Title: U.S. DOT Crossing Inventory Form.
OMB Control Number: 2130-0017.
Type of Request: Extension of a currently approved collection.
Abstract: Form FRA F 6180.71 is a voluntary form, and is used by States and railroads to periodically update certain site specific highway-rail crossing information which is then transmitted to FRA for input into the National Inventory File. This information has been collected on the U.S. DOT-AAR Crossing Inventory Form (previous designation of this form) since 1974 and maintained in the National Inventory File database since

1975. The primary purpose of the National Inventory File is to provide for the existence of a uniform database which can be merged with accidents data and used to analyze information for planning and implementation of crossing safety programs by public, private, and governmental agencies responsible for highway-rail crossing safety. Following the official establishment of the National Inventory in 1975, the Federal Railroad Administration (FRA) assumed the principal responsibility as custodian for the maintenance and continued development of the U.S. DOT/AAR National Highway-Rail Crossing Inventory Program. The major goal of the Program is to provide Federal, State, and local governments, as well as the railroad industry, information for the

improvement of safety at highway-rail crossings. Good management practices necessitate maintaining the database with current information. The data will continue to be useful only if maintained and updated as inventory changes occur. FRA previously cleared the reporting and recordkeeping burden for this form under Office of Management and Budget (OMB) Clearance Number 2130-0017. OMB approved the burden for this form through August 31, 2009. FRA is requesting a new three year approval from OMB for this information collection.
Form Number(s): Form FRA F 6180.71.
Affected Public: Businesses.
Respondent Universe: 683 Railroads.
Frequency of Submission: On occasion; monthly.

Pipeline and Hazardous Materials Safety Administration

[Docket ID PHMSA-97-2995]

Pipeline Safety: Random Drug Testing Rate

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice of minimum annual percentage rate for random drug testing.

SUMMARY: PHMSA has determined that the minimum random drug testing rate for covered employees will remain at 25 percent during calendar year 2009.

DATES: Effective January 1, 2009 through December 31, 2009.

FOR FURTHER INFORMATION CONTACT: Stanley Kastanas, Director, Office of Substance Abuse Policy, Investigations and Compliance, PHMSA, U.S. Department of Transportation, telephone 202-550-0629 or e-mail stanley.kastanas@dot.gov.

SUPPLEMENTARY INFORMATION: Operators of gas, hazardous liquid, and carbon dioxide pipelines and operators of liquefied natural gas facilities must select and test a percentage of covered employees for random drug testing. Pursuant to 49 CFR 199.105(c)(2), (3), and (4), the PHMSA Administrator's decision on whether to change the minimum annual random drug testing rate is based on the reported random drug test positive rate for the pipeline industry. The data considered by the Administrator comes from operators' annual submissions of Management Information System (MIS) reports required by 49 CFR 199.119(a). If the reported random drug test positive rate is less than one percent, the Administrator may continue the minimum random drug testing rate at 25 percent. In 2007, the random drug test positive rate was less than one percent. Therefore, the minimum random drug testing rate will remain at 25 percent for calendar year 2009.

In reference to the notice published in 70 FR 20800, PHMSA intends to publish an Advisory Bulletin specifying the methodology for reporting MIS contractor data to PHMSA. Therefore, operators must ensure records on contract employees continue to be maintained.

Authority: 49 U.S.C. 5103, 60102, 60104, 60108, 60117, and 60118; 49 CFR 1.53.
