

Background and Brief Description

Reducing congenital syphilis is a national objective in the DHHS Report entitled "Healthy People 2010 (Vol. I and II)". Objective 25-9 of the DHHS document states the goal to "reduce congenital syphilis to 1 new case per 100,000 live births". In order to meet this national objective, an effective surveillance system for congenital

syphilis must be continued to monitor current levels of disease and progress towards the year 2010 objective. The purpose of the revision is to accommodate minor change to the "Congenital Syphilis (CS) Case Investigation and Report Form" (CDC73.126). In the proposed revision, the "reporting city" and "resident city" information blocks in the "Congenital Syphilis (CS) Case Investigation and

Report" data collection form will be removed because several states have begun to use a 5-digit (rather than 4-digit) FIPS code for city, and CDC data systems cannot accommodate the new codes.

The congenital syphilis data will continue to be used to develop intervention strategies and to evaluate ongoing control efforts. There is no cost to respondents other than their time.

ESTIMATE OF ANNUALIZED BURDEN TABLE

Type of respondents	Name of form	No. of respondents	No. of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
State and local health departments ..	Congenital Syphilis (CS) Case Investigation and Report.	18	11	20/60	66
Total	18	66

Dated: April 23, 2009.

Maryam I. Daneshvar,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

Centers for Disease Control and Prevention

Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP): Strengthening National Capacity in Malaria and Other Infectious Disease Operations Research, Funding Opportunity Announcement (FOA) CK09-003

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the aforementioned meeting.

Time And Date: 12 p.m.-3 p.m., June 11, 2009 (Closed).

Place: Teleconference.

Status: The meeting will be closed to the public in accordance with provisions set forth in Section 552b(c) (4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office, CDC, pursuant to Public Law 92-463.

Matters To Be Discussed: The meeting will include the review, discussion, and evaluation of "Strengthening National Capacity in Malaria and Other Infectious Disease Operations Research, Funding Opportunity Announcement (FOA) CK09-003."

Contact Person For More Information: Wendy Carr, PhD, CDC, 1600 Clifton Road, NE., Mailstop D60, Atlanta, GA 30333, Telephone: (404) 498-2276.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both CDC and the Agency for Toxic Substances and Disease Registry.

Dated: April 17, 2009.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

National Institutes of Health

National Institute of Neurological Disorders and Stroke; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Neurological Disorders and Stroke Special Emphasis Panel.

Date: May 5, 2009.

Time: 8 a.m. to 12 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852, (Telephone Conference Call)

Contact Person: William C. Benzinger, PhD, Scientific Review Administrator, Scientific Review Branch, Division Of Extramural Research, NINDS/NIH/DHHS/Neuroscience Center, 6001 Executive Boulevard, Suite 3204, MSC 9529, Bethesda, MD 20892, (301) 496-0660, benzingw@mail.nih.gov.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Exclusive License: Dengue Tetravalent Vaccine Containing a Common 30 Nucleotide Deletion in the 3'-UTR of Dengue Types 1,2,3, and 4

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i), that the National Institutes of Health (NIH), Department of Health and Human Services (HHS), is contemplating the grant of an exclusive license to practice the following invention as embodied in the following patent applications: (1) E-120-2001/0, Whitehead et al., "Development of Mutations Useful for Attenuating Dengue Viruses and Chimeric Dengue Viruses", Brazilian Patent Application PI0209943.8, filed May 22, 2002, (2) E-089-2002/0, Whitehead et al., "Dengue Tetravalent Vaccine Containing a Common 30 Nucleotide Deletion in the 3'-UTR of Dengue Types 1,2,3, and 4, or Antigenic Chimeric Dengue Viruses 1,2,3, and 4", Brazilian Patent Application PI0309631-9, filed April 25, 2003, and (3) E-139-2006/0, Whitehead et al., "Development of Dengue Vaccine Components", Brazilian Patent Application TBA, filed August 15, 2007 to Fundacao Butantan, having a place of business in Sao Paulo, Brazil. The patent rights in this invention have been assigned to the United States of America.

DATE: Only written comments and/or application for a license which are received by the NIH Office of Technology Transfer on or before May 14, 2009 will be considered.

ADDRESSES: Requests for a copy of the patent application, inquiries, comments and other materials relating to the contemplated license should be directed to: Peter Soukas, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; E-mail: ps193c@nih.gov; Telephone: (301) 435-4646; Facsimile: (301) 402-0220.

SUPPLEMENTARY INFORMATION: The global prevalence of dengue has grown dramatically in recent decades. The disease is now endemic in more than 100 countries in Africa, North and South America, the Eastern Mediterranean, Southeast Asia and the Western Pacific. Southeast Asia and the

Western Pacific are most seriously affected. Before 1970 only nine countries had experienced Dengue Hemorrhagic Fever (DHF) epidemics, a number that had increased more than four-fold by 1995. WHO currently estimates there may be 50 million cases of dengue infection worldwide every year.

The methods and compositions of this invention provide a means for prevention of dengue infection and dengue hemorrhagic fever (DHF) by immunization with attenuated, immunogenic viral vaccines against dengue. The vaccine is further described in Blaney JE et al., "Mutations which enhance the replication of dengue virus type 4 and an antigenic chimeric dengue virus type 2/4 vaccine candidate in Vero cells." *Vaccine*. 2003 Oct 1;21(27-30):4317-27 and Whitehead SS et al., "A live, attenuated dengue virus type 1 vaccine candidate with a 30-nucleotide deletion in the 3' untranslated region is highly attenuated and immunogenic in monkeys." *J. Virol*. 2003 Jan;77(2):1653-7.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The field of use may be limited to live attenuated vaccines against dengue infections in humans. The Licensed Territory may be limited to Brazil.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: April 23, 2009.

Richard U. Rodriguez,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.
