

Information Collection: Evaluation of the Medicare Care Management Performance Demonstration (MCMP) and the Electronic Health Records Demonstration (EHRD); **Use:** The MCMP demonstration was authorized under Section 649 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. This is a three year pay for performance demonstration with physicians to promote the adoption and use of health information technology (HIT) to improve the quality of care for eligible chronically ill Medicare beneficiaries. MCMP targets small to medium sized primary care practices with up to 10 physicians. Practices must provide care to at least 50 Medicare beneficiaries. Physicians will receive payments for meeting or exceeding performance standards for quality of care. They will also receive an additional incentive payment for electronic submission of performance measures via their electronic health record (EHR) system. These payments are in addition to their normal payments for providing service to Medicare beneficiaries. The Office System Survey (OSS) will be used to assess progress of physician practices in implementation and use of EHRs and related HIT functionalities.

The EHR demonstration is authorized under Section 402 of the Medicare Waiver Authority. The goal of this five year pay for performance demonstration is to foster the implementation and adoption of EHRs and HIT in order to improve the quality of care provided by physician practices. The EHRD expands upon the MCMP Demonstration and will test whether performance-based financial incentives (1) increase physician practices' adoption and use of electronic health records (EHRs), and (2) improve the quality of care that practices deliver to chronically ill patients. The EHRD targets small to medium sized primary care practices with up to 20 physicians. Practices must provide care to at least 50 Medicare beneficiaries. Approximately 800 practices will be enrolled in the demonstration across four sites. Practices will be randomly assigned to

a treatment and a control group. The OSS will be used to assess progress of physician practices in implementation and use of EHRs and related HIT functionalities, and to determine incentive payments for treatment practices. In-person and telephone discussions with community partners and physician practices will be used to learn about practices' experiences and strategies in adopting and using EHRs, as well as the factors that help or hinder their efforts. Submission for OMB Review; Comment Request

Title: Supporting Healthy Marriage (SHM) Demonstration and Evaluation Project—Wave 2 Survey

OMB No.: 0970-0339.

Description: The Administration for Children and Families (ACF), U.S. Department of Health and Human Services, is conducting a demonstration and evaluation called the Supporting Healthy Marriage (SHM) Project. SHM is a test of marriage education demonstration programs in eight sites that will enroll about 800 couples per site, with half assigned to participate in the SHM program and the other half assigned to the control group.

SHM is designed to inform program operators and policymakers of the effectiveness of programs designed to help low-income married couples strengthen and maintain healthy marriages and improve outcomes for adults and children.

This notice of information collection is for two activities. One is a second adult survey and new instruments to obtain information from children and youth about 30 months after study entry. The other is for an extension of the period of approval for the first survey and observation instruments used to obtain information from research participants about 12 months after study entry.

The proposed second wave of information collection will involve:

- An adult survey instrument to assess study participants' longer term marital status and stability, quality of relationships, and a range of other measures.
- A survey of focal children of study participants in both the program and control groups who are over 8 years of age (the youth survey).
- A direct child assessment of focal children of study participants in both the program and control groups who are 8 years of age or younger.

Respondents: Low-income married couples and their children in the SHM evaluation research sample.
