the reports is to provide greater accountability in the preparation of the nation's teaching forces and to provide information and incentives for its improvement. IHEs that have teacher preparation programs must report annually to their States on the performance of their program completers on teacher certification or licensure tests. States, in turn, must report test performance information, institution by institution, to the Secretary of Education. They must also report on their requirements for teacher certification and licensure, State standards, alternative routes to certification, low performing teacher preparation programs and related items.

#### SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

#### I. Background

The Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) and the DOE Organization Act (42 U.S.C. 7101 *et seq.*) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*), provides the general public and other Federal agencies with opportunities to comment on collections of information conducted by or in conjunction with the EIA. Also, the EIA will later seek approval for this collection by the Office of Management and Budget (OMB) under Section 3507(a) of the Paperwork Reduction Act of 1995.

Under Public Law 95-91, section 205(h), the Administrator of the EIA is required to "identify and designate" the major energy companies who must annually file Form EIA-28 to ensure that the data collected provide "a statistically accurate profile of each line of commerce in the energy industry in the United States." Data collected on Form EIA-28 are published and used in analyses of the energy industry.

U.S. major energy companies report financial and operating information to

the FRS survey each year on a consolidated corporate level, by individual lines of business, by major functions within each line of business, and by various geographic regions. From this information, EIA produces the annual publication Performance Profiles of Major Energy Producers. The data are also used for analyses and inquiries concerning earnings, profitability, investments, production and refining costs, reserve growth, and other issues related to the financial performance of major energy producers.

Please refer to the proposed forms and instructions for more information about the purpose, who must report, when to report, where to submit, the elements to be reported, detailed instructions, provisions for confidentiality, and uses (including possible nonstatistical uses) of the information. For instructions on obtaining materials, see the **FOR FURTHER INFORMATION CONTACT** section.

#### II. Current Actions

EIA is proposing a three-year extension with changes to the previously approved Form EIA-28 for the FRS survey to be conducted in 2010 collecting information for 2009.

EIA is proposing the following changes to the form:

- Expand the balance sheet information requested for property, plant, and equipment (PP&E), and investments and advances to unconsolidated affiliates beyond additions to include other changes, such as reclassifications and impairments;
- Reduce the scope of domestic information collected on the downstream natural gas and electric power operations of the major energy companies;
- Recategorize some downstream natural gas business operations to more closely align the survey with industry practices; and
- Add coverage of foreign operations for petroleum purchases and sales of raw materials and refined products, and for downstream natural gas operating expenses.

Schedule 5120 "Selected Consolidating Balance Sheet and Financial Data" will be expanded to include collection of other changes to PP&E and investments and advances to unconsolidated affiliates, by line of business.

Many of the questions for the downstream natural gas and electric power lines of business require detailed information from the operational units of the FRS respondent companies, and are more difficult to obtain. Data for several items are only provided by one or two companies. Consequently, the
