II. Background

A. What Action is the Agency Taking?

Pursuant to 40 CFR 155.58(c), this notice announces the availability of EPA's final registration review decision for L-Lactic Acid, case 6062. L-Lactic Acid is a low-toxicity acid that occurs naturally in several foods and is primarily found in fermented milk products. However, L-Lactic Acid also occurs naturally in meats, fruits, tomato juice, beer, wine, molasses, blood and muscles of animals, and in the soil. L-Lactic Acid is registered as a biochemical pesticide used as a mosquito attractant (in traps). In addition, L-Lactic Acid is also used as an antimicrobial disinfectant, indirect food contact surface sanitizer, fungicide, and virucide when applied to hard, non-porous surfaces such as tile, countertops, metal, or glass.

Pursuant to 40 CFR 155.57, a registration review decision is the Agency's determination whether a pesticide meets, or does not meet, the standard for registration in FIFRA. EPA has considered L-Lactic Acid in light of the FIFRA standard for registration. The L-Lactic Acid Final Decision document in the docket describes the Agency's rationale for issuing a registration review final decision for this pesticide.

In addition to the final registration review decision document, the registration review docket for L-Lactic Acid also includes other relevant documents related to the registration review of this case. The proposed registration review decision was posted to the docket and the public was invited to submit any comments or new information. During the 60-day comment period, no public comments were received.

Pursuant to 40 CFR 155.58(c), the registration review case docket for L-Lactic Acid will remain open until all actions required in the final decision have been completed.
