Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267-9677, for a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to establish a low altitude RNAV route in the Chicago/Rockford International Airport, IL, terminal area. The route, designated as T-265, would be depicted on the appropriate IFR En Route Low Altitude charts. This T-route is only intended for use by GPS/GNSS-equipped aircraft and is being proposed to enhance safety and to facilitate the more flexible and efficient use of the navigable airspace for en route IFR operations transitioning through the Chicago/Rockford International terminal airspace area west of Chicago, IL.

Low altitude RNAV routes are published in paragraph 6011 of FAA Order 7400.9S signed October 3, 2008, and effective October 31, 2008, which is

incorporated by reference in 14 CFR 71.1. The low altitude RNAV routes listed in this document will be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes a low altitude Area Navigation route (T-Route) at Rockford, IL.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," paragraph 311a, 311b, and 311k. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

ACTION: Notice of Availability of Amendment 16 to the South Atlantic Snapper-Grouper Fishery Management Plan; request for comments.

SUMMARY: The South Atlantic Fishery Management Council (Council) has submitted Amendment 16 to the Fishery Management Plan (FMP) for the Snapper-Grouper Fishery of the South Atlantic Region (Amendment 16) for review, approval, and implementation by NMFS. Amendment 16 was

developed to address overfishing and other management issues in the snapper-grouper fishery. Amendment 16 would establish management reference points and specify interim allocations for the commercial and recreational sectors for gag and vermilion snapper, as well as implement management measures which would be applied to the commercial and recreational sectors of the snapper-grouper fishery. These management measures include: a four-month spawning season closure of the recreational and commercial shallow water grouper fisheries; a five-month closure of the recreational vermilion snapper fishery; commercial quotas for gag and vermilion snapper; a reduced recreational grouper aggregate bag limit (including tilefish) and vermilion snapper bag limit; and a requirement to use dehooking and venting tools to reduce bycatch mortality of snapper-grouper species.
