

No significant adverse impacts are identified for any resource area. In accordance with Section 7 of the Endangered Species Act, the Navy is seeking concurrence with NMFS and U.S. Fish and Wildlife Service (USFWS) for "may affect, not likely to adversely affect" determinations for federally listed species. The Navy is coordinating with the Washington Department of Ecology for a Coastal Consistency Determination under the Coastal Zone Management Act. Navy analysis has indicated that under the Clean Air Act requirements, no significant impacts would occur to the regional air quality, and under the Clean Water Act there would be no significant impacts to water quality. National Historic Preservation Act analysis indicated that no significant impacts to cultural resources would occur if the proposed action or alternatives were implemented. Implementation of the No Action Alternative or any of the proposed action alternatives would not disturb, adversely affect, or result in any takes of bald eagles. None of the alternatives would result in a significant adverse effect on the population of a migratory bird species.

The decision to be made by the Assistant Secretary of the Navy (Installations & Environment) is to determine which alternatives analyzed in the EIS best meet the needs of the Navy given that all reasonably foreseeable environmental impacts have been considered.

The Draft EIS was distributed to Federal, State, and local agencies, elected officials, and other interested individuals and organizations on December 24, 2008. The public comment period will end on March 1, 2009. Copies of the Draft EIS are available for public review at the following libraries:
