DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5300-N-08]

Notice of Availability: Notice of Funding Availability (NOFA) for Fiscal Year (FY) 2009; Brownfields Economic Development Initiative (BEDI)

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: HUD announces the availability on its Web site of the application information, submission deadlines, funding criteria, and other requirements for the FY2009 Brownfields Economic Development Initiative (BEDI) NOFA. The BEDI NOFA makes approximately \$20 million in assistance available, combining assistance appropriated by the Department of Housing and Urban Development Appropriations Act, 2009 (Pub. L. 111-8, approved March 11, 2009) and the Department of Housing and Urban Development Appropriations Act, 2008 (Pub. L. 110-116, approved December 26, 2007). All BEDI grants must be used in conjunction with a new Section 108-guaranteed loan commitment. Applicants for BEDI assistance must address the requirements established by HUD's Fiscal Year 2009 Notice of Funding Availability (NOFA) Policy Requirements and General Section to the NOFA published on December 29, 2008 (73 FR 79548), as amended on April 16, 2009 (74 FR 17685). Applicants should take particular note that they should follow the application submission instructions contained in this NOFA and not use those in the General Section. The notice providing information regarding the application process, funding criteria and eligibility requirements is available on the HUD Web site at <http://www.HUD.gov/BEDI>.

Ernest F. Hollings ACE Basin National Wildlife Refuge, Charleston, Beaufort, Colleton, and Hampton Counties, SC

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability: draft comprehensive conservation plan and environmental assessment; request for comments.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of a draft comprehensive conservation plan and environmental assessment (Draft CCP/EA) for Ernest F. Hollings ACE Basin National Wildlife Refuge (ACE Basin NWR) for public review and comment. In this Draft CCP/EA, we describe the alternative we propose to use to manage this refuge for the 15 years following approval of the Final CCP.

DATES: To ensure consideration, we must receive your written comments by June 3, 2009.

ADDRESSES: Send comments, questions, and requests for information to: Mr. Van Fischer, Natural Resource Planner, South Carolina Lowcountry Refuge Complex, 5801 Highway 17 North, Awendaw, SC 29429. A copy of the

Draft CCP/EA is available on both compact disc and hard copy, and it may be accessed and downloaded from the Service's Internet site: <http://southeast.fws.gov/planning>.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we continue the CCP process for ACE Basin NWR. We started the process through a notice in the **Federal Register** on January 3, 2007 (72 FR 141).

Background

The CCP Process

The National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee) (Improvement Act), which amended the National Wildlife Refuge System Administration Act of 1966, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Improvement Act.

ACE Basin NWR was established on September 20, 1990, and was renamed the Ernest F. Hollings ACE Basin National Wildlife Refuge on May 16, 2005. The refuge is a partner in the ACE Basin Task Force, a coalition consisting of the Service, South Carolina Department of Natural Resources, Ducks Unlimited, The Nature Conservancy, The Low Country Open Land Trust, Mead Westvaco, and private landowners. The refuge's two separate units (Edisto Unit and Combahee Unit) are further broken down into sub-units, with the Edisto Unit containing the Barrelville, Grove, and Jehossee sub-units, and the Combahee Unit containing the Bonny Hall, Combahee Fields, and Yemassee sub-units. The refuge is divided into nine management units or compartments, ranging in size

from 350 to 3,355 acres. Compartment boundaries are established along geographic features that can be easily identified on the ground (*i.e.*, rivers, roads, and trails).

Serving as a basis for each alternative, goals and sets of objectives were developed to help fulfill the purposes of the refuge and the mission of the National Wildlife Refuge System. These alternatives represent different approaches to managing the refuge, while still meeting purposes and goals. Plans will be revised at least every 15 years, or earlier, if monitoring indicates management changes are warranted.

CCP Alternatives, Including Our Proposed Alternative

We developed three alternatives for managing the refuge and chose Alternative C as the proposed alternative. A full description is in the Draft CCP/EA. We summarize each alternative below.

Alternative A: Continuation of Current Refuge Management (No Action)

This alternative represents no change from current management of the refuge and provides a baseline. Management emphasis would continue to focus on maintaining existing managed wetlands for wintering waterfowl, shorebirds, and wading birds. Primary activities include managing wetland impoundments (primarily historically created "rice fields"), managing old farm fields in a grassland/scrub/shrub mosaic for neotropical migratory birds, basic species monitoring, wood duck banding, and managing moist soil for waterfowl. Alternative A represents the anticipated conditions of the refuge for the next 15 years, assuming current funding, staffing, policies, programs, and activities continue. The other two alternatives are compared to this alternative in order to evaluate differences in future conditions compared to baseline management.

This alternative reflects actions that include managing habitat for resident and wintering waterfowl, nesting bald eagles, foraging wood storks, and overwintering whooping cranes (experimental flock). Further, it reflects actions for maintaining upland and wetland forests; for repairing wetland impoundment control structures (aluminum flash board risers and wooden "rice trunks"), dikes, and internal drainage ditches and canals; for managing habitat for neotropical migratory birds; and for providing wildlife-dependent recreation opportunities. Species monitoring would be limited due to staffing constraints, volunteer assistance, and
