SUPPLEMENTARY INFORMATION:

I. Abstract

The National Medal of Technology is the highest honor awarded by the President of the United States to America's leading innovators. Established by an Act of Congress in 1980, the Medal of Technology was first awarded in 1985. The Medal is given annually to individuals, teams, and/or companies/divisions for their outstanding contributions to the Nation's economic, environmental and social well-being through the development and commercialization of technology products, processes and concepts, technological innovation, and development of the Nation's technological manpower.

The purpose of the National Medal of Technology is to recognize those who have made lasting contributions to America's competitiveness, standard of living, and quality of life through technological innovation, and to recognize those who have made substantial contributions to strengthening the Nation's technological workforce. By highlighting the national importance of technological innovation, the Medal also seeks to inspire future generations of Americans to prepare for and pursue technical careers to keep America at the forefront of global technology and economic leadership.

The National Medal of Technology and Innovation Nomination Evaluation Committee, a distinguished, independent committee appointed by the Secretary of Commerce, reviews and evaluates the merit of all candidates nominated through an open, competitive solicitation process. The committee makes its recommendations for Medal candidates to the Secretary of Commerce, who in turn makes recommendations to the President for final selection. The National Medal of Technology and Innovation Laureates are announced by the White House and the Department of Commerce once the Medalists are notified of their selection.

The public uses the National Medal of Technology and Innovation Nomination Application to recognize through

nomination an individual's or company's extraordinary leadership and innovation in technological achievement. The application must be accompanied by six letters of recommendation or support from individuals who have firsthand knowledge of the cited achievement(s).

II. Method of Collection

The nomination application and instructions can be downloaded from the USPTO Web site. Nomination files should be submitted by electronic mail. Alternatively, letters of recommendation may be sent by electronic mail, fax or overnight delivery.

III. Data

OMB Number: 0651-0060.

Form Number(s): None.

Type of Review: Extension of a currently approved collection.

Affected Public: Primarily business or other for-profit organizations; not-for-profit institutions; individuals or households.

Estimated Number of Respondents: 26 responses per year.

Estimated Time per Response: The USPTO estimates that it will take approximately 40 hours to gather the necessary information, prepare the nomination form, write the recommendations, and submit the request for the nomination to the USPTO. This collection contains one form.

Estimated Total Annual Respondent Burden Hours: 1,040 hours per year.

Estimated Total Annual Respondent Cost Burden: \$36,067. The USPTO is calculating an estimated respondent hourly rate through an estimate of earnings obtained from the Bureau of Labor Statistics, Occupational Outlook Handbook, 2008-09 edition. The USPTO estimates that half of the submissions will be filed by public relations specialists and half by research engineers. The USPTO estimates that it will cost public relations specialists \$23.68 per hour and research engineers \$45.68 per hour, for an average hourly rate of \$34.68. Considering these factors, the USPTO estimates \$36,067 per year for labor costs associated with respondents.

Item	Estimated time for response	Estimated annual responses	Estimated annual burden hours
National Medal of Technology and Innovation Nomination Form	40 hours	26	1,040
Total	26	1,040
