SUPPLEMENTARY INFORMATION: The Maryland State Highway Administration (MSHA), who owns and operates this double-leaf bascule drawbridge, has requested a temporary deviation from the current operating regulations set forth in 33 CFR 117.5 and 33 CFR 117.557 to facilitate mechanical repairs.

The Pennington Avenue Bridge, a lift-type drawbridge, has a vertical clearance in the closed position to vessels of 38 feet, above mean high water. Vessels may pass underneath the bridge while the bridge is in the closed position.

Under this temporary deviation, the drawbridge will provide partial openings of the lift spans for vessels. The MSHA will repair a cracked trunnion bearing on the southwest leaf of the lift span. To facilitate repairs, MSHA must immobilize half of the drawbridge spans to single-leaf operation each day, beginning 7 a.m. on July 20, 2009, until 8 p.m. on August 31, 2009. While not under repair, the opposite connecting spans on the north side will continue to open for vessels.

The Coast Guard will inform the users of the waterway through our Local and Broadcast Notices to Mariners of the opening restrictions of the draw span to minimize transiting delays caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.
