¹ The number of respondents for the Mother Supplement (635) is less than the number of responses (800) because mothers are asked to provide separate responses for each of the biological children with whom they reside. The total number of responses for the Mother Supplement (800) is more than the number for the Child Supplement (720) because the number of children completing the Child Supplement is lower due to age restrictions and nonresponse.

² The total number of 14,560 respondents across all the survey instruments is a mutually exclusive count that does not include: (1) The 400 re-interview respondents, who were previously counted among the 7,600 main survey respondents, (2) the 635 Mother Supplement respondents, who were previously counted among the main survey respondents, and (3) the 540 Child SAQ respondents, who were previously counted among the 720 Child Supplement respondents.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating/maintenance): \$0.
