## General Information

*A. What Should I Consider as I Prepare My Comments for EPA?*

1. *Submitting CBI.* Do not submit this information to EPA through <http://www.regulations.gov> or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that

includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

**SUPPLEMENTARY INFORMATION:** Under section 108(a) of the Clean Air Act (CAA), the Administrator identifies and lists certain pollutants which “cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare.” The EPA then issues air quality criteria for listed pollutants, which are commonly referred to as “criteria pollutants.” The air quality criteria are to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varying quantities.” Under section 109 of the CAA, EPA establishes National Ambient Air Quality Standards (NAAQS) for each listed pollutant, with the NAAQS based on the air quality criteria. Section 109(d) of the CAA requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to

periodically review and revise the NAAQS, if appropriate, based on the revised criteria.

Air quality criteria have been established for the sulfur oxides (SO<sub>x</sub>) and NAAQS have been established for sulfur dioxide (SO<sub>2</sub>), an indicator for SO<sub>x</sub>. Presently, EPA is reviewing the air quality criteria for SO<sub>x</sub> and the NAAQS for SO<sub>2</sub>. As part of its review of the NAAQS, EPA has prepared an assessment of exposures and characterization of health risks associated with ambient SO<sub>2</sub>. Planned approaches to assessing exposures and characterizing risks were described in the document, *Sulfur Dioxide Health Assessment Plan: Scope and Methods for Exposure and Risk Assessment*. This planning document was released for public review and comment in November 2007 and was the subject of a consultation with the Clean Air Scientific Advisory Committee (CASAC) on December 5 and 6, 2007. Comments received from that consultation were considered in developing the “Risk and Exposure Assessment to Support the Review of the SO<sub>2</sub> Primary National Ambient Air Quality Standards: First Draft,” which was released in July 2008.

The second draft of this document was released in March 2009 and conveys the approach taken to assess exposures to ambient SO<sub>2</sub> and to characterize associated health risks, as well as to present the results of those assessments. In addition, this document also contains a staff policy assessment that considers the evidence presented in the final Integrated Science Assessment and the exposure and risk characterization results presented in this second draft document, as they relate to the adequacy of the current SO<sub>2</sub> NAAQS and any potential alternative primary SO<sub>2</sub> standards. This draft document is available online at: [http://www.epa.gov/ttn/naaqs/standards/so2/s\\_so2\\_cr\\_rea.html](http://www.epa.gov/ttn/naaqs/standards/so2/s_so2_cr_rea.html).

Dated: May 14, 2009.
