibility.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The U.S. or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty where DHS determines that the information would assist in the enforcement of civil or criminal laws.

H. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil or criminal discovery, litigation, or settlement negotiations, or in response to a subpoena from a court of competent jurisdiction.

I. To third parties during the course of a law enforcement investigation to the extent necessary to obtain information pertinent to the investigation, provided disclosure is appropriate to the proper performance

of the official duties of the officer making the disclosure.

J. To an organization or individual in either the public or private sector, either foreign or domestic, where there is a reason to believe that the recipient is or could become the target of a particular terrorist activity or conspiracy, to the extent the information is relevant to the protection of life or property and disclosure is appropriate to the proper performance of the official duties of the person making the disclosure.

K. To an appropriate Federal, State, local, tribal, foreign, or international agency, if the information is relevant and necessary to a requesting agency's decision concerning the hiring or retention of an individual, or issuance of a security clearance, license, contract, grant, or other benefit, or if the information is relevant and necessary to a DHS decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit and when disclosure is appropriate to the proper performance of the official duties of the person making the request.

L. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations, for purposes of assisting such agencies or organizations in preventing exposure to or transmission of a communicable or quarantinable disease or for combating other significant public health threats.

M. To Federal and foreign government intelligence or counterterrorism agencies or components where CBP becomes aware of an indication of a threat or potential threat to national or international security, or where such use is to assist in anti-terrorism efforts and disclosure is appropriate to the proper performance of the official duties of the person making the disclosure.

N. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

O. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations where DHS is aware of a need to utilize relevant data for purposes of testing new technology and systems designed to enhance national security or identify other violations of law

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

The data is stored electronically at the CBP and DHS Data Center for current data and offsite at an alternative data storage facility for historical logs, system backups and in paper form.

**RETRIEVABILITY:**

These records may be searched on a variety of data elements including name, addresses, place and date of entry or departure, or country of citizenship as listed in the travel documents used at the time of entry to the U.S. An admission number, issued at each entry to the U.S. to track the particular admission, may also be used to identify a database record.

**SAFEGUARDS:**

All NIIS records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include all of the following: restricting access to those with a ''need to know''; using locks, alarm devices, and passwords; compartmentalizing databases; auditing software; and encrypting data communications.

NIIS information is secured in full compliance with the requirements of the DHS IT Security Program Handbook. This handbook establishes a comprehensive program, consistent with federal law and policy, to provide complete information security, including directives on roles and responsibilities, management policies, operational policies, and application rules, which will be applied to component systems, communications between component systems, and at interfaces between component systems and external systems.

One aspect of the DHS comprehensive program to provide information security involves the establishment of rules of behavior for each major application, including NIIS. These rules of behavior require users to be adequately trained regarding the security of their systems. These rules also require a periodic assessment of technical, administrative and managerial controls to enhance data integrity and accountability. System users must sign statements acknowledging that they have been trained and understand the security aspects of their systems. System users must also complete annual privacy awareness training to maintain current access.

NIIS transactions are tracked and can be monitored. This allows for oversight and audit capabilities to ensure that the data is being handled consistent with all applicable federal laws and regulations regarding privacy and data integrity.

**RETENTION AND DISPOSAL:**

NIIS data is subject to a retention requirement. The information collected and maintained in NIIS is used for entry screening, admissibility, and benefits purposes and is retained for seventy five (75) years from the date obtained. However, NIIS records that are linked to active law enforcement lookout records, CBP matches to enforcement activities, and/or investigations or cases will remain accessible for the life of the law enforcement activities to which they may become related. The current disposition for paper copy is 180 days from date of departure.

**SYSTEM MANAGER AND ADDRESS:**

Assistant Commissioner, Office of Information Technology, U.S. Customs and Border Protection Headquarters, 1300 Pennsylvania Avenue, NW., Washington, DC 20229.

**NOTIFICATION PROCEDURE:**

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to CBP's FOIA Officer, 1300 Pennsylvania Avenue, NW., Mint Annex, Washington, DC 20229.

When seeking records about yourself from this system of records or any other CBP system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

• An explanation of why you believe the Department would have information on you,

• Specify when you believe the records would have been created,

• If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information CBP may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

The system contains certain data received on individuals, passengers and crewmembers that arrive in, depart from, or transit through the U.S. This system also contains information collected from carriers that operate vessels, vehicles, aircraft and/or trains that enter or exit the U.S. and from the individuals upon crossing the U.S. border.

Basic information is obtained from individuals, the individual's attorney/representative, CBP officials, and other federal, state, local, and foreign agencies.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

No exemption shall be asserted with respect to information maintained in the system that is collected from a person or submitted on behalf of a person, if that person, or his or her agent, seeks access or amendment of such information.

This system, however, may contain information related to an ongoing law enforcement investigation because the information regarding a person's travel and border crossing was disclosed to appropriate law enforcement in conformance with the above routine uses. As such pursuant to 5 U.S.C. 552 a (j)(2) and (k)(2), DHS will claim exemption from (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as is necessary and appropriate to protect this information.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0108]**

### Privacy Act of 1974; United States Coast Guard—014 Military Pay and Personnel System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of record notices, the Department of Homeland Security giving notice that it proposes to add a system of records to its inventory of record systems titled United States Coast Guard Military Pay and Personnel. This system is a compilation of nine legacy record systems: DOT/CG 534 Travel and Transportation of Household Effects (April 11, 2000); DOT/CG 537 FHA Mortgage Insurance for Servicemen in lieu of VHA Mortgage Insurance for Servicemen; DOT/CG 573 United States Public Health Services, Commissioned Officer Corps Staffing and Recruitment Files (April 11, 2000); DOT/CG 622 Military Training and Education Records (April 11, 2000); DOT/CG 623 Military Pay and Personnel System (April 11, 2000); DOT/CG 625 Officer Selection and Appointment System (April 11, 2000); DOT/CG 626 Official Officer Service Records (April 11, 2000); DOT/CG 629 Enlisted Personnel Record System (April 11, 2000); DOT/CG 630 Coast Guard Family Housing (April 11, 2000); and DOT/CG 640 Outside Employment of Active Duty Coast Guard Personnel (April 11, 2000). This record system will allow the Department of Homeland Security/United States Coast Guard to collect and maintain records regarding military pay and personnel. Categories of individuals, categories of records, and routine uses of these legacy system of records notices have been consolidated and updated to better reflect the United States Coast Guard's military service personnel record systems. This new system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009. This new system will be effective January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0108 by one of the following methods:

• *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.

• *Fax:* 1–866–466–5370.

• *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

• *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov*, including any personal information provided.

• *Docket:* For access to the docket, to read background documents, or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: David Roberts (202–475–3521), Privacy Officer, United States Coast Guard. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/United States Coast Guard (USCG) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern active duty, reserve, and retired active duty and retired reserve, as well as eligible dependent's military pay and personnel processing.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a USCG system of records under the Privacy Act (5 U.S.C. 552a) that deals with active duty, reserve, retired active duty, and retired reserve, as well as eligible dependent's military pay and personnel processing. This record system will allow DHS/USCG to collect and maintain records regarding military pay. The collection and maintenance of this information will assist DHS/USCG in meeting its obligation pay active duty, reserve, retired active duty, and retired reserve military personnel, as well as eligible dependents for their service.

In accordance with the Privacy Act of 1974, and as part of the DHS Privacy Office's ongoing effort to review and update legacy system of record notices DHS is giving notice that it proposes to add a system of records to its inventory

of record systems titled United States Coast Guard Military Pay and Personnel. This system is a compilation of nine legacy record systems: DOT/CG 534 Travel and Transportation of Household Effects (65 FR 19476 April 11, 2000); DOT/CG 537 FHA Mortgage Insurance for Servicemen in lieu of VHA Mortgage Insurance for Servicemen (65 FR 19476 April 11, 2000); DOT/CG 573 United States Public Health Services, Commissioned Officer Corps Staffing and Recruitment Files (65 FR 19476 April 11, 2000); DOT/CG 622 Military Training and Education Records (65 FR 19476 April 11, 2000); DOT/CG 623 Military Pay and Personnel System (65 FR 19475 April 11, 2000); DOT/CG 625 Officer Selection and Appointment System (65 FR 19476 April 11, 2000); DOT/CG 626 Official Officer Service Records (65 FR 19476 April 11, 2000); DOT/CG 629 Enlisted Personnel Record System (65 FR 19476 April 11, 2000); DOT/CG 630 Coast Guard Family Housing (65 FR 19476 April 11, 2000); and DOT/CG 640 Outside Employment of Active Duty Coast Guard Personnel (65 FR 19476 April 11, 2000). This record system will allow the DHS/USCG to collect and maintain records regarding military pay and personnel. Categories of individuals, categories of records, and routine uses of these legacy system of records notices have been consolidated and updated to better reflect the USCG's military service personnel record systems. This new system will be included in DHS's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the use of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the Military Pay and Personnel System of Records.

## III. Health Insurance Portability and Accountability Act

This system of records contains individually identifiable health information. The Health Insurance Portability and Accountability Act of 1996, applies to most of such health information. Department of Defense 6025.18–R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974 or mentioned in this system of records notice.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this new system of records to the Office of Management and Budget and to Congress.

### System of Records

DHS/USCG–014.

**SYSTEM NAME:**

United States Coast Guard Military Pay and Personnel System.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

Records are maintained at the United States Coast Guard Headquarters in Washington, DC and field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Categories of individuals covered by this system include active duty, reserve, and retired active duty and retired reserve USCG military personnel and their annuitants and dependents. Also included are active duty and retired National Oceanic and Atmospheric Administration (NOAA) Officers and their annuitants and dependents, as well as Officers of the Commissioned Corps of the United States Public Heath Service (PHS) and their annuitants and dependents.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

- Individual's name;
- Social security number;
- Employee identification number;
- Date and place of birth;
- Gender;
- Minority designation and nationality;
- Marital status;
- Limited medical related information to include dates of physical examinations, color blindness, immunizations, weight and body mass index (and compliance to standards);
- Addresses;
- Total current monetary earnings, including overtime, computed to the nearest dollar;
- Number of hours worked;
- Leave accrual rate;
- Leave requests and balances;
- Health and life insurance requests;
- Payroll deduction requests;
- Information for the purpose of validating legal requirements for garnishment of wages;
- Salary rate;
- Cash awards;
- Retirement withholdings;
- Background information to include work experience;
- Education records, including: Highest level achieved; specialized education or training obtained in and outside of military service; non-traditional education support records; achievement and aptitude test results; academic performance records; correspondence course rate advancement records; military performance records; admissions processing records; grade reporting records; academic status records; transcript maintenance records;
- Military duty assignments;
- Ranks held;
- Allowances;
- Personnel actions such as promotions, demotions, or separations;
- Record of instances of Uniform Code of Military Justice infractions;
- Performance evaluations;
- Individual's desires for future assignments, training requested, and notations by assignment officers;
- Information for determinations of waivers and remissions of indebtedness to the United States Government;
- Travel claims, transportation claims, government bills of lading, and applications for shipment of household effects;
- USCG Housing System Records, including: Housing surveys, computer data summaries, correspondence from the individual seeking housing; and
- Names, dates of birth, addresses, social security numbers, and gender of annuitants and dependents of active duty, reserve, and retired active duty and reserve military members.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; The Federal Records Act, 44 U.S.C. 3101; 5 U.S.C. 5501–5597; 10 U.S.C. 1043, 1147; 14 U.S.C. 92(I) 92(r), 93(g), 475, 512, 620, 632, 645, 681, 687; 37 U.S.C. 406; 42 U.S.C. 213, 253; 49 CFR 1.45, 1.46.

**PURPOSE(S):**

The purpose of this system is to administer the USCG active duty, reserve, and retired active duty and retired reserve military pay and personnel system. Additionally, the system is used to provide necessary information to Department of Commerce for NOAA Officers and to Health and Human Services Officers for the Commissioned Corps of the United States Public Heath Service (PHS) to administer their respective pay and personnel system.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

**Note:** This system of records contains individually identifiable health information. The Health Insurance Portability and Accountability Act of 1996, applies to most of such health information. Department of Defense 6025.18–R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974 or mentioned in this system of records notice. Therefore, routine uses outlined below may not apply to such health information.

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (including United States Attorney Offices) or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To the Department of Treasury for the purpose of disbursement of salary, United States Savings Bonds, allotments, or travel claim payments.

I. To Department of Commerce and Health and Human Services to administer their respective pay and personnel systems for NOAA Officers and the Commissioned Corps of the PHS, respectively.

J. To Federal, State, and local government agencies to disclose earnings and tax information, including the Internal Revenue Service and the Social Security Administration.

K. To the Department of Defense and Veterans Administration for determinations of benefit eligibility for military members and their dependents.

L. To the Department of Defense for manpower and readiness planning.

M. To the Comptroller General for the purpose of processing waivers and remissions.

N. To an individual's spouse, or person responsible for the care of the individual concerned when the individual to whom the record pertains is mentally incompetent, critically ill, or under other legal disability for the purpose of assuring the individuals is receiving benefits or compensation they are entitled to receive.

O. To a requesting government agency, organization, or individual the home address and other relevant information on those individuals who, it is reasonably believed, might have contracted an illness, been exposed to, or suffered from a health hazard while a member of government service.

P. To other government agencies for the purpose of earnings garnishment.

Q. To the Department of Defense for the purpose of preparing the Officer Register and Reserve Office Register, which is provided to all Coast Guard officers.

R. To education institutions or training facilities for purposes of enrollment and verification of employee attendance and performance.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, CD–ROM, and DVD.

**RETRIEVABILITY:**

Records may be retrieved by name, social security number, or employee identification number.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. A defense in depth strategy has been employed. Overlapping and complimentary management, operational and technical security controls have been implemented and followed to minimize the risk of compromising the confidentiality or adversely impacting the integrity of the information that is being stored, processed, and/or transmitted. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

Travel and Transportation of Household Effects records are temporary and are destroyed six years after the period of the account. (AUTH GRS 9, Item 1).

U.S. Public Health Services (USPHS) Commissioned Officer Corps Staffing and Recruiting records are temporary and are transferred to Commission Personnel Operation Division upon completion of Coast Guard assignment. (AUTH NC1–26–76–2), item 359, and (NC1–26–80–4), item 151.

Military Training and Education, records are temporary, including training courses and related material, school and training files containing correspondence, reports and related paper on Coast Guard and Navy schools and trainee index cards. These records are destroyed when five years old. (AUTH NC1–26–76–2), items 559 and 561 and (NC1–26–80–4), item 338b.

Class folders containing personal and service history, muster card files, and recruit training record cards are destroyed when one year old (AUTH NC1–26–80–4), items 338b, 338c, 338d and 338e.

Military Pay and Personnel System records are temporary, and transferred to FRC 6 months after period of account, and destroyed 56 years after period covered by account (AUTH NC1–26–76–2), items 227a and 99d.

Officer Selection and Appointment System, records are temporary. Officer Candidates and Direct Commission Program application for selected applicants and filed in Official Personnel Folder (AUTH NC1–26–76–2), items 583a and 584a.

Non-selected Officer Candidate applicants are destroyed six months after deadline dates for class which application is made (NC1–26–76–2), item 583b.

For Non-selected Direct Commission Program applicants records are destroyed one year from date of board by which considered (NC1–26–79–2), item 584b.

For OCS and Direct Commission applicant files containing copies of applications for appointment in the Coast Guard Reserve, interviews, reports, and medical examination are destroyed when one year old (AUTH NC1–26–80–4 item 337b).

Official Officer Service Records are permanent and transferred records to the National Personnel Records Center (NPRC), St. Louis, MO, six months after separation or retirement. Transfer to NARA 62 years after date (AUTH: N1–330–04–1, Item 1).

Enlisted Personnel Records System records are permanent and transferred records to the National Personnel Records Center (NPRC), St. Louis, MO, six months after separation or retirement. Transfer to NARA 62 years after date (AUTH: N1–330–04–1, Item 1).

Records concerning housing are kept until the applicant is placed in housing. Coast Guard Family Housing records are temporary and destroyed when two years old (AUTH: GRS 15, items 1, 3, and 5a).

Outside Employment of Active Duty Coast Guard Personnel records are temporary and destroyed when three years old or when superseded ore obsolete, whichever is later (AUTH GRS 25), items, 1 and 9.

Leave and earnings statements and pay records are microfilmed and retained onsite for four years, then archived at the Federal Record Center, and destroyed when 50 years old.

Duplicate magnetic copies of the pay and personnel record are retained at an off site facility for a useful life of seven years.

Education records are kept for five years. Paper records for waivers and remissions are retained on site six years three months after the determination and then destroyed.

Paper records to determine legal sufficiency for garnishment are retained on site six years three months after the member separates from the service or the garnishment is terminated, and then destroyed.

Travel and transportation of household effects records are kept for three years, and then transferred to a Federal Records Center.

Records concerning congressional correspondence are maintained indefinitely because they were determined to be of historical value.

**SYSTEM MANAGER AND ADDRESS:**

For active duty military personnel of the USCG: Chief, Office of Personnel, USCG Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For USCG reserve military personnel and retired USCG reserve military personnel waiting pay at age 60: Chief, Office of Reserve Affairs, USCG Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For USCG waivers and remissions: Chief, Personnel Services Division, Office of Military Personnel, USCG Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For records used to determine legal sufficiency for garnishment of wages and pay records: Commanding Officer, USCG, Personnel Services Center, 444 SE Quincy Street, Topeka, KS 66683–3591. For data added to the decentralized data segment the commanding officer, officer-in-charge of the unit handling the military personnel's pay and personnel record, or Chief, Administrative Services Division for individuals whose records are handled by USCG Headquarters 2100 2nd Street, SW., Washington, DC 20593–0001.

For NOAA members: National Oceanic and Atmospheric Administration, Commissioned Personnel Division, 11400 Rockville Pike, Rockville, MD 20852.

For Officers of the Commissioned Corps, United States Public Health Service Office of Commissioned Corps Operations, 1100 Wootton Parkway, Suite 100, Rockville MD 20852.

**NOTIFICATION PROCEDURE:**

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to: For active duty military personnel of the USCG: Chief, Office of Personnel, USCG Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For USCG reserve military personnel and retired USCG reserve military personnel waiting pay at age 60: Chief, Office of Reserve Affairs, USCG Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For USCG waivers and remissions: Chief, Personnel Services Division, Office of Military Personnel, USCG Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001. For records used to determine legal

sufficiency for garnishment of wages and pay records: Commanding Officer, USCG, Personnel Services Center, 444 SE Quincy Street, Topeka, KS 66683–3591. For data added to the decentralized data segment the commanding officer, officer-in-charge of the unit handling the individual's pay and personnel record, or Chief, Administrative Services Division for individuals whose records are handled by USCG Headquarters 2100 2nd Street, SW., Washington, DC 20593–0001.

For NOAA members: National Oceanic and Atmospheric Administration, Commissioned Personnel Division, 11400 Rockville Pike, Rockville, MD 20852.

For Officers of the Commissioned Corps, United States Public Health Service Office of Commissioned Corps Operations, 1100 Wootton Parkway, Suite 100, Rockville, MD 20852.

When seeking records about yourself from this system of records or any other USCG system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

• An explanation of why you believe the Department would have information on you,

• Specify when you believe the records would have been created,

• If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information the USCG may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

Individuals, USCG personnel officials, National Oceanic and Atmospheric Administration personnel officials, the Department of Defense, Commissioned Corp of Public Health Service personnel officials, previous employers, educational institutions, court records, and test results.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0088]**

### Privacy Act of 1974; Federal Emergency Management Agency—003 National Flood Insurance Program Files System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security is giving notice that it proposes to consolidate five legacy record systems and a new program into a Department of Homeland Security system of records notice titled, Department of Homeland Security Federal Emergency Management Agency—003 National Flood Insurance Program Files: FEMA/FIMA–2 National Flood Insurance Direct Servicing Agent Application and Related Documents Files (January 23, 2002); FEMA/FIMA–3 National Flood Insurance Bureau and Statistical Agent (BSA) Data Elements and Related Files (January 23, 2002); FEMA/FIMA–6 National Flood Insurance Special Direct Facility Repetitive Loss Target Group Records and Related Files (January 23, 2002); FEMA/FIMA–7 National Flood Insurance Community Rating System and Related Documents Files (January 23, 2002); and FEMA/FIA–2 National Flood Insurance Application and Related Documents Files (January 23, 2002), and the newly created National Flood Insurance Program Modernization, Business Process Improvement, and Systems Engineering Management Systems. This system will enable the Department of Homeland Security to administer the Federal Emergency Management Agency National Flood Insurance Program. Categories of individuals, categories of records, and the routine uses of these legacy system of records notices have been consolidated and updated to better reflect the Department of Homeland Security's Federal Emergency Management Agency National Flood Insurance Program record systems. This system will be included in the Department's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009. This new system will be effective January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0088 by one of the following methods:

• *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Fax:* 1–866–466–5370.

• *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

• *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov*, including any personal information provided.

• *Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Federal Emergency Management Agency Acting Privacy Officer, Federal Emergency Management Agency. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA) has relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records pertaining to the National Flood Insurance Program, which is administered by DHS/FEMA.

In 1968, Congress created the National Flood Insurance Program (NFIP) in response to the rising cost of taxpayer funded disaster relief for flood victims and the increasing amount of damage caused by floods. The Mitigation

Directorate, a component of FEMA, manages the NFIP and oversees the floodplain management and mapping components of the Program.

Nearly 20,000 communities across the United States and its territories participate in the NFIP by adopting and enforcing floodplain management ordinances to reduce future flood damage. In exchange, the NFIP makes Federally-backed flood insurance available to homeowners, renters, and business owners in these communities.

Typically, a home or business owner will seek flood insurance from an insurance company that provides other lines of business such as car insurance or property and casualty homeowners insurance. In other cases, a mortgage lender will require flood insurance in addition to regular homeowner's insurance. If a homeowner's insurance company participates in the NFIP's Write-Your-Own (WYO) Program, and the home or business owner's building is located in a participating NFIP community, the home or business owner can purchase flood insurance.

This record system will allow DHS/FEMA to collect and maintain records regarding applicants, policyholders, and others, including insurance agents, associated with the National Flood Insurance Program. The system will be used by DHS to collect and maintain records on applicants and beneficiaries of the FEMA National Flood Insurance Program, as well as others who are involved in the National Flood Insurance Program, including WYO business transactions. The collection and maintenance of this information will assist DHS in meeting its obligation to administer the FEMA National Flood Insurance Program.

In accordance with the Privacy Act of 1974, DHS is giving notice that it proposes to consolidate five legacy record systems: FEMA/FIMA–2 National Flood Insurance Direct Servicing Agent Application and Related Documents Files (67 FR 3193 January 23, 2002), FEMA/FIMA–3 National Flood Insurance Bureau and Statistical Agent (BSA) Data Elements and Related Files (67 FR 3193 January 23, 2002), FEMA/FIMA–6 National Flood Insurance Special Direct Facility (SDF) Repetitive Loss Target Group Records and Related Files (67 FR 3193 January 23, 2002), FEMA/FIMA–7 National Flood Insurance Community Rating System and Related Documents Files (67 FR 3193 January 23, 2002), and FEMA/FIA–2 National Flood Insurance Application and Related Documents Files (67 FR 3193 January 23, 2002) into a DHS/FEMA system of records notice titled, Federal Emergency Management Agency National Flood Insurance Program Files. This system will enable DHS/FEMA to administer the National Flood Insurance Program. Categories of individuals, categories of records, and the routine uses of these legacy system of records notices have been consolidated and updated to better reflect DHS/FEMA's National Flood Insurance Program record systems. This system will be included in DHS's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the Federal Emergency Management Agency National Flood Insurance Program Files System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this newly revised system of records to the Office of Management and Budget (OMB) and to Congress.

**System of Records: DHS/FEMA–003**

**SYSTEM NAME:**

Federal Emergency Management Agency—003 National Flood Insurance Program Files.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

Records are maintained at the Federal Emergency Management Agency Headquarters in Washington, DC and in field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Categories of individuals covered by this system include applicants and policyholders of flood insurance; Severe Repetitive Loss (SRL) property owners (previously known as ''Repetitive Loss Target Group'' (RLTG)); insurance companies and agents; WYO Companies and lenders; communities that submit Community Rating Survey (CRS) applications; and certified flood adjusters.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

- Individual's name;
- Social security number;
- Addresses;
- Telephone numbers;
- E-mail address;
- Tax ID numbers;
- Insurance policy numbers and information;
- Group Flood Insurance Program (GFIP) Certificate Holders
- Property information:
  - Bank/lender
  - Date of mortgage
  - Address of bank/lender
  - Loan information, such as: loan number, names and addresses of first and possible second mortgagees, and file or identification number of loan;
  - Taxpayer's identification number
- Administration records, such as: transaction errors and rejects per WYO Company, documents and photographs necessary to substantiate a claim for losses due to burglary or robbery, reports of adjusters, and adjusters' bills paid by the program;
- Names and contact information of insurance agents;
- Write Your Own Companies (WYO's);
- Severe Repetitive Loss (SRL) property owners;
- Community Rating System (CRS) applications to adjust NFIP insurance premiums based on the mitigation of activities implemented by a community;
- Names and contact information of individuals seeking NFIP data; and

• Data elements required for reporting purposes under the FEMA Mitigation Directorate Bureau and Statistical Agent contract for private insurance companies. Data elements include, but are not limited to:

○ Data elements regarding policy reinstatement with/without policy changes,

○ Data elements regarding insurance claims, and

○ Data elements regarding payment of claims.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

The Federal Records Act, 44 U.S.C. 3101; National Flood Insurance Act of 1968, as amended and Flood Disaster Protection Act of 1973, 42 U.S.C. 4001, *et seq.*

**PURPOSE(S):**

The purpose of this system is to manage the National Flood Insurance Program, to assess National Flood Insurance Program user satisfaction, and to provide information on the National Flood Insurance Program to those who inquire.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (DOJ) (including United States Attorney Offices) or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal Government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To insurance agents, brokers, adjusters, lending institutions, WYO Companies as authorized under 44 CFR 62.23, the Army Corps of Engineers, Small Business Association, the American Red Cross, the United States Department of Agriculture Farm Service Agency, State and local governments, including State and local individual and family grant and assistance agencies, National Flood Insurance Program policy and claims records for carrying out the purposes of the National Flood Insurance Program, to determine eligibility for benefits, and to verify non-duplication of benefits following a flooding event.

I. To States to provide Group Flood Insurance Program (GFIP) certificates for carrying out the purposes of the National Flood Insurance Program.

J. To property loss reporting bureaus, State insurance departments, and insurance companies to investigate fraud or potential fraud in connection with claims, subject to the approval of the Office of Inspector General, DHS.

K. To State and local government individual and family grant agencies to ascertain the degree of financial burden that State and local governments expect to assume in the event of a flooding disaster.

L. To State and local government agencies to further the National Flood Insurance Program marketing activities.

M. To State and local government agencies that provide the names and addresses of policyholders and a brief general description of their plan for acquiring and relocating their flood prone properties to ensure that they are engaged in flood plain management, improved real property acquisitions, relocation projects that are consistent with the National Flood Insurance Program and, upon the approval of the Administrator, Federal Insurance Mitigation Administration, that the use furthers the flood plain management and hazard mitigation goals of the agency.

N. To the Army Corps of Engineers, State and local government agencies and municipalities to review National Flood Insurance Program policy and claims files to assist in hazard mitigation and flood plain management activities and in monitoring compliance with the flood plain management measures duly adopted by the community.

O. To lending institutions, mortgage servicing companies, and others servicing mortgage loan portfolios, as well as private companies engaged in or planning to engage in activities to market or assist lenders and mortgage servicing companies to comply with the requirements of the Flood Disaster Protection Act of 1973, including lender compliance, and to market the sale of flood insurance policies under the National Flood Insurance Program.

P. To current owners of properties designated under the National Flood

Insurance Program as SRL Target Group properties, the dates and dollar amounts of loss payments made to prior owners so current owners may evaluate whether that designation is appropriate and may, if they believe the designation is not appropriate, use the information to appeal that designation.

Q. To the Special Direct Facility National Flood Insurance Program Repetitive Loss records for the processing of SRL Target Group policyholder underwriting and claims records.

R. To Preferred Risk Property (PRP) owners who are contesting the denial of the PRP applications, the properties' prior loss history.

S. To Federal, State, and local government agencies to conduct research, analysis, and feasibility studies.

T. To communities to provide repetitive loss records that pertain to that community.

U. To OMB in connection with the review of private relief legislation in accordance with OMB Circular No. A–19.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

Disclosure under 5 U.S.C. 552a(b)(12). DHS/FEMA may make disclosures from this system to ''consumer reporting agencies'' as defined in the Fair Credit Reporting Act 15 U.S.C. 1681a(f), as amended; or the Federal Claims Collection Act of 1966 31 U.S.C. 3701(a)(3), as amended.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

Records will be retrieved by individual's name; insurance policy number; Repetitive Loss Target Group number; property address; zip code; telephone number; insurance agents; company name, including lenders and WYO Companies; community name; and Community Rating System application number.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated system security access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

Policy records are kept as long as the property owner is enrolled in the insurance program and pays the policy premiums, and cutoff when the file becomes inactive. Policy records are destroyed 5 years after the cutoff with FEMA Records Schedule N1–311–86–1, Item 1A13a(2). Claim records are maintained for 6 years and 3 months after final action, unless litigation exists. Records are disposed of FEMA Records Schedule N1–311–86–1, Item 2A12(2)(b). Claim records with pending litigation are destroyed after review by General Counsel with FEMA Records Schedule N1–311–86–1, Item 2A13a(1). Consumer records, including Community Rating System records, are retired to the Federal Record Center 2 years after cutoff, and destroyed 10 years after cutoff, IAW FEMA Records Schedule N1–311–02–01, Item 4.

**SYSTEM MANAGER AND ADDRESS:**

Administrator, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency Headquarters, 500 C Street, SW., Washington, DC 20472.

**NOTIFICATION PROCEDURE:**

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to FEMA's FOIA Officer, 500 C Street, SW., Attn: FOIA Coordinator, Washington, DC 20472.

When seeking records about yourself from this system of records or any other FEMA system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

- An explanation of why you believe the Department would have information on you,
- Specify when you believe the records would have been created,
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information the FEMA may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

Individual's who apply for and individuals who are insured under the National Flood Insurance Program, WYO Companies, flood insurance agents and lenders, individuals who request information on the National Flood Insurance Program, appraisal records, title reports, and homeowner reports.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0126]**

### Privacy Act of 1974; Federal Emergency Management Agency–005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of records notices, the Department of Homeland Security is giving notice that it proposes to update and reissue the following legacy record

system: FEMA/State and Local Programs and Support (SLPS)–6 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files (September 7, 1990) as a Department of Homeland Security system of records notice titled, Department of Homeland Security Federal Emergency Management Agency—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed updated to better reflect the Department of Homeland Security's Federal Emergency Management Agency—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files. This new system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009. This new system will be effective January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0126 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket, to read background documents, or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Federal Emergency Management Agency Privacy Officer, Federal Emergency Management Agency. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

## I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern DHS/FEMA—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a system of records under the Privacy Act (5 U.S.C. 552a) that deals with the DHS/FEMA—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files. This record system will allow DHS/FEMA to collect and maintain records regarding individual properties that qualify for acquisition and/or relocation under the Comprehensive Environmental Response Compensation Liability Act of 1980, as amended, and National Flood Insurance Act as amended, 42 U.S.C. 4001. The collection and maintenance of this information will assist DHS/FEMA in tracking individual properties that qualify for acquisition and/or relocation under these Acts.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of records notices, DHS is giving notice that it proposes to update and reissue the following legacy record system FEMA/SLPS–6 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files (55 FR 37182 September 7, 1990) as a DHS system of records notice titled DHS/FEMA—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files. DHS has reviewed the categories of individuals and categories of records, and has updated the routine uses of this legacy system of records notice to better reflect DHS/FEMA—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files. This new system will be included in DHS's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/FEMA—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this new system of records to the Office of Management and Budget and to Congress.

### System of Records: DHS/FEMA–005

#### SYSTEM NAME:

Federal Emergency Management Agency—005 Temporary and Permanent Relocation and Personal and Real Property Acquisitions and Relocation Files.

#### SECURITY CLASSIFICATION:

Unclassified.

#### SYSTEM LOCATION:

Records are maintained at the Federal Emergency Management Agency Headquarters in Washington, DC and field offices.

#### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered by this system include individuals whose real property has been, or is being, acquired by DHS/FEMA. Also included are individuals who have been, or are being, relocated by DHS/FEMA.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

- Individual's name;
- Taxpayer identification number/social security number;
- Amounts paid for purchase of property including records of negotiations and offers;
- Title search documentation including property titles, title company correspondence, closing papers, tax records, and contracts;
- Loan interest payment information including mortgage payment papers, loan documentation claims, and DHS/FEMA approvals;
- Information for determining benefit amounts for real property acquisition including tax records, mortgage information, and divorce decrees;
- Information concerning replacement housing determinations including tax information, affidavits, and determinations;
- Relocation claims payment information including documents which verify that funds have been spent, deeds, contracts, building estimates, construction bills, loan papers, leases, cancelled checks, claim forms, and Decent, Safe and Sanitary Inspection Forms;
- Deeds, contractual sale documents, notations of follow-up actions, appraiser qualifications, rent supplement information, insurance verifications, moving cost information, permanent relocation questionnaires including background information on displaced persons, and information supplied by displaced persons to support claims for real property acquisition and relocation assistance. The temporary relocation file may contain the following:
  - Applicant contact sheets;
  - Application for assistance;
  - Leases and/or reimbursement agreements and corresponding housing inspection reports;
  - Requests for payment with supporting bills, receipts, etc., for relocation expenses and payment records to individuals and businesses; and
  - Move-out records.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

Federal Records Act, 44 U.S.C. 3101; Comprehensive Environmental Response Compensation Liability Act (CERCLA) of 1980, 42 U.S.C. 9601 *et seq.*; Executive Order 12580; Uniform Relocation Assistance and Real Property Acquisition Policies Act, 42 U.S.C. 4601 *et seq.*; National Flood Insurance Act of 1968 and Flood Disaster Protection Act of 1973, 42 U.S.C. 4001, *et seq.* and Executive Order 9397.

**PURPOSE(S):**

The purpose of this system is to track individual properties that qualify for acquisition and/or relocation under the Comprehensive Environmental Response Compensation Liability Act of 1980, as amended, and the National Flood Insurance Act, 42 U.S.C. 4001, as amended.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To the affected State or political subdivision thereof for the purpose of determining the State's or subdivision's eligibility for tracking title to the acquired property for recreational and open space resources.

I. To the Environmental Protection Agency for the purpose of verifying the proper eligibility and use of Superfund monies to acquire properties found to be uninhabitable for the population and in connection with legal cases brought under the Superfund.

J. To the Small Business Administration for the purpose of determining the individual/business eligibility for loans and no duplication of funds.

K. To the Department of Justice, or a United States Attorney for legal representation in duplication of benefits provided to the individual or legal cases brought by or against FEMA, or in the case of Superfund monies, those brought by or against the Environmental Protection Agency.

L. To the Department of Justice for the purpose of obtaining official title opinions prior to acquisition as outlined under Section 1362 acquisitions.

M. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

Disclosure pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this system to ''consumer reporting agencies'' as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

Records may be retrieved by individual's name, property addresses, mobile home sales documents, leases, and contracts.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

Permanent Personal and Real Property Acquisition and Relocation records are covered by General Record Schedules 3 and 4. Original files regarding occupant-related documents (e.g., site requests, mobile home sales documents, leases, and contracts) will be consolidated at regional offices at the end of Phase II (e.g., when shelterees are moved to permanent housing) and destroyed 6 years and 3 months after files are consolidated in accordance with FEMA Record Schedule N1–311–86–1, Item 4C8b(1). Files relating to permanent relocations under Superfund and purchases of properties under Section 1362 are permanent and will be maintained in accordance with FEMA Records Schedule N1–311–86–1, Item 4C10d.

**SYSTEM MANAGER AND ADDRESS:**

For Superfund acquisitions—Associate Director, State and Local Programs and Support Directorate, Federal Emergency Management Agency, Washington, DC 20472.

**NOTIFICATION PROCEDURE:**

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to FEMA's FOIA Officer, 500 C Street, SW., Attn: FOIA Coordinator, Washington, DC 20472.

When seeking records about yourself from this system of records or any other FEMA system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

- An explanation of why you believe the Department would have information on you,
- Specify when you believe the records would have been created,
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information the FEMA may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

Individuals, appraisal records, title reports, or homeowner reports.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0155]**

### Privacy Act of 1974; U.S. Customs and Border Protection—010 Persons Engaged in International Trade in Customs and Border Protection Licensed/Regulated Activities System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security is giving notice that it proposes to consolidate eight legacy record systems into a U.S. Customs and Border Protection system of records notice titled, U.S. Customs and Border Protection Persons Engaged in International Trade in Customs and Border Protection Licensed/Regulated Activities: Treasury/CS.040 Carrier File, October 18, 2001; Treasury/CS.041 Cartmen or Lightermen, October 18, 2001; Treasury/CS.057 Container Station Operator Files, October 18, 2001; Treasury/CS.069 Customs Brokers File, October 18, 2001; Treasury/CS.137 List of Vessel Agents Employees, October 18, 2001; Treasury/CS.260 Warehouse Proprietor Files, October 18, 2001; Treasury/CS.271 Cargo Security Record System, October 18, 2001; and Treasury/CS.274 Importers, Brokers, Carriers, Individuals and Sureties Master Files, October 18, 2001. Categories of individuals, categories of records, and the routine uses have been consolidated and updated to better reflect the U.S. Customs and Border Protection record systems that collect and maintain information on persons engaged in international trade in Customs and Border Protection licensed/regulated activities. The Department of Homeland Security is

issuing a Notice of Proposed Rulemaking concurrent with this SORN in the **Federal Register**. The exemptions for the legacy system of records notices will continue to be applicable until the final rule for this system of records notice is completed. This system will be included in the Department's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009. This new system will be effective January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0155 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 1300 Pennsylvania Ave., NW., Washington, DC 20229. For privacy issues contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

## I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records pertaining to persons engaged in international trade in CBP licensed/regulated activities.

As part of its efforts to streamline and consolidate its record systems, DHS is establishing a component system of records under the Privacy Act (5 U.S.C. 552a) for DHS/CBP that deals with persons engaged in international trade in CBP licensed/regulated activities. This record system is titled, U.S. Customs and Border Protection Persons Engaged in International Trade in CBP Licensed/Regulated Activities. This system will be used by DHS/CBP to collect and maintain records on persons engaged in international trade in CBP licensed/regulated activities.

In accordance with the Privacy Act of 1974, DHS is giving notice that it proposes to consolidate eight legacy record systems into a DHS/CBP system of records notice titled, U.S. Customs and Border Protection Persons Engaged in International Trade in Customs and Border Protection Licensed/Regulated Activities: Treasury/CS.040 Carrier File (66 FR 52984 October 18, 2001); Treasury/CS.041 Cartmen or Lightermen (66 FR 52984 October 18, 2001); Treasury/CS.057 Container Station Operator Files (66 FR 52984 October 18, 2001); Treasury/CS.069 Customs Brokers File (66 FR 52984 October 18, 2001); Treasury/CS.137 List of Vessel Agents Employees (66 FR 52984 October 18, 2001); Treasury/CS.260 Warehouse Proprietor Files (66 FR 52984 October 18, 2001); Treasury/CS.271 Cargo Security Record System (66 FR 52984 October 18, 2001); and Treasury/CS.274 Importers, Brokers, Carriers, Individuals and Sureties Master Files (66 FR 52984 October 18, 2001). Categories of individuals, categories of records, and the routine uses have been consolidated and updated to better reflect DHS/CBP record systems that collect and maintain information on persons engaged in international trade in CBP licensed/regulated activities. Additionally, DHS is issuing a Notice of Proposed Rulemaking (NPRM) concurrent with this system of records notice (SORN) in the **Federal Register**. The exemptions for the legacy system of records notices will continue to be applicable until the final rule for this SORN is completed. This system will be included in the Department's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the U.S. Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/CBP Persons Engaged in International Trade in CBP Licensed/Regulated Activities System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget (OMB) and to Congress.

### System of Records: DHS/CBP–010

**SYSTEM NAME:**

U.S. Customs and Border Protection Persons Engaged in International Trade in Customs and Border Protection Licensed/Regulated Activities.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

Records are maintained at the U.S. Customs and Border Protection Headquarters in Washington, DC and in field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Categories of individuals covered by this system include importers, brokers, carriers, sureties; officers/owners, employees, associates of customs bonded carriers, drivers of motor vehicles, licensed cartmen, licensed lightermen, individuals and firms who have applied for or hold a license as a bonded cartman or lighterman, individuals employed by cartmen or lightermen, present and past container station operators and warehouse proprietors and their employees, including those who require an

investigation, licensed customs brokers, employees of customs brokers, individuals or firms who have applied for a broker's license, airport and airline employees with access to the CBP controlled area of a terminal, and employees of vessel agents.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system may include:

- Individual's name;
- Social security number;
- Date and place of birth;
- Addresses and notification of change of address;
- Personal characteristics;
- Photograph or other biometrics;
- History of past employment;
- Previous five years residences,
- Alias;
- Citizenship;
- Military records;
- Criminal record other than traffic violations;
- Use of narcotic drugs;
- Organization's name;
- Copies of bonds, entries, bills, and data center listings;
- Location of business records;
- Status reports of individuals' application including issuance, denial or renewal;
- Copies of incoming and outgoing correspondence relating to persons engaged in international trade in CBP licensed/regulated activities;
- Requests for written approval to employ persons who have been convicted of a felony;
- Applications for cartmen/lightermen licenses and identification cards;
- Applications and approvals/denials of bonds to act as container station operator or warehouse proprietor;
- Reports of investigations;
- Fingerprint cards;
- Information regarding proposed administrative disciplinary action against customs brokers for violation of the regulations governing the conduct of their business; and
- Determinations as to whether CBP issued or did not issue a particular license or permit and the type of license or permit.

*Authority for maintenance of the system:*

5 U.S.C. 301; the Federal Records Act, 44 U.S.C. 3101; Executive Order 9373; 19 U.S.C. 1484, 1485, 1498, 1499, 1509, 1551, 1551a, 1555, 1556, 1565, 1624, and 1641; 19 CFR parts 19, 111, 112, 113, 141, 142, 148, and 163..

**PURPOSE(S):**

The purpose of this system is to collect and maintain records on persons engaged in international trade in CBP licensed/regulated activities. These records include identifying information as well as the results of background checks or official vetting performed to ensure that CBP's approval of the individuals' right to perform the licensed or regulated activity is appropriate.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS or any component in his/her official capacity;

3. Any employee of DHS or any component in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The U.S. or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS or CBP determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS or CBP collected the records.

B. To a congressional office in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS or CBP suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. DHS or CBP has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS, CBP, or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS or CBP's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS or CBP, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS/CBP officers and employees.

G. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty where DHS determines that the information would assist in the enforcement of civil or criminal laws.

H. To an appropriate Federal, State, local, tribal, foreign, or international agency, if the information is relevant and necessary to a requesting agency's decision concerning the hiring or retention of an individual, or issuance of a security clearance, license, contract, grant, or other benefit, or if the information is relevant and necessary to a DHS decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit and disclosure is appropriate to the proper performance of the official duties of the person making the request.

I. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal law proceedings or in response to a subpoena form a court of competent jurisdiction.

J. To third parties during the course of a law enforcement investigation or

background check to the extent necessary to obtain information pertinent to the investigation, provided disclosure is appropriate to the proper performance of the official duties of the officer making the disclosure.

K. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

Records are retrieved by individual's name or organization's name.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated system security access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

• Carrier records are retained by CBP for six years after the death of the licensee or revocation in accordance with the CBP, Records Control Manual, Schedule 6, Custody of Merchandise, Item 2.

• Broker files and records of broker's employees are retained by CBP for six years after the death of the licensee or revocation in accordance with the CBP, Records Control Manual, Schedule 6, Custody of Merchandise, Item 2. These files are periodically updated and removed to an inactive file, as necessary.

• Cartmen and lightermen files are reviewed annually at which time cancelled identification cards are removed. Closed CBP Form 3078s (Application for Identification Card) may also be removed, but normally are held for approximately three years incase a new application is received from the same company or transferred to another company after investigation.

• Container station operator files are disposed of in accordance with the CBP Records Control Manual, Schedule 6, Custody of Merchandise Records, Item 10.

• Records on warehouse proprietor and vessel agent employees are maintained by the organization for the duration of the individual's employment and retained by CBP for six years after the death of the licensee or revocation in accordance with the CBP, Records Control Manual, Schedule 6, Custody of Merchandise, Item 2.

• Records on drivers are maintained in an active file until revoked or cancelled. After revocation or cancellation, the information folder is placed in an inactive file for five years, and then disposed of in accordance with the General Services Administration Disposal Manual.

• Information on proprietor bonded warehouse operators and employees is retained on file until Customs bonded operations cease and are discontinued, and then maintained in an inactive file for three years. Final disposition is in accordance with the General Services Administration Disposal Manual.

• Files on brokers, carriers, and sureties are maintained for six years after death of licensee or revocation in accordance with the CBP Records Control Manual. In accordance with the Records Control Manual, Schedule 9 Entry Processing, files on importers are maintained in connection with the respective entry of merchandise for eight years after liquidation of the entry, which is the final determination of classification and duty relating to the imported merchandise by CBP.

**SYSTEM MANAGER AND ADDRESS:**

Executive Director, Commercial Targeting and Enforcement, Office of International Trade, U.S. Customs and Border Protection, Customs and Border Protection Headquarters, 1300 Pennsylvania Avenue, NW., Mint Annex, Washington, DC 20229.

**NOTIFICATION PROCEDURE:**

The Secretary of Homeland Security has exempted this system from certain aspects of the notification, access, and amendment requirements of the Privacy Act. CBP will review each request to determine whether or not notification, access, or amendment should be provided. Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to CBP's FOIA Officer, 1300 Pennsylvania Avenue, NW., Mint Annex, Washington, DC 20229.

When seeking records about yourself from this system of records or any other CBP system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

• An explanation of why you believe the Department would have information on you,

• Specify when you believe the records would have been created,

• If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information CBP may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

Records are obtained by authorized Customs forms or electronic formats from individuals and/or companies incidental to the conduct of foreign trade and required by the Customs Service in administering the tariff laws and regulations of the United States. Individuals; organizations; DHS/CBP; correspondence; investigation reports

and supporting materials; applications for bonds and licenses, and other DHS/CBP memoranda.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

The Secretary of Homeland Security has exempted this system pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Additionally, the Secretary has exempted this system pursuant to 5 U.S.C. 552a(k)(2) of the Privacy Act from subsections (c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f).

Dated: December 10, 2008.

**Hugo Teufel III,**

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0109]**

### Privacy Act of 1974; United States Coast Guard—017 Federal Medical Care Recovery Act System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of records notices, the Department of Homeland Security is giving notice that it proposes to update and reissue the following legacy record system DOT/CG 577 Federal Medical Care Recovery Act Record System (April 11, 2000) as a Department of Homeland Security system of records notice titled United States Coast Guard Federal Medical Care Recovery Act. This system will allow the Department of Homeland Security/United States Coast Guard to collect and maintain Federal Medical Care Recovery Act claims. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the Department of Homeland Security/United States Coast Guard's Federal Medical Care Recovery Act record system. This new system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0109 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket, to read background documents, or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: David Roberts (202–475–3521), Privacy Officer, United States Coast Guard. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/United States Coast Guard (USCG) have relied on pre-existing Privacy Act systems of records notices for the collection and maintenance of records that concern the USCG Federal Medical Care Recovery Act (FMCRA).

As part of its efforts to streamline and consolidate its record systems, DHS/USCG is updating and reissuing a DHS/USCG system of records under the Privacy Act (5 U.S.C. 552a) that deals with the FMCRA. This record system will allow DHS/USCG to collect and maintain records regarding the FMCRA. The collection and maintenance of this information will assist DHS/USCG in meeting its obligation to address FMCRA claims. FMCRA is a statute that requires DHS/USCG to pursue collection actions for medical care provided to its beneficiaries. The FMCRA statute allows DHS/USCG to join and start their own action to collect for the medical care and lost wages provided to the beneficiary.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of records notices, DHS is giving notice that it proposes to update and reissue the following legacy record system DOT/CG 577 Federal Medical Care Recovery Act Record System (65 FR 19475 April 11, 2000) as a DHS/USCG system of records notice titled Federal Medical Care Recovery Act. This system will allow DHS/USCG to collect and maintain FMCRA claims. Categories of individuals and categories of records have been reviewed, and the routine uses of this legacy system of records notice have been updated to better reflect the DHS/USCG's FMCRA record system. This new system will be included in the DHS's inventory of record systems.

#### II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the FMCRA Files System of Records.

#### III. Health Insurance Portability and Accountability Act

This system of records contains individually identifiable health information. The Health Insurance Portability and Accountability Act of

1996, applies to most of such health information. Department of Defense 6025.18–R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974 or mentioned in this system of records notice.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this new system of records to the Office of Management and Budget and to Congress.

**System of Records**
**DHS/USCG–017**

**SYSTEM NAME:**

United States Coast Guard—017 Federal Medical Care Recovery Act.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

Records are maintained at USCG Headquarters in Washington, DC, in field locations, and at USCG health care facilities at which the USCG military personnel or eligible dependent receives treatment.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Categories of individuals covered by this system include active duty, reserve, and retired active duty, retired reserve, and their eligible dependents. Also included are insurance company employees, related legal staff, the alleged tortfeasor. Finally, individuals such as Search and Rescue victims, employees, volunteers, or others who are provided emergency care by the USCG.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

- Military personnel's name;
- Eligible dependent's name;
- Social Security number;
- Gender;
- Date of birth;
- Case number;
- Insurance company's name and representative's name;
- Legal firm's name and legal representative's name;
- Addresses;
- Telephone numbers;
- Correspondence, memoranda, and related documents concerning potential and actual FMCRA claims;
- Police reports;
- Witness statements;
- Court documentation;
- Basic contact information for insurance companies, legal staff, and tortfeasor;
- Copies of medical and dental treatment provided to the individual subject of the claim;
- Copies of medical bills associated with civilian care provided at government expense; and
- Automated data processing (ADP) records containing identifying data on individuals, unit of assignment and address, home address, the amount of the claim, the amount paid to the government on the claim, dates of correspondence sent, due dates of reply, claim number, date claim opened, and date claim closed.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; The Federal Records Act, 44 U.S.C. 3101; 14 U.S.C. 632.; 10 U.S.C. 1095, Uniformed Services Medical and Dental Care; 42 U.S.C. 2651 *et seq.*, Federal Medical Care Recovery Act. 3 CFR 25.131, 133.

**PURPOSE(S):**

The purpose of this system is to collect and maintain FMCRA claims for the government.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

**Note:** For records of identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be a client/patient, maintained in connection with the performance of any alcohol or drug abuse prevention and treatment function conducted, requested, or directly or indirectly assisted by any department or agency of the United States, shall, except as provided therein, be confidential and be disclosed only for the purposes and under circumstances expressly authorized in 42 U.S.C. 290dd–2. The results of a drug test of civilian employees may be disclosed only as expressly authorized under 5 U.S.C. 7301. These statutes take precedence over the Privacy Act of 1974 to the extent that disclosure is more limited. The Routine Uses set forth below do not apply to this information. However, access to the record by the individual to whom the record pertains is governed by the Privacy Act.

A. To medical personnel to the extent necessary to meet a bona fide medical emergency;

B. To qualified personnel for the purpose of conducting scientific research, management audits, financial audits, or program evaluation provided that employees are individually identified;

C. To the employee's medical review official;

D. To the administrator of any Employee Assistance Program in which the employee is receiving counseling or treatment or is otherwise participating;

E. To any supervisory or management official within the employee's agency having authority to take adverse personnel action against such employee; or

F. Pursuant to the order of a court of competent jurisdiction where required by the United States Government to defend against any challenge against any adverse personnel action. See 42 U.S.C. 290dd, 290ee, and Public Law 100–71, Section 503(e).

**Note:** For all other records besides those noted above, this system of records contains individually identifiable health information. The Health Insurance Portability and Accountability Act of 1996 applies to most of such health information. Department of Defense 6025.18–R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974 or mentioned in this system of records notice. Therefore, routine uses outlined below may not apply to such health information.

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (including United States Attorney Offices) or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such

information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To attorneys and insurance companies involved in settling and litigating claims pursuant to Health Information Portability and Accountability Act.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

Name, social security number, case number, or address of military personnel or eligible dependent. Records can also be retrieved by attorney's or other parties' names.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

Records are retained at USCG Headquarters for 2 years; transferred to a Federal Records Center and retained for an additional 4 years, for a total of 6 years, and destroyed thereafter. (AUTH: GRS 1, Item 19.)

**SYSTEM MANAGER AND ADDRESS:**

Human Resources Management, United States Coast Guard, Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

**NOTIFICATION PROCEDURE:**

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to Human Resources Management, United States Coast Guard, Headquarters, 2100 2nd Street, SW., Washington, DC 20593–0001.

When seeking records about yourself from this system of records or any other USCG system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

- An explanation of why you believe the Department would have information on you,
- Specify when you believe the records would have been created,
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information the USCG may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

See ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

From the individual, or if a minor, the parent or guardian, and witnesses. Medical facilities (USCG, Department of Defense, Uniformed Services Treatment Facility, or Civilian Facility) where beneficiaries are treated. Injury investigations. Attorneys and insurance companies involved in the claim.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

**BILLING CODE 4410–10–P**

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0150]**

### Privacy Act of 1974; U.S. Customs and Border Protection—015 Automated Commercial System, System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of record notices, the Department of Homeland Security proposes to update and reissue the following legacy record system, Treasury/CS.278 Automated

Commercial System (October 18, 2001) as a Department of Homeland Security system of records notice titled, U.S. Customs and Border Protection Automated Commercial System. The Customs and Border Protection Automated Commercial System is a comprehensive system used by Department of Homeland Security, U.S. Customs and Border Protection to track, control, and process all commercial goods imported into the United States. This legacy system will now also collect additional data via its Automated Broker Interface and Vessel Automated Manifest System. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the U.S. Customs and Border Protection—015 Automated Commercial System record system. This reissued system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** The established system of records will be effective January 20, 2009. Written comments must be submitted on or before January 20, 2009.

**ADDRESSES:** You may submit comments, identified by DHS–2008–0150 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket to read background documents or comments received go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 799 Ninth Street, NW., Washington, DC 20001–4501. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

The priority mission of U.S. Customs and Border Protection (CBP) is to prevent terrorists and terrorist weapons from entering the country while facilitating legitimate travel and trade. The Automated Commercial System (ACS) is the comprehensive system used by U.S. Customs and Border Protection to track, control, and process all commercial goods imported into the United States. ACS is a sophisticated and integrated large-scale business-oriented system which employs multiple modules to perform discrete aspects of its functionality, including receiving data transmissions from a variety of parties involved in international commercial transactions and providing CBP with the capability to track both the transport transactions and the financial transactions associated with the movement of merchandise through international commerce. Through the use of Electronic Data Interchange (EDI), ACS facilitates merchandise processing, significantly cuts costs, and reduces paperwork requirements for both Customs and the importing community.

ACS also provides the following:

*A. Cargo Selectivity*

CBP uses the ACS Cargo Selectivity System to sort high risk cargo from low risk cargo and to determine the type of examination required. Cargo selectivity accepts data transmitted through ABI and compares it against established criteria. CBP uses the Cargo Selectivity System, a module of ACS, to process manifests and National In-bond entries in order to identify the CBP inspection and examination status of specific bills of lading for imported merchandise. Cargo Selectivity facilitates more efficient and effective cargo processing by ensuring cargo that requires additional screening receives it and that which is lower risk does not.

*B. Entry Summary Selectivity*

The Entry Summary Selectivity system of ACS screens the review of entry summary data. Using line item data transmitted through ABI, the system matches national and local selectivity criteria against entry summary data to assess risk by importer, tariff number, country of origin, manufacturer, and value. The system captures paperless summary activity, discrepant summary findings, and line item team assignment data.

*C. Border Cargo*

The Border Cargo Selectivity system of ACS determines risk assessment and examination requirements for high volume borders (*i.e.*, ports of entry). The system uses the same screening process as the Cargo Selectivity system. The Border Cargo Selectivity system will soon be enhanced to allow ABI filers to transmit manifest information.

*D. Quota*

The ACS Quota system tracks quantity controls on imported merchandise. It also tracks visas from other countries. (Visas determine the amount of exports allowed for certain countries.) The Quota system checks the quantities against the visas and transmits this information to the country of origin. The ACS quota and visa controls simplify reconciliation of imports and exports.

*E. Paperless Entry*

Paperless entry processing eliminates the need for ABI participants to file a Customs Form 3461, Entry/Immediate Delivery, if certain criteria are met and the merchandise does not require examination. Carriers who participate in AMS will receive electronic notifications when merchandise is available for release.

*F. Automated Invoice Interface (AII)*

AII allows filers to send electronic invoice information to Customs. This information is transmitted to Customs using either ABI record formats or the EDIFACT CUSDEC (Customs declaration). When EDIFACT is used, the filer also transmits data that is normally on the CF–3461 for cargo release, as well as the entry summary CF–7501, invoice data, and other government agency data.

*G. Drawback*

Filers can submit a drawback claim to Customs on a diskette or through ABI. This ensures that the data is quickly and accurately recorded in ACS and results in faster claim processing and issuance of the drawback payment. Immediate acceptance or rejection of data is available.

*H. Protest*

The ABI electronic protest system allows ABI participants to file, amend, and query the following types of actions:

- Protests against decisions of the Customs Service under 19 U.S. C. 1514.
- Petitions for refunds of Customs duties or corrections of errors requiring reliquidation pursuant to 19 U.S.C. 1520(c) and (d).
- Interventions in an importer's protest by an exporter or producer of merchandise from a country that is a party to the North American Free Trade

Agreement under Section 181.115 of the Customs Regulations.

Once filed, protests can be amended and additional arguments submitted to:

- Apply for further review (when not requested at time of filing).
- Assert additional claims or challenge an additional decision.
- Submit alternative claims and additional grounds or arguments.
- Request review of denial of further review.
- Request denial of the protest be voided.

The protest, petition, or intervention can be transmitted remotely from any location. Customs views and processes the protest on-line. An automatic notification routine keeps the filer informed of any change in status, including final disposition.

*I. Remote Location Filing*

Remote Location Filing (RLF) is a pilot program which allows an approved participant to electronically file a formal or informal entry of merchandise with Customs from a location within the United States other than the port of arrival (POA) or the designated examination site (DES). Such merchandise, upon clearance by CBP, may enter the commerce of the United States.

*J. National In-bond*

The National In-bond system tracks cargo en route in the United States. Using departure, arrival, and closure data, the In-bond system tracks cargo from the point of unlading to the port of entry or exportation. The In-bond system is incorporated within AMS. AMS retains control over all sea in-bond movements (both conventional and paperless) that are associated with automated bills of lading.

*K. Paperless Master In-bond*

The Paperless Master In-bond program controls the movement and disposition of master in-bond (MIB) shipments from the carrier's custody at the port of unlading to the same carrier's custody at the port of destination. This program utilizes the data already available in AMS, eliminating the need for paper documentation.

To help prevent terrorist weapons from being transported to the United States, vessel carriers bringing cargo to the United States are required to transmit certain information to Customs and Border Protection (CBP) about the cargo they are transporting prior to lading that cargo at foreign ports of entry. CBP is issuing an interim final rule that requires both importers and carriers to submit additional information pertaining to cargo to CBP before the cargo is brought into the United States by vessel. This information must be submitted to CBP by way of a CBP-approved electronic data interchange system. The required information is necessary to improve CBP's ability to identify high-risk shipments so as to prevent smuggling and ensure cargo safety and security, as required by section 203 of the Security and Accountability for Every (SAFE) Port Act of 2006 and section 343(a) of the Trade Act of 2002, as amended by the Maritime Transportation Security Act of 2002.

The proposed rule was known to the trade as both the ''Importer Security Filing proposal'' and the ''10 + 2 proposal.'' The name ''10 + 2'' is shorthand for the number of advance data elements CBP was proposing to collect. Carriers would be generally required to submit two additional data elements—a vessel stow plan and container status messages regarding certain events relating to containers loaded on vessels destined to the United States—to the elements they are already required to electronically transmit in advance (the ''2'' of ''10+2''); and importers, as defined in the proposed regulations, would be required to submit ten data elements—an Importer Security Filing containing ten data elements (the ''10'' of ''10+2'').

ACS has two principal methods for electronic data interchange: The Automated Broker Interface (ABI) and the Automated Manifest System (AMS). Under the ''10+2'' program, importers, who submit the Importer Security Filing (ISF), will use either ABI or Vessel AMS to provide their information to CBP. ACS, upon receipt of the ISF, will transfer the data to the Automated Targeting System (ATS) for screening and targeting purposes. Once screened the ISF data will be returned with embedded targeting links to ACS to be maintained in accordance with the ACS stated retention policy.

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and its components and offices have relied on preexisting Privacy Act systems of records notices for the maintenance of records that concern the tracking, controlling, and processing of all commercial goods imported into the United States.

This collection satisfies the requirements of Section 203 of the Security and Accountability for Every Port Act of 2006 (Pub. L. 109–347, 120 Stat. 1884 (SAFE Port Act)).

Consistent with DHS's information sharing mission, information stored in the Automated Commercial System may be shared with other DHS components, as well as appropriate Federal, State, local, tribal, foreign, or international government agencies. This sharing will only take place after DHS/CBP determines that the receiving component or agency has a need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice.

To provide notice and transparency to the public, the Department of Homeland Security, U.S. Customs and Border Protection announces an amendment to an existing legacy Privacy Act system of records, the Automated Commercial System, a comprehensive system used by U.S. Customs and Border Protection to track, control, and process all commercial goods imported into the United States. This legacy system will now also collect additional data via the Automated Broker Interface and Vessel Automated Manifest System.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of record notices, DHS proposes to update and reissue the following legacy record system, Treasury/CS.278 Automated Commercial System (66 FR 52984 October 18, 2001), as a DHS/CBP system of records notice titled, U.S. Customs and Border Protection Automated Commercial System. Categories of individuals and categories of records have been reviewed, and the routine uses of this legacy system of records notice have been updated to better reflect the DHS/CBP Automated Commercial System record system. This reissued system will be included in DHS's inventory of record systems.

**II. Privacy Act**

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter

of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals to more easily find such files within the agency. Below is the description of the Automated Commercial System system of records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this updated system of records to the Office of Management and Budget and to Congress.

**System of Records**
**DHS/CBP—015**

**SYSTEM NAME:**

U.S. Customs and Border Protection—015 Automated Commercial System

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

Records are maintained at the CBP Headquarters in Washington, DC and field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Categories of individuals covered by this system include: CBP employees and individuals involved in the import trade.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

- Individual's name;
- Social Security Number (SSN), if collected;
- Address;
- CBP employee names;
- CBP employee SSN;
- Importer of record number, which can be the IRS Employer Identification Number (EIN), SSN, or a Customs-assigned number;
- Importer name and address;
- Type of importation bond;
- Importation bond expiration date;
- Surety code;
- Violation statistics;
- Protest information;
- Customhouse broker number;
- Customhouse name;
- Customhouse address;
- Bond agent name;
- Bond agent SSN;
- Surety code (non-SSN);
- Surety name;
- Customs bond information;
- Liquidator identification (non-SSN);
- Foreign Manufacturer/Shipper identification code;
- Foreign Manufacturer/Shipper name;
- Foreign Manufacturer/Shipper address;
- Carrier names;
- Carrier codes (non SSN) (Standard Carrier Agent Code (SCA) for vessel carriers, International Air Transport Association (IATA) for air carriers);
- Manufacturer (or supplier) name;
- Seller name;
- Buyer name;
- Ship to party name;
- Container stuffing location;
- Consolidator (stuffer);
- Foreign trade zone applicant identification number;
- Consignee number(s);
- Country of origin;
- Commodity HTSUS number;
- Booking party;
- Foreign port of unlading;
- Place of delivery; and
- Ship to party.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

19 U.S.C. 66, 1431, 1448, 1481, 1484, 1505, 1514 and 1624, section 203 of the Security and Accountability for Every (SAFE) Port Act of 2006 and section 343(a) of the Trade Act of 2002, as amended by the Maritime Transportation Security Act of 2002.

**PURPOSE(S):**

The purpose of this system is to track, control, and process all commercial goods imported into the United States, and to improve CBP's ability to identify high-risk shipments so as to prevent smuggling and ensure cargo safety and security. As part of CBP identifying high risk shipments for border security and counterterrorism purposes, the system includes information relating to individuals and their relationship to the merchandise as documented in the Importer Security Filing (ISF).

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when:

1. DHS or any component thereof;

2. any employee of DHS in his/her official capacity;

3. any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. the United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS/CBP determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS/CBP collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) that rely upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS,

when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To a Federal, State, or local agency, or other appropriate entity or individual, or through established liaison channels to selected foreign governments, in order to provide intelligence, counterintelligence, or other information for the purposes of intelligence, counterintelligence, or antiterrorism activities authorized by U.S. law, Executive Order, or other applicable national security directive.

H. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

I. To the Bureau of the Census to provide information on foreign trade data.

J. To a Federal agency, pursuant to the International Trade Data System Memorandum of Understanding, consistent with the receiving agency's legal authority to collect information pertaining to and/or regulate transactions in international trade.

K. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty where DHS determines that the information would assist in the enforcement of civil or criminal laws.

L. To a Federal, State, local, tribal, territorial, foreign, or international agency, maintaining civil, criminal or other relevant enforcement information or other pertinent information, which has requested information relevant to or necessary to the requesting agency's or the bureau's hiring or retention of an individual, or issuance of a security clearance, license, contract, grant, or other benefit;

M. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations, in response to a subpoena, or in connection with criminal law proceedings;

N. To third parties during the course of an investigation to the extent necessary to obtain information pertinent to the investigation;

O. To the Department of Justice, the United States Attorney's Office, or a consumer reporting agency for further collection action on any delinquent debt when circumstances warrant;

P. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations where DHS is aware of a need to utilize relevant data for purposes of testing new technology and systems designed to enhance national security or identify other violations of law;

Q. To a former employee of DHS, in accordance with applicable regulations, for purposes of responding to an official inquiry by a Federal, State, or local government entity or professional licensing authority; or facilitating communications with a former employee that may be necessary for personnel-related or other official purposes where the Department requires information or consultation assistance from the former employee regarding a matter within that person's former area of responsibility;

R. To an organization or individual in either the public or private sector, either foreign or domestic, where there is a reason to believe that the recipient is or could become the target of a particular terrorist activity or conspiracy, to the extent the of life or property; and

S. To a consumer reporting agency related to owing the U.S. Government money in accordance with 15 U.S.C 1681 *et seq.*

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

Yes, in accordance with the provision of 15 U.S.C. 1681 *et seq.*

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records that are stored electronically are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

Records may be retrieved by identification codes and/or name.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions. The system maintains a real-time auditing function of individuals who access the system. Additional safeguards may vary by component and program.

**RETENTION AND DISPOSAL:**

The Importer Security Filing is retained for fifteen years from date of submission unless it becomes linked to active law enforcement lookout records, CBP matches to enforcement activities, and/or investigations or cases (*i.e.*, specific and credible threats; individuals, and routes of concern; or other defined sets of circumstances) for which it will remain accessible for the life of the law enforcement matter to support that activity and other enforcement activities that may become related. All other records are maintained for a period of six years from the date of entry.

**SYSTEM MANAGER AND ADDRESS:**

Director, Office of Automated Systems, CBP Headquarters, 1300 Pennsylvania Avenue, NW., Washington, DC 20229 is responsible for all data maintained in the files.

**NOTIFICATION PROCEDURE:**

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to CBP's FOIA Officer, 1300 Pennsylvania Avenue, NW., Washington, DC 20229. If an individual believes more than one component maintains Privacy Act records concerning him or her the individual may submit the request to the Chief Privacy Officer, Department of Homeland Security, 245 Murray Drive, SW., Building 410, STOP–0550, Washington, DC 20528.

When seeking records about yourself from this system of records or any other Departmental system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full

name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty or perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

- An explanation of why you believe the Department would have information on you,
- Identify which component(s) of the Department you believe may have the information about you,
- Specify when you believe the records would have been created,
- Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records,
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information the component(s) will not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

*See* ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

*See* ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

Records are obtained by authorized Customs forms or electronic formats from individuals and/or companies incidental to the conduct of foreign trade and required by CBP in administering the tariff laws and regulations of the United States.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

Information in the system may be shared with law enforcement and/or intelligence agencies pursuant to the above routine uses. The Privacy Act requires DHS to maintain an accounting of the disclosures made pursuant to all routines uses. Disclosing the fact that a law enforcement or intelligence agencies has sought particular records may affect ongoing law enforcement or intelligence activity. As such pursuant to 5 U.S.C. 552a(j)(2) and (k)(2), DHS will claim exemption from (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as is necessary and appropriate to protect this information.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

**BILLING CODE 4410–10–P**

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0153]**

### Privacy Act of 1974; U.S. Customs and Border Protection—013 Seized Assets and Case Tracking System

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security is giving notice that it proposes to consolidate twelve legacy record systems into a U.S. Customs and Border Protection system of records notice titled, U.S. Customs and Border Protection Seizures and Violators (SEACATS): Treasury/CS.021 Arrest/Seizure/Search Report and Notice of Penalty File, October 18, 2001, Treasury/CS.096 Fines, Penalties, and Forfeiture Control and Information Retrieval System, October 18, 2001, Treasury/CS.098 Fines, Penalties, and Forfeitures Records, October 18, 2001, Treasury/CS.099 Fines, Penalties, and Forfeiture Files (Supplementary Petitions), October 18, 2001, Treasury/CS.100 Fines, Penalties, and Forfeiture Records, October 18, 2001, Treasury/CS.125 Intelligence Log, October 18, 2001, Treasury/CS.136 All Liquidated Damage, Penalty, and Seizure Cases; Prior Violators, October 18, 2001, Treasury/CS.156 Narcotic Violator File, October 18, 2001, Treasury/CS.209 Resumes of Professional Artists, October 18, 2001, Treasury/CS.213 Seized Asset and Case Tracking System, October 18, 2001, Treasury/CS.215 Seizure Report File, October 18, 2001, Treasury/CS.227 Temporary Importation Under Bond (TIB) Defaulter Control System, October 18, 2001, and Treasury/CS.258 Violator's Case Files, October 18, 2001. Categories of individuals, categories of records, and the routine uses of these legacy system of records notices have been consolidated and updated to better reflect the U.S. Customs and Border Protection seizures and violators record systems. DHS is issuing a Notice of Proposed Rulemaking concurrent with this SORN elsewhere in the **Federal Register**. The exemptions for the legacy system of records notices will continue to be applicable until the final rule for this SORN has been completed. This system will be included in the Department's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009. This new system will be effective January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0153 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: Laurence E. Castelli (202–325–0280), Chief, Privacy Act Policy and Procedures Branch, U.S. Customs and Border Protection, Office of International Trade, Regulations & Rulings, Mint Annex, 1300 Pennsylvania Ave., NW., Washington, DC 20229. For privacy issues contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP) have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records pertaining to seizures and violators.

As part of its efforts to streamline and consolidate its record systems, DHS is establishing a component system of records under the Privacy Act (5 U.S.C. 552a) for DHS/CBP that pertains to seizures made, and persons found violating laws and regulations enforced,

by DHS/CBP. This record system will allow DHS/CBP to collect and maintain records regarding seizures and violators.

In accordance with the Privacy Act of 1974, DHS is giving notice that it proposes to consolidate twelve legacy record systems into a DHS/CBP system of records notice titled, U.S. Customs and Border Protection Seizures and Violators (SEACATS): Treasury/CS.021 Arrest/Seizure/Search Report and Notice of Penalty File (66 FR 52984 October 18, 2001), Treasury/CS.096 Fines, Penalties, and Forfeiture Control and Information Retrieval System (66 FR 52984 October 18, 2001), Treasury/CS.098 Fines, Penalties, and Forfeitures Records (66 FR 52984 October 18, 2001), Treasury/CS.099 Fines, Penalties, and Forfeiture Files (Supplementary Petitions) (66 FR 52984 October 18, 2001), Treasury/CS.100 Fines, Penalties, and Forfeiture Records (66 FR 52984 October 18, 2001), Treasury/CS.125 Intelligence Log (66 FR 52984 October 18, 2001), Treasury/CS.136 All Liquidated Damage, Penalty, and Seizure Cases; Prior Violators (66 FR 52984 October 18, 2001), Treasury/CS.156 Narcotic Violator File (66 FR 52984 October 18, 2001), Treasury/CS.209 Resumes of Professional Artists (66 FR 52984 October 18, 2001), Treasury/CS.213 Seized Asset and Case Tracking System (66 FR 52984 October 18, 2001), Treasury/CS.215 Seizure Report File (66 FR 52984 October 18, 2001), Treasury/CS.227 Temporary Importation Under Bond (TIB) Defaulter Control System (66 FR 52984 October 18, 2001), and Treasury/CS.258 Violator's Case Files (66 FR 52984 October 18, 2001). Categories of individuals, categories of records, and the routine uses of these legacy systems of records notices have been consolidated and updated to better reflect DHS/CBP seizures and violators record systems. Additionally, DHS is issuing a Notice of Proposed Rulemaking (NPRM) concurrent with this SORN elsewhere in the **Federal Register**. The exemptions for the legacy system of records notices will continue to be applicable until the final rule for this SORN has been completed. This system will cover all seizure, civil and criminal cases relating to violators of the customs, immigration, agriculture and other laws and regulations administered or enforced by DHS/CBP.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the U.S. Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system, in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/CBP Seizures and Violators System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget (OMB) and to Congress.

### System of Records DHS/CBP–013

#### SYSTEM NAME:

U.S. Customs and Border Protection Seized Assets and Case Tracking System (SEACATS).

#### SECURITY CLASSIFICATION:

Unclassified.

#### SYSTEM LOCATION:

This computer database is located at the U.S. Customs and Border Protection National Data Center in the Washington, DC area. Computer terminals are located at CBP sites and ports throughout the United States and at CBP Headquarters, Washington, DC as well as appropriate facilities under the jurisdiction of the U.S. Department of Homeland Security (DHS) and other locations at which officers of DHS may be posted or operate to facilitate DHS's mission of homeland security. Terminals may also be located at appropriate facilities for other participating government agencies pursuant to agreement. Records are maintained at the U.S. Customs and Border Protection Headquarters in Washington, DC and in field offices.

#### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered by this system include current and former violators and alleged or otherwise suspected violators of Custom, immigration, agriculture or other laws and regulations administered or enforced by DHS/CBP, and related parties involved in, or affected by, an inquiry concerning the violation of Customs, immigration, agriculture or other law enforced or administered by DHS/CBP. This system includes:

- Persons who are believed to be involved in activities which constitute, or may develop into, possible violation of Customs, immigration, agriculture or other laws administered or enforcement by DHS/CBP.
- Persons who smuggle, or are suspected of smuggling, merchandise or contraband, including narcotics and other illegal drugs, into the U.S.;
- Vessels, aircraft and other conveyances that have been used in connection or with or found in violation of Customs, immigration, agriculture or other laws and regulations enforced or administered by DHS/CBP;
- Individuals and businesses fined, penalized, or forced to forfeit merchandise because of violations of Customs, immigration, agriculture and/or other laws administered or enforced by DHS/CBP;
- Individuals and businesses who have filed false invoices, documents, or statements that result in a violation of Customs, immigration, agriculture or other laws and regulations administered or enforced by DHS/CBP;
- Individuals and businesses who have filed supplemental petitions for relief from fines, penalties, and forfeitures assessed for violations of the laws and regulations administered or enforced by DHS/CBP;
- Owners, claimants, and other interested parties to seized property;
- Purchasers of forfeited property;
- Individuals to whom prohibited merchandise is addressed; and
- Individuals who assist in the enforcement of customs, navigation, immigration, agriculture and other laws administered or enforced by DHS/CBP.

#### CATEGORIES OF RECORDS IN THE SYSTEM:

Categories of records in this system may include:

- Individual's name;
- Business name;
- Aliases;
- Social security number;

- Physical description of the individual;
- Addresses;
- Telephone numbers;
- Occupation;
- Violator's previous record;
- Driver's license;
- Passport number;
- Entry documentation;
- Personal identifying number, such as informant number;
- Case number or seizure number;
- Vessel name, including registration number;
- Aircraft name and tail number;
- License Plate Number;
- Type of violation/suspected violation;
- Description of violation/alleged violation, including circumstances surrounding the violation/alleged violation, including section of law violated or alleged to have been violated;
- Date and place of violation/alleged violation;
- On-site disposition actions, such as whether a seizure was made, an item was detained, or inspection occurred;
- Sender of the seized or detained goods;
- Intended recipient of the seized or detained goods;
- Parties entitled to legal notice or who are legally liable;
- Bond information;
- Notices;
- Investigative reports and disposition of fines, penalties, and forfeitures;
- Memoranda;
- Petitions and supplemental petitions;
- Recommendations pertaining to litigation;
- Referrals to Department of Justice;
- Notes from officers related to a DHS/CBP action;
- Case information pertaining to violation;
- Actions taken by DHS/CBP;
- Documents relating to the internal review and consideration of the request for relief and decision thereon;
- Property description;
- Estimated foreign value of merchandise;
- Duty;
- Domestic value of merchandise;
- CBP Port code;
- Delivery to seizure clerk; and
- Applicants for awards of compensation and determination of such applications.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; the Federal Records Act, 44 U.S.C. 3101; the immigration laws, including 8 U.S.C. 1221, 1321–1328, 8 CFR parts 270, 274, 280; the Customs laws, including 18 U.S.C. 542, 545 and 19 U.S.C. 66, 1436, 1497, 1509, 1592, 1593a, 1594, 1595a, 1618, 1619, 1624, 1703 and, 19 CFR parts 1623, 171 and 172; the agriculture laws, including 7 U.S.C. 8303, 8304, 8307; Executive Order 9373.

**PURPOSE(S):**

The purpose of this system is to (1) document individuals and businesses who violated, or are alleged to have violated, Custom, immigration, agriculture and other laws and regulations enforced or administered by DHS/CBP; (2) collect and maintain records on fines, penalties, and forfeitures; and (3) collect and maintain records of individuals who have provided assistance with respect to identifying or locating individuals who have or are alleged to have violated Customs, immigration, agriculture and other laws and regulations enforced or administered by DHS/CBP.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when it is necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS or any component in his/her official capacity;

3. Any employee of DHS or any component in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The U.S. or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS or CBP determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS or CBP collected the records.

B. To a congressional office in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS or CBP suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. DHS or CBP has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS, CBP, or another agency or entity) or harm to the individual who relies upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS or CBP's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS or CBP, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS/CBP officers and employees.

G. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty where DHS determines that the information would assist in the enforcement of civil or criminal laws.

H. To an appropriate Federal, State, local, tribal, foreign, or international agency, if the information is relevant and necessary to a requesting agency's decision concerning the hiring or retention of an individual, or issuance of a security clearance, license, contract, grant, or other benefit, or if the information is relevant and necessary to a DHS decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of

an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit and disclosure is appropriate to the proper performance of the official duties of the person making the request.

I. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal law proceedings or in response to a subpoena from a court of competent jurisdiction.

J. To third parties during the course of a law enforcement investigation to the extent necessary to obtain information pertinent to the investigation, provided disclosure is appropriate to the proper performance of the official duties of the officer making the disclosure.

K. To a consumer reporting agency in accordance with section 3711(3) of Title 31.

L. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or any component is necessary to demonstrate the accountability of DHS or a component's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

M. To appropriate Federal, State, local, tribal, or foreign governmental agencies or multilateral governmental organizations where DHS is aware of a need to utilize relevant data for purposes of testing new technology and systems designed to enhance national security or identify other violations of law.

N. To a Federal, State, or local agency, or other appropriate entity or individual, or through established liaison channels to selected foreign governments, in order to provide intelligence, counterintelligence, or other information for the purposes of intelligence, counterintelligence, or antiterrorism activities authorized by U.S. law, Executive Order, or other applicable national security directive.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

Yes, when appropriate and in accordance with section 3711(3) of Title 31.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

**RETRIEVABILITY:**

Records are retrieved by individual's name; business name; vessel name; aircraft name; case number; year and CBP port code; identification codes; identifying number; date of violation; type of violation; name of the person to which seized items are addressed; case or seizure number by fiscal year; and phone number.

**SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated system security access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

**RETENTION AND DISPOSAL:**

Records related to a law enforcement action; or that are linked to an alleged violation of law or regulation, or are matches or suspected matches to enforcement activities, investigations or cases (i.e., administrative penalty actions or criminal prosecutions), will remain accessible until the conclusion of the law enforcement matter and any other enforcement matters or related investigative, administrative, or judicial action to which it becomes associated plus five years. Records associated with a law enforcement matter, where all applicable statutes of limitation have expired prior to the conclusion of the matter, will be retained for two years following the expiration of the applicable statute of limitations.

**SYSTEM MANAGER AND ADDRESS:**

Customs and Border Protection, Customs and Border Protection Headquarters, 1300 Pennsylvania Avenue, NW., Washington, DC 20229.

**NOTIFICATION PROCEDURE:**

The Secretary of Homeland Security has exempted this system from notification, access, and amendment because of the law enforcement nature of the information. However, CBP will review requests on a case by case and release information as appropriate. Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to CBP's FOIA Officer, 1300 Pennsylvania Avenue, NW., Mint Annex, Washington, DC 20229. Specific FOIA contact information can be found at *http://www.dhs.gov/foia* under ''contacts.''

When seeking records about yourself from this system of records or any other CBP system of records your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Director, Disclosure and FOIA, *http://www.dhs.gov* or 1–866–431–0486. In addition you should provide the following:

- An explanation of why you believe the Department would have information on you,
- Specify when you believe the records would have been created,
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without this bulleted information CBP may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

**RECORD ACCESS PROCEDURES:**

*See* ''Notification procedure'' above.

**CONTESTING RECORD PROCEDURES:**

See ''Notification procedure'' above.

**RECORD SOURCE CATEGORIES:**

Individuals, including individuals petitioning for relief of fines, penalties, and forfeitures; DHS/CBP employees, including DHS/CBP employees who prepare Customs Form 5955a (Notice of Penalty or liquidated Damages Incurred and Demand for Payment) and Customs

Form 151 (Search/Arrest/Seizure Report) at the time and place where the violation occurred; Information and representations supplied by importers, brokers and other agents pursuant to the entry and processing of merchandise or in the clearing of individuals or baggage through Customs. Also included is information gathered pursuant to DHS/CBP investigations of suspected or actual violations of Customs, immigration, agriculture and other laws enforced or administered by DHS/CBP, regulations, recommendations, and information supplied by other agencies; Port Director of CBP who has jurisdiction over fines, penalties, and forfeitures; penalty notices; Search/Arrest/Seizure Reports transmitted to the Fines, Penalties, and Forfeitures Office by ports and stations within the area; and mail shipments.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

Pursuant to exemption 5 U.S.C. 552a(j)(2) of the Privacy Act, portions of this system are exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5) and (e)(8); (f), and (g). Pursuant to 5 U.S.C. 552a(k)(2), this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). In addition, to the extent a record contains information from other exempt systems of records, CBP will rely on the exemptions claimed for those systems.

Dated: December 10, 2008.

**Hugo Teufel III,**

*Chief Privacy Officer, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

**[Docket No. DHS–2008–0139]**

### Privacy Act of 1974; United States Coast Guard—010 Physical Disability Evaluation System Files System of Records

**AGENCY:** Privacy Office; DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974 and as part of the Department of Homeland Security's ongoing effort to review and update legacy system of records notices, the Department of Homeland Security is giving notice that it proposes to update and reissue the following legacy record system, DOT/CG 571 Physical Disability Separation System as a Department of Homeland Security system of records notice titled, Department of Homeland Security United States Coast Guard—010 Physical Disability Evaluation System. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the Department of Homeland Security United States Coast Guard's physical disability evaluation record system. This new system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** Written comments must be submitted on or before January 20, 2009. This new system will be effective January 20, 2009.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2008–0139 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.
- *Mail:* Hugo Teufel III, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.
- *Instructions:* All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change and may be read at *http://www.regulations.gov*, including any personal information provided.
- *Docket:* For access to the docket, to read background documents, or comments received, go to *http://www.regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** For general questions please contact: David Roberts (202–475–3521), United States Coast Guard Privacy Officer, United States Coast Guard. For privacy issues please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS)/United States Coast Guard (USCG) has relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern physical disability evaluation proceedings.

As part of its efforts to streamline and consolidate its record systems, DHS is updating and reissuing a DHS/USCG system of records under the Privacy Act (5 U.S.C. 552a) that deals with USCG's physical disability evaluation proceedings. This record system will allow DHS/USCG to collect and preserve the records regarding physical disability evaluation proceedings. The collection and maintenance of this information is used to ensure equitable application of the provisions of Title 10, United States Code, Chapter 61, which relates to the separation or retirement of military personnel by reason of physical disability. These laws were enacted primarily for the purpose of maintaining a vital and fit military organization with full consciousness of the necessity for maximum use of the available work force. These laws provide benefits for eligible members whose military service is terminated through no fault of their own due to a service-connected disability, and they prevent the arbitrary separation from the service of those members who incur a disabling injury or disease, yet remain fit for duty. The collection and maintenance of this information will assist DHS/USCG in meeting its obligation to manage the physical disability evaluation process proceedings.

In accordance with the Privacy Act of 1974 and as part of DHS's ongoing effort to review and update legacy system of records notices, DHS is giving notice that it proposes to update and reissue the following legacy record system, DOT/CG 571 Physical Disability Separation System (65 FR 19476 April 11, 2000), as a DHS/USCG system of records notice titled, DHS/USCG–010 Physical Disability Evaluation System. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the DHS/USCG physical disability evaluation record system. This new system will be included in DHS's inventory of record systems.

#### II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some

identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/USCG–010 Physical Disability Evaluation Files System of Records.

## III. Health Insurance Portability and Accountability Act

This system of records contains individually identifiable health information. The Health Insurance Portability and Accountability Act of 1996, applies to most of such health information. Department of Defense 6025.18–R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974 or mentioned in this system of records notice.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this new system of records to the Office of Management and Budget and to Congress.

**System of Records: DHS/USCG–010.**

**SYSTEM NAME:**

United States Coast Guard—010 Physical Disability Evaluation System.

**SECURITY CLASSIFICATION:**

Unclassified.

**SYSTEM LOCATION:**

Records are maintained at the USCG Headquarters in Washington, DC and field offices.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

All USCG active duty and reserve personnel who are referred for potential separation or retirement for physical disability.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Categories of records in this system include:

- Name;
- Social Security Number (SSN) and/or Employee ID (EmpID)
- Informal Physical Evaluation Board files;
- Formal Physical Evaluation Board files;
- International Classification of Diseases code (ICD);
- Physical Review Council files;
- Physical Disability Appeal Board files; and
- Physical Disability Board of Review files.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; 14 U.S.C. 632; the Federal Records Act, 44 U.S.C. 3101; 10 U.S.C. Chapter 61.

**PURPOSE(S):**

The purpose of this system is to document physical disability evaluation proceedings and ensure equitable application of the provisions of Title 10, United States Code, Chapter 61, which relates to the separation or retirement of military personnel by reason of physical disability.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

**Note:** For records of identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be a client/patient, maintained in connection with the performance of any alcohol or drug abuse prevention and treatment function conducted, requested, or directly or indirectly assisted by any department or agency of the United States, shall, except as provided therein, be confidential and be disclosed only for the purposes and under circumstances expressly authorized in 42 U.S.C. 290dd–2. This statute takes precedence over the Privacy Act of 1974 to the extent that disclosure is more limited. The Routine Uses set forth below do not apply to this information. However, access to the record by the individual to whom the record pertains is governed by the Privacy Act.

A. To medical personnel to the extent necessary to meet a bona fide medical emergency;

B. To qualified personnel for the purpose of conducting scientific research, management audits, financial audits, or program evaluation provided that employees are individually identified;

C. To the employee's medical review official;

D. To the administrator of any Employee Assistance Program in which the employee is receiving counseling or treatment or is otherwise participating;

E. To any supervisory or management official within the employee's agency having authority to take adverse personnel action against such employee; or

F. Pursuant to the order of a court of competent jurisdiction where required by the United States Government to defend against any challenge against any adverse personnel action. *See* 42 U.S.C. 290dd, 290ee, and Public Law 100–71, Section 503(e).

**Note:** For all other records besides those noted above, this system of records contains individually identifiable health information. The Health Insurance Portability and Accountability Act of 1996, applies to most of such health information. Department of Defense 6025.18–R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974 or mentioned in this system of records notice. Therefore, routine uses outlined below may not apply to such health information.

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records of information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice or other Federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when:

1. DHS or any component thereof;

2. any employee of DHS in his/her official capacity;

3. any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. the United States or any agency thereof, is a party to the litigation or has an interest in such litigation, and DHS determines that the records are both relevant and necessary to the litigation and the use of such records is compatible with the purpose for which DHS collected the records.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency, organization, or individual for the purpose of performing audit or oversight operations as authorized by law, but only such

information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. The Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individuals that rely upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate Federal, State, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To Department of Veterans Affairs for assistance in determining the eligibility of individuals for benefits administered by that agency and available to U.S. Public Health Service or the Department of Defense medical personnel in connection with the performance of their official duties.
