SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we finalize the CCP process for the Innoko Refuge. We started this process with a notice of intent in the **Federal Register** (72 FR 8197, Feb. 23, 2007) We announced the availability of the draft CCP and EA, and requested comments in a notice of availability in the **Federal Register** (73 FR 27842, May 14, 2008).

Established by the Alaska National Interest Lands Conservation Act (94 Stat. 2371) in 1980, Innoko Refuge covers some 3,850,000 acres and is one of the most important waterfowl areas in west central interior Alaska. Approximately half of the Refuge consists of wetlands set with innumerable lakes and ponds of varying size. The remainder is marked by hills, most of which are less than one thousand feet in elevation. Almost one-third of the Refuge is designated Wilderness. The route of the historic Iditarod Trail crosses the Refuge.

Refuge purposes include (1) conservation of fish and wildlife populations and habitats in their natural diversity including, but not limited to, waterfowl, peregrine falcons, other migratory birds, black bear, moose, furbearers, and other mammals and

salmon; (2) fulfilling the international treaty obligations of the United States with respect to fish and wildlife and their habitats; (3) providing, in a manner consistent with purposes (1) and (2) above, the opportunity for continued subsistence by local residents; and ensuring, to the maximum extent practicable and in a manner consistent with purpose (1) above, water quality and necessary water quantity within the Refuge.

We announce our decision and the availability of the FONSI for the revised CCP for Innoko Refuge in accordance with National Environmental Policy Act (NEPA) [40 CFR 1506.6(b)] requirements. We completed a thorough analysis of impacts on the human environment in the EA that accompanied the draft revised CCP.

The CCP will guide us in managing and administering the Innoko Refuge for the next 15 years. The revised CCP is Alternative B, the proposed action in the draft CCP, edited slightly in response to public comments.

Background

The Alaska National Interest Lands Conservation Act of 1980 (94 Stat. 2371; ANILCA) and the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee) require us to develop a CCP for each Alaska refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. We will review and update the CCP at least every 15 years in accordance with national policy and ANILCA. ANILCA requires us to designate areas according to their respective resources and values and to specify programs and uses within the areas designated. To meet this requirement, the Alaska Region established management categories for refuges including Wilderness, Minimal, Moderate, Intensive, and Wild River management. For each management category we identified appropriate activities, public uses, commercial uses, and facilities. Only Wilderness and Minimal management categories are applied to Innoko Refuge.

Draft CCP Alternatives

Our draft CCP and EA addressed seven issues and evaluated two alternatives. The seven significant issues raised during scoping were: (1) Competition for moose harvesting; (2) management of air taxis to balance
