Nanomaterial Case Studies: Nanoscale Titanium Dioxide in Water Treatment and Topical Sunscreen

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Public Comment Period.

SUMMARY: EPA is announcing a 45-day public comment period for the draft document titled, "Nanomaterial Case Studies: Nanoscale Titanium Dioxide in Water Treatment and Topical Sunscreen" (EPA/600/R-09/057). The document was prepared by the National Center for Environmental Assessment within EPA's Office of Research and Development. The case studies focus on two different applications of nanoscale titanium dioxide, water treatment and topical sunscreen. The document is intended to serve as a foundation for creating a long-term research strategy to provide the information needed for comprehensive environmental assessments of selected nanomaterials. It does not attempt to draw conclusions regarding potential environmental risks

of nanoscale titanium dioxide, but only to identify what is known and what needs to be known to support future assessment efforts.

EPA is releasing this draft document solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. This document has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination. When finalizing the draft document, EPA intends to consider any public comments that EPA receives in accordance with this notice.

DATES: The 45-day public comment period begins July 31, 2009, and ends September 14, 2009. Technical comments should be in writing and must be received by EPA by September 14, 2009.

ADDRESSES: The draft "Nanomaterial Case Studies: Nanoscale Titanium Dioxide in Water Treatment and Topical Sunscreen" is available primarily via the Internet on the National Center for Environmental Assessment's home page under the Recent Additions and the Data and Publications menus at <http://www.epa.gov/ncea>. SUPPLEMENTARY INFORMATION:

I. Information About the Project/ Document

Engineered nanoscale materials (*nanomaterials*) are conventionally defined as having at least one

dimension between 1 and 100 nanometers (nm) and unique properties that arise from their small size. Like all technological developments, nanomaterials offer the potential for both benefits and risks. The assessment of such risks and benefits requires information, but given the nascent state of nanotechnology, much remains to be learned about the characteristics and effects of nanomaterials before such assessments can be completed. The draft document, "Nanomaterial Case Studies: Nanoscale Titanium Dioxide in Water Treatment and Topical Sunscreen," is a starting point to identify what is known and, more importantly, what *needs* to be known about selected nanomaterial applications—in this case, for nanoscale titanium dioxide (*nano-TiO₂*)—to assess their potential ecological and health implications. The complex properties of various nanomaterials make evaluating them in the abstract or with generalizations difficult if not impossible. Thus, this document focuses on two specific uses of *nano-TiO₂*, as a drinking water treatment and as topical sunscreen. These "case studies" do *not* represent completed or even preliminary assessments; rather, they present the structure for identifying and prioritizing research needed to support future assessments. The case studies follow the comprehensive environmental assessment (CEA) approach, which combines a product life-cycle framework with the risk assessment paradigm. In essence, risk assessment relates exposure and effects information for a given substance or stressor, and CEA expands on this paradigm by including life-cycle stages and considering both indirect and direct ramifications of a substance or stressor.

In this document, the Commission provides notice that those information collections have been approved by OMB and are effective immediately.

An agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number, and no person is required to respond to a collection of information unless it displays a currently valid OMB control number. Comments concerning the accuracy of the burden estimate(s) and any suggestions for reducing the burden should be directed to the person listed in the "FOR FURTHER INFORMATION CONTACT" section below.

FOR FURTHER INFORMATION CONTACT: Leslie Haney, Leslie.Haney@fcc.gov, (202) 418-1002.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1126.
OMB Approval Date: July 22, 2009.
Expiration Date: July 31, 2012.

Title: Section 10.350, Testing Requirements for the Commercial Mobile Alert System (CMAS)

Form No.: Not applicable.

Estimated Annual Burden: 1,752 responses; 2.5 seconds per response; 2 hours annual total.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), and (o), 201, 303(r), 403 and 606 of the Communications Act of 1934, as amended; as well as by sections 602(a), (b), (c), and (f), 603, 604, and 606 of the WARN Act.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: The Commission requested OMB approval of a new information collection in order to obtain the full three-year clearance from them. The Commission's estimates for public burden are described above.

As required by the Warning, Alert, and Response Network (WARN) Act, Public Law 109-347, the Federal Communications Commission adopted final rules to establish a Commercial Mobile Alert System (CMAS), under which the Commercial Mobile Service (CMS) providers may elect to transmit emergency alerts to the public, see *Second Report and Order and Further Notice of Proposed Rulemaking*, FCC 08-164, 23 FCC Rcd. In order to ensure that the CMAS operates efficiently and effectively, the Commission requires participating CMS providers to receive required monthly test messages initiated by the Federal Alert Gateway Administrator, to test their infrastructure and internal CMAS delivery systems by distributing the monthly message to their CMAS coverage area, and to log the results of the tests. The Commission also requires periodic testing of the interface between the Federal Alert Gateway and each CMS Provider Gateway to ensure the availability and viability of both gateway functions. The CMS Provider Gateways must send an acknowledgement to the Federal Alert Gateway upon receipt of these interface test messages.

The Commission, the Federal Alert Gateway and participating CMS providers will use this information to ensure the continued functioning of the CMAS, thus complying with the WARN Act and the Commission's obligation to promote the safety of life and property through the use of wire and radio communications.

Federal Communications Commission.
