#### **SUPPLEMENTARY INFORMATION:**

##### **I. General Information**

The U.S. Environmental Protection Agency plans to create a Privacy Act system of records to centralize, standardize and safeguard the information submitted by experts who support three scientific and technical advisory committees (i.e., the Science Advisory Board, the Clean Air Scientific Advisory Committee, and the Advisory Council on Clean Air Compliance Analysis) that report to EPA's Administrator. The SAB Staff Office: (1) Requests nominations from the public for qualified individuals to serve as experts on committees and panels that advise the Administrator; (2) identifies experts to become Special Government Employees (SGEs) to serve on the advisory committees and panels; (3) manages the SGEs' personnel paperwork and ensures that SGEs comply with ethics training and financial disclosure requirements of the Ethics in Government Act, 5 U.S.C. App. 4; and (4) coordinates experts' participation in approximately fifty advisory projects per year and approximately eighty meetings per year. The SAB Staff Office conducts these activities to provide the Administrator with scientific advice from balanced committees of qualified experts on high priority science issues.

To manage the above activities in an efficient manner that protects the privacy of the scientific experts, the SAB Staff Office has integrated personal information provided by the experts in a central SAB Database. Consolidating information about individual experts in a central location allows for consistent procedures to be followed for protecting privacy-related information necessary to manage and support the advisory committees for which the SAB Staff Office is responsible.

Records in the SAB Database of Scientific and Technical Experts are safeguarded from unauthorized use. Only SAB Staff Office personnel and a very limited number of database support contractors have access to consolidated personal information in the password-protected SAB databases. Some generally available information such as experts' institutional affiliation and biographical sketches are accessible via the EPA SAB Web site (<http://www.epa.gov/sab>). Security procedures have been approved through the Application Development Process administered by EPA's Office of Environmental Information.

The system is maintained at the U.S. EPA, 1025 F Street, NW., Suite 3600, Mail Code 1400F, Washington, DC 20004.

Dated: June 22, 2009.
