BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Notice of Offering of Five Alternative Energy Interim Policy Leases for Wind Resource Data Collection on the Outer Continental Shelf Offshore Delaware and New Jersey; Notice of Availability of an Environmental Assessment

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of Lease Offering; Notice of Availability of an Environmental Assessment.

SUMMARY: Notice is given that the MMS will issue five limited leases authorizing wind resource data collection on the Outer Continental Shelf (OCS) offshore New Jersey and Delaware. Five OCS blocks will be leased for a term of 5 years; and the annual rent will be \$3.00 per acre as established in the interim policy published in the **Federal Register** (72 FR 214, pp. 62673-62675) on November 6, 2007. The OCS blocks will be leased subject to the terms set forth in the lease form published in the **Federal Register** (73 FR 77, pp. 21363-21375) on April 21, 2008, and also subject to stipulations. The MMS will issue leases for four OCS blocks off the coast of New Jersey and one off the coast of Delaware to four companies: Bluewater Wind Delaware, LLC; Bluewater Wind New Jersey Energy LLC; Fishermen's Energy of New Jersey, LLC, and Deepwater Wind, LLC. The OCS blocks off the coast of New Jersey are Wilmington NJ 18-02 Block 6936 to Bluewater Wind New Jersey Energy, LLC; Wilmington NJ 18-02 Block 6931 to Fishermen's Energy of New Jersey, LLC; Wilmington NJ 18-02 Block 6738 and Wilmington NJ 18-02 Block 7033 to Deepwater Wind, LLC. The OCS block MMS will lease off the coast of Delaware is Salisbury NJ 18-05 Block 6325 to Bluewater Wind Delaware, LLC.

The MMS is also giving notice that MMS is making available to the public an environmental assessment (EA) that addresses the issue of whether offering of leases off the coasts of New Jersey and Delaware would have a significant effect on the human environment and whether an environmental impact statement (EIS) must be prepared pursuant to the National Environmental Policy Act of 1969 (NEPA), as amended, 42 U.S.C. 4321 *et seq.* Based on the environmental review set forth in the EA, the MMS has determined that no significant effects on the human environment have been identified that would result from the issuance of leases for wind resource data collection on the

OCS off the coasts of New Jersey and Delaware. Therefore, MMS concluded that an EIS was not required under the NEPA and prepared a Finding of No Significant Impact (FONSI). The MMS is making available the FONSI and the decision memorandum approving the selection of the preferred alternative on the MMS Web site provided at the time of this notice.

SUPPLEMENTARY INFORMATION:

Background. Section 388 of the Energy Policy Act of 2005 (EPAct) gave the Secretary of the Department of the Interior (DOI) the authority to issue leases, easements and rights-of-way on the OCS for alternative energy activities. In a Request for Information and Nominations published on November 6, 2007, in the **Federal Register** (72 FR 214, pp. 62673-62675) the MMS announced that it had established an interim policy under which it would issue limited leases authorizing alternative energy resource assessment data collection and technology testing activities on the OCS and that it was accepting requests for limited leases to conduct such activities. Limited leases issued under the interim policy for energy resource assessment data collection and technology testing activities have a term of 5 years, and do not authorize the production or transmission of energy. Subsequently, MMS received more than 40 nominations proposing areas for limited leases on the OCS off the Pacific and Atlantic Coasts. The MMS reviewed in detail all nominations received and established priority areas for initial leasing based on considerations such as technological complexity, geographical balance, timing needs, competing space-use issues, and relevant State-supported renewable energy activities and initiatives. The MMS also took into consideration the importance of supporting the advancement of activities relating to the development of each of the renewable energy resource types cited in the nominations—wind, current, and wave. In April 2008, MMS identified a subset of 16 proposed lease areas for priority consideration, including 7 areas offshore Delaware and New Jersey, and provided public notice of those areas in the **Federal Register** (73 FR 76, pp. 21152-21155) in which it sought other project proposals for those areas for the purpose of determining competitive interest as required by the EPAct. No competing nominations were received for any of the areas offshore Delaware and New Jersey, allowing the MMS to proceed with the issuance of the leases noncompetitively and the required
