#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The Service Annual Survey (SAS) produces annual nationwide estimates of revenue and expenses for selected service industries. Selected service industries include all or portions of the following North American Industry Classification System (NAICS) sectors: Transportation and Warehousing (NAICS 48 and 49); Information, Finance and Insurance (NAICS 51 and 52); Real Estate and Rental and Leasing (NAICS 53); Professional, Scientific and Technical Services (NAICS 54); Administrative and Support and Waste Management and Remediation Services (NAICS 56); Health Care and Social Assistance (NAICS 62); Arts, Entertainment, and Recreation (NAICS 71); and Other Services (NAICS 81).

For selected industries in Finance, Information, Professional, Scientific and Technical Services, and Administrative Support and Waste Management and

Remediation Services, SAS produces estimates of revenue by detailed North American Product Classification System (NAPCS) products. Inventory estimates for selected industries in the Information sector are produced, as well as estimates of expanded revenues for selected industries across multiple sectors. For industries with a significant non-profit component, separate estimates are developed for taxable firms and organizations exempt from Federal income tax.

These data are needed to provide a sound statistical basis for the formation of policy by various governmental agencies. The Census Bureau is authorized by Title 13, United States Code, to conduct surveys necessary to furnish current data on subjects covered by the major censuses. These surveys provide continuing and timely national statistical data for the period between economic censuses.

The Bureau of Economic Analysis, the primary Federal user of these annual program statistics, uses the information in developing the national income and product accounts, compiling benchmark and annual input-output tables, and computing Gross Domestic Product by industry. The Bureau of Labor Statistics uses the data as inputs to its Producer Price Indexes and in developing productivity measurements. The Centers for Medicare and Medicaid Services use the data in the development of the National Health Expenditure Accounts. The Federal Communications Commission uses the data as a means for assessing FCC policy. The Census Bureau uses the data to provide new insight into changing structural and cost conditions that will impact the planning and design of future economic census questionnaires. Private industry also uses the data as a tool for marketing analysis.

Data are collected from all of the largest firms and from a sample of small- and medium-sized businesses selected using a stratified sampling procedure. The samples are reselected periodically, generally at 5-year intervals. The largest firms continue to be canvassed when the sample is redrawn, while nearly all of the small- and medium-sized firms from the prior sample are replaced. We collect these data by using a mail-out/mail-back and online survey questionnaire.

The Census Bureau is expanding the industry coverage of the SAS to include Utilities (NAICS 22) and Educational Services (NAICS 61); and the rest of Transportation (NAICS 48); Finance and Insurance (NAICS 52); and Real Estate and Rental and Leasing (NAICS 53) not currently covered by SAS. For expanded

industries, the survey will produce estimates of total operating revenue and both total and detailed operating expenses. This expansion will increase the size of the survey sample by about 30 percent.

## II. Method of Collection

The Census Bureau collects this information by mail, Internet, fax, and telephone follow-up.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The U.S. Census Bureau conducts a quarterly survey of service industry production—the Quarterly Services Survey (QSS). The QSS is a principal economic indicator series that produces, for selected service industries, quarterly estimates of total operating revenue and the percentage of revenue by class of customer. The survey also produces estimates of total operating expenses from tax-exempt firms in industries that have a large not-for-profit component. In addition, for hospital services, the survey estimates the number of inpatient days and discharge admissions. Current selected service industries include information services; professional scientific and technical services; hospitals; nursing and residential care facilities; administrative and support and waste management and remediation services; ambulatory health care services; social assistance; credit intermediation and related activities; securities, commodity contracts, and other financial investments and related
