

appropriate methods, interventions, and instruments.

This request includes studies investigating the utility and acceptability of proposed recruitment methods, intervention contents and delivery, questionnaire domains, individual questions, and interactions with project staff or electronic data collection equipment. These activities will also provide information about how respondents answer questions and ways in which question response bias and error can be reduced. Overall, these development activities are intended to provide information that will increase the success of the surveillance or research project through increasing response rates and decreasing response

error thereby decreasing future data collection burden to the public. The studies that will be covered under this request will include one or more of the following investigational modalities: (1) Focus group and individual interviews; (2) cognitive interviews for development and testing of specific data collection instruments; (3) component testing of instruments developed from qualitative research or communication methods; (4) testing of behavioral interventions; (5) public acceptance of intervention and prevention methods; (6) utilizing computer-assisted instruments (including Web-based technology).

Respondents who will participate in individual and group interviews (qualitative, cognitive, and computer-

assisted development activities) are selected purposely from those who respond to recruitment advertisements. In addition to utilizing advertisements for recruitment, respondents who will participate in research on survey methods may be selected purposively or systematically from within an ongoing surveillance or research project.

CDC estimates that in a given year, 46,529 individuals will participate in 10 different information collection activities each year, each lasting between 6–12 months.

Participation of respondents is voluntary and there is no cost to the respondents other than their time.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average hours per response	Total response burden (hrs)
General public and health care providers	Screener	81200	1	10/60	13533
General public and health care providers	Consent Forms	40600	1	5/60	3383
General public and health care providers	Individual interview	6600	1	1	6600
General public and health care providers	Group interview	4000	1	2	8000
General public and health care providers	Individual Survey	30000	1	30/60	15000
Total	46517

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. Alternatively, to obtain a copy of the data collection plans and instrument, call 404-639-5960 and send comments to Maryam I. Daneshvar, CDC Reports Clearance Officer, 1600 Clifton Road, NE., MS-D74, Atlanta, Georgia 30333;

comments may also be sent by e-mail to omb@cdc.gov.

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have a practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Foreign Quarantine Regulations (42 CFR part 71), (OMB Control No. 0920-0134)—Extension—National Center for Preparedness, Detection, and Control of Infectious Diseases (NCPDCID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 301 of the Public Health Service Act (PHSA) (42 U.S.C. 264) authorizes the Secretary of Health and Human Services (HHS) to make and enforce regulations necessary to prevent

the introduction, transmission, or spread of communicable diseases into the United States. Legislation and existing regulations governing the foreign quarantine activities (42 CFR part 71) authorize quarantine officers and other personnel to inspect and undertake necessary control measures with respect to conveyances, persons, and shipments of animals and etiologic agents entering the United States from foreign ports in order to protect the public's health.

Under the foreign quarantine regulations, the master of a ship or captain of an airplane entering the United States from a foreign port is required by public health law to report certain illnesses among passengers (42 CFR 71.21 (b)). In addition to the aforementioned list of illnesses which must be reported to CDC, the master of a ship or captain of an airplane must also report (1) hemorrhagic Fever Syndrome (persistent fever accompanied by abnormal bleeding from any site); or (2) acute respiratory syndrome (severe cough or severe respiratory disease of less than 3 weeks in duration); or (3) acute onset of fever and severe headache, accompanied by stiff neck or change in level of consciousness. CDC has the authority to collect personnel health information to

protect the health of the public under the authority of section 301 of the Public Health Service Act (42 U.S.C.).

This information collection request also includes the Passenger Locator Information Form. The Passenger Locator Information Form is used to collect reliable information that assists quarantine officers in locating, in a timely manner, those passengers and crew who are exposed to communicable diseases of public health significance while traveling on a conveyance. HHS delegates authority to CDC to conduct

quarantine control measures. Currently, with the exception of rodent inspections and the cruise ship sanitation program, inspections are performed only on those vessels and aircraft which report illness prior to arrival or when illness is discovered upon arrival. Other inspection agencies assist quarantine officers in public health screening of persons, pets, and other importations of public health significance and make referrals to the Public Health Service when indicated. These practices and procedures assure protection against the

introduction and spread of communicable diseases into the United States with a minimum of recordkeeping and reporting as well as a minimum of interference with trade and travel.

Respondents include airline pilots, ships' captains, importers, and travelers. The nature of the quarantine response dictates which forms are completed by whom.

There are no costs to respondents except for their time to complete the forms.

ESTIMATE OF ANNUALIZED BURDEN HOURS

Citation	Number of respondents	Number of responses per respondent	Average burden per respondent (in hours)	Total burden
71.21 Radio Report of death/illness	9,500	1	2/60	317
71.33(c) Report by persons in isolation or surveillance	11	1	3/60	1
71.35 Report of death/illness in port	5	1	30/60	3
Locator Form used in an outbreak of public health significance	2,700,000	1	5/60	225,000
Locator Form used for reporting of an ill passenger(s)	800	1	5/60	67
71.51(b)(3) Admission of cats/dogs; death/illness	5	1	3/60	1
71.51(d) Dogs/cats: Certification of Confinement, Vaccination	1,200	1	15/60	300
71.52(d) Turtle Importation Permits	10	1	30/60	5
71.53(d) Importer Registration—Nonhuman Primates	40	1	10/60	7
71.53(e) Recordkeeping	30	4	30/60	60
Total				225,761
