

of the remaining databases, and because they are not amenable to automated searching or have more limited automated searching capabilities than others, FDA understands that there may be some overlap across some of the databases and/or some limitation to automated search capabilities. However, as discussed in section IV.A.3. of the concept paper, the majority of names with similarity to the proposed proprietary name can be identified through database searches, and a variety of publicly available databases and resources containing product names can be used to identify similar names. FDA itself uses databases, the Internet, and other printed and electronic drug product resources to search for

orthographic and phonological name similarities. The concept paper recommends that applicants search a variety of sources and, at a minimum, search the publicly available databases listed in Appendix A of the concept paper "Computerized Resources" because these databases are ones that FDA itself uses and considers the information in these references useful screening tools if properly searched. If a name appears in more than one database, it is acceptable to list the name once and list the sources along with the identified name. In addition, in most cases, the computerized resources listed in Appendix A are publicly available, including the Phonetic Orthographic Computer Analysis

(POCA) software (see FDA's notice of availability in the **Federal Register** of February 17, 2009 (74 FR 7450). As part of the pilot program, FDA encourages sponsors to identify any new databases or those databases which are more amenable to automated searching.

FDA estimates the burden of this collection of information in table 1 of this document. The "Hours Per Response" is for all of the submissions and notifications to FDA described previously under paragraphs 1 to 4 in this document, and is based on information provided by industry as well as FDA's familiarity with the time required for this information collection as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN¹

	Number of Respondents	Number of Responses per Respondent	Total Annual Responses	Hours Per Response	Total Hours
Pilot Project Proprietary Name Review	20	1	20	480	9,600

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.
