

garments introduced per year that require new or revised care instructions. Staff estimates the burden of determining care instructions to be 43 hours each year per respondent, for a cumulative total of 1,145,821 hours. Staff further estimates that the burden of drafting and ordering labels is 2 hours each year per respondent, for a total of 53,294 hours. Staff believes that the

process of attaching labels is fully automated and integrated into other production steps for about 40 percent of the approximately 19.1 billion garments that are required to have care instructions on permanent labels.¹² For the remaining 11.46 billion items (60 percent of 19.1 billion), the process is semi-automated and requires an average of approximately two seconds per item,

for a total of 6,366,667 hours per year. Thus, the total estimated annual burden for all respondents is 7,565,782 hours (1,145,821 hours to determine care instructions + 53,294 hours to draft and order labels + 6,366,667 hours to attach labels).

Estimated annual cost burden: \$61,410,000¹³, rounded to the nearest thousand (solely relating to labor costs).

Task	Hourly Rate	Burden Hours	Labor Cost
Determine care instructions	\$22.00	1,145,821	\$25,208,062
Draft and order labels	\$16.27	53,294	\$867,093
Attach labels	\$5.55 ¹⁴	6,366,667	\$35,335,002
TOTAL			\$61,410,157

¹⁴ See note 6.

Staff believes that there are no current start-up costs or other capital costs associated with the Rule. Because the labeling of textile products has been an integral part of the manufacturing process for decades, manufacturers have in place the capital equipment necessary to comply with the Rule's labeling requirements. Based on knowledge of the industry, staff believes that much of the information required by the Rule would be included on the product label even absent those requirements.
