

be given 30 days to apply. The SGA will provide a description of the projects, proposed scope of work and performance periods, eligibility requirements and the dollar amounts of the awards, and the estimated number of grants to be awarded. The SGA also will describe what is required in the grant application, the closing date for receipt of the applications, any special reporting requirements, and the rating criteria that will be used in reviewing grant applications. The SGA will provide all of the necessary information for interested parties to participate in this competitive grant process.

B. Award

Grant applications submitted in response to the SGA will be reviewed by a technical panel for consistency with the SGA requirements. Awards are subject to availability of funds and evaluation of the applicant's technical proposal. Funding decisions are made at the discretion of the Assistant Secretary of Labor for Mine Safety and Health.

A technical panel will advise the Grant Officer during the review and rating process. Panel members will be selected based on their knowledge of the subject matter. Each panel member will perform an independent evaluation of the application based solely upon the criteria announced in the SGA.

After the review, the Grant Officer may ask an applicant to provide supplemental information that may be necessary to clarify issues within the application. Negotiations are not a guarantee of funding.

Once selections are made, awardees are notified. If the applicant accepts the terms and conditions outlined in the award package, the Grant Officer will execute the grant award and funds will be allocated.

C. Post-Award Process

MSHA anticipates that it will meet with all successful applicants before the grants are started. MSHA will provide this meeting information in the award package.

The selected applicant must submit financial and activity reports on a quarterly basis, beginning ninety days from the award of the grant. MSHA will work with the grantee to establish report contents, which, among other things, will include performance measures to encourage continuous improvement. The report must be submitted within 30 days after the close of the quarter.

D. Completion of the Grant

After completion of the grant, the grantee must complete a Final Project Report, which will include an

assessment of project performance and outcomes achieved. MSHA also will arrange for an independent evaluation of each funded project. All grantees must agree to cooperate with this evaluation and must make records available for all project activities.

VI. Special Procedures for Applying

MSHA will be accepting grant applications through the Grants.gov Web site only. A downloadable application package for the Brookwood-Sago grant program will be available through this Web site.

In order for interested parties to participate, they must have a Dun and Bradstreet number (DUNS) and must register with the Grants.gov Web site.

A. Dun and Bradstreet Number

Since October 1, 2003, all applicants for Federal grant funding opportunities are required to include a DUNS number with their application. The DUNS number is a nine-digit identification number that identifies business entities uniquely. There is no charge for obtaining a DUNS number. To obtain a DUNS number, call 1-866-705-5711 or access the following Web site: <http://dnb.com/us/>.

B. Grants.gov Site Registration

Applicants must register on the Grants.gov Web site at http://www.grants.gov/applicants/get_registered.jsp. Details regarding registration are outlined in the Grants.gov 3-Step Registration Guide at <http://www.grants.gov/section910/Grants.govRegistrationBrochure.pdf>.

Please note that the registration process may take three to five business days to complete, and an interested party must have completed all registration steps to submit an application via Grants.gov.

Authority: 30 U.S.C. 965.
