SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

The information collection requirements in the Lead in General Industry Standard are designed to reduce occupational lead exposure in general industry. Lead exposure can result in both acute and chronic effects and can be fatal in severe cases of lead toxicity. The standard specifies the following requirements that impose

paperwork burdens on employers: Establishing a compliance program and notifying laundry personnel of lead hazards; instituting programs for exposure monitoring and medical surveillance (including medical examinations); notifying employees of exposure levels, biological monitoring results, the option for multiple physician review; and the restricted availability of chelation; providing information to physicians; obtaining written medical opinions; implementing employee information and training programs; recording medical removals; maintaining and transferring records of exposure monitoring and medical surveillance results, medical removals, and objective data used for the initial exposure monitoring exemption; and making records available to specified parties.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting OMB to extend their approval of the information collection requirements contained in the Lead in General Industry Standard. The Agency proposes to decrease burden hours from 1,242,562 hours to 1,225,255 hours, a total decrease of 17,307 hours. The decrease is primarily due to the reduction in the number of facilities (from 62,357 to 61,405) and exposed employees (from 887,113 to 871,974). There is also a cost reduction as a result of reducing the number of facilities and exposed employees as stated above. Although there is a reduction in the number of facilities and exposed employees, the cost estimate to perform medical surveillance has increased from \$61.50 to \$65.37 and medical examinations have increased from \$210 to \$223, resulting in a total cost increase of \$2,578,340.

Type of Review: Extension of currently approved information collection requirements.

Title: Lead in General Industry Standard (29 CFR 1910.1025).

OMB Number: 1218-0092.

Affected Public: Business or other for-profits; Federal government; State, local and tribal governments.

Number of Respondents: 61,405.

Frequency: On occasion.

Total Responses: 4,219,272.

Average Time per Response: Ranges from 1 minute to notify employees of their right to seek a second medical opinion to 2 hours for an employee to receive a medical examination.

Estimated Total Burden Hours: 1,225,255.

Estimated Cost (Operation and Maintenance): \$143,566,299.
