

trip if two statistical areas are sampled on the same trip.

Also under the NEFSC Groundfish project, Georges Bank (GB) haddock maturity and fecundity data would be collected. NEFSC is requesting an EFP to collect one tote of undersized haddock for sampling. The vessels would deliver up to five totes of fish (600 lb, 272.16 kg), four of which would contain legal sized fish, and one of which would contain undersized fish. The fish would be whole and iced. The total amount of GB haddock that would be authorized under this EFP would not exceed 1,300 lb (589.67 kg). NEFSC staff would meet the captain at the dock to collect the fish. None of the fish would be sold into the food market.

For the GMRI Monkfish project, fishermen would report their entire catch, kept and discarded, on one trip every 2 weeks during the 8 month study period, for a total of between 160 and 200 Days At Sea (DAS). The project would require the biological sampling EFP to allow fishermen to retain the entire monkfish catch on the last tow for two trips per month for 8 months on five vessels, resulting in 80 separate samples, not to exceed 550 lb (249.48 kg) of monkfish per sample. Each sample would be delivered to a GMRI sampler who would separate legal and undersized fish, weigh each portion and sub-sample for length frequencies and other biological information. Legal sized fish would be allowed to be sold by the vessel, but undersized fish would be retained by GMRI. It is estimated that the amount of undersized fish for the 80 samples would not exceed 4,800 lb (2,177.24 kg).

The applicant may make requests to NMFS for minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted by NMFS without further notice if they are deemed essential to facilitate completion of the proposed research and result in only a minimal change in the scope or impact of the initially approved EFP request. In accordance with NOAA Administrative Order 216-6, a Categorical Exclusion or other appropriate NEPA document would be completed prior to the issuance of the EFP. Further review and consultation may be necessary before a final determination is made to issue the EFP. After publication of this document in the **Federal Register**, the EFP, if approved, may become effective following a 15-day public comment period.

SUPPLEMENTARY INFORMATION:

On March 31, 2009, the National Institute of Standards and Technology's (NIST) Technology Innovation Program (TIP) announced that it was soliciting high-risk, high reward research and development proposals for financial assistance (74 FR 14523). The due date for submission of all proposals was 3 p.m. Eastern Time, Tuesday, June 23, 2009. Due to technical difficulties some proposers were unable to submit their proposals electronically on Tuesday, June 23, 2009. In order to provide all interested parties the opportunity to submit a proposal for TIP, NIST is extending the solicitation period until 3 p.m. Eastern Time, Tuesday, July 7, 2009. Electronic proposals received between 3 p.m. and 11:59 p.m. Eastern Time on June 23, 2009 will be deemed timely and given full consideration. Paper proposals received between 3 p.m. Eastern Time on Tuesday, June 23, 2009 and July 2, 2009 will be deemed timely and given full consideration. During the extended solicitation period, NIST will accept only paper submissions. Proposers who attempted to submit electronic proposals but were unsuccessful are encouraged to resubmit their proposals by paper. Paper submissions must be received by 3 p.m. Eastern Time, July 7, 2009. Please note that for paper submissions the Program requires one original and fifteen (15) copies of the proposal.

The proposal submission deadline applies to any mode of paper proposal delivery, including hand-delivery, courier, and express mailing, but not facsimile. Proposals submitted via facsimile will not be accepted. NIST will not make any allowances for late submissions. All TIP competition requirements and information announced in the March 31, 2009, **Federal Register** notice and in the Tuesday, May 19, 2009 **Federal Register** notice amendment (74 FR 23396) apply to proposals submitted during the extended time period with the exception of the review, selection, and award processing time that is now expected to be completed by late
