

Drilled Coalbed Methane Wells with Horizontal Branches in Coal Seams: Breached Surface Articulated Horizontal Borehole (SAHB) Mine Through Plan: (1) Breached SAHB's will be ventilated in accordance with all State and Federal regulations; (2) legs that are open after mining through may have an effective plug installed into the coal rib to prevent an excess of methane into the mined area. An effective plug is any material that impedes the flow of methane and water. Typically, a hydraulic packer is used to plug the hole but cement or grout may be substituted. The hole is plugged when typical face ventilation will not suffice and the potential for methane accumulation exists, usually occurring immediately after cut through; (3) typically, open legs are breached several times during development mining, which allows the segmented hole to be ventilated and eliminates methane storage capacity; (4) should a situation occur where a breached leg continues to produce methane and cannot be ventilated, the hole will be water infused again. Water infusion will take place underground using mine water at standard operating pressure. The hole will remain infused until it is determined that it may be safely bled off and ventilated or it is breached during secondary mining; and (5) when the trunk line of a SAHB has not been severed, a negative pressure surface pump connected to the SAHB may be used to ventilate the hole. The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M-2009-006-C.

Petitioner: Spartan Mining Company, P.O. Box 1120, Holden, West Virginia 25625.

Mine: Road Fork No. 51 Mine, MSHA I.D. No. 46-01544, located in Wyoming County, West Virginia.

Regulation Affected: 30 CFR 75.1700 (Oil and gas wells).

Modification Request: The petitioner requests a modification of the existing standard to permit an alternative method of compliance when: (1) Mining within 75 feet of a horizontal wellbore; (2) when initially mining through a horizontal wellbore; and (3) when subsequently mining through horizontal wellbores, using the specific procedures listed in this petition for modification. The petitioner states that; (1) no person shall be permitted in the area of the mine-through operation except those actually engaged in the operation, company personnel, personnel from MSHA, and personnel from the

appropriate West Virginia agency; (2) the mine-through operation shall be under the direct supervision of a certified official; and (3) prior to mining through the first lateral wellbore of a coalbed methane well and a well which has already had at least one lateral wellbore mined through, Spartan will verify that any water that is present will be bailed from the vertical section of the wellbore, as close to the coal seam elevation as practical, using normal bailing equipment; and (4) the surface wellhead will be maintained opened to bring the vertical section of the wellbore to outside atmosphere pressure. A complete description of the procedures the petitioner will use in implementing its modification can be reviewed at the MSHA address listed in this notice. The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M-2009-007-C.

Petitioner: Black Butte Coal Company, P.O. Box 98, Point of Rocks, Wyoming 82942.

Mine: Black Butte and Leucite Hills Mines, MSHA I.D. No. 48-01180, located in Sweetwater County, Wyoming.

Regulation Affected: 30 CFR 77.1304(a) (Blasting agents; special provisions).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of commercially recycled petroleum-based lubrication oil that is commercially mixed with unused No. 2 fuel oil to create a blasting agent. The petitioner states that the mixed oil is purchased in batches of approximately 8,000 to 10,000 gallons and is not mixed with ammonium nitrate prill until the Ammonium Nitrate-Fuel Oil (ANFO) components are placed in a blasting hole. The petitioner asserts that the proposed alternative method would at all times guarantee no less than the same measure of protection afforded by the existing standard.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

LEGAL SERVICES CORPORATION

Sunshine Act Meeting of the Board of Directors

TIME AND DATE: The Board of Directors of the Legal Services Corporation will

meet on May 26, 2009 via conference call. The meeting will begin at 11 a.m. (EDT), and continue until conclusion of the Board's agenda.

LOCATION: 3333 K Street, NW., Washington, DC 20007, 3rd Floor Conference Room.

STATUS OF MEETING: Open. Directors will participate by telephone conference in such a manner as to enable interested members of the public to hear and identify all persons participating in the meeting. Members of the public may observe the meeting by joining participating staff at the location indicated above.

MATTERS TO BE CONSIDERED: 1. Approval of the agenda.

2. Consider and act on Board of Directors' response to the Inspector General's Semiannual Report to Congress for the period of October 1, 2008 through March 31, 2009.

3. Consider and act on other business.

4. Public comment.

CONTACT PERSON FOR INFORMATION:

Katherine Ward, Executive Assistant to the Vice President for Legal Affairs, at (202) 295-1500.

SPECIAL NEEDS: Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Katherine Ward, at (202) 295-1500.

Dated: May 15, 2009.

Victor M. Fortunato,

Vice President for Legal Affairs, General Counsel & Corporate Secretary.
