## FEDERAL RESERVE SYSTEM

### Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or

bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at [www.ffiec.gov/nic/](http://www.ffiec.gov/nic/).

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 16, 2009.

**A. Federal Reserve Bank of Boston** (Richard Walker, Community Affairs Officer) P.O. Box 55882, Boston, Massachusetts 02106-2204:

1. *NewStar Financial, Inc.*, Boston, Massachusetts, to become a bank holding company by acquiring 100 percent of the voting shares of Southern Commerce Bank, National Association, Tampa, Florida.

Board of Governors of the Federal Reserve System, January 15, 2009.

**Jennifer J. Johnson,**

*Secretary of the Board.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[30Day-09-08AW]

#### Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance

Officer at (404) 639-5960 or send an e-mail to [omb@cdc.gov](mailto:omb@cdc.gov). Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

#### Proposed Project

Quarantine Station Illness Response Forms: Airline, Maritime, and Land/Border Crossing—New—National Center for Preparedness, Detection, and Control of Infectious Diseases (NCPDCID), Centers for Disease Control and Prevention (CDC).

CDC proposes to collect patient-level clinical, epidemiologic, and demographic data from ill travelers and their possible contacts in order to fulfill its regulatory responsibility to prevent the importation of communicable diseases from foreign countries (42 CFR Part 71) and interstate control of communicable diseases in humans (42 CFR Part 70).

#### Background and Brief Description

Section 361 of the Public Health Service (PHS) Act (42 U.S.C. 264) authorizes the Secretary of Health and Human Services to make and enforce regulations necessary to prevent the introduction, transmission or spread of communicable diseases from foreign countries into the United States. The regulations that implement this law, 42 CFR Parts 70 and 71, authorize quarantine officers and other personnel to inspect and undertake necessary control measures with respect to conveyances (e.g., airplanes, cruise ships, trucks, etc.), persons, and shipments of animals and etiologic agents in order to protect the public health. The regulations also require conveyances to immediately report an "ill person" or any death on board to the Quarantine Station prior to arrival in the United States. An "ill person" is defined in statute by:

—Fever ( $\geq 100$  °F or 38 °C) persisting  $\geq 48$  hours

—Fever ( $\geq 100$  °F or 38 °C) AND rash, glandular swelling, or jaundice

—Diarrhea ( $\geq 3$  stools in 24 hours or greater than normal amount)

The Severe Acute Respiratory Syndrome (SARS) situation and concern about pandemic influenza and other communicable diseases have prompted CDC Quarantine Stations to recommend that *all* illnesses be reported prior to arrival.

CDC Quarantine Stations are currently located at 20 international U.S. Ports of Entry. When a suspected illness is reported to the Quarantine Station,

officers promptly respond to this report by meeting the incoming conveyance (when possible), collecting information and evaluating the patient(s), and determining whether an ill person can safely be admitted into the U.S. If Quarantine Station staff are unable to meet the conveyance, the crew or medical staff of the conveyance are trained to complete the required documentation and forward it (using a secure system) to the Quarantine Station for review and follow-up.

To perform these tasks in a streamlined manner and ensure that all relevant information is collected in the most efficient and timely manner possible, Quarantine Stations use a number of forms—the Airline Screening and Illness Response Form, the Ship Illness/Death Reporting Form, and the Land/Border Crossing Form—to collect data on passengers with suspected illness and other travelers/crew who may have been exposed to an illness. These forms are also used to respond to a report of a death aboard a conveyance.

The purpose of all of the forms is the same: to collect information that helps

quarantine officials detect and respond to potential public health communicable disease threats. All forms collect the following categories of information: demographics and mode of transportation, clinical and medical history, and any other relevant facts (e.g., travel history, traveling companions, etc.). As part of this documentation, quarantine public health officers look for specific signs and symptoms common to the nine quarantinable diseases (Pandemic influenza; SARS; Cholera; Plague; Diphtheria; Infectious Tuberculosis; Smallpox; Yellow fever; and Viral Hemorrhagic Fevers), as well as most communicable diseases in general. These signs and symptoms include fever, difficulty breathing, shortness of breath, cough, diarrhea, jaundice, or signs of a neurological infection. The forms also collect data specific to the traveler’s conveyance.

These data are used by Quarantine Stations to make decisions about a passenger’s suspected illness as well as its communicability. This in turn

enables Quarantine Station staff to assist conveyances in the public health management of passengers and crew.

The estimated total burden on the public, included in the chart below, can vary a great deal depending on the severity of the illness being reported, the number of contacts, the number of follow-up inquiries required, and who is recording the information (e.g., Quarantine Station staff versus the conveyance medical authority). In all cases, Quarantine Stations have implemented practices and procedures that balance the health and safety of the American public against the public’s desire for minimal interference with their travel and trade. Whenever possible, Quarantine Station staff obtain information from other documentation (e.g., manifest order, other airline documents) to reduce the amount of the public burden.

There is no cost to respondents other than their time to complete the survey. The total estimated annualized burden for this data collection is 172 hours.

ESTIMATE OF ANNUALIZED BURDEN

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Airline Illness or Death Investigation Form .....	1320	1	6/60
International Maritime Illness or Death Report .....	200	1	3/60
International Maritime Illness or Death Investigation Form .....	200	1	7/60
Land Border Illness or Death Investigation Form .....	60	1	6/60

Dated: January 12, 2009.

**Proposed Project**

State Medicaid Tobacco Coverage Survey—Reinstatement—National Center for Chronic Disease Prevention and Control (NCCDPHP), Centers for Disease Control and Prevention (CDC).

**Background and Brief Description**

Tobacco use remains the leading preventable cause of death in the United States despite the availability of evidence-based treatments for tobacco dependence, which include counseling and FDA-approved pharmacotherapies. To increase both the use of treatment by smokers attempting to quit and the number of smokers who quit successfully, the Guide to Community Preventive Services recommends reducing the out-of-pocket cost of

effective tobacco-dependence treatments, and the Public Health Service (PHS) Clinical Practice Guideline supports expanded insurance coverage for tobacco-dependence treatment.

Medicaid recipients have approximately 50% greater smoking prevalence than the overall U.S. adult population, and they are disproportionately affected by tobacco-related disease and disability. Information about the amount and type of coverage for tobacco-dependence treatment offered by Medicaid has been collected during 1998, 2000, 2001, 2002, 2003, 2005, 2006, and 2007. Information collection for the three most recent years (2005–2007) was conducted by the Centers for Disease Control and Prevention (OMB No. 0920-0691, expiration date 8/31/2008). Respondents were Medicaid directors or their designees in all 50 states and the District of Columbia.

CDC requests OMB approval to reinstate information collection for an
