Proposed Project

"Evaluation of AHRQ's Effective Health Care Program"

AHRQ proposes to perform an evaluation of the Effective Health Care (EHC) program's governance structure, methods for engaging stakeholders and

approaches to setting national research priorities. Pursuant to Section 1013 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, Pub. L. 108-173, the EHC program was established by AHRQ to conduct research, demonstrations, and evaluations designed to improve the quality, effectiveness, and efficiency of Medicare, Medicaid, and the State Children's Health Insurance Program. The EHC program was designed to provide effectiveness and comparative effectiveness evidence of medical treatments, therapeutics, devices and drugs to assist policymakers, health care providers, clinicians, consumers, and other stakeholders in making informed decisions. The EHC program has offered a platform for combining explicit reviews of scientific evidence on the clinical effectiveness of pharmaceuticals and other health care interventions, as well as the translation and dissemination of scientific findings into meaningful messages for a wide variety of audiences. It serves as an interface between the clinical research entities and health policy making entities. This
