The boundaries were chosen based on easy line-of-sight locations and generally represent all navigational waters. The area includes the municipal waters of Mount Desert, Southwest Harbor, and portions of Cranberry Isles, and Tremont.

There are marinas, yacht clubs and public landings/piers in the proposed area with a combination of mooring fields and dock space for the recreational and commercial vessels. Maine has certified that there are six pumpout facilities within the proposed area available to the boating public and the facilities are connected to the

municipal sewage system. A list of the facilities, locations, contact information, hours of operation, and water depth is provided at the end of this petition.

Maine has provided documentation indicating that the total vessel population is estimated to be 992 in the proposed area. It is estimated that 374 of the total vessel population may have a Marine Sanitation Device (MSD) of some type.

The proposed area is identified as a High Value Wildlife Habitat by the U.S. Fish and Wildlife Service. The area constitutes almost 25 square miles of marine habitat, 4,000 acres of wetlands,

and essential habitat for bald eagles. The area is adjacent to and bordered by Acadia National Park, the most popular tourist location in the state. There are two large marinas and two service docks in Southwest Harbor, and a large boating complex managed by the Town of Mount Desert and a small marina in Northeast Harbor, together serving roughly 992 boats. This area is a popular destination for boaters due to its natural environmental diversity and would benefit from a No Discharge Area.
