

October 2006 and appears at 40 CFR 155.40. The Pesticide Registration Improvement Act of 2003 ("PRIA") was amended and extended in September 2007. FIFRA as amended by PRIA in 2007 requires EPA to complete registration review decisions by October 1, 2022 for all pesticides registered as of October 1, 2007. The registration review final rule provides for a minimum 60-day public comment period for all proposed registration review decisions.

This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed decision. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Docket for L-Lactic Acid. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments. The Agency will carefully consider all comments received by the closing date and will provide a Response to Comments Memorandum in the Docket and www.regulations.gov. The final registration review decisions will explain the effect that any comments have had on the decisions.

Background on the registration review program is provided at: http://www.epa.gov/oppsrrd1/registration_review/. Quick links to earlier documents related to the registration review of this pesticide are provided at: http://www.epa.gov/oppsrrd1/registration_review/reg_review_status.htm/.
