

are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Resource Conservation and Recovery Act of 1976 (RCRA), as amended, requires EPA to establish a national regulatory program to ensure that hazardous wastes are managed in a manner protective of human health and the environment. Under this program (known as the RCRA Subtitle C program), EPA regulates newly generated hazardous wastes, as well as hazardous remediation wastes (i.e., hazardous wastes managed during cleanup). To facilitate prompt and protective treatment, storage, and disposal of hazardous remediation wastes, EPA established three requirements for remediation waste management sites that are different from those for facilities managing newly generated hazardous waste:

- Performance standards for remediation waste management sites (40 CFR 264.1(j));

- A provision excluding remediation waste management sites from requirements for facility-wide corrective action; and

- A new form of RCRA permit for treating, storing, and disposing of hazardous remediation wastes (40 CFR part 270, subpart H). The new permit, a Remedial Action Plan (RAP), streamlines the permitting process for remediation waste management sites to allow cleanups to take place more quickly.

In addition, EPA created a new kind of unit called a "staging pile" (40 CFR 264.554) that allows more flexibility in storing remediation waste during cleanup.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 32 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information;

search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Business or other for-profit.

Estimated Number of Respondents: 215.

Frequency of Response: Once.

Estimated Total Annual Hour Burden: 6,953.

Estimated Total Annual Cost:

\$483,576, which includes \$459,103 annualized labor and \$24,473 annualized capital or operating & maintenance costs.

Changes in the Estimates: There is an increase of 2,009 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due primarily to the State agency burden, which was not calculated in previous renewals.
