

Background and Brief Description

Reducing congenital syphilis is a national objective in the DHHS Report entitled "Healthy People 2010 (Vol. I and II)". Objective 25-9 of the DHHS document states the goal to "reduce congenital syphilis to 1 new case per 100,000 live births". In order to meet this national objective, an effective surveillance system for congenital

syphilis must be continued to monitor current levels of disease and progress towards the year 2010 objective. The purpose of the revision is to accommodate minor change to the "Congenital Syphilis (CS) Case Investigation and Report Form" (CDC73.126). In the proposed revision, the "reporting city" and "resident city" information blocks in the "Congenital Syphilis (CS) Case Investigation and

Report" data collection form will be removed because several states have begun to use a 5-digit (rather than 4-digit) FIPS code for city, and CDC data systems cannot accommodate the new codes.

The congenital syphilis data will continue to be used to develop intervention strategies and to evaluate ongoing control efforts. There is no cost to respondents other than their time.

ESTIMATE OF ANNUALIZED BURDEN TABLE

Type of respondents	Name of form	No. of respondents	No. of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
State and local health departments ..	Congenital Syphilis (CS) Case Investigation and Report.	18	11	20/60	66
Total	18	66

Dated: April 23, 2009.

Maryam I. Daneshvar,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.
