

individuals observed, frequency of observation, and any behavioral changes and the context of the changes relative to construction activities shall also be included in the annual report. Additional information that will be recorded during construction and contained in the reports include: date and time of marine mammal detections (visually or acoustically), weather conditions, species identification, approximate distance from the source, activity of the vessel or at the construction site when a marine mammal is sighted, and whether thrusters were in use and, if so, how many at the time of the sighting.

Endangered Species Act (ESA)

On January 12, 2007, NMFS concluded consultation with MARAD and USCG under section 7 of the ESA on the proposed construction and operation of the Neptune LNG facility and issued a Biological Opinion. The finding of that consultation was that the construction and operation of the Neptune LNG terminal may adversely affect, but is not likely to jeopardize, the continued existence of northern right, humpback, and fin whales, and is not likely to adversely affect sperm, sei, or blue whales and Kemp's ridley, loggerhead, green, or leatherback sea turtles. Issuance of this IHA will not have any impacts beyond those analyzed in that consultation.

National Environmental Policy Act

MARAD and the USCG released a Final EIS/Environmental Impact Report (EIR) for the proposed Neptune LNG Deepwater Port. A notice of availability was published by MARAD on November 2, 2006 (71 FR 64606). The Final EIS/EIR provides detailed information on the proposed project facilities, construction methods, and analysis of potential impacts on marine mammals. The Final EIS/EIR is incorporated as part of the MMPA record of decision (ROD) for this action.

NMFS was a cooperating agency in the preparation of the Draft and Final EISs based on a Memorandum of Understanding related to the Licensing of Deepwater Ports entered into by the U.S. Department of Commerce along with 10 other government agencies. On June 3, 2008, NMFS adopted the USCG and MARAD FEIS and issued a separate ROD for issuance of authorizations pursuant to sections 101(a)(5)(A) and (D) of the MMPA for the construction and operation of the Neptune LNG Port facility.

Preliminary Determinations

NMFS has preliminarily determined that the impact of construction and operation of the Neptune Port Project may result, at worst, in a temporary modification in behavior of small numbers of certain species of marine mammals that may be in close proximity to the Neptune LNG facility and associated pipeline during its construction and operation. These activities are expected to result in some local short-term displacement, resulting in no more than a negligible impact on the affected species or stocks of marine mammals. The provision requiring that the activity not have an unmitigable adverse impact on the availability of the affected species or stock for subsistence use does not apply for this proposed action as there is no such uses of these species or stocks in the proposed project area.

This preliminary determination is supported by measures described earlier in this document under "Proposed Mitigation and Monitoring Measures," "Reporting Requirements," and MARAD's ROD (and NMFS' Biological Opinion on this action). As a result of the described mitigation measures, no take by injury or death is requested, anticipated, or proposed to be authorized, and the potential for temporary or permanent hearing impairment is very unlikely due to the relatively low sound source levels (and consequently small zone of impact for hearing-related effects). The likelihood of such effects would be avoided through the incorporation of the proposed shut-down mitigation measures mentioned in this document. While the number of marine mammals that may be harassed will depend on the distribution and abundance of marine mammals in the vicinity of the Port facility during construction and operation, the estimated number of marine mammals to be harassed is small.

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to issue an IHA to Neptune for the taking (by Level B harassment only) incidental to construction and operation of the Neptune Port provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Foreign-Trade Zones Board

[Order No. 1614]

Termination of Foreign-Trade Subzone 22G; Sanofi-Aventis, Des Plaines, IL

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, on July 20, 1994, the Foreign-Trade Zones Board issued a grant of authority to the Illinois International Port District authorizing the establishment of Foreign-Trade Subzone 22G at the Sanofi-Aventis facility, Des Plaines, Illinois (Board Order 700, 59 FR 38431, 07/27/94);

Whereas, the Illinois International Port District has advised the Board that zone procedures are no longer needed at the facility and requested voluntary termination of Subzone 22G (FTZ Docket 39-2008);

Whereas, the request has been reviewed by the FTZ Staff and U.S. Customs and Border Protection officials, and approval has been recommended;

Now, therefore, the Foreign-Trade Zones Board terminates the subzone status of Subzone 22G, effective this date.

Signed at Washington, DC, this 24th day of April, 2009.

Ronald K. Lorentzen,

Acting Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Attest:

Andrew McGilvray,

Executive Secretary.
