

mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

## II. What Should I Consider when I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Offer alternative ways to improve the collection activity.
7. Make sure to submit your comments by the deadline identified under **DATES**.
8. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

## III. What Information Collection Activity or ICR Does this Action Apply to?

*Affected entities:* Entities potentially affected by this ICR are companies that manufacture, process, import, or distribute in commerce a chemical substance or mixture and that obtain information that reasonably supports the conclusion that such substance or mixture presents a substantial risk of injury to health or the environment.

*Title:* Notification of Substantial Risk of Injury to Health and the Environment under TSCA Section 8(e).

*ICR numbers:* EPA ICR No. 0794.12, OMB Control No. 2070-0046.

*ICR status:* This ICR is currently scheduled to expire on October 31, 2009. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40

CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

*Abstract:* Section 8(e) of TSCA requires that any person who manufactures, imports, processes, or distributes in commerce a chemical substance or mixture and obtains information that reasonably supports the conclusion that such substance or mixture presents a substantial risk of injury to health or the environment must immediately inform EPA of such information. This information collection refers to that reporting requirement. EPA routinely disseminates TSCA section 8(e) data it receives to other Federal agencies to provide information about newly discovered chemical hazards and risks.

Responses to the collection of information are mandatory (see 15 U.S.C. 2607(e)). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

*Burden statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to range between 5 and 51 hours per response, depending upon the nature of the response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

*Estimated total number of potential respondents:* 390.

*Frequency of response:* On occasion.

*Estimated total average number of responses for each respondent:* 1.3.

*Estimated total annual burden hours:* 30,515 hours.

*Estimated total annual costs:* \$2,057,588. This includes an estimated burden cost of \$2,057,588 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

## IV. Are There Changes in the Estimates from the Last Approval?

There is an increase of 12,380 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's current estimates as to the number of TSCA section 8(e) submissions anticipated in the next three years compared with earlier years. The change is an adjustment.

## V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
