SUPPLEMENTARY INFORMATION:

Title: 30 CFR parts 202, 206, and 207, Indian Oil and Gas Valuation.

OMB Control Number: 1010-0103.

Bureau Form Number: Forms MMS-4109, MMS-4110, MMS-4295, MMS-4410, and MMS-4411.

Abstract: The Secretary of the U.S. Department of the Interior is responsible for mineral resource development on Federal and Indian lands and the Outer Continental Shelf (OCS). The Secretary is required by various laws to manage mineral resource production on Federal and Indian lands and the OCS, collect the royalties and other mineral revenues due, and distribute the funds in accordance with those laws. Applicable laws pertaining to mineral leases on Federal and Indian lands are posted on our Web site at http://www.mrm.mms.gov/Laws_R_D/PublicLawsAMR.htm.

The Secretary also has a trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. The MMS performs the minerals revenue management functions and assists the Secretary in carrying out the Department's trust responsibility for Indian lands.

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from Federal or Indian lands, that company or individual agrees to pay the lessor a share in an amount or value of

production from the leased lands. The lessee is required to report various kinds of information to the lessor relative to the disposition of the leased minerals. Such information is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling of such minerals. We collect this information to ensure that royalties are accurately valued and appropriately paid.

Information collections covered in this ICR are found at 30 CFR part 202, subparts C and J, which pertain to royalties; part 206, subparts B and E, which govern the valuation of oil and gas produced from leases on Indian lands; and part 207, which pertains to recordkeeping. Indian tribes and individual Indian mineral owners receive all royalties generated from their lands. Determining product valuation is essential to ensure that Indian tribes and individual Indian mineral owners receive payment on the full value of the minerals removed from their lands. Failure to collect the data described in this information collection could result in the undervaluation of leased minerals on Indian lands. All data reported is subject to subsequent audit and adjustment.

Indian Oil

Regulations at 30 CFR part 206, subpart B, govern the valuation for royalty purposes of all oil produced from Indian oil and gas leases (tribal and allotted), except leases on the Osage Indian Reservation, and must be consistent with mineral leasing laws, other applicable laws, and lease terms. Generally, the regulations provide that lessees determine the value of oil based upon the higher of (1) the gross proceeds under an arm's-length contract; or (2) major portion analysis.

These oil valuation methods are eligible for applicable transportation allowances. From information collected on Form MMS-4110, Oil Transportation Allowance Report, (1) MMS verifies transportation allowances to determine if the lessee reported and paid the proper royalty amount; and (2) MMS and tribal personnel evaluate whether the transportation allowances reported and claimed by lessees are within regulatory allowance limitations and are calculated in accordance with applicable regulations.

Indian Gas

Regulations at 30 CFR part 206, subpart E, govern the valuation for royalty purposes of natural gas produced from Indian oil and gas leases (tribal and allotted). The regulations

apply to all gas production from Indian oil and gas leases, except leases on the Osage Indian Reservation.

Most Indian leases contain the requirement to perform accounting for comparison (dual accounting) for gas produced from the lease. Lessees must elect to perform actual dual accounting as defined in 30 CFR 206.176 or alternative dual accounting as defined in 30 CFR 206.173. Lessees use Form MMS-4410, Accounting for Comparison [Dual Accounting], to certify that dual accounting is not required on an Indian lease or to make an election for actual or alternative dual accounting for Indian leases.

The regulations require lessees to submit Form MMS-4411, Safety Net Report, when gas production from an Indian oil or gas lease is sold beyond the first index pricing point. The safety net calculation establishes the minimum value, for royalty purposes, of natural gas production from Indian oil and gas leases. This reporting requirement ensures that Indian lessors receive all royalties due and aids MMS compliance efforts.

From information collected on Form MMS-4295, Gas Transportation Allowance Report, (1) MMS verifies transportation allowances to determine if the lessee reported and paid the proper royalty amount; and (2) MMS and tribal personnel evaluate whether the transportation allowances reported and claimed by lessees are within

regulatory allowance limitations and are calculated in accordance with applicable regulations.

From information collected on Form MMS-4109, Gas Processing Allowance Summary Report, (1) MMS verifies processing allowances to determine if the lessee reported and paid the proper royalty amount; and (2) MMS and tribal personnel evaluate whether the processing allowances reported and claimed by lessees are within regulatory allowance limitations and are calculated in accordance with applicable regulations.

Indian Oil and Gas

Form MMS-4393, Request to Exceed Regulatory Allowance Limitation, is used for both Federal and Indian leases. Most of the burden hours are incurred on Federal leases; therefore, the form is approved under ICR 1010-0136, pertaining to Federal oil and gas leases. However, we include a discussion of the form in this ICR, as well as the burden hours for Indian leases. To request permission to exceed a regulatory allowance limit, lessees must (1) submit a letter to MMS explaining why a higher allowance limit is necessary; and (2) provide supporting documentation, including a completed Form MMS-4393. This form provides MMS with the data necessary to make a decision whether to approve or deny the request and track deductions on royalty reports.

Summary

The MMS is requesting OMB's approval to continue to collect this information. Not collecting this information would limit the Secretary's ability to discharge his/her duties and may also result in loss of royalty payments to Indian tribes and individual Indian mineral owners. Proprietary information submitted to MMS under this collection is protected, and no items of a sensitive nature are collected. The requirement to respond is mandatory for Form MMS-4410, Accounting for Comparison [Dual Accounting], and for Form MMS-4411, Safety Net Report, under certain circumstances. For all other forms in this collection, the requirement to respond is required to obtain a benefit.

Frequency of Response: Annually and on occasion.

Estimated Number and Description of Respondents: 302 potential Indian lessees.

Estimated Annual Reporting and Recordkeeping "Hour" Burden: 1,074 hours.
