

116—Control of Air Pollution by Permits for New Construction or Modification. The July 22, 1998, revision repeals and replaces the Renewal Application Fees section with a new section. The October 4, 2002, revision increases the determination of fees for NSR permits, corrects addresses, and makes other administrative changes. The September 25, 2003, revision clarifies that an emission reduction credit must be certified and banked to be creditable as an offset in the NSR permitting program, repeals and replaces the section that addresses the use of emission reductions as offsets for NSR permitting and the definition of “offset ratio,” and makes administrative changes. EPA has determined that these SIP revisions comply with the Clean Air Act and EPA regulations, are consistent with EPA policies, and will improve air quality. This action is being taken under section 110 and parts C and D of the Federal Clean Air Act (the Act or CAA).

SUPPLEMENTARY INFORMATION:

A. Background

The GSA is amending the GSAR to update the text addressing GSAR Part 523, Environment, Energy and Water Efficiency, Renewable Energy Technologies, Occupational Safety, and Drug-Free Workplace. This rule is a result of the GSA Acquisition Manual (GSAM) rewrite initiative undertaken by GSA to revise the GSAM to maintain consistency with the FAR and implement streamlined and innovative acquisition procedures that contractors, offerors, and GSA contracting personnel can utilize when entering into and administering contractual relationships. The GSAM incorporates the GSAR as well as internal agency acquisition policy. The GSA will rewrite each part of the GSAR and GSAM, and as each GSAR part is rewritten, will publish it in the **Federal Register**.

This proposed rule changes the title of Part 523 to “Environment, Energy and Water Efficiency, Renewable Energy Technologies, Occupational Safety, and Drug-Free Workplace,” to correspond to the title in FAR Part 23. The title for Subpart 523.3 is changed to “Hazardous Material Identification and Material Safety Data” to be consistent with the corresponding FAR subpart.

In addition, this proposed rule amends the GSAR to delete clause 552.223-70, Hazardous Substances, in its entirety because it does not contain all of the required statutes for shipping hazardous materials. It is replaced with two new hazardous materials clauses.

Clause 552.223-70, Preservation, Packaging, Packing, Marking and Labeling of Hazardous Materials

(HAZMAT) for Export Shipment, is added to require compliance by contractors with the International Maritime Dangerous Goods (IMDG) Code, the Occupational Safety and Health Regulation, and the applicable Modal Regulation, which are mandated in the new GSAR clause as they pertain to export shipping. This clause also contains a requirement for compliance by contractors with the Air Force Inter-Service Manual (AFIM) 24–204 for military aircraft shipments.

Clause 552.223–73, Preservation, Packaging, Packing, Marking and Labeling of Hazardous Materials (HAZMAT) for Domestic Shipment, is added to require compliance by contractors with the U.S. Department of Transportation Hazardous Material Regulation and the Occupational Safety and Health Administration Regulation.

In addition, the provision at 552.212–72, Contract Terms and Conditions Required to Implement Statutes or Executive Orders Applicable to GSA Acquisition of Commercial Items, is updated to include the new hazardous material clauses.

The GSA published an Advance Notice of Proposed Rulemaking (ANPR) in the **Federal Register** at 71 FR 7910 on February 15, 2006, with request for comments on the GSAM rewrite initiative. The GSA did not receive any comments pertaining to GSAR Part 523.

This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The GSA does not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because there are no substantive changes. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. We invite comments from small businesses and other interested parties. The GSA will consider comments from small entities concerning the affected GSAR Part 523 and 552 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (GSAR case 2006–G506), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 104–13) applies because the proposed rule contains information collection requirements. Accordingly, the

Regulatory Secretariat has submitted a request for reinstatement with changes to the information collection requirement concerning Environment, Conservation, Occupational Safety and Drug-free Workplace, to the Office of Management and Budget under 44 U.S.C. 35, *et seq.*

Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average .658 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows:

Respondents: 563.

Responses per respondent: 3.

Total annual responses: 1689.

Preparation hours per response: .658.

Total response burden hours: 1111.

D. Request for Comments Regarding Paperwork Burden

Submit comments, including suggestions for reducing this burden, not later than May 19, 2009 to: GSAR Desk Officer, OMB, Room 10102, NEOB, Washington, DC 20503, and a copy to the General Services Administration, Regulatory Secretariat (VPR), 1800 F Street, NW., Room 4041, Washington, DC 20405.

Public comments are particularly invited on: whether this collection of information is necessary for the proper performance of functions of the GSAR, and will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Requester may obtain a copy of the justification from the General Services Administration, Regulatory Secretariat (VPR), Room 4041, Washington, DC 20405, telephone (202) 208–7312. Please cite OMB Control Number 3090–0205, GSAR Case 2006–G506, Environment, Conservation, Occupational Safety and Drug-Free Workplace, in all correspondence.
