

2002–2004 of 5.93% increase to 12.54% for 2005–2007.

The reduction in the earlier years IMR (2002–2004) for Central Harlem made them ineligible for the FY 2009 Healthy Start Eliminating Disparities Open competition. To be eligible, the IMR for the service area had to be 1.5 times the national average for the period of 2002–2004 or 10.35. In FY 2010 there will be another Healthy Start Eliminating Disparities Open competition and grantees will be required to use the most recently available IMR data (2004–2006 or 2005–2007) to compete. To be eligible for the competition, grantees will have to have an IMR that is 1.5 times the national average for the project area for either 2004–2006 or 2005–2007. Data supplied the New York City Bureau Statistics indicates that Central Harlem would be eligible for this competition because they have 12.54% IMR for teen births for 2005–2007.

The award of non-competitive supplemental funding will enable NMPP to provide much need services in Central Harlem. Given the current economic situation and the rising IMR rate in the project area, the loss of this experienced provider of health services would be devastating and would contribute to the rise in infant deaths in Central Harlem. NMPP is the primary provider of comprehensive community-based perinatal services and the only Healthy Start site serving the project area. The project's dedication and commitment to the residents of Harlem since 1999 could not be replaced another community based provider.
