Title: NESHAP for Municipal Solid Waste Landfills (Renewal).

ICR Numbers: EPA ICR Number 1938.04, OMB Control Number 2060-0505.

ICR Status: This ICR is scheduled to expire on August 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Municipal Solid Waste (MSW) Landfills were proposed on November 7, 2000, and promulgated on January 16, 2003. These standards apply to each existing and new municipal solid waste (MSW) landfills. This subpart applies to: An MSW landfill that has accepted waste since November 8, 1987, or has additional capacity for waste deposition; a major source, collocated with a major source; and an area source landfill with a design capacity equal to or greater than 2.5 million megagrams (Mg) and 2.5 million cubic meters (m³) and has estimated uncontrolled emissions equal to or greater than 50 megagrams per year (Mg/yr) of nonmethane organic compounds (NMOC); or an MSW landfill that has additional capacity for waste deposition, that includes a bioreactor and is not permanently closed as of January 16, 2003.

Owners or operators of the affected facilities would be required to submit semiannual compliance reports for control device operating parameters, prepare a startup, shutdown, and malfunction (SSM) plan, and prepare semiannual SSM reports.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements and retain the file for at least five years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average five hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information either to or for a Federal agency. This includes the time needed to review instructions, develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of each municipal solid waste landfill.

Estimated Number of Respondents: 1,121.

Frequency of Response: On occasion, annually and semiannually.

Estimated Total Annual Hour Burden: 18,234.

Estimated Total Annual Cost: \$1,489,039, which includes \$1,472,039 in labor costs, \$17,000 in operation and maintenance (O&M) costs, and no capital/startup costs.

Changes in the Estimates: There is no change in the labor hours in this ICR as compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or nonexistent, so there is no significant change in the overall burden. It should be noted that there is a change in the labor cost compared to the previous ICR. The change is due to a minor calculation error. This ICR reflects the correction and updates the labor cost figure.

The capital/startup costs are not included because this NESHAP does not require MSW landfills to purchase or operate additional control equipment or monitoring devices.

Dated: July 2, 2009.

John Moses,

Director, Collection Strategies Division.
