Proposed Rule Stage

414. • REVISION OF FEE SCHEDULES; FEE RECOVERY FOR FY 2009 [NRC-2008-0620]

Legal Authority: 42 USC 2201; 42 USC 5841

Abstract: The proposed rule would amend the Commission's licensing, inspection, and annual fees charged to its applicants and licensees. The amendments implement the Omnibus Budget Reconciliation Act of 1990 (OBRA-90), as amended, which requires that the NRC recover approximately 90 percent of its budget authority in Fiscal Year (FY) 2009, less the amounts appropriated from the Nuclear Waste

Fund, and for Waste Incidental to Reprocessing, generic homeland security activities, and scholarships and fellowships.

Based on the bill reported by the House Appropriations Committee on June 25, 2008, the NRC's required fee recovery amount for the FY 2009 budget is approximately \$ 870.6 million. After accounting for carryover and billing adjustments, the total amount to be recovered through fees is approximately \$ 864.8 million.

415. DISTRIBUTION OF SOURCE MATERIAL TO EXEMPT PERSONS AND GENERAL LICENSEES AND REVISION OF 10 CFR 40.22 GENERAL LICENSE [NRC-2009-0084]

Legal Authority: 42 USC 2201; 42 USC 5841

Abstract: The proposed rule would amend the Commission's regulations to improve the control over the distribution of source material to exempt persons and to general licensees in order to make part 40 more risk-informed. The proposed rule also would govern the licensing of source material by adding specific requirements for licensing of and reporting by distributors of products and materials used by exempt persons and general licensees. Source material is used under general license and under various exemptions from licensing requirements in part 40 for which there is no regulatory mechanism for the Commission to obtain information to fully assess the resultant risks to public health and safety. Although estimates of resultant doses have been made, there is a need for ongoing information on the quantities and types of radioactive material distributed for exempt use and use under general license. Obtaining information on the distribution of source material is particularly difficult because many of the distributors of source material to exempt persons and generally licensed persons are not currently required to hold a license from the Commission. Distributors are often unknown to the

Commission. No controls are in place to ensure that products and materials distributed are maintained within the applicable constraints of the exemptions. In addition, the amounts of source material allowed under the general license in section 40.22 could result in exposures above 1 mSv/year (100 mrem/year) to workers at facilities that are not required to meet the requirements of parts 19 and 20. Without knowledge of the identity and location of the general licensees, it would be difficult to enforce restrictions on the general licensees. This rule also would address PRM-40-27 submitted by the State of Colorado and Organization of Agreement States.

416. CONTROLLING THE DISPOSITION OF SOLID MATERIALS [NRC-1999-0002]

Legal Authority: 42 USC 2201; 42 USC 5841

Abstract: The staff provided a draft proposed rule package on Controlling the Disposition of Solid Materials to the Commission on March 31, 2005, which the Commission disapproved. The Commission's decision was based on the fact that the Agency is currently faced with several high priority and complex tasks, that the current approach to review specific cases on an individual basis is fully protective of public health and safety, and that the immediate need for this rule has changed due to the shift in timing for reactor decommissioning. The Commission has deferred action on this rulemaking.
