**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The Crystal River National Wildlife Refuge is developing a Comprehensive Conservation Plan (CCP), a 15-year planning document, to chart the course of future management options on the refuge. The refuge was established in 1983 for the purpose of protecting the Florida manatee, an endangered species.

Citrus County, where the refuge is located, is heavily dependent on manatee ecotourism as a source of tourist revenue. Local tour operators conduct manatee-human interactions in the form of "swim with" the manatee programs, which have become enormously popular over the years. Citrus County widely advertises and encourages visitors to come from around the world to have this unique experience. We manage ecotourism activities cooperatively with local tour operators through special use permits that impose conditions on activities conducted within the refuge. One condition is that operators must provide educational materials to their customers related to manatee-human interactions.

We have signed a challenge cost-share agreement with the Department of Community Services, Citrus County, to conduct a survey to obtain information to:

- (1) Evaluate present and future use levels by the public, and
- (2) Determine the quality and viability of manatee ecotourism experiences.

The county will contract with a private consulting firm to develop and conduct the survey, analyze the data, and provide the results to the Service and the county. The proposed survey will gather information from visitors regarding their experience while visiting Citrus County and the purpose for their visit, including specific questions related to manatee viewing. The report will not include any personal information about the participants and will only include information regarding the present and future public use levels on the refuge, as well as a determination of the quality and viability of manatee ecotourism experiences. The information collected will provide data to:

- (1) Support future refuge decisions to ensure protection of manatees while providing quality experiences for visitors.
- (2) Aid local business interests in providing quality ecotourism experiences.
