k. *Description of Request*: The City of Bedford is requesting a non-capacity amendment to its license for the Bedford Hydroelectric Project in order to allow a variance from the existing minimum instream flow of 400 cubic feet per second (cfs) in the bypass reach during low flow conditions in the James River. The amendment would allow the following project operations depending on flow conditions in the James River as measured at the U.S. Geological Survey gaging station no. 02025500: (1) At flows of 1000 cfs or greater, a minimum instream flow of 400 cfs would be released in the bypass reach; (2) at flows between 800 and 1000 cfs, 600 cfs would go through the turbines for power generation and the remainder (between 200 and 400 cfs) would be released in the bypass reach; and (3) at flows less than 800 cfs, generation would cease and all flows would be released in the bypass reach. In addition, the amendment would require the City of Bedford to notify the Virginia Department of Game and Inland Fisheries (VDGIF) and the Virginia Department of Environmental Quality (VDEQ) if flows in the James River are less than 1000 cfs for five consecutive days, and consult with the VDEQ regarding the continuation of the variance.
