alternatives. Comments received on the Draft PR/EIS suggested that all reasonable water supply alternatives could not be adequately evaluated without considering fish habitat and fish passage needs. Ecology is proceeding with a separate evaluation of water supply and management alternatives. Ecology continues as a cooperating agency in this study which evaluates storage options per Public Law 108–7.

In addition to the No Action Alternative, this jointly prepared Final PR/EIS analyzes three storage alternatives, referred to as the Joint Alternatives, which Reclamation and Ecology are considering as part of the Storage Study. These include Black Rock, Wymer Dam and Reservoir, and Wymer Dam plus Yakima River Pump Exchange Alternatives. The No Action Alternative is identified as the Preferred Alternative in the Final PR/EIS.

Public Review

Because additional information about mitigation of seepage from Black Rock Reservoir is contained in the Final PR/EIS, a 45 day review period is being provided so that this new information can be reviewed. Changes to the Final PR/EIS are highlighted for ease of review. Responses to comments about the new information will be contained in the Record of Decision which will be issued following the review period. If you wish to comment on this Final PR/EIS, mail us your comments by February 2, 2009 as indicated under the ADDRESSES section.
