

is requesting a revision due to elimination of previously approved data element. The item eliminated is request for alternative physical access which was estimated at 700 burden hours. Other reporting requirement estimates were updated since the last submission to the OMB in 2006. Therefore, the Commission is reporting a -700 hour program change and a -103,410 hourly adjustment of the total annual burden resulting in a new estimated burden of 61,490 hours (previously estimated at 165,600 total annual burden hours) since this collection was last submitted to the OMB for review and approval in 2006.

This collection identifies 16 different information collection requirements. The Commission sought to further Congress's goal of promoting innovation and investment by all participating in the telecommunications marketplace, in order to stimulate competition for all services, including advanced telecommunications services. In furtherance of this goal, the Commission imposes certain information collection requirements on incumbent local exchange carriers (LECs) in order to ensure compliance with the incumbent LEC's collocation obligations and to assist incumbent LECs in protecting network integrity. All of the collections will be used by the Commission and by competitive carriers to facilitate the deployment of advanced services and to implement section 251 of the Communications Act of 1934, as amended.

Federal Communications Commission.

The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice.
