

designation reduced the minimum potato size, as determined in the United States Standards for Grades of Potatoes, to $\frac{3}{4}$ inches diameter.

The Committee reported that smaller size potatoes of good quality receive premium prices. While USDA Market News does not report on round type potatoes or on small size, long type potatoes in the Idaho-E. Oregon area, but does report on activity in other regions producing both round types and smaller sizes of potatoes, reports from other areas do show that the higher grade, small size round type potatoes consistently command higher prices than larger potatoes. It would be reasonable to expect price trends between production areas to move together, given that the regions would compete with each other for sales in the domestic market.

Relaxing the size requirement would allow producers and handlers of potatoes under the order to ship a greater percentage of their crop to the fresh market. In addition, shipments of the smaller size potatoes that would be allowed after this change should command higher prices, which would be expected to increase total net returns for those firms who chose to ship. The benefits derived from this rule change are not expected to be disproportionately more or less for small handlers or producers than for larger entities.

Additionally, this rule would allow potato importers to respond to the changing demand of the domestic consumers. The market's increasing preference for small size potatoes applies to imported potatoes as well as domestic potatoes. Thus, importers would benefit by increasing sales to an emerging domestic market segment.

The Committee discussed alternatives to this proposed change. One alternative included making no change at all to the current regulation. The Committee did not believe that maintaining the current requirements would serve to meet the needs of consumers or buyers, and would not ultimately be of any benefit to the industry. Another alternative discussed was to allow smaller size potatoes to continue to be handled exempt from regulation under the special purpose shipment provisions provided within the order. This option was also rejected because it could potentially allow lower quality potatoes to be shipped into the fresh market. Lastly, the Committee considered further relaxing the size requirement for potatoes beyond what is proposed in this rule. The discussion centered on whether to extend the relaxation to U.S. No. 2 grade potatoes as well. The

Committee believed that the proposed relaxation is sufficient to adequately supply the growing market demand for smaller size potatoes while still maintaining high quality standards for such potatoes. After consideration of all the alternatives, the Committee believes that the proposed changes contained herein would provide the greatest amount of benefit to the industry with the least amount of cost.

AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

This rule would not impose any additional reporting or recordkeeping requirements on either small or large potato handlers and importers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. In addition, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this proposed rule.

Further, the Committee's meeting was widely publicized throughout the potato industry, and all interested persons were invited to attend the meeting and participate in Committee deliberations. Like all Committee meetings, the June 9, 2008, meeting was a public meeting and all entities, both large and small, were able to express their views on this issue. Finally, interested persons are invited to submit comments on this proposed rule, including the regulatory and informational impacts of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <http://www.ams.usda.gov/AMSV1.0/ams.fetchTemplateData.do?template=TemplateN&page=MarketingOrdersSmallBusinessGuide>. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

In accordance with section 8e of the Act, the United States Trade Representative has concurred with the issuance of this proposed rule.

A 60-day comment period is provided to allow interested persons to respond to this proposal. All written comments timely received will be considered before a final determination is made on this matter.

SUPPLEMENTARY INFORMATION: On April 16, 2009, FCA published a notice in the

Federal Register seeking public comment on proposed changes to the rules governing director elections for System banks and associations and the related director elections process. See 74 FR 17612. The comment period is scheduled to expire on June 15, 2009. In a letter dated May 1, 2009, the Farm Credit Council, on behalf of System banks and associations, requested that the Agency extend the comment period for another 60 days to allow more time for the boards of directors of System banks and associations to consider the proposed rule and submit their comments. Several System associations submitted separate requests to extend the public comment period for an additional 60 days, noting that they will have only one board meeting at which to consider and discuss the issues before the comment period expires. Due to the wide-ranging effect of the proposed rule on directors, director candidates, nominating committees, and the voting shareholders of System institutions, we have granted this request. The FCA supports public involvement and participation in its regulatory process and invites all interested parties to review and provide comments on our proposed rule.
