Abstract: Section 4 of the Endangered Species Act (ESA) specifies the process by which we can list species as threatened or endangered. When we consider whether or not to list a species, the ESA requires us to take into account the efforts being made by any State or any political subdivision of a State to protect such species. We also take into account the efforts being made by other entities. States or other entities often formalize conservation efforts in conservation agreements, conservation plans, management plans, or similar documents. The conservation efforts recommended or called for in such documents could prevent some species from becoming so imperiled that they meet the definition of a threatened or endangered species under the ESA.

The Policy for Evaluation of Conservation Efforts When Making Listing Decisions (PECE) encourages the development of conservation agreements/plans and provides certainty about the standard that an individual conservation effort must meet for us to consider whether it contributes to forming a basis for making a decision about the listing of a species. PECE

applies to “formalized conservation efforts” that have not been implemented or have been implemented but have not yet demonstrated if they are effective at the time of a listing decision.

Under PECE, formalized conservation efforts are defined as conservation efforts (specific actions, activities, or programs designed to eliminate or reduce threats or otherwise improve the status of a species) identified in a conservation agreement, conservation plan, management plan, or similar document (68 FR 15100). The development of such agreements/plans is voluntary. There is no requirement that the individual conservation efforts included in such documents be designed to meet the standard in PECE.

Comments: On November 24, 2008, we published in the **Federal Register** (73 FR 71041) a notice of our intent to request that OMB renew this ICR. SUPPLEMENTARY INFORMATION:

I. Abstract

The Fish and Wildlife Service (we, Service) has contracted with Frederick Sowers Consulting to conduct an independent evaluation of Great Ape Conservation Fund (GACF) grants. The evaluation will be limited to those grants we financed during Fiscal Years 2006 through 2008 through a \$2.5 million/year resource transfer from the Agency for International Development in support of the Central Africa Regional Program for the Environment.

In the central African region, conservation efforts are focused around approximately 12 large landscapes where conservation organizations take the lead in a multi-stakeholder process of land use and conservation planning. We plan to survey the direct recipients of GACF grants and their associated partners (e.g. international and African conservation and development nongovernmental organizations, stakeholder groups, civic organizations, and other funding agencies). The survey will cover both leading partners and smaller implementing partners within the landscape.

The 74 grantees, who serve in direct contact with the public, are spread across five countries in the central African region. We plan to use an online survey as an efficient and minimally disruptive means of collecting information on grants management mechanics and operations and grantee performance in achieving conservation aims. The online survey will be open for an adequate period of time to allow respondents ample time to complete and update the survey questionnaire. We plan to collect:

(1) Basic demographic data about the institutions, such as the size of the organization, the length and duration of its presence in the landscape, the nature of its activities, and its relationship with other stakeholders.

(2) Information on the quality and nature of the relationships between grant recipients and the Government.

(3) Effectiveness of the program in contributing to conservation objectives.
