Finding of No Significant Impact for Little Sandy Trail Creek Watershed Structure No. 1; Madison County, Georgia, July 3, 2009

Introduction

The Little Sandy Trail Creek Watershed is a federally assisted action authorized for planning under Public Law 106-472, the Watershed Rehabilitation Act, which amends Public Law 83-566, the Watershed Protection and Flood Prevention Act. An environmental assessment was undertaken in conjunction with development of the watershed plan. This assessment was conducted in consultation with local, State, and Federal agencies as well as with interested organizations and individuals. Data developed during the assessment are available for public review at the following location: U.S. Department of Agriculture, Natural Resources Conservation Service, 355 East Hancock Avenue, Athens, Georgia 30601.

Recommended Action

This document describes a plan for upgrading an existing floodwater retarding structure, Little Sandy Trail Creek Watershed Structure No. 1, to meet current dam safety criteria in Georgia. The plan calls for the modification of the existing vegetative auxiliary spillway, enlarging the principal spillway and raising the top of the dam on an existing dam. Works of improvement will be accomplished by providing financial and technical assistance through an eligible local sponsor.

The Principal Project Measures are to:

1. Modifying the existing vegetative auxiliary spillway, enlarging the principal spillway and raising the top of the dam. This construction is designed to bring the existing dam into compliance with current dam safety criteria in Georgia.

2. The measures will be planned and installed by developing a contract with the current operator of the dam.

Effects of Recommended Action

Modifying the existing vegetative auxiliary spillway, enlarging the principal spillway and raising the top of

the dam will bring Little Sandy Trail Creek Watershed Structure No. 1 into compliance with current dam safety criteria. This will essentially eliminate the risk to loss of life for individuals in 6 homes and 10 roads downstream. Additional effects will include continued protection against flooding, continued water quality benefits, continued fishing activities, continued recreational opportunities, protected land values, protected road and utility networks, and reduced maintenance costs for public infrastructure.

Wildlife habitat will not be disturbed during installation activities. No wetlands, wildlife habitat, fisheries, prime farmland, or cultural resources will be destroyed or threatened by this project. Some 30 acres of wetland and wetland type wildlife habitat will be preserved. Fishery habitats will also be maintained.

No endangered or threatened plant or animal species will be adversely affected by the project.

There are no wilderness areas in the watershed.

Alternatives

Six alternative plans of action were considered in project planning. No significant adverse environmental impacts are anticipated from installation of the selected alternative. Also, the planned action is the most practical, complete, and acceptable means of protecting life and property of downstream residents.

Consultation—Public Participation

Original sponsoring organizations include the Georgia Soil and Water Conservation Commission, Broad River Soil and Water Conservation District and Madison County. At the initiation of the planning process, meetings were held with representatives of the original sponsoring organizations to ascertain their interest and concerns regarding the Little Sandy Trail Creek Watershed. The Georgia Soil and Water Conservation Commission agreed to serve as "lead sponsor" being responsible for leading the planning process with assistance from NRCS. As lead sponsor they also agreed to provide non-federal cost-share, property rights, operation and maintenance, and public participation during, and beyond, the planning process.

An Interdisciplinary Planning Team provided for the "technical" administration of this project. Technical administration includes tasks pursuant to the NRCS nine-step planning process, and planning procedures outlined in the NRCS-National Planning Procedures Handbook. Examples of tasks completed
