Title: NESHAP for Refractory Products Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 2040.04, OMB Control Number 2060-0515.

ICR Status: This ICR is scheduled to expire on June 30, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Refractory Products Manufacturing were proposed on June 20, 2002 (67 FR 42107) and were promulgated on April 16, 2003 (68 FR 18729).

The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the provisions specified at 40 CFR part 63, subpart SSSSS.

Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 15 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Refractory product manufacturers.
Estimated Number of Respondents: 8.
Frequency of Response: Initially, occasionally and semiannually.
Estimated Total Annual Hour Burden: 338.

Estimated Total Annual Cost: \$30,344, which is comprised of: \$27,304 in labor costs, \$3,040 in O&M costs, and no annualized capital/startup costs.

Changes in the Estimates: There is no change in the estimation methodology for labor hours or cost to the respondents in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for respondents is very low, negative, or non-existent.

The previous approved ICR renewal indicated 470 annual labor hours; after review of the burden tables, it was determined that the number of indicated hours was based on a calculation error. The decrease in burden is due to a correction in the labor hours from 470 to 338 per year.

Dated: April 6, 2009.
John Moses,
Acting Director, Collection Strategies Division.
