SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary determines that: (1) An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or (2) that the application of such standard to such mine will result in a diminution of safety to the miners in such mine. In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M-2009-013-C.

Petitioner: Wolf Run Mining Company, LLC, RT 3 Box 146, Philippi, West Virginia 26416.

Mine: Sentinel Mine, MSHA I.D. No. 46-04168, located in Barbour County, West Virginia.

Regulation Affected: 30 CFR 75.1101-1(b) (Deluge-type water spray systems).

Modification Request: The petitioner requests a modification of the existing standard to not provide blow-off dust covers on nozzles on deluge type systems. The petitioner states that although more than adequate pressure and flow rates for the deluge system are maintained, in some tests, the dust covers do not come off all sprays. The petitioner proposes to continue its weekly functional testing of the complete deluge-type water spray system. The petitioner further states that dust covers are not necessary because the system will be inspected and maintained weekly. The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded the miners by the existing standard.

Docket Number: M-2009-014-C.

Petitioner: Jim Walter Resources, Inc., P.O. Box 133, Brookwood, Alabama 35444.

Mine: No. 4 Mine, MSHA I.D. No. 01-01247, located in Tuscaloosa County, Alabama.
