

I. Abstract

The primary objective of the NCRDS is to advance the understanding of the energy endowment of the United States (U.S.) through the gathering and organization of digital geologic information related to coal, coalbed gas, shale gas and other energy resources. Standardized information on the location, quality, quantity, and availability of U.S. energy resources is necessary for policy makers to optimize energy development within an economic context; to implement wise land use planning, as well as to minimize environmental impacts from energy utilization. The primary partners, for the past 33 years of NCRDS, have been the State geological surveys, which function as the basic scientific information sources for their governments. Data submitted to NCRDS by States or Universities constitute more than two-thirds of USTRAT, a USGS point-source stratigraphic database on coal occurrence. This database provides the geologic basis for resource assessment calculations at federal and State levels. Assistance in other Energy Program research efforts is also provided by State survey geologists through the NCRDS cooperative agreements.

Awards to a State geological survey are through a competitive process via submittal to <http://www.grants.gov>. Although no mandate exists, dollars are matched or in-kind services provided at some level by the States. Data compilation and submittal are continuous, building onto prior years of work, thus multi-year proposals are submitted, but are funded annually based on availability. In 2009, NCRDS supported 26 projects in 23 States. The program is conducted under various authorities, including 30 U.S.C. 208–1, 42 U.S.C. 15801, and 43 U.S.C. 31 *et seq.*

II. Data

OMB Control Number: 1028–New.
Title: National Coal Resources Data System (NCRDS).

Respondent Obligation: Voluntary; necessary to receive benefits.

Frequency of Collection: Annually.

Estimated Annual Number of and Description of Respondents: 30 total State Geological Surveys or Universities are canvassed for a multi-year period.

Estimated Annual Number of Responses: 25.

Estimated Completion Time: 20 hours per response.

Estimated Annual Burden Hours: 750 hours.

Estimated Annual Reporting and Recordkeeping “Hour” Burden: We

estimate the public reporting burden will average 20 hours per response. This includes time to develop project goals, write the statement of work, perform internal proposal reviews, and submit the proposal through grants.gov.

Estimated Annual Reporting and Recordkeeping “Non-Hour Cost”: There are no “non-hour cost” burdens associated with this collection of information.

III. Request for Comments

To comply with the public consultation process, we publish this **Federal Register** notice announcing that we will submit this ICR to OMB for approval.
